PREFACE

Dear Classmates:

I hope you will find as much interest and pleasure in reading the following annals of yourselves as I have found in editing them. They show that none of us has become great (except perhaps around the waistband), but we are young yet, and the foundations in many cases are evidently being solidly laid. Yet if we count no giants among us, still we are by no means a race of pygmies. We have tackled (between us) almost every conceivable kind of work, and between the modest lines you can often read genuine achievement. Most gratifying, we have not one single name to be ashamed of; every man has made a living creditably, and, as you will note, is in the majority of cases also supporting a wife and family. All this is what we should expect of 1903. We have done something for Harvard by living the lives of useful citizens. In the next decade we shall hope that our growing influence, separate and collective, will be applied more directly in her aid.

If this report shall help to reawaken the ties of college days, to increase our interest in each other, and perhaps result in creating or strengthening business and social friendships, it will have served its chief purpose.

I wish to express my appreciation of the way in which most of the men have responded. A recalcitrant minority have done what they could to make life hard for the editors, but in spite of their efforts most of them have been unearthed. The number of "lost men" is larger than it should be. Help find them!

The Harvard Alumni Association, under the auspices of which the report is brought out, deserves our thanks for the thorough, efficient and interested work which it has done.

SEXENNIAL REUNION

The two hundred and thirty men who returned for the Sexennial in September, 1909, all seemed to have a very good time. About seventy turned up for the Yale baseball game, and about one hundred and twenty-five at Class Day. Each member of the class was armed with a green balloon on entering the Stadium, and after a cheer for the ladies these were freed all together and rose amid great applause. The day at J. D. Clark's farm was an unqualified success, enough unexpected and novel amusements being offered to keep every one constantly entertained. G. B. Perry and G. D. Boardman, disguised as ladies, made their appearance in a canoe while the crowd were bathing in careless freedom (and nothing else), and were promptly capsized. Kernan in the "fox hunt" was later proved by Child to be only a mug-hunter. A. R. Little gave a splendid equestrian exhibition at broken intervals on the rear quarters of a donkey. In climbing the greased pole Sugden distanced all competitors except Angle, whose performance, however, was suspected of being crooked. The day at Cohasset and Nantasket with 1906 was also most enjoyable. 1903 won the baseball game by the score of 10 to 6. Both classes returned to Boston together on a specially chartered steamer. The Class Dinner at the American House was a very uproarious affair, owing largely to the zeal of about a dozen cocktail-mixers, recruited from the Class. R. W. Child made a witty speech on "Dogs, and their Relation to Various Members of the Class," and L. Warner read an excellent toast to the class. It was voted by acclamation to present J. D. Clark with a loving-cup as a slight return for his hospitality, and J. D. Clark, Jr., the Class Boy, was elected an honorary member of the Class. The usual luncheon was held in Holworthy 7 on Commencement. A number of men went to New London to the races.

RECORDS OF THE CLASS

EDWIN HALE ABBOT, JR.

Born	<i>Milwaukee, Wis., March 5, 1881.</i>
Parents	<i>Edwin Hale, Martha Trask (Steele) Abbot.</i>
School	<i>Browne and Nichols School, Cambridge, Mass.</i>
Years in College	<i>1899-1904.</i>

Unmarried	
Business	<i>Lawyer.</i>
Address	<i>(home) 1 Follen St., Cambridge, Mass.</i> <i>(business) 340 Tremont Building, Boston, Mass.</i>

Though I received my degree in 1904, it was given to me "as of" 1903. During the years 1905 to 1907 I was in the Harvard Law School, serving in the two latter years on the Harvard Law Review. In 1908 I did graduate work in the Law School, receiving an A.M. in Law. In October, 1908, I went into the office of Hemenway, Barnes and Farley, in Boston. In December, 1911, I became special assistant United States attorney in connection with the prosecution of the United Shoe Machinery Company and certain of its officers under the Sherman Act. In September, 1912, I formed a law partnership with James W. Spring with offices at my present address. That I think brings the epitaph down to date. Thus far I have admired but not followed the example of many of the class in getting married, save to the law. Moreover my situation is not wholly desolate. I find my wife (hereinafter called Lex) a charming companion for at least eight hours a day. But she does not insist that I spend the evening with her except occasionally. If I come in just as the cuckoo clock strikes two (A.M.) I don't have to cuckoo ten or more times just to keep up appearances. Lex is quite as inscrutable as any lady. No mere man can hope to understand her wholly. This lends variety and uncertainty. Her clothes are extremely durable, being generally buckram or sheepskin. Nor does she follow every whim of fashion. Finally, in the matter of unreasonableness the most unreasonable of spouses

Address *687 Boylston St., Boston, Mass.*

CLASS OF 1903 — THIRD REPORT

After graduating from college and having spent one year in the Medical School, I attended the American School of Osteopathy at Kirksville, Mo. After graduating from there I returned to Boston and attended the Harvard Medical School two more years, since which time I have practised in Boston. Member: Boston Athletic Association, Harvard Club of Boston, First Corps of Cadets, Masons.

JOHN MEAD ADAMS

Born	<i>Reading, Mass., June 6, 1882.</i>
Parents	<i>Frank Stone, Anna Eliza Adams.</i>
School	<i>High School, Reading, Mass.</i>
Years in College	<i>1899-1903.</i>
Degrees	<i>A.B., 1903; A.M., 1905; Ph.D., 1907.</i>
Married	<i>Edna May Roberts, Reading, Mass., Sept. 6, 1907 (died April 5, 1913).</i>
Children	<i>Mary, Jan. 6, 1909 (died Jan. 6, 1909).</i>
Business	<i>Teacher.</i>
Address	<i>(home) 110 Earl St., Kingston, Ontario. (business) Queen's University, Kingston, Ontario.</i>

For four years after graduation I studied at Harvard in the Graduate School, and during most of that time had a teaching appointment at Harvard. After my marriage in the fall of 1907 we lived in Cambridge for a year, and I taught at Simmons College, Boston, as well as at Harvard. The following year we travelled abroad, spending some time at Leipsie and at Cambridge, England. On our return I had an opportunity to teach in Occidental College, Los Angeles, and we remained there three years (1909-1912). Last summer I resigned to accept an appointment in the scientific school connected with Queen's University, Kingston, Ontario. Queen's is strikingly different from American universities, being a close copy of the Scotch universities. It is also distinguished by having the shortest term on the Continent,—seven months. This circumstance is favorable to the management of summer tours in Europe, which has been my vacation side line for several years. Member: American Physiological Society.

PHILIP ADAMS

Born	<i>Honolulu, Hawaiian Islands, June 26, 1881.</i>
Parents	<i>Edward Payson, Ellen Germain (Fisher) Adams.</i>
School	<i>Cambridge Latin School, Cambridge, Mass.</i>
Years in College	<i>1899-1903.</i>
Degrees	<i>A.B., 1903.</i>
Unmarried	
Business	<i>Artist.</i>
Address	<i>(home) 51 Brattle St., Cambridge, Mass.</i> <i>(business) Studio at 100 Chestnut St., Boston, Mass.</i>

Brothers of 1903: I was born at Honolulu on June 26, 1881, at about 5 p.m., just in time for afternoon tea. I recall very little about my infancy; it all seems so hazy. Perhaps it would be better to march on to the scene of our graduating exercises at Sanders Theatre. Among the exercised were Dick Child, letting off those funny cracks he'd been hoarding up anxiously for months, Langdon Warner "poeting" aloud and Jim Field blessing the unrenowned. One and all of us were looking forward into the future and wondering, "What will we be in ten years' time?" Ten years was an eternity then; the advent of 1913 seemed as remote an event as one's own decease. The first two years of the ten I spent in teaching. My position was instructor in English at the University of Wisconsin, and my salary was large enough to keep a canary alive (if it was careful and Fletcherized every seed). In the summer of 1905 I hopped off the perch and found myself in Washington, D. C. I aspired to the office of vice-consul and student interpreter at a Japanese port, a post which I failed to secure through a miscarriage of justice. In the nick of time it transpired that I was blissfully ignorant of the Japanese tongue! A fortunate catastrophe! for through the agency of the Harvard Bureau of Appointments I was enabled to secure a tutoring position, which gave me a rare opportunity of foreign travel, and made it possible for me to take up my present profession, in which I find the greatest happiness.

CLASS OF 1903 — THIRD REPORT

I have always had intimations of what this occupation would be, even when I could not see my way clear to entering upon it. In the summer of 1904 I had returned to Cambridge to take Dr. Ross's course in drawing and painting. Then in 1906 I studied for a summer in the Students' Art League in New York. The fall of that year was the time of my departure for a "bear-leading" trip around the world. I had previously been abroad for a summer during college, but this later tour, which extended over three years and took me to Hawaii, Japan, China, the Malay States, Burma, India, and most of the European countries, was an unusual and glorious experience. On arriving home in the fall of 1909, I entered the Museum Art School in Boston, spent three years in study there, and since June, 1912, have been "on my own," as a portrait painter and landscape artist. I am in partial possession of a delightful studio at 100 Chestnut Street, Boston, the other occupant being a bat, with whom I am on excellent terms. Such is my life history up to date,—the history of the unrenowned, the whole spiel.

In July, 1903, my education began. My one ambition in life is to know as much as my five-year-old thinks I do. My one consolation is that "While there's life, there's hope." But I find that even now my education has only just begun.

RECORDS OF THE CLASS

After graduating I took a summer's vacation and started to work in the fall of 1903. My first job was as clerk in the auditing department of the Chicago, Cincinnati and Louisville Railroad Company at Richmond, Ind. At the end of six months, when the offices of the road were moved to Cincinnati, I was able to take the job of private secretary to the president, which I held until the summer of 1905, when the road was sold. The following winter I went into the New York office of George A. Fernald and Company, bankers and bond dealers, whose headquarters were in Boston. Early the next winter I became manager of the office, and held that position until the summer of 1910. I then returned to Boston to become interested with my classmate, Philip C. Stanwood, in the reorganization of a roofing slate quarrying company. March 1, 1911, I became president of the Eagle Slate Company and general manager of the Mathews Slate Company, which positions I now hold. Member: Harvard Club of New York.

Having had from an early age a belief that law was the profession for which I was best fitted both by capacity and taste, upon graduating I went to the Harvard Law School. There with the shining intellectual lights of our class I worked for three hard years. That was a long, long time ago, and my memory of it is rather dim, though I can clearly recall a desire to get an A, which I didn't, a continual fear of being called on (a barbarous childish custom which we didn't have in college), and playing polo and leading a generally gay life in the summers. On graduating I went into the law office of Long and Hemenway in Boston, later to become

CLASS OF 1903 — THIRD REPORT

Hemenway, Barnes and Farley, Farley being the John Wells Farley who coached the football team our senior year and whose kindness led me into that particular office. Looking back, I guess I was about as willing a combination of office boy (we had a regular office boy) and case reader as ever went into an office. I settled down with full assurance I was going to be a great lawyer. One, two, three years passed in hard, steady work, and I could see moderate success ahead, and then little by little it began to dawn on me that I wasn't in the right job. It didn't come all of a jump. I fought against it, but slowly the idea won out. Not being married, I can't state from experience, but I imagine it was just the way it has been with some of you married fellows who have slowly awakened to the fact you married the wrong girl. I had had another love too when I was younger and untainted by the desire of worldly riches and success, and she had come back to my mind again. That was painting. I tried to work them along together, but the law, who in truth is a jealous mistress, would have nothing of it. So I just slowly got divorced, and about three years ago made the break and undertook to become an artist. Some day, if I can compete with Billy James and Phil Adams, I hope to get a chance to paint the likenesses of some of you mercenarily industrious people when you get sufficiently famous and have made enough money to spend some of it on such useless things as portraits. The only office of honor which I have held (and which I now hold) is that of godfather to a number of my friends' children, both girls and boys. Member: Myopia Hunt Club, Tennis and Racquet Club, Annisquam Yacht Club.

Unmarried	
Business	<i>Minister.</i>
Address	<i>7 Church St., Belfast, Me.</i>

RECORDS OF THE CLASS

The two years succeeding graduation I tutored in a family at Youngstown, Ohio. In 1905 I returned to Cambridge and entered the Harvard Divinity School. After graduating from the School in 1908, I became assistant minister in the First Congregational Society (Unitarian) of Quincy, Mass. In 1911 I resigned from that position, and became minister of the First Parish (Unitarian) in Belfast, Maine. Thus runs the chronicle of ten years: in spite of the events of work and play that make the narrative pleasant and the years good, I leave the space to those who can tell stories of interest. Member: New England Botanical Club.

Address	<i>(home) University Club, Portland, Ore. (business) Beck Building, Broadway and Oak St., Portland, Ore. (permanent) U. S. Forest Service, Portland, Ore.</i>

In July, 1903, I entered the office of Adams and Company, bankers, Boston, where I worked about one year. In the summer of 1904 I entered the first-year class of the Yale forest school, and in 1906 was graduated with the degree of M.F. In July, 1906, I received an appointment as forest assistant in the United States forest service, and was assigned to timber sale work in Arizona, where I remained until December of that year. After a three months' detail in Washington, D. C., I was sent as inspector to the Northwest District, with headquarters at Portland, Ore., where I did general inspection work on the national forests until 1908. The service being reorganized in that year, I was placed in charge of the office of silviculture, including the timber sale, planting and investigative work in District VI (Oregon,

I finished my college course in three years, but received my degree with the class in June, 1903. From June, 1902, to December, 1908, I was on the road as a travelling special salesman and supervisor of salesmen for a Boston specialty house. In December, 1908, I joined the bond department of Lee, Higginson and Company. In January, 1909, I became their representative in Connecticut, with headquarters in Hartford, where I have been ever since. Member: University Club of Hartford, Hartford Golf Club.

Address	<i>(home) 56 Barrington St., Rochester, N. Y. (business) 1050 University Ave., Rochester, N. Y.</i>

Immediately upon receiving my degree I went for a three months' European tour with William MacLeod, 1905. I look back with great pleasure to this trip, and am happy that I took full advantage of my last long vacation. Upon my return I entered the employ of the Stromberg-Carlson Telephone Manufacturing Company, a large corporation making telephone apparatus for independent operating companies, mines, railroads, etc. I worked for a time in the factory, but have spent most of my time in the office, particularly in the financial end of the business. I now hold the office of assistant treasurer, have the general supervision of the accounting departments and of all clerical work, and more particularly the collection of notes and accounts. I have likewise some part in directing the policies

of the company. I have found it much easier to keep up my interest in athletics than to indulge in any form of them regularly, for the working hours of a manufacturing concern are usually long. Nevertheless I have intermittently played tennis and baseball and in winter bowled and gone snowshoeing when I could. I am very fond of walking, and have spent several short vacations in walking trips throughout the state. The group of men with whom I was most intimate in college have kept in touch with each other through reunions from time to time. I have kept in touch with University affairs by reading the Bulletin, and have attended class reunions, football games and the like.

I have taken practically no part in politics outside of marching in a campaign club in presidential years. At the present time I am often busied with some form of church work or work in connection with the local Chamber of Commerce. Three years ago last fall I married, and practically all of my time outside of working hours has since been spent at home. I have taken great interest in my house, and obtain recreation by doing a good deal of necessary and unnecessary work about the house and in the garden. With the exception of a session with typhoid two years ago, I have enjoyed perfect health. Life has been for me most pleasant, but not varied or in any way unusual. Member: University Club of Rochester, Rochester Chamber of Commerce.

Business	<i>Minister.</i>
Address	<i>(home) 36 Russell Terracc, Pittsfield, Mass. (business) Pilgrim Memorial Church, Pittsfield, Mass.</i>

During the year 1903-1904 I worked as an assistant in the English department in Harvard College. The following year I was a tutor in Cambridge, and in residence at Divinity Hall. The next year I continued my work in tutoring, and enrolled as a student in the Divinity School, from which I graduated in 1908. From September 1 of that year until November 1, 1909, I was the minister's assistant at the Old South Church in Boston. On November 1, 1909, I became minister of the Pilgrim Memorial Church (Congregational) in Pittsfield, Mass. Hugh B. Baker, 1903, my roommate during my last two years in Cambridge, and Robert N. Miller, Law School, 1906. On October 1, 1906, I settled down in my home city, Fitchburg, Mass., and started to practise law by myself but in the office of an older lawyer. Here I stayed nine months and was gradually gaining some practice. On July 2, 1907, I was appointed Assistant Register of Probate for Worcester County and still hold that position. My predecessor had just been appointed Judge of Probate to fill a second judgeship then created by the legislature. After my marriage in 1908 I continued to live in Fitchburg until March, 1912, when I moved into a house which I built in Worcester and which is now my home. Outside of law I have been interested in real estate to some extent. Member: Charles W. Moore Lodge, A. F. and A. M., of Fitchburg. Worcester Tennis Club, Worcester County Bar Association.

Immediately upon leaving college, I received an appointment as draughtsman in the ordnance office, War Department, at Washington, where I remained until February, 1907. At that time I had risen to a position of gun designer and computer, but seeing nothing ahead but a perpetual under-dog's job, bossed by West Pointers, and fearing the effect of the hot Washington summers on my health, I re-

signed my position and came west to Rockford. I first entered the employ of the Barber-Coleman Company, textile machinery manufacturers, of Rockford, but in a few months ran across a classmate, Bob Ruhl, who had recently purchased the H. C. Marsh Company. We effected a working arrangement for carrying on the business on a joint basis, he as office and I as shop manager. The grist of mitre boxes continued uninterrupted for a year, when Bob had a call to the editorship of a local newspaper, and literature prevailed. I was left in sole charge of the business, where I have since remained. My official title of secretary and treasurer is sometimes supplemented by manager, if correspondents will stand for the double outrage. That's all for business, but you should see my family. One boy, nearly nine, and three girls, all talking the Boston patois that instantly betrays their ancestry to the keen westerners. We are certainly proud of them. Member: Rockford University Club.

Since leaving college a very short ten years ago I have lived the conservative Boston life, and have done the things which are expected of such conservatives, namely: studied a profession, married and lived in the Back Bay. And, strange as it will seem to some of my more energetic classmates, this life has been a most agreeable one. The first four years after

RECORDS OF THE CLASS

leaving college were years of constant attention to the Harvard Medical School, a very different sort of thing from those spent at college. It is a pleasure already to think that a half dozen 1903 men who went with me directly to the Medical School were members of the first class to be graduated from our new and deservedly famous school buildings. Then nearly three years were spent in hospitals, and finally a big shove pushed me into the world on my own responsibility, where I have ever since been trying to orient myself. The above is a typical outline of the preparation of those who follow medicine, tame enough in its narration, but much more interesting to those who experience the various stages. Much of my leisure time has been spent in connection with rowing, the Union Boat Club supplying what in me seems to be a deep-seated longing for exercise; and it is one of my fondest dreams to see post-graduate boating developed into rowing of the first quality. In this respect I feel as if an old grudge had been partly paid off by four victories over Yale on the graduate eights. The calm of my early professional career allowed my thoughts to turn in another direction, and in 1909 I was married; to-day an increasing amount of time is allotted to two youngsters, one of whom has already signified his desire to go to Harvard. If all of my classmates have had a decade as agreeable as myself, I congratulate them. I have written medical papers only. Member: Æsculapian Club. Union Boat Club, Harvard Club of Boston.

Roy Bayard Bacon

Born	<i>Denver, Col., June 27, 1881.</i>
Parents	<i>Ward Lee, Mary Craig (Turnbull) Bacon.</i>

town in northeastern Ohio, where he attended the public schools, graduating in 1898. His father, Ward Lee Bacon, was a grocer and the town treasurer. Roy Bacon entered Hiram (Ohio) College in the fall of 1898, where he spent two years, taking a literary course and editing the college magazine. He graduated in 1900 with the degree of Litt.B. (Bachelor of Letters). The same autumn he entered Harvard College in the sophomore class. He elected a literary course in English, French and German, with a few courses in education, his intention being to teach English as his profession. He took no prominent part in social affairs or athletics, but wrote several poems for the college papers, and did some work at the Riverside and Elizabeth Peabody missions. He lived simply and assisted in supporting himself by tutoring in the summer vacations. He graduated with our class in 1903, and spent the first year after graduation teaching at the Park Avenue Institute, a boys' school at Bridgeport, Conn. He then went into newspaper work in Ohio, holding positions successively on the staffs of the Warren Tribune, the Lorain Times-Herald, the Cleveland Plain Dealer, and the Cleveland Press. The decidedly literary character of his writings created favorable attention. In 1907 he had a serious attack of typhoid fever, which obliged him to give up his newspaper work and to take a position as teacher in Stetson University, Deland, Fla. Early in 1908 he accepted an appointment as inspector of immigration in the federal Bureau of Commerce and Labor, but, shortly after, had a recurrence of the typhoid fever and died at Washington, D. C., April 21, 1908.

From January to April of my junior year I was in an Indian sporting camp in the Maine woods in charge of a rusticated boy. By working here the rest of that year I managed to get the required number of courses to my credit, and was able to leave college in June, 1902. This absence of almost a year and a half from the customary course forced me to do without much of the sociability that belongs to college life, and since then I have often regretted the loss. In the fall of 1902 I came to Middlesex

School as a master. Two years and a half later I became business manager of the school, retaining part of my teaching. With an eye to the future I got possession of a pleasant farm house and farm opposite the school. The next year I was married, and since then have lived on my farm. My occupation is three-sided,—teaching, business management and farming. From all three I get pleasure, from none of them fame. Ever since coming to Middlesex I have had charge of the school football team, and I hesitate to admit how much satisfaction I have felt when several of my boys at Cambridge made good on the college team. I have written one or two football plays, also a change or two in the rules of the game.

Howard Irving Baldwin

Born	<i>Paterson, N. J., July 22, 1879.</i>
Parents	<i>Joseph R., Mary (Hogencamp) Baldwin.</i>
School	<i>Allen School, West Newton, Mass.</i>
Years in College	<i>1899-1900.</i>
Died	<i>Tolland, Conn., April 17, 1902.</i>

Howard Irving Baldwin was born at Paterson, N. J., in 1879, the son of Joseph R. and Mary H. Baldwin. He prepared for college at the Allen School, West Newton, Mass. At school he was earnest, energetic, enthusiastic and extremely conscientious in all matters. He was very near-sighted, so that he worked under great difficulties, but his zeal for learning and splendid physique enabled him to attain what another might have given up in despair. He was interested in debating and spoke well. He was also a good athlete, playing on the school football team. In 1899 he entered Harvard College with the Class of 1903. He led a quiet but industrious life, his poor eyesight becoming an increasing handicap as time went on. As he was extremely ambitious this handicap greatly affected his spirits, and in a fit of despondency he drowned himself in a pond near his home, the town of Tolland, Conn., April 17, 1902.

Business	<i>Traveller.</i>
Address	<i>(permanent) Care of Brown, Shipley and Company, 123 Pall Mall, London, England.</i>

When Dr. Vincent Bowditch sent me from Harvard to California the third time he said, "I want you to give up all idea of coming back to Harvard to get your degree and of studying any more for your profession, for you would not have the strength to practise anyway." I decided it was wise to follow the doctor's orders, for my grandfather, Barton Ballou, A.M., by work and study had, before he was married, ruined his health, the result of which several of us who have come into the world later have felt. So I shall never have a Harvard degree, but I am pleased that two of my grandfathers on my mother's side had Harvard degrees. For several years I felt as if I had to apologize for living, though not so much in California, where I spent six winters and one summer, as in New England. In Europe I feel quite comfortable, for here one meets so many who are not busy getting money that he feels fairly respectable if he has no profession or business. Also one can find interesting places in Europe where the cold is less severe than in New England. Since leaving Harvard I have visited the following places in Europe, Asia and Africa: Egypt, Palestine, Syria, Constantinople and Greece, one winter and spring; one winter in Paris; one winter in Rome; spring of another year in Rome and Venice; the French Riviera; and this winter (1912-1913) again in Egypt. I have also been much in England, and as my small income will go so much further in Europe, I have been rather forced to become a foreign resident. However, I am glad I am an American and that all my ancestors, on both sides, settled in America in the seventeenth century; but I am sorry that I have had neither the health and

strength nor the ability to hold any "offices of honor or trust."

About July 15, 1903, I started to work at the Draper Company's plant in Hopedale, Mass., staying there for five or six months, when illness compelled me to go to Florida. On my return I again worked at the Draper Company's plant until September 6, 1904, when I came to Portland as assistant treasurer of the Portland Iron and Steel Company. I remained in this position until June 1, 1912, when, with my associate, who was general manager of the same company, I took over the property of the old company.

When I state that I am the proud husband and father of a happy family, I have written about nine-tenths of my autobiography. As to the remaining tenth, I might state that after leaving the Law School I took the first train for California, and I expect to live here for the next fifty years. In 1905 I was admitted to practice, and have not yet been disbarred. In 1906 I passed through the great fire and earthquake, after having devoted to the former my office furniture, files and law library, home, household furniture and belongings [N. B. No insurance, because they were in "fire-proof" buildings]; and later we passed through the still more momentous upheaval known as the "graft prosecution." I have also passed through a number of law suits and a number of political campaigns, with, for the most part, very satisfactory results; but my chief claim to fame seems to be that I was one of the two California delegates who were "steam-rollered" at the National Republican Convention of 1912, by Senators Root and Penrose and Professor Taft, after Mr. Wheeler (the other Roosevelt delegate) and I had defeated our two Taft opponents by over seventy-six thousand votes, or by more than two to one. I suppose I am still rather narrow minded, but I never did care much for Yale men, anyhow. As I look back over my long and fairly active life, I have but two regrets: the first, that as a delegate to the National Republican Convention of 1908 I voted to nominate Mr. Taft for President; the second, that I shall not be able to attend our Decennial.

November, 1903, I was transferred to geological work in Butte in connection with mining litigation of the company. In this latter occupation I continued until March, 1905, when I became field engineer for an exploration company, in which capacity I was employed until July, 1910. During this period I travelled extensively over Canada, Mexico and the western United States, examining and operating mining properties. Since that time I have occupied the chair of geology and mineralogy at the Montana State School of Mines, at the same time acting in the capacity of consulting mining engineer for various concerns, including the Chicago, Milwaukee and Puget Sound Railway. Member: American Institute of Mining Engineers, Montana Society of Engineers, Seismological Society of America, Silver Bow Club of Butte.

Address	<i>269 Washington Ave., Chelsea, Mass.</i>

For the first two years after receiving my A.B. degree I was registered in the Harvard Divinity School, but worked mainly in philosophy, receiving my Ph.D. in the philosophy of religion in 1905. I entered the Episcopal Theological School in Cambridge in September, 1905, and received my S.T.B. degree from there in 1907. From August, 1907, to May, 1909, I was curate at the Church of the Ascension, Fall River, and in charge of St. Matthew's, being ordained priest in June, 1908. From May, 1909, to October, 1911, I was rector of Trinity Church, Milford, Mass., and from January to October, 1911, I was in charge of St. Paul's, Hopkinton. Since October, 1911, I have been rector of St. Luke's, Chelsea. In Fall River I was one of the founders of the

After graduation, the strikes in the mining district of Colorado forced me to take to surveying on a dam site near Leadville, and later to a few months of work underground in Leadville. Having the opportunity of going to Mexico thrust upon me, I spent the next four or five years in almost continuous residence there. After severing my connection with that

mining company, the next three years were given up to professional trips in Mexico and in the western states. I have ridden in many parts of the west coast of Mexico on mule back and have suffered the usual climatic and regional annoyance and discomforts. It was pleasant to occasionally meet some 1903 classmate or other grad. on the road. Last year the opportunities in building construction of southern California attracted me, and here I am in San Diego. Address	<i>(home) 1527 Sherwin Ave., Chicago, Ill. (business) 80 East Jackson St., Chicago, Ill.</i>

After six months of draughting in Pittsburgh I worked on the steam turbine testing floor of the Westinghouse Machine Company. I was chiefly occupied with tightening bolts on hot mains and cleaning slime out of the sump pits. Then I was employed with the Jones and Laughlin Steel Company, and afterwards with the Carnegie Technical Schools as an instructor in mechanical engineering. Some practical work as an architect's engineer and superintendent followed, and I finally started out for myself selling steam-power plant equipment, especially what are known as Kelley Heaters. Ever since coming to Pittsburgh I have been teaching about steam engines and steam-power plant equipment in a technical night school for the Westinghouse men, except for a couple of winters when connected with the Carnegie school. I have studied harder since I have been out of school than I ever did before. I didn't realize when I left Harvard that there were so many things I didn't know; since then I have learned much. I haven't any honors to report; I have simply been plugging along. My latest move has been to Chicago to dispose of Kelley Heaters over the Middle West. I have written a few articles in some of the technical journals.

Children	<i>Alice Douglas, Nov. 16, 1907.</i>
Business	<i>Writer and teacher.</i>
Address	<i>(home) 5321 Chestnut St., New Orleans, La. (business) 326-330 Camp St., New Orleans, La.</i>

On leaving Harvard I took up literary work in New York, and for a time published a little magazine called "The Manuscript." Later I wrote and drew for McClure's Syndicate, then for a period of several years knocked about the country, working for different newspapers and going on occasional hunting trips. In 1903 I moved south, and am now in New Orleans with the Daily Picayune of this city. I am particularly interested in all athletic and military work. At present I am president of the Washington Artillery Athletic Club and judge of the National Rifle Association in New Orleans. In the summer of 1911 I conducted the Boy Scout camp at Clermont Harbor, Miss. At the time of the Mississippi floods, 1912, I was placed in command of a refugee camp of over two thousand people at Milliken's Bend, La., and had charge of this during the entire overflow. In June, 1912, I attended the government school for officers at Fort Riley, Kan., and as a result of my work secured the appointment for the Special School of Fire at Fort Sill, June, 1913. I am to be instructor in woodcraft through July and August, 1913, at Culver Military Academy. Books, articles or plays which I have written or translated: The Four Claytons, Fengirt Stories, American History Games, Text Book for Young American League. Member: Knights Templar, Washington Artillery, Louisiana National Guards, National Geographic Society, National Rifle Association of America.

My two years after graduating from college were spent in the Harvard Law School. Before starting into active practice I had the novel experience of working my way to Europe on a cattle steamer. In June, 1905, I met my faithful roommate, D. P. Lockwood, 1903, in Chester, England, and together we took a two months' walking tour in Europe. I returned to the United States in September, 1905, and began to practise law in the office of Nagel and Kirby of St. Louis. The senior member of the firm was the Honorable Charles Nagel, Secretary of Commerce and Labor under President Taft, and I had the rare good fortune of coming intimately in touch with his exceedingly able, upright and conscientious character. My relations with the firm were exceedingly pleasant but not as lucrative as I needed (my own fault), and therefore when I received an offer in December, 1907, to become associated with Stewart, Eliot, Chaplin and Blayney on a guaranteed income basis, I promptly accepted. January 1, 1909, I became a member of the firm, which was

CLASS OF 1903 — THIRD REPORT

dissolved January 1, 1911, and the present firm of Eliot, Chaplin, Blayney and Bedal was formed. Of course most of my life has been given up to my profession, and I have had a wide range of experience in the courts of my state as well as in those of neighboring states. My interest and my pride have been in my profession, and I have not devoted much time to other things. While I can claim only a fair measure of success, still the fact of working with congenial associates is in itself an element of great compensation. The bare facts of domestic life are given above, and that side of life is hardly a subject for a class report. Still I am tempted to say, as one of my law classmates did in a report, that his principal interest outside of his business was "domestic economy." With two growing youngsters on my hands, whom I see far too seldom, there is not much opportunity for either social, political or civic development. In this age children come first, and if you would have them love you, you can have no divided allegiance. However, I have not altogether neglected my duty to my city. I am an active member of the Civic League and am especially interested in matters of housing and sanitation. I have spent over two years on the draft of an ordinance to regulate the milk supply and conditions of the city, and have seen it wrecked, like most good things, in the city assembly. However, it is but a start, and I hope in two more years to give St. Louis the best working milk ordinance in the country. I have written papers for societies, but have not had them published. Member: City Club, Blackstone Club, St. Louis Law Library Association, St. Louis Bar Association, St. Louis Amateur Athletic Association, Civic League, St. Louis Pure Milk Commission.

I spent the summer and fall following graduation with my mother and brother in Perry, N. Y. In the latter part of November I went to what is now Midvale, Utah, and entered the employ of the United States Smelting Company, one of the plants belonging to the United States Smelting, Refining and Mining Company. Here I occupied various positions as laborer, research chemist, furnace helper, furnaceman, foreman, bag-house foreman, and in June, 1908, was appointed assistant superintendent of the plant. This position I held until January 1910, when I came to Needles, Cal., as superintendent of the smelter of the Needles Mining and Smelting Company, another plant belonging to the United States Smelting, Refining and Mining Company. I remained in this position until October, 1911, when I left the smelting business and entered that of real estate and mine brokerage, insurance and loans with B. L. Vaughn of Needles, Cal. The business is now conducted under the firm name of Vaughn

RECORDS OF THE CLASS

Since leaving Harvard I have spent every school year but one at Penn College in my present position, beginning, however, as assistant professor. The year 1909-1910 I spent in Chicago taking graduate work in Greek and Latin at the University of Chicago. For several years I have been registrar at Penn, also chairman of the committee on entrance credits. For two years I was chairman of the athletic committee. Last fall I was made chairman of the executive committee of the Iowa State Hellenic Society. I have been rather active in church work. For three years I have been clerk of the Oskaloosa monthly meeting of Friends, and last year was appointed a member of the foreign missionary committee of the Iowa yearly meeting of Friends. Member: Classical Association of Middle West and South, Iowa State Hellenic Society, New Era Club of Oskaloosa.

Beyond the incidental public service which lies in the path of most lawyers, and participation in a movement last fall to elect a non-partisan judiciary nominated by the Bar Association, I have post-

Not having been able to convince the authorities that I **was a shining light** in the usual classroom exercises, I left **Harvard University** the latter part of May, 1900, and shortly thereafter assumed the duties of office boy in the office of George P. Wescott, Portland, Maine. I succeeded in holding down this important position for about two years, and finally advanced through gradual stages to the position of clerk, and later became a member of the firm. This happened about 1905. The business was constructing water works, gas works and electric light plants, and the management of these corporations. About eighteen properties of this kind were managed from this office, and gradually I became associated with the management of the individual corporations. I withdrew from partnership in this concern about the first of March, 1912, and opened my own office. At the present time I am second vice-president of the Springfield City Water Company of Springfield, Mo., treasurer of the Mousam Water Company of Kennebunk, Maine, and treasurer of the Ruth Oil Company of Portland, Maine. I am a producer of crude oil, and own a few small producing properties in Oklahoma and Kansas. Member: Odd Fellows, Elks, Portland Athletic Club, Portland Country Club.

I completed my college course at the midyear examinations in my senior year, and soon after married and went abroad for six months. On my return I entered the Harvard Law School, graduating in the spring of 1906. I then entered the law office of Jeremiah Smith, Jr., and Malcolm Donald. After a year with them, they became partners in the firm of Fish, Richardson, Herriek and Neave, and I went with them to that office. I stayed with that firm till July 1, 1908, when I formed a partnership with Edward H. Warren, Theodore Hoague, and Henry James, Jr., with offices at 84 State Street, Boston. For the first two years of our partnership we had charge of the work of the Boston Legal Aid Society, which renders legal aid gratuitously, if necessary, to all persons who may appear worthy thereof and who from poverty are unable to procure it. Since July, 1910, my practice has been mainly confined to corporation matters, such as the organization of corporations and the general management of their legal affairs. On October 1, 1912, my partner, Henry James, Jr., left us to take a position in New York, so that our firm now consists of three members, Warren, Hoague and myself. At present I am secretary of the Boston Legal Aid Society, president and director of the Cohasset Water Company, secretary and director of the Thames River Specialties Company and of the Climax Company of Lowell. Completing the requirements for my A.B. in three years, I secured leave of absence for the fourth year and entered the Harvard Medical School, from which I was graduated in 1906. Two years later I was graduated from the surgical service of the Massachusetts General Hospital. In September, 1908, I opened an office in my home city, Columbus, Ohio, "for the practice of medicine." Most of the work that has come my way has been surgical, and my interests being wholly in that line, I announced myself a *simon-pure* a year ago, and have been giving all of my time since then to surgery. The word "giving" is used advisedly, being almost literally true. However, I am having a good time. In June, 1909, I married Miss Elizabeth Cole, A.B. (Wellesley), 1905. I never matriculated at Wellesley, but doubtless I should have received at least a gentleman's mark for regularity in attendance during those four years had I applied for it. In March, 1911, our boy was born, and I began to have some appreciation of what life means to older folks. Likewise I learned some things not taught in the course in pediatrics. I am surgeon for two railroads, visiting surgeon to two hospitals, and in a mild and I trust wholly harmless sort of way I am connected with the local medical school

These things just listed are collected, I find, by specialists for impressing country doctors when you send them an occasional reprint. They serve other and more useful ends, of course. I spent the year 1904-1905 in Columbia University, New York, graduating from there in the summer of 1905 with the degree of Civil Engineer. I spent the end of the summer of 1905 under the East River, New York, helping August Belmont dig a tunnel from Long Island City to New York, and spent the rest of 1905, also the first two months of 1906, doing the same thing. I then went to work for the Rapid Transit Commission and helped them tunnel from New York to Brooklyn. Growing tired of subterranean life, I migrated to San Francisco in December, 1906, where I have been ever since. I have helped rebuild the city, have reconstructed several miles of street car lines, have laid out an interurban line, and hope to have the Panama Pacific International Exposition finished in time for 1915. Until recently I have belonged to the Harvard Clubs of New York and San Francisco. I have written A New Method of Loose Leaf Survey Notes (Electric Railway Journal).

My business has increased steadily and has been most satisfactory. During all this time I have lived in Winchester, which is about nine miles out. There are a number of Harvard men in the town and some classmates. The combination of a home in Winchester and a business in Boston is all that any one has a right to expect.

went into the Boston office of George H. Burr and Company in the commercial paper business. I was salesman in that office, covering Boston and some of the larger New England points, until my marriage. At that time I was offered the position of private secretary and general business agent to the Honorable Thomas Mott Osborne, then public service commissioner under Governor Hughes of New York. My work kept me in Albany for the winter of 1908, at the end of which I moved to Auburn, taking care of Mr. Osborne's various interests in and about that city. In January, 1912, I was elected vice-president and director of the National Bank of Auburn, and have since divided my time between my work in Mr. Osborne's interests and the bank. My family has been augmented by one daughter, Agnes, born in 1908, and a son, William, born in 1912. The latter, while born in a city absolutely surrounded by "Elis" and while no doubt greatly influenced already by the fact that he cannot belong to the class of 1903, is already headed, however, for Harvard and the class of 1934. In passing I wish to say that I have been authorized and herewith do issue a challenge to the sons (if any) who will be freshmen at that time (1930-1934) of Albert Bigelow, George Barton, or any other "Threesers," even including Dudley Clarke, to an all-round catch-as-catch-can, Marquis of Queensbury rules to govern. Note.—All acceptances must contain a forfeit of ten dollars, to be posted at the National Bank of Auburn in the name of Gerald D. Boardman. In politics I have been a Democrat in city, state and nation, and reached my zenith when elected a member of the "I Did but Wish I Hadn't" Club; this honor being granted to numerous of our Empire State citizens, owing to their active efforts in the campaign to elect a certain Democratic governor in 1909. In closing I wish to add that my head is still well thatched outside, which is more than a few of my classmates can say. I will mention no names, and not even refer you to Arthur Rotch. I say nothing as to the inside of my head (cries of "Obvious!" from the crowds). Member: Tennis and Racquet Club of Boston. City Club of Auburn, Owasco Country Club, The Hermits.

Business *Minister.*

Died *Boulder, Col., Aug. 15, 1909.*

Halsey Moore Borthwick was born October 4, 1880, at Freehold, N. Y. His father was Rev. Menzo W. Borthwick, a Congregational minister, and as he changed his pulpit frequently, the family resided during Halsey's youth in Freehold, N. Y.; Madisonville, Pa.; Baleville, N. J.; Binghamton, N. Y.; Chicago, Ill.; and Manchester, N. H. Borthwick graduated as salutatorian of the class of 1898 at the Manchester High School, spent a year there in post-graduate work, and entered Harvard in the fall of 1899. He lived at home with his family, which had moved to Cambridge. Owing to this fact and to the necessity of living economically, Borthwick took little part in social or athletic activities at college. He earned a Price Greenleaf scholarship and devoted considerable time to church and Young Men's Christian Association work. At the close of his sophomore year he was found to have tuberculosis and was obliged to leave college. He went for a short while to Rutland, Mass., then to Colorado Springs, and finally made his home at Boulder, Col., a town not far from Denver. After two years his health improved enough to enable him to take up work toward his chosen profession, the ministry. He became assistant to the pastor of the local Presbyterian church. His health forced him to resign this position, but later he became an active worker in the Congregational church, holding the position of superintendent of the Sunday school. In March, 1909, his health began to decline rapidly, and on August 15, 1909, he died of Addison's disease. Even in the short period of his work he made a deep impression for good on those about him. A committee of the Sunday school, speaking for the school in a letter written just after his death, says: "We purpose to keep the inspiration of his life ever before us to the end that the precious seed which he has sown may bear much fruit in our hearts." The funeral services, which were of a semi-public nature, showed in what esteem and affection he was held.

After graduation I started the regular course in the Harvard Law School. Upon the outbreak of the Russo-Japanese War I went with E. V. Morgan to the Far East as secretary to the consulate general of Dalny. We spent eleven months waiting near our post, which we never reached. I returned to the Law School in January, 1905, and continued my law course, graduating in 1907. I left at once to join W. Cameron Forbes, then secretary of commerce and police in the government of the Philippine Islands, as one of his law clerks and assistant to W. Greene, 1901. In the autumn of 1907 I became his private secretary, and when he was appointed governor general I was appointed private secretary to the governor general; later I was appointed his secretary. I visited Cambridge in June, 1910, on vacation leave. Member: Manila Club, University Club of Manila, Sociedad de tiro al blanco, Manila Polo Club, Bagnio Country Club, Columbia Club, Varsity Club.

Degrees	<i>S.B., 1903; A.M., 1905.</i>
Married	<i>Mabel Louise Shurtleff, Edgartown, Mass., Nov. 30, 1905.</i>
Business Address	<i>Metallurgist. (home) 55 Claremont Ave., Arlington Heights, Mass. (business) 26 Abbot Building, Harvard Sq., Cambridge, Mass.</i>

After graduating I returned to the Graduate School of Arts and Sciences, performed some research and other work, and supported myself meanwhile by teaching metallurgical chemistry and by singing. In June, 1905, I received my A.M. and immediately left for a six weeks' trip to Georgia, Alabama, Tennessee and West Virginia, where the summer course in mining visited the mining and metallurgical establishments of the South. Here we learned that "all that glitters is not gold" and all that sizzles is not fried chicken. On my return I worked for Professor H. M. Howe in and about New York City, ostensibly as his private technical assistant in metallurgy, but really acting as man-of-all-work, performing duties ranging from designing carriage brakes, measuring breeze velocities, surveying, drawing plans for a new residence for the boss, and proofreading a new edition of one of Professor Howe's books. With him I learned the importance of picking up stray pins from the floor and other fundamental principles of much value. After a year of this I returned to Harvard to teach metallurgy as assistant to Professor Sauveur. I also have aided him in consulting work. During his sabbatical year I gave several of his courses, and on his return entered into partnership with him (1909) for consulting work and the sale of metallurgical microscopes and accessories. In September, 1912, this professional and commercial work had been taking so much of my time that I resigned from the University, retaining only a course (Met. S 12) in the Harvard Summer School. Since then Professor Sauveur and I have opened an office and laboratory in Harvard Square. In 1903-1905 I was a director of the Randall Hall Association and auditor there in 1904-1905. Professor Sauveur and I wrote and published a laboratory text

and note book in 1908, and we published Sauveur's Metallurgy of Iron and Steel in September, 1912. I am now serving on the committee for hardness tests of the American Society for Testing Materials, am vice-president of the Arlington Civic League, and chairman of the music committee of the Arlington Singers' Club. Books and articles I have written or partly written: (With Professor Sauveur) Laboratory Experiments in Metallurgy (published by the authors, 1908), several magazine (technical) articles on metallurgy, Member: American Society for Testing Materials, International Association for Testing Materials, Iron and Steel Institute of London, Institute of Metals of London, Harvard Club of Boston, Harvard Mining Club, American Institute of Mining Engineers.

Business	<i>Lumberman.</i>
Address	<i>26 Lake St., Oshkosh, Wis.</i>

Shortly after leaving college I engaged in the business of dealing in timber, lumber and land on the Pacific coast, particularly in Oregon. Later on I also became interested in this business in the South, particularly in Georgia and Alabama, and am still so engaged in these places. I do not think I have held any offices of honor or trust, except that I served one term as a member of the Wisconsin assembly (legislature). Perhaps I should add that I am somewhat interested in banking and in the railroad business in Wisconsin. Member: University Club of Chicago.

Business	<i>Manufacturer.</i>
Address	<i>(home) 11 Kings Beach Terrace, Lynn, Mass. (business) 761 Washington St., Lynn, Mass.</i>

Immediately after Commencement I went to work in the Boston office of E. Naumburg and Company of New York City, dealers in commercial paper. In March, 1904, I went on the road for them as salesman, and covered, at various times during the next four years, all the leading cities and towns of the New England states. I gathered here a broad and invaluable experience. I resigned, July, 1908, to enter my father's business in Lynn,—the manufacture of cut soles and leather. I was admitted, January, 1910, to general partnership, under the firm name of Henry W. Breed and Company.

looking for work in the line of banking or brokerage without success. In January, 1904, I obtained employment in a large dry goods jobbing house in Boston, where I found two or three of my classmates. Not satisfied, and still on the lookout, I remained in this line till June, when an opportunity presented itself in the Commonwealth Trust Company,—at the bottom. Every one knows the messenger's job, hustling the wallet. That lasted six months, when I was made receiving teller of the company's rapidly growing branch office. I continued in this capacity until, through the purchase of the New England National Bank, and shifting of offices, I became paying teller of the New England, where I now am. There is very little else to tell. I spend practically all of my leisure motoring, and in the summer combine it with golf. My vacations are passed at Maplewood, N. H., and every two or three years I take a short trip south to see the old home, the family and my boyhood friends. Member: Oxford Club of Lynn, Harvard Club of Lynn, I. A. B., Homestead Golf Club.

Address	<i>(home) 11 Waldo St., Brookline, Mass. (business) 60 State St., Boston, Mass.</i>

After honeymooning around the country during the summer of 1907, I entered the office of Warren, Garfield and Whiteside, where I began to practise the theories which I thought I had learned in the Law School. Practice not fulfilling the adage of "makes perfect," I decided to try something entirely new, and accordingly in the fall of 1908 I entered the legal department of the Boston Elevated Rail-

way Company at 101 Milk Street, Boston, where I remained until February 7, 1910. During this latter period I was actively engaged in defending that company against attempts by fakirs and lawyers of that class to separate the Elevated from its hard-earned nickels. On February 7, 1910, I left the offices of the Elevated and opened my own "suite" in the Kimball Building at 18 Tremont Street, Boston. Business becoming good, I removed to more commodious quarters at 60 State Street in December, 1910. Although not growing as wealthy as perhaps I might in other occupations, my practice is gradually increasing so that I am able to support my small family in a fairly comfortable way. My only office of honor or trust consists in my trusteeship of a savings bank account for Cyrus Brewer, 3d, the nucleus of which began with the proceeds of auction bridge. Member: University Club of Boston, Boston Athletic Association, Bar Association of Boston.

After leaving college I engaged in the manufacture of corsets at Derby, Conn., with the Brewster Corset Company, which was owned by my father. In 1908, my father being dead, the company was dissolved. I then went to Chicago, where I worked for the big packers for two years. In 1911 I connected with the Bitter Root Valley Irrigation Company, a big corporation with general offices in the First National Bank Building, Chicago, and engaged in the development and sale of a large tract of fruit land just south of Missoula, Mont. In the summer of 1912 I was sent to New York as

Lond Island. Classmates who acted as ushers were: Derby, Peabody, Bowditch, Krumbhaar, Barton, Godfrey, Waller, Whitridge, Waterbury and Kobbé. After a month spent camping in the Maine woods, my wife and I went to Paris, where the next seven years were spent preparing for my profession. Here were born Helen Manning, the Class Baby, and Lucy Manning. In the spring of 1904 Julian Peabody, now my partner, came to Paris. We were both admitted to the Ecole des Beaux Arts in the spring of 1905, and joined the atelier Deglane. In an old leaky shed on the Boulevard Raspail, where our much-feared and devoted Patron criticised our work twice a week, I passed from "nouveau" or chore-boy, running errands, filling lamps, etc., to "reservist," "niggering" for the more advanced students, and finally to "ancien." Our design problems on varied subjects, from a village school to a state house, were judged by a jury of all the patrons. The handing in of our work was occasion for great rejoicing. The drawings, often bulky and still wet with paint, were hauled into a hand-cart, and usually some American harnessed to the shafts. The cavalcade, pushing, pulling and shouting, would rush to the school at the last moment, joined by all the other push-carts of our rival ateliers. A few days later the awards were read out to the competitors in the old paved courtyard of the school. The exhibition of drawings was then open to the public for two days. Should the projet obtain a mention the student could count off one from his two dozen odd values needed to obtain the diploma. No mention meant that his two months' work was in vain. A medal counted as two or sometimes three mentions. Besides the regular projets—six a year—we had a year's course in construction, including engineering and higher mathematics; freehand drawing, modelling, decorative competitions, twelve-hour planning competitions, six a year; archaeology, three or four special prize competitions; a course in perspective; one in stereotomy; courses in descriptive geometry, trigonometry and calculus. All the subjects had to be studied in French, in many of which we were

examined orally. Part of the year 1908 I spent in Herbert D. Hale's office in New York as draughtsman. Returning to Paris, I obtained my diploma from the French government in June, 1910. That last summer abroad was spent travelling in England, studying domestic architecture. The travelling in search of architectural inspiration was perhaps the most important part of the preparation. During the seven years abroad my wife and I visited Italy, Germany, Switzerland, Austria, Turkey and Greece, and of course travelled extensively in France. One summer was spent at Avranches, near Mont St. Michel; another travelling in Brittany; another at Manigod in the Haute Savoie Mountains. Our favorite haunts near Paris were Senlis, Chartres and the forest of Fontainebleau. Returning to America in the fall of 1910, I opened an office in New York for the practice of architecture. A son named for me, was born on Christmas day of that year. I spent several months in the employ of Marc Eidlitz and Sons, the builders, during the construction of the Bankers Trust Company's skyscraper, in order to learn modern steel construction. My present partnership was formed in 1911, with Julian Peabody, 1903, and Albert Wilson. Among the buildings of a public character designed by us are: town hall at Huntington, L. I.; buildings for the Carnegie Institution; Eugenics Record Office and Public Library at Cold Spring Harbor, L. I. Last year we moved to our farm of forty acres on Stony Brook Harbor, L. I., where we now live in an old farmhouse, surrounded by immense locust trees, close by the water. Here another son, James Parrish, was born in June, 1912. As I reach home each evening and am greeted by my large family (large for a decennial report) I feel sure that in all our travels abroad we never happened upon any spot as beautiful—to us—as our home in Stony Brook. Member: Knickerbocker Club, Union Club, Racquet and Tennis Club, Harvard Club, Down Town Association, Smithtown Hunt Club, Architectural League, Beaux Arts Society, Société des Architectes, Diplômés par le Gouvernement Français, St. George's Trade School.

After graduation I taught Latin and Greek in the high school at Middletown, Conn. During the next two years I taught various subjects at Dixon Academy, Covington, La. In the autumn of 1906 I came to Concord, where I am at the present time. I am sorry that I cannot give a less perfunctory account of my career for the past decade. Any more intimate autobiography would, however, necessitate the setting forth of the various crimes I have committed during this interval. On reflection I have decided that this would be expecting too much of me.

After graduation I spent four years at the Harvard Medical School. The summers of these years were divided between hospital work and vacation. One such vacation was spent in a six weeks' trip with Francis W. Peabody, 1903, to the Canadian Rockies, Portland, Ore., where H. L. Corbett, 1903, gave us a royal time; then to San Francisco, the Yosemite, Los Angeles, and home via the Grand Canyon of the Colorado. After graduation from the Medical School in June, 1907, I served in the Massachusetts General Hospital, Boston, as surgical house officer until August 1, 1908. After a vacation I then had six months' service as surgical and orthopedic house officer in the Children's Hospital, Boston. Finishing here May 1, 1909, I became the assistant of Dr. Joel E. Goldthwait, who is doing orthopedic surgery in Boston. In October, 1911, I became associated with Dr. Joel E. Goldthwait, Dr. Charles F. Painter and Dr. Robert B. Osgood, all of whom are interested in the orthopedic side of medicine. About June, 1911, I became an assistant to the

After completing the requirements for my degree in June, 1902, I entered the employ of Baring, Magoun and Company, bankers, 15 Wall Street, New York, as assistant to the office boy. The duties of this position, however, were so onerous,

and required such an advanced knowledge of errand running, ink-well filling, letter copying, and other branches of higher mathematics, that I decided to follow the advice of Horace Greeley and go west. Consequently I gave up the chance of becoming a financial magnate, and in November, 1902, came to San Francisco to learn the lumber business with the Hammond Lumber Company, whose president was my classmate, Richard Hammond's father. After a few months in the office I went to the sawmills at Eureka, Cal., to study the practical end. I moved to Los Angeles in October, 1905, where the Hammond Lumber Company were operating a wholesale and retail lumber business under the name of the National Lumber Company, and was given charge of the sales. In 1907 I was made treasurer of that company, which position I held until February, 1910, when I resigned to become manager of the Pacific Lumber Company of Los Angeles. In October, 1911, I became general sales manager of the company, and moved my headquarters back to San Francisco, where I am now located. "Thus endeth the first lesson." ROSWELL ROBERTS BROWNSON

Born	<i>Yonkers, N. Y., July 19, 1879.</i>
Parents	<i>Willard Herbert, Isabella (King) Brownson.</i>
School	<i>Lawrenceville School, Lawrenceville, N. J.</i>
Years in College	<i>1899-1904.</i>

Leaving college in June, 1904, after a course of four and one-half years, lengthened beyond the orthodox four years by the fact that I missed a half year in 1902, I returned to Yonkers, N. Y., the peaceful hamlet of my birth, and worked

there for the better part of a year as an employee of the Otis Elevator Company. I migrated with my wife in June, 1905, to Oxnard, Cal., where I pushed a pen in the office of the American Beet Sugar Company during the 1905 "campaign," or operating season of the sugar factory. From January, 1906, to June, 1907, I graced the editorial chair of the Oxnard Courier, an alleged weekly newspaper, after which (finding the conduct of the said Courier not sufficiently lucrative without a too close adherence to the wishes and mandates of certain industrial interests which possessed the customary and perfectly proper strangle-hold upon the said city of Oxnard) I packed my duds and hied me to Los Angeles, where I became a wage-slave on one of the daily papers of the Angel City. Returning to New York in the fall of 1908, I went to work for the Associated Press, by which famous news-suppressing agency I was transferred to San Francisco in March, 1909. After nearly three years with the Associated Press, I went over to the staff of the San Francisco Bulletin, but serious illness compelled me to leave that paper after a span of barely a month. Then followed a brief visit to the effete East for the Yuletide of 1911-1912. Returning to sun-kissed California, I set myself the task of finding for my flock of five a more or less rural habitation, partially removed from the madding throng of city life. The orange belt of the California southland appearing to measure up fairly well with the specifications, I committed my first act of really serious gambling by attaching myself and aforesaid flock to a ten-acre orange orchard in the upper reaches of the beautiful San Gabriel valley, under the snow-capped peaks of Grayback and Old Baldy. Here, with the aid of a theodolite, a sextant, a spectroscope, an ice-pick and a fine-tooth comb, I am at present busily engaged in searching my trees for evidences of whatever unfrozen oranges it may have pleased the gods to leave me at the close of what will go down in the horticultural history of the Pacific slope as the Big Freeze of 1913. And further deponent sayeth not. Member: Socialist party of America, Los Angeles Alumni Chapter of the Intercollegiate Socialist Society.

RECORDS OF THE CLASS

Immediately after graduation I went to work for the Northwestern Leather Company at their Sault Ste. Marie, Mich., tannery. I spent a year there and in the summer of 1904 I was given charge of a new tannery at Manistique, Mich., remaining until 1906, when I was transferred to the selling department in Boston. In January, 1908, I was sent by the firm to open a selling office in St. Louis. The company decided in March, 1911, to instal a modern accounting and cost system, of which I was placed in charge. This change made it necessary to move back to Sault Ste. Marie, Mich. At present I am secretary of my concern. Since graduating my principal hobby has been golf. Member: Sault Ste. Marie Young Men's Christian Association, Country Club of Sault Ste. Marie.

I left Harvard at the end of my sophomore year. The following fall and winter I passed at Lake Charles, La., although not engaged in business. I returned to New York in the spring of 1902. For a time I was with the stock exchange firm of Henderson, Lindly and Company. I left to help promote and incorporate the Columbian National Life Insurance Company of Boston, Mass., taking up my residence in Brookline. I remained with the insurance company two years, at the end of which time I engaged in business with the George P. Bingham Company, who were financing dock properties in Boston and were interested in coastwise shipping. On the formation of the firm of Hamlin, Nickerson and Company I went with them as a clerk, where I stayed a little over two years, when I became treasurer of the National Metal Seal Company and of the Metal Seal Sales Company, manufacturing metal seals for all classes of containers. In the early summer of 1911 I moved to New York City, and became assistant to the general manager of the Healy Box Corporation, manufacturers of box-making machinery. The company was consolidated and on the reorganization the general manager and also all in the New York office were relieved from duty, including myself. Since then I have been interested in several propositions, all in too experimental a state to write about here, but all being along general manufacturing lines, which seems to be work I enjoy. I hope in the end to succeed in this line, although up to this time I can't lay claim to unbounded success. I do enjoy good health.

In September, 1903, I accepted a position as teacher of English in Franklin School, Cincinnati, but in January, 1904, gave up that work to go to New York. There I had work for a short time on the New York Daily News. After a few months circumstances made it possible for me to begin the work I believed I was called to,—preparation for Holy Orders. In September, 1904, I entered the General Theological Seminary, New York, and was graduated from there in May, 1907. On May 25, 1907, in the Church of St. John the Evangelist, Bowdoin Street, Boston, I was made a deacon, and entered on my ministry there. In the same church, on March 7, 1908, I was ordained a priest. In May of that

year I received from the General Theological Seminary, New York, the degree of B.D. The next month I went to England to enter the novitiate of the Society of St. John the Evangelist, at Cowley, St. John's, Oxford, and remained there until 1912. On January 5, 1912, I made my profession as a religious by taking the vows of poverty, chastity and obedience for life, and was received into the Society of St. John the Evangelist. In a few weeks I was transferred by my Father Superior back to our church and mission house in Boston, and in January, 1913, I began priestly work in Cambridge also, taking rooms there at the request of some Harvard men. I have written *What's the Use?* (a series of articles on practices of the Christian religion, in the Holy Cross Magazine, West Park, N. Y.)

I was drawn into the business whirl of New York while peering too near the bait. For ten long years I have nibbled at the edge of the trap without springing anything. At last, to change the metaphor, almost dizzy blind, looking up the ladder, I saw a vacancy near the top, which now shelters me from the "rainy day." I am at present the foreign buyer of laces, embroideries, etc., for Butler Brothers (of New York, Chicago, St. Louis, Minneapolis and Dallas), keeping some nice young lady out of a job. Mrs. Butler is the only one who knows how much I make. If there is anything left at death, Harvard will benefit. Chances for future? Wouldn't sell them. I advise all young men to go into business if they are good waiters. It takes ten to twelve years of hard work to pull down soft money.

After leaving college in June, 1903, I entered the Harvard Medical School in the fall of the same year, and graduated in June, 1907, with my M.D. degree. While in the Medical School I became more interested in mental diseases than any other branch of medicine, and I obtained an appointment in the State Hospital at Dannemora, N. Y., for insane criminals. But in April, 1907, I was offered another appointment, at the McLean Hospital in Waverley, Mass., and I chose the latter. I went at once to live at the McLean Hospital, and remained there until November, 1908. In March, 1908, I had taken and passed my state board examinations for registration in medicine. In November, 1908, I was offered the care of a private case, which I took; and for one year I lived with this patient. In November, 1909, I desired to have a fuller training, in an all-round way, and I found that there was a vacancy at the Waltham Hospital, so I took an

CLASS OF 1903 — THIRD REPORT

appointment there for eight months. After that I felt that the time had come when I ought to start out for myself, and I chose Belmont as the place in which to start. I took an office and room there and hung out my sign. In January, however, of the following year I decided that Cambridge offered more attractions, and so I moved back again and hung out another sign on Hawthorn Street. I kept the office in Belmont until the next August, but by that time I had found that two offices did not pay, so moved all my things to Cambridge, and here I have remained. In August, 1912, I moved again from Hawthorn Street to the office and house I now occupy at 1 Waterhouse Street; now I am situated in the midst of the "Doctor's Row." In October, 1910, I was asked to teach anatomy at the Waltham Nurses Training School, and I have done this for the past three years. In August, 1911, I started in the nerve department of the Massachusetts General Hospital, where I did some work with the alcoholic patients. In February, 1912, I received a graduate assistant appointment, and in January, 1913, I was given an appointment of assistant in the nerve department. Member: Waltham Medical Club, Waltham Hospital House Officers Alumni Association, Cambridge Medical Improvement Society, Massachusetts Medical Society, American Medical Association, Boylston Medical Society. Born	<i>Cleveland, Ohio, Aug. 16, 1879.</i>
Parents	<i>Oscar James, Frances (Fuller) Campbell.</i>
School	<i>University School, Cleveland, Ohio.</i>
Years in College	<i>1900-1902.</i>
Degrees	<i>A.B., 1903; A.M., 1907; Ph.D., 1910.</i>
Married	<i>Emily Lyon Fuller, Bridgeport, Conn., Sept. 10, 1907.</i>
Children	<i>Eunice Clark, Sept. 23, 1908; Katharine, Dec. 1, 1909; Emily Fuller, Oct. 15, 1912.</i>
Business	<i>Assistant professor of English.</i>
Address	<i>205 Prospect St., Madison, Wis.</i>

Having accumulated enough credits to graduate at the end of the junior year, I spent the academic year 1902-1903 abroad, most of it in Berlin, where I prepared a fellow for Yale, studied a bit, and had a musical debauch. The next year I taught English and German in the Asheville School, a boys' school situated about eight miles west of Asheville, N. C., in some of the best country in America, but unlike Doodle Page's end of the same state, no place for either peaches or elephants. The next two years I was instructor in English and law at the Naval Academy at Annapolis. In the autumn of 1906 I went back to Harvard to work for a doctor's degree in comparative literature, which I obtained after four years of work. In September, 1907, I married, and since then I have been consistently accumulating a family of daughters,—for some reason, the usual family of a college professor. I now have three,—a number which the class secretary, if one can judge from the blanks he has just sent out, obviously considers the decent maximum. In the course of my graduate work at Harvard I became interested in Scandinavian literature and particularly in the work of a Danish writer of comedy, Ludvig Holberg. Accordingly, after I had obtained my Ph.D., I went abroad for a year as a Sheldon Fellow to obtain material for a book on Holberg. Travelling about Europe with two children under two years of age to my mind puts one's executive ability to the supreme test. I felt myself the director of an expedition, the

CLASS OF 1903 — THIRD REPORT

leader of a caravan. When I left New York I commanded, besides the necessary nurses and maiden aunts, eighty-four bottles of milk for one child and eight gallons for the other. The principal points of interest to us were drug stores at which castoria was on sale. I spent a large part of the winter in Copenhagen, where I had a wonderful time. A foreign scholar in Denmark is enough of a rarity to receive unusual courtesies from the remarkable professors who just at present compose the University of Copenhagen. Later in the year I studied in Berlin, Paris, London and Oxford. In Paris I saw a lot of Harry Dana, and in the remote little town of Normandy called Veules les Roses I met H. J. Forman. I had a bully year, and collected material which I have just gathered into a book that is soon to appear as one of the Harvard Studies in Comparative Literature. In the autumn of 1911 I accepted a position in the University of Wisconsin,—what Jim Field calls “a brisk young university.” Although some of the students here are undoubtedly a bit crude, their intellectual eagerness and enthusiasm is perfectly extraordinary. Nothing is taken for granted, least of all a thing like literature; on the other hand, there is little indifference and perfunctory acceptance of traditional values. Such an atmosphere is masculine and stimulating, and I like it. Member: University Club of Madison, Maple Bluff Golf and Country Club of Madison, Modern Language Association of America, American-Scandinavian Society.

It is hard to realize that the Class of 1903 has reached its tenth anniversary, so swiftly has the time passed away. When I received my S.B. I decided that I would follow the example of my father, Dr. Charles A. Carlton, and prepare myself to be a physician, with the hope of acquiring his skill and good name. I received my M.D. from the Harvard Medical School in 1908, and opened the office which had been occupied by my father for thirty years. I have found considerable pleasure in the practice of medicine, having signed up to the present time fifty-six birth certificates and only five death certificates, so you see my birth rate exceeds the death rate. I am now a professor at the College of Physicians and Surgeons in Boston, where I teach medical students the subject of histology. I extend my best wishes to all the members of the Class of 1903, and wish them continued success. Member: Starr King Lodge, A. F. and A. M.

In 1906-1907 I visited England, France, Germany, Switzerland, Italy and the West Indies, which trip proved to be the most broadening influence in my life. RECORDS OF THE CLASS

From February, 1904, to November, 1912, I spent in the service of the National Shawmut Bank, Boston. In 1907 I undertook, with five others, to establish a night department to facilitate the handling of the large volume of business developed in New England's largest and fastest growing financial institution. The night department eventually grew to a force of twenty-five men, handling about seven million dollars' worth of checks each night. During that period a system was worked out which was finally adopted for the day work. Though several large banks in other cities have established night forces, in none has the idea been carried out so elaborately as at the Shawmut. In October, 1912, I received a promising offer from the Merchants National Bank to develop a night department there. I accepted, and since November 1 have been engaged in that effort. Member Bank Officers Association.

On leaving Harvard I went immediately to New York, where with my roommate in college I entered the wholesale house of Butler Brothers at 495 Broadway. I went through the different stages of stock clerk, order filler, head order filler, and finally at the end of one year was given charge of a department. At this time I was offered a chance with the Dennison Manufacturing Company, and in August, 1904, entered their Boston store at 26 Franklin street. After being there a few months I was given New Hampshire, Vermont, and parts of Massachusetts and Rhode Island to cover as outside salesman. I travelled over this territory for two years. In the summer of 1906 my father and I purchased the stationery business of Byron Stevens, which we still conduct under the firm name of F. W. Chandler and Son. The only event which stands out in this period as being at all out of the ordinary run of natural events is my trip on skis to the top of Mount Washington. In February, 1906, I started with Norman Libby from Bridgton, Maine, and walked on skis, with snow everywhere from four to eight feet deep, to Mount Washington. We climbed the mountain on skis, and upon reaching the top after an all day's climb, slid down to the bottom in twenty minutes. As far as we can discover, this was the first attempt to climb the mountain on skis.

I left college in 1902 to enter the Medical School. As soon as I was graduated in medicine I was appointed interne at the Worcester City Hospital. Here I served for nineteen months. At this place my work was very instructive and very pleasant, for John B. Manning, 1903, was also an interne. We had many good times together. In 1908 I located in Clinton, Mass., to take up private work. The work has been very satisfactory in all ways. I was appointed assistant surgeon at the Clinton Hospital in 1909, a position I hold at present. Another event happened in 1909, for I was married to Hazel Heiser of North Dakota. In 1910 we were blessed with a little daughter, who has been

While here I have joined the Massachusetts Medical Society and American Medical Association. I have been bacteriologist and milk inspector of Clinton for the last four years.

I spent my first year after graduating from Harvard College (1903-1904) at the Harvard Law School. The second year (1904-1905) I was at the University of Pennsylvania Law School. That year (January and February, 1905) I went south on a short gunning trip in North Carolina and near Savannah, Ga. The game consisted of quail, which to me makes interesting sport. The sport in the vicinity of Polkton, N. C., was the best, though both there and near Savannah the party (which in each case consisted of three) secured several brace of quail. In North Carolina the game is found in the cotton fields and on the edge of the woods which border them; in Georgia it is found chiefly in the open fields. The following year, after leaving the University of Pennsylvania law school, I entered the office of Biddle and Ward, 505 Chestnut Street, Philadelphia, as a law student. I also tutored in a class while there, and in December, 1906, took and passed my examinations for the Philadelphia bar. In January, 1907, I went abroad, going to Cairo, Egypt. My sister's husband, Vere S. Alston, Esq., is a judge in the native

CLASS OF 1903 — THIRD REPORT

courts there, and I enjoyed my visit very much. The procedure is carried on entirely in Arabie, the native tongue, though the judges who preside are generally English or French. Of course they are familiar with Arabie, both written and spoken. While in Egypt I went up the Nile as far as Luxor. It was here that I visited the great Temple of Karnak, also the Temple of Luxor and Deir El Bachre, and the Tombs of the Kings and the Tombs of the Queens. In the Temple of Karnak, which is one of the most imposing ruins in the world, there is a stone needle, eighty-five feet high and approximately twelve feet square at the base, hewn out of a solid block of red granite, and brought down the river about two hundred miles from the quarry at Assuan. It is one of the largest pieces of solid hewn stone which has ever been transported. The Tombs of the Kings and of the Queens are across the river and the Temple of Deir El Bachre is near them. The Tombs of the Kings and of the Queens are cut out of the living rock in the sides of the hills. The stone is of a soft reddish color, and the tombs of the more important rulers are set deep in the rock, approached by passages sometimes two or three hundred feet long. These passages appear to have been finished yesterday, so fresh does the paint on the walls appear. I also took two trips from Buzzard's Bay to Bar Harbor in my twenty-one footer. Pretty rough weather going around Cape Cod, and once across Boston Bay! My wife accompanied me on one trip. I have been guilty of no books or plays, either genuine or translated. Perhaps just as well for myself and the class.

RECORDS OF THE CLASS

Having graduated from the Harvard Law School and being under the necessity of providing for a wife and the expectancy of children, I failed to spend my first year languishing in a law office. Instead of this, much of the time was spent in Washington, where I acted as correspondent for Ridgeway's Weekly and other publications. After that came a residence in New York City, where I had a connection with the staff of Collier's. I spent the summer of 1907 travelling and in Kentucky at the Caleb Powers trial and the trials of the feudists of Breathitt County. After a four months' siege of typhoid in the later part of that year, I came out of a delirium to find myself in Boston. I had begun to believe that writing as a profession, though lucrative, was not as satisfactory as writing as an incident and accompaniment to some other occupation, which occupation would demand that I undertake not only my own affairs but be responsible for those of others, and more than this, be attached by the many social and business filaments of obligation to some one community. Accordingly I accepted employment in 1908 with Stone and Webster, engaged in the promotion, management and engineering of water powers and public utilities. For this firm and for magazines I have travelled during the last five years into all corners of the United States and have spent much time in the tropics,—Cuba, Porto Rico and the Gulf islands. In the latter part of 1911 I joined other Harvard men in forming the nucleus of the Progressive party in Massachusetts, and 1912 marked a time of pretty constant devotion to state and national politics. No other activity, however, seems to interfere seriously with a fairly constant contributing to periodicals and preparation of books. As time goes on I find myself more and more interested in those economic and social problems upon the proper solution of which I feel the future of America depends. Books, articles or plays which I have written or translated: *Jim Hands* (Macmillan, 1910); *The Man in the Shadow* (1911); *The Blue Wall* (Houghton Mifflin Company, 1912); about one hundred and fifty short stories for Harper's, Atlantic, Century, Collier's, Saturday Evening Post, Every-

Business Address	<i>Zoölogist. (home) 1726 18th St., Washington, D. C. (business) Smithsonian Institution, Washington, D. C.</i>

Immediately upon leaving college I journeyed to the West Indies for the purpose of carrying on certain lines of zoölogical research, in which, largely as a result of a previous visit to the islands and to Venezuela, I had become greatly interested. Beginning at Barbados, I visited also the islands of St. Vincent, Bequia (from which island I was so fortunate as to witness a magnificent volcanic eruption on Martinique), Mustique, Canouan, Mayreau, Union, Carriacou, Petit St. Vincent, Petit Martinique and Grenada, with shorter stops at St. Lucia, Dominica, Montserrat, Antigua and St. Kitts. Many of the smaller islands had never previously been visited by a scientific man, and I therefore succeeded in uncovering a rich field. Returning to Boston late in 1904, I spent about a year in working up and publishing the results of my investigations. When this was completed the Commissioner of Fisheries offered me an opportunity of accompanying the steamer "Albatross" as naturalist on a cruise in Alaskan waters, among the Aleutian and Commander islands, and thence southward to Japan and Korea, where the major portion of the work was to be done. The cruise, which lasted eight months, proved most interesting. Just as we were about to sail the San Francisco fire occurred, involving the destruction of the apartment house where I was living. In Behring Sea we were so fortunate as to discover a new island, just risen from the water and still steaming violently from every crevice in its rocks. The oceanographic results of the cruise proved to be far in advance of our most sanguine expectations; but most unhappily, on our homeward trip from Yokohama to Honolulu, through the worst sea which I have ever seen, our captain, Commander Leroy M. Garrett, United States Navy, was washed overboard and lost, so that my

recollections of the trip, otherwise most pleasant, are tinged with sincere regret for a departed friend. Returning to Washington, I have remained here ever since, excepting during the summers, which always find me in Massachusetts; and also excepting a four months' European trip, on which I represented the Smithsonian Institution and the United States Government at a scientific congress in Austria, later travelling on the Continent and renewing old friendships in many cities. Books, articles or plays which I have written: About one hundred and fifty treatises on zoölogical and allied subjects, in English, French, German and Spanish, published in Boston, Cambridge, Washington, Barbados (West Indies), Copenhagen, London, Dublin, Paris, Berlin, Marburg, Frankfort, Calcutta, Sydney (New South Wales) and Perth (Western Australia). Member: Cosmos Club of Washington, D. C., Royal Geographical Society of London, and numerous scientific societies.

In the fall after graduation I entered the Harvard Law School, and in due course obtained my law degree in the spring of 1906. These were profitable and pleasant years, in which I learned to value the University and New England even more than as an undergraduate. During this time I had the great good fortune to meet, in Boston, Miss Fanny Pickman Dwight, who later became my wife. Soon after leaving the Law School I became a law clerk in the office of Carter, Ledyard and Milburn in New York and, after an apprenticeship of two years, formed a partnership with Elihu Root, Jr., and Francis W. Bird, both my classmates at the Law School. This firm continues under the name of Root, Clark and Bird. Our practice, which has been of a general nature, has been most interesting and absorbing. For several years I was a trustee of Pomfret School, and I have served on the admissions committee and board of managers of the Harvard Club of New York. I am at present a member of the committee on admissions of the New York Bar Association. I have taken a constant interest in local politics, and have been on various committees of the Republican and lately of the Progressive party. If I have acquired a hobby, it is farming, which I occasionally have an opportunity to experiment with in a small way on a rock-bound farm which we own in New Hampshire. Much as I should like to, however, I find it quite difficult to combine many outside interests with my profession in this highly interesting but rather strenuous town. Member: Harvard Club of New York, Association of the Bar of the City of New York, Union Club, Racquet and Tennis Club, New York Law Institute.

I left Harvard in the summer of 1900 on a year's furlough because of nervous breakdown. I was unable to return on account of an accidental gunshot wound in the knee, which kept me an invalid for nearly six months. I then went into the machinery business; made automobiles; I left this to take a position on the St. Louis Post Dispatch in the advertising department, where I remained for more than three years. I held the position of assistant to the advertising manager. Afterwards I took charge of the publicity department of the Ballard Snow Liniment Company, and handled the spending of over two hundred thousand dollars in newspaper advertising all over the United States. I started with Will D'Arcy in the D'Arcy Advertising Agency, but was compelled to go west for my health, so purchased an interest in a ranch in Colorado near Colorado Springs, which we turned into a summer resort. I took charge of this and remained in that position for about one year. I came to Seattle in 1907, where I started an advertising agency with a Mr. Thorne and Mr. Foote. We called this agency the Thorne Advertising Service. I am still in the same business in this city. My intentions are some day to return to Harvard and complete my course. Member: Seattle Ad Club.

My quiet life since graduation has been an exemplification of the Chinese proverb, "Some study shows the need for more," and a refutation of Kipling's "He travels fastest

RECORDS OF THE CLASS

who travels alone." After the classical spirit had worked out its logical degree an outcropping of Romantic tendencies led me to spend a year and a half in Berlin and Bonn, reading Sanskrit and acquiring a knowledge of "things Indian." An offer to teach Sanskrit at Chicago made me commit myself definitely to Indic philology. The past two or three years have been spent in an effort to bring about "the Rise of the Moon of Enlightenment," which, owing to refractory mechanism, persistently remains just below the horizon and refuses to budge until sundry manuscripts are plucked out of many crannies in India. So, though ink has flowed plentifully, the bibliographical section remains blank. Two of our classmates, who were fortunate or unfortunate enough to fall into the pigeonhole of scholarship, and one who was converted from scholarship to theology, chanced to drift to Chicago. So the old class is here four-square to the world.

After this experience in teaching of varied kinds and grades, I spent the year 1909-1910 as special student at Bridgewater, Mass., Normal School, in preparation for higher work in the public schools, in what I believe is coming to be the profession of education. After receiving in February, 1910, the Massachusetts superintendent's certificate, I served a term as principal of Roselle Park, N. On graduating I went to St. Luke's Hospital, New York City, as resident physician for two years. Since 1909 I have practised medicine, written occasional articles on medicine and taught at the medical school. The following items have been thrust at me: instructor in applied therapeutics, Columbia University; director in the Allied Tuberculosis Clinics of New York City; attending physician to the Vanderbilt Clinic, Day Camp for Consumptives; director of the department of tuberculosis, Vanderbilt Clinic. My music still interests me constantly, and I have composed and published at rather regular intervals since leaving college. A list follows: Fifteen songs, published by Schirmer, New York; one song, published by Breit Kopf and Härtel, Leipzig; five piano pieces, published by John Church Company, New York; five piano pieces, published by Ditson Company, Boston; and one or two scattered songs. I am about to publish two or three violin works too. I have had the pleasure of using beautiful lyrics by Langdon Warner, 1903, and Arthur Ficke, 1904. I have recently been invited to serve as a member of the graduate advisory board of the New Harvard Musical Review. Articles which I have written: Treatment of Purpura Hemorrhagica (Archives of Internal Medicine), Treatment of Cough in the Consumptive (Journal American Medical Association), Precautions in Use of Tuberculin (Interstate Medical Journal). Member: MacDowell Club of New York, Harvard Club of New York, National Arts Club, New York State Medical Society, St. Luke's Alumni Medical Society, American Medical Association, National Association for the Prevention of Tuberculosis.

School	<i>Hale's School, Boston, Mass.</i>
Years in College	<i>1899-1903, 1904-1906.</i>
Unmarried	
Business	<i>Teacher of music.</i>
Address	<i>Dedham, Mass.</i>

Since leaving college, I spent two years taking graduate courses in music at Harvard under Professor John K. Paine, after which I spent some time in studying. During the first two seasons of opera in Boston I was répétiteur, or operatic coach in the Opera House, and during the last two years, I have been coach in the Boston Opera School in the New England Conservatory of Music, besides giving private lessons outside. I have written and had a few songs published, among them the following: The Arrow and the Song, The Infinite Shining Heavens, Autumn Within, O, Like a Queen, From the Prison Windows, Requiem Memory, Jour de Noces Nostalgie, The Elf and the Dormouse, Keep a'Goin, and some lighter songs.

Business	<i>Manufacturer.</i>
Address	<i>(home) Fearing Road. Hingham, Mass. (business) 131 State St., Boston, Mass.</i>

After leaving college I entered the stock brokerage concern of Paine, Webber and Company. About three years later I came to the conclusion that I ought to be in business for myself. Mr. Whittington, who by the way is a 1902 man, joined with me to form the brokerage concern of Coleman and Whittington. After three years and a little more of very pleasant relations in business I had an opportunity to go with the Hamilton Woolen Company, and have been with this company ever since. Previous to the time of my marriage (1909) I resided with my folks in Dorchester, but since 1909 I have resided in Hingham, Mass., where I had the honor last year of being a delegate to the Republican state convention. Member: The Wompatuck Club of Hingham, Hingham Yacht Club, Hingham Tennis Club, Wollaston Golf Club, Harvard Club of Boston, Sons of the American Revolution, Benevolent and Protective Order of Elks, Harvard Club of Hingham.

Business	<i>Lawyer.</i>
Address	<i>(home) 3 Wildwood St., Winchester, Mass. (business) 70 State St., Boston, Mass.</i>

I began the practice of law after December of the second year in the Law School, having passed my bar examination at that time. During the first three years I was associated with Conrad J. Rueter, 1884, and in September, 1908, joined Franklin F. Phillips, Jr., 1904, in general practice at 70 State Street, Boston, as Comins and Phillips. I have had no special outside interests, and the only political appointment has been to the board of health of Winchester. At such times as I have opportunity I attempt to add to my collection of musical compositions,—thus far without very great financial return. If any classmate sees Walter Clarkson,—exponent of the fast ball and quick breaking drop,—kindly request him to bring his billiard cue to Boston, where I would have a word with him. Music which I have written: Funeral March, Orchid Waltz, Vacation Dream Waltzes, The Tattler, Valse Debutante, Colonial Courtesy, Whispering Cupid Waltzes. Member: Harvard Club of Boston, Harvard Club of New York, Calumet Club of Winchester, Mass.

The September of 1903 I registered at Northwestern University as fellow in physics. I worked hard,—too hard, as I afterwards learned to my sorrow,—but I look back upon the year with pleasant memories. not only because of the opportunities of the work itself, but because of an interesting partial understanding of the ways of some of the middle western universities that I obtained through attending games and debates and through some inter-collegiate tennis matches in which I myself figured rather ludicrously. The college year of 1905 I spent in the Harvard Graduate School. After completing my studies, I taught in St. Louis, Washington, D. C., and Malden, Mass. I enjoyed teaching very well, and yet I was never entirely satisfied with the profession, probably because I had always been in my earlier years accustomed to greater physical activity. Finally because of hyperacidity, brain fag, etc., I was obliged to give up study and teaching (and this should have been done years before). I am now on a farm, working hard and regularly. The drudgery part of the farm work comes easily enough, and the rather severe struggle I have in making ends meet is, I suppose, a part of real life. My marriage four years ago to a 1904 Wellesley girl has brought me permanent happiness and made me a firm believer in the advantages of higher education in fitting a woman for her duties in the home.

factory was at that time under construction. It commenced operation in the spring of 1904, and I spent about a year in the various departments getting practical experience. In the summer of 1905 I withdrew from active connection with the business, and in 1911 was made vice-president of the company. After leaving the Coonley Manufacturing Company, I obtained a position as salesman with the Ewart Manufacturing Company, Indianapolis, Ind., manufacturers of malleable iron and steel chains for the transmission of power. In 1906 this company was merged with the Link Belt Machinery Company of Chicago and the Link Belt Engineering Company of Philadelphia into the Link-Belt Company, with headquarters at Chicago, to which office I was moved. In 1912 I was elected a vice-president of the company. In the spring of 1908 I was elected a director of the Chicago Savings Bank and Trust Company. In the fall of that year I was made president of the C. B. Live Stock Company, which owns and was then operating as a cattle ranch a considerable tract of land in Texas. The stockholders of this company organized in 1910 the Crosbyton-Southplains Railroad Company, of which I was also made president. This company has constructed and is now operating a short line of railroad in northern Texas. Since leaving college my time has been occupied by business, with the exception of a trip to Europe in 1911. Member: Chicago Club, University Club of Chicago, Saddle and Cycle Club of Chicago, Onwentsia Club of Lake Forest.

Address	<i>(home) 125 Washington St., Dorchester, Mass.</i> <i>(business) 722 Dudley St., Dorchester, Mass.</i>

I left college to go into the real estate business with my father and brother, under the firm name of P. B. Corbett and Sons. We did a general real estate brokerage and insurance business. After two years I resigned from the firm and opened an office of my own, doing a similar business. I continued this for about one year, when I recognized the opportunities in speculative building, and entered upon this interesting and variegated field. I have operated around Boston and built a number of houses, almost entirely investment property in different sections. From the present outlook, I shall continue in this line because I like it and have met with a certain meed of success. It always has interest, and the opportunities for its growth are only limited by my own energy and capacity. The outlook is now broader, and past experiences have given confidence for bigger things in the future. I served three years in the Massachusetts State Militia as a member of Light Battery A, Field Artillery. Member: Boston Chamber of Commerce.

Business	<i>Accountant.</i>
Address	<i>(home) 69 Beverly Road, Worcester, Mass.</i> <i>(business) 40½ Main St., Worcester, Mass.</i>

The last decade has passed so quickly that I may as well make the record brief. Since I went from college to the business world my time has been chiefly devoted to taking care of money for other people, and figuring how to make more money—for them. After three years in national banks I cast my lot with one of the great trusts which assists in feeding the American public, and remained with that concern until 1912, when I took charge of the accounting department of a wholesale and retail hardware business in my home city. Fortune has favored me in many ways,—with health, home and friends, and a fair division of work and pleasure. Perhaps one ought not to ask more.

Business	<i>Merchant.</i>
Address	<i>(home) 1 Carroll St., Portland, Me. (business) 120 Exchange St., Portland, Me.</i>

After receiving my degree of A.M. at Harvard in June, 1903, I returned to my home in Portland, Maine, and on August 1, 1903, entered the employ of Milliken, Cousens and Company, wholesale dry goods and commission merchants. In 1908 this firm was burned out, and on May 1, 1908, my brother, William T. Cousens, myself and our father made up the commission firm of L. M. Cousens and Company, handling cotton warps. This firm continued until January 1, 1912, when it was dissolved upon the death of L. M. Cousens, the senior partner. Since then I have not been in active business other than executor of the estate of L. M. Cousens. I am a director of the Mercantile Trust Company, and also of the Homestead Loan and Building Association, Portland, Maine. I am now secretary of the State Street (Congregational) Parish Club. I was chosen treasurer of the Lambda Chapter House Corporation (Bowdoin College) in 1909, and director in 1912. I still am treasurer. In the national organization of the Zeta Psi Fraternity of North America I have held the following offices: doorkeeper, 1904; corresponding secretary, 1908-1910; trustee, 1911-1913. I was elected president for one year on April 5, 1913. The membership is composed of six hundred active men and five thousand alumni. Member: State Street Parish Club, Portland, Maine, Economic Club, Bowdoin Club, Harvard Club.

Directly after the midyear examinations of 1903 I secured leave of absence from Cambridge until June. In March I went to Santa Fé. Here I bought a horse, as my intention was to see the country. From Santa Fé I drifted north, crossing the Sangre de Cristo mountains into Colorado, continuing up through Wyoming, with a look into Idaho, as far as Montana. Then it was time to get back to Cambridge for graduation and Class Day. I took a position in September, 1903, with the Brown's Tract Lumber Company at Fulton's Chain, N. Y. From there I went, September 1, 1904, to Garden Creek, Buchanan County, Virginia, where the Quigley Furniture Company was getting out oak. Having seen all I cared to of life in the Blue Ridge, I came north to a position

CLASS OF 1903 — THIRD REPORT

with the C. C. Kellogg and Sons Company, lumber dealers, Utica, N. Y. Being unable to stand the fearful monotony of life in a city, I left in September, 1905, for Nevada, where I spent the autumn catching mustangs, moving to Utah for the winter and coming east the following April to dispose of our horses. New York State was home after all. I had seen no country so beautiful as our own Mohawk Valley and no country better adapted to almost any sort of agriculture, so here I have "stayed, farming it" in what is par excellence the farming country of the Empire State. And in the spring, when the ice goes out of the lakes and the winds blow warm, it is an easy matter to saddle up and go for a few days' fishing where the trout strike often; or in the fall, when the first frost comes, your horse will carry you in a fifty-mile ride to where the deer are feeding on the hardwood ridges; or if you haven't time for that, you can put in a pleasant day nearer home with your shotgun among the birds. I have written an article on Guides for Outdoor Life and one on Evolution for the Utica Daily Press. Member: Oneida County Farm Improvement Association, New York State Breeders Association.

Address	<i>(home) 308 South 24th St., Philadelphia, Pa. (business) 1103 Franklin Bank Building, Philadelphia, Pa.</i>

I was married on June 23, 1903, at St. James Church, Philadelphia, and after a wedding trip abroad, returned to

RECORDS OF THE CLASS

Philadelphia, where my eldest son, Daniel Michaux, was born on March 8, 1904. As I understand that the "class baby" is the first child born to a member of the class who has completed four years at college and married afterwards, I wish to put forward the claim of my son Daniel to the class babyship. I am aware that another member of the class has already made this claim for his baby, but as his child happens to be a girl, and was born several weeks after my boy, I feel sure he will be willing to acknowledge the justness of my claim. In the spring of 1904 I moved to Greensburg, Pa., where I lived for a year, working as an assistant engineer for the Keystone Coal and Coke Company. I then went into the coal business on my own account and spent over a year in the wilds of West Virginia. In 1906 I moved back to Pennsylvania, and for three years operated a coal mine in Clearfield County. In 1909 I sold out my operation, partly on account of wishing to bring my family back to Philadelphia, where my boys could go to a good school. Since that time I have acted as a consulting mining engineer, and spent my spare time on a few more or less successful inventions, most of which relate to mining. Member: American Institute of Mining Engineers, Franklin Institute, Historical Society of Pennsylvania, Harvard Club of New York.

My history since college might well, perhaps, be given in the brief words, "graduated in 1903—in 1913 still alive." However, this is a time of reckoning, and what a member of

RECORDS OF THE CLASS

the Class of 1903 has done with the last ten years must, it appears, to a degree at least, be spread upon the records. As I glance back at the time that has passed since I became a graduate, it seems that my life has been governed by two gods: the spirit of modern civilization that gathers its slaves together in cities, and goads them on to toil in the crowded rounds of business, medicine or law, striving for money or fame among men; and the red spirit of the wilderness and the wild, that leads its followers, regardless of the consequences, in search of the still places of the earth and regions where nature yet holds undisputed reign. The first of these two masters carried me through the Harvard Law School, from which I graduated in 1906, through two summers' and a winter's work in Tech. and finally into an office in the city of Boston, in which office I still am and where for the last four or five years I have worked in the practice of the law. The second of my masters has led me not only through the woods and mountains and upon the streams of New England, but also on journeys to regions remote and unfrequented. During the first four years after leaving the Law School I hunted for many months in the Northwest; I saw a summer pass and a fall while I travelled the woods and mountains of the upper Stikine and the headwaters of the Mackenzie in search of bear and moose and sheep; a spring came and a summer went as I wandered among the snowy cloud-shrouded peaks of the Alaska peninsula, trailing the great brown bear in his haunts by the Behring Sea; and again as I followed the bear and the white sheep of the North over the ragged mountains of the Kenai, the fall days grew short and the winters' snows drove down. And in the last three years, even since I perforce have become closely bound to the city and a lawyer's work therein, still my red god has led me each fall for a few weeks to the marshes and barrens of Newfoundland, where the caribou yet move ghost-like among the woods and through the fogs driving low across the opens, and where, as in Saltatha's country of the musk ox, "the lakes are sometimes misty and sometimes blue and the loons cry

LAWRENCE BELDING CUMMINGS

Born	<i>Columbus, Ohio, Feb. 5, 1881.</i>
Parents	<i>John, Julia (Belding) Cummings.</i>
School	<i>Central High School, Columbus, Ohio.</i>
Years in College	<i>1899-1902.</i>
Degrees	<i>A.B., 1903; LL.B. (Indiana Law School), 1910.</i>
Married	<i>Mabel Louise Talbott, Indianapolis, Ind., May 31, 1906.</i>
Children	<i>Talbott, July 23, 1910; John Lawrence, March 22, 1913.</i>
Business	<i>Lawyer.</i>
Address	<i>(home) 2850 North Meridian St., Indianapolis, Ind.</i> <i>(business) Lombard Building, Indianapolis, Ind.</i>

IN September, 1903, I was assigned by the Boston office of the American Telephone and Telegraph Company to the Central Union Telephone Company at Indianapolis, where I remained in the legal department until January, 1907, resigning my position to open a real estate business. I married in 1906, and early in 1907 went abroad with my wife for a trip through the Nile and Jordan valleys and unfrequented parts of the Mediterranean coast. Returning in the fall of 1907, I took up the business of managing trust estates, and to equip myself better for that work entered the Indiana Law School, receiving my degree in 1910. Upon admission to the bar I opened an office for the general practice of law, and since then have been engaged in the pursuit of the elusive client. My work at present is largely in connection with the prosecution of cases for the Juvenile Court. I am one of a forlorn-hope committee of the Bar Association on legal education, a rather futile enterprise with the Indiana constitution limiting the qualifications of an Indiana lawyer to voting age and moral character,—excellent qualities but rather circumscribed, being exactly as much and no more than are demanded of our worthy colleague, the Indiana bartender. I should be delighted to append a list of my offices of honor and trust, except that I have not been thus honored and trusted. My one achievement has been a nearly perfect percentage of attendance at New London and Soldiers Field.

SUMNER WEBSTER CUSHING

Born	<i>Norwell, Mass., Dec. 30, 1879.</i>
Parents	<i>Webster Adams, Amanda Frances Cushing.</i>
School	<i>Normal School, Bridgewater, Mass.; High School, Brockton, Mass.</i>
Years in College	<i>1902-1903.</i>
Degrees	<i>S.B., 1903; A.M. (Brown University), 1910.</i>

Business	<i>Teacher.</i>
Address	<i>(home) 18 Ocean Terrace, Salem, Mass. (business) State Normal School, Salem, Mass.</i>

The first year after leaving college I taught science in the Wakefield, Mass., High School; the next, mathematics in the Waterbury, Conn., High School; the third and fourth, mathematics and physical geography in the Technical High School at Providence, R. I., and studied for my master's degree at Brown. In 1907 I attended the summer session at Harvard, and in September began work at the State Normal School at Salem, Mass., as head of the geography department, which position I am still filling. In the summer of 1908 I did research work in physiography, under the direction of Harvard, in the Central Plateau of France. The next summer I was occupied with graduate field work along the coast of Maine, and during the previous and following academic years with graduate work in the University under Professor W. M. Davis. A Sheldon travelling fellowship was awarded me in June, 1910, to carry on research work in geography in India for the academic year 1910-1911. I proceeded to India via the Mediterranean and returned via Japan and the Pacific, remaining in Japan long enough to study superficially the physiography of the coast lands between Kobe and Tokyo. The results of this work are now appearing in numerous articles in the Bulletin of the Amer-

I gave courses in physiography at the University of Illinois during the summer session of 1910 and similar courses at Columbia University in July and August, 1912. In August, September and October, 1912, the American Geographical Society of New York gave a memorial transcontinental excursion to some seventy European and American geographers, among whom I was counted. Books, articles, etc., which I have written: The Geography of Godavari, A District in India, The Ganges River, The East Coast of India—its Physiography, The East Coast of India—its People. Member: Association of American Geographers, Essex Lodge of Masons, Essex Institute.

After leaving college, where the work is easy and getting a degree is easier, I struggled through the Medical School, where the work is hard and getting a degree is harder. The summer of 1907 I spent as doctor at the Engineering School at Squam Lake. In September I went to the Boston City Hospital, where I remained until about the first of February, 1908, when I became house officer at the Relief Station in Haymarket Square. About the first of June, 1908, I was appointed executive assistant at the Boston City Hospital, where I remained until the first of March, 1909. While there I had my first and, I hope, my only experience with the politicians of Boston. After leaving the hospital I thought that all I had to do was to put up my shingle and patients would flock to my office. What foolishness! After a temporary sojourn in Charlestown I went to Winchester, where I have remained ever since, doing most of my work amongst those people who have been to all the other doctors and cannot get them again. Soon there came to town two other M.D.'s, and the greater part of my practice passed to them. Now I am a country doctor, work any old time at any old thing, and am beginning to have people know that I am in town. Considering my life from the standpoint of society and romance since June, 1903, I will say that it has been a blank, and as yet "the girl" has not shown up. As a student, except in getting closer to nature, I am afraid here again I have made a failure. After a long vacation I started my business career in the office of the New England Mutual Life Insurance Company, December 1, 1903. A year of this was enough, and I then tackled the study of wool. One winter in a Lawrence, Mass., mill and an office apprenticeship fitted me for selling wool, and later I was tried as a buyer in Wyoming and Montana. I liked Montana, and when all family connections in Boston were ended I moved to Billings to live. I buy wool in season and have an interest in a few sheep. Here again

After graduating from Harvard, I was for one year, 1903-1904, a teacher of English literature at St. Paul's School, Concord, N. H.; and for the two following years, 1904-1906, a teacher of English literature at the Thacher School, in the Ojai valley, California. I then returned to Harvard for four years, 1906-1910, studying comparative literature in the Harvard Graduate School. During the last two of those years I taught as assistant to Professor Wendell in Comparative Literature 1. In 1910 I received the degree of Ph.D. in comparative literature. The subject of my doctor's thesis was "Medieval Visions of the Other World." In the spring of 1910 I sailed for Europe, and have been studying for two years in Paris,—the first year on the Hyde Fellowship, or Fellowship of the Ministry of Public Instruction of the French Republic, and the second year on one of the Sheldon travelling fellowships. During the first year I taught at the Sorbonne, or the University of Paris, as a *lecteur d'Anglais*, and later was the *lecteur d'Anglais* at the *Ecole Normale Supérieure*. While in Paris I was one of the group of Harvard men who were helped by Ambassador Bacon to found the Harvard Club of that city. During my stay abroad I travelled not only in France but also in England and Wales,

In June, 1912, I was appointed instructor in the department of English and comparative literature at Columbia University, and since my return to this country in September, 1912, I have been teaching various courses in English and comparative literature at Columbia. Member: Harvard Club of New York City, Faculty Club of Columbia University.

Parents	<i>Charles Erastus, Isabel Canfield (Sage) Darrow.</i>
School	<i>High School and Bradstreet's Private School, Rochester, N. Y.</i>
Years in College	<i>1900-1903.</i>
Degrees	<i>A.B., 1903; A.M., 1904; Ph.D., 1906.</i>
Married	<i>May Goodall, Windsor Beach (White City), N. Y., July 16, 1903.</i>
Children	<i>Edward Goodall, Feb. 28, 1907; Alfred Charles, March 29, 1909.</i>
Business	<i>Teacher and writer.</i>
Address	<i>Point Loma Homestead, Point Loma, Cal.</i>

In July following graduation I married Miss May Goodall of Providence, R. I., and on the 18th of that month Mrs. Darrow and I sailed for Germany, where I studied in the museums of Berlin, Dresden and Vienna. During the academic year 1903-1904 I held the Charles Eliot Norton Fellowship and studied at the American School of Classical Studies at Athens, Greece, and travelled throughout Greece, the islands of the Ægean, Asia Minor and Italy. At Commencement in 1904 the degree of A.M. was conferred upon me by Harvard for additional work done at the University during my senior year. Between the autumn of 1904 and the summer of 1906 I studied as a resident student in the Harvard Graduate School, and received a Ph.D. in classical archaeology in 1906, giving a course in Greek archaeology in the Summer School of the University of that year. In the fall of 1906 I was appointed adjunct professor of Greek in Dickinson College at Carlisle, Pa., while in the fall of 1907 I was called to Drury College at Springfield, Mo., as professor of Greek, and re-

mained there for three years. During my connection with the Drury faculty I was also editor of the official publications of the college. In the fall and spring of 1909 a Springfield minister, the pastor of the young lady then serving as the librarian of the public library of that city, saw fit to attack me violently from his pulpit, demanding my discharge by the college authorities because of my religious beliefs. (My wife had presented the public library with a copy of Madame Blavatsky's Key to Theosophy, which had been accepted with official thanks by the library board over and above the strenuous opposition of the librarian and her pastor.) Since it was known by the college authorities that I had been a member of the Universal Brotherhood and Theosophical Society for many years, and since my private beliefs had never entered into my official activities, as the college claimed to be "unsectarian," as a beneficiary of the Carnegie Foundation, I regarded it as my duty to stand unterrified by the thunders of the ecclesiastical inquisition. In the autumn of 1910 I was invited by Mrs. Katherine Tingley to work at the international theosophical headquarters at Point Loma, Cal., where I have been ever since, taking my place upon the teaching staff of Rajs Yoga College and on the literary staff. I have written many articles in *The Century Path* (1911), and *The Theosophical Path* (1912 and 1913), especially a series entitled "Studies in Orphism" in the latter. Member: Free and Accepted Masons, Knights of Pythias, Universal Brotherhood, and Theosophical Society.

My home, my law practice and the militia have been my chief interests during the past ten years. I was married while in the Law School, and have three husky youngsters that keep me busy at home and they surely do so since their mother's death, three years ago. Our time is about equally divided between Boston in the winter and Hubbardston, a little town near Mount Wachusett in Worcester County, in the summer. My first year out of the Law School was spent with the late Edward I. Baker, Esq., and the last six years have seen me trying to extract fees on my own account from more or less unwilling clients and with widely varying degrees of success. My experience has probably been that of most young lawyers who start out for themselves in one of the larger cities, and certainly not one a detailed description of which would be of

CLASS OF 1903 — THIRD REPORT

the slightest general interest. Military work in various lines has been my "hobby." This has centred in the First Corps Cadets, which I joined during my junior year at college and of which I am now an officer. The drilling, the work at camp or at manœuvres each summer, the rifle matches both indoors in winter and on the outdoor ranges in summer, with now and then a chance for very real usefulness, as at the time of the Chelsea fire and during the strike at Lawrence, have all appealed very strongly to me. On the side, I have done more or less work on genealogy and local colonial history, still manage to play a fairly decent game of tennis, and have played at politics to the extent of serving a few years on the Republican ward and city committee. Member: First Corps Cadets, Military Society of the Loyal Legion, New England Historic Genealogical Society, Unitarian Club of West Roxbury, Harvard Club of Boston.

Business	<i>Social worker.</i>
Address	<i>112 Salem St., Boston, Mass.</i>

I connected with the Civic Service House, a social settlement house in the North End of Boston, the first year I came to Harvard, owing to previous interest in the work at Hull House, Chicago, where I partially prepared for college. My work at the Civic Service House during the two years I was at Harvard was in connection with the organization of local trades. After graduating from Harvard I got leave of absence from the Civic Service House, and for a year acted as national organizer in the Ladies' Garment Workers' unions. I visited all the industrial centres for the purpose of effecting a better organization in the garment trades, which in those sweat-shop days needed organization badly.

RECORDS OF THE CLASS

I returned to the Civic Service House to assume the position of associate director to Meyer Bloomfield, and have been at the House ever since. For five years, however, between 1906 and 1911, I served the Boston school committee as supervisor of licensed minors, in charge of three thousand licensed newsboys and bootblacks and pedlers of school age. My position was that of child-labor inspector of street work done by children who attended school. I gave my days to this work and my nights to the Civic Service House. I resigned this position of supervisor to take full charge of the Civic Service House as head worker and successor to Meyer Bloomfield. My work at the Civic Service House brings me in touch with many organizations working for the improvement of civic, social or industrial conditions and necessitates membership in a good many of them, such as the Boston City Club, the Twentieth Century Club, Association for Labor Legislation, etc. The work calls for coöperation with many existing agencies and for membership on various committees either created by the House or by other agencies which have invited the House to join. For example, I am one of the supervisors of the Credit Union, a remedial loan and saving association, and am one of the directors of the Home Savings Society. Books, articles or plays which I have written or translated: *Child Life on the Street* (see reports of Charities Conference), *Americanizing the Immigrant* (Outlook, June, 1905), *Naturalization* (pamphlet on file in Boston Public Library), *Education and Population* (two chapters in a book on *Jews of America*: Dr. Bernheimer, editor); occasional contributor to *Boston Transcript*, special articles on Truancy, Immigration, etc. Member: Twentieth Century Club, Boston City Club, Monday Eve Club, Boston Social Union, Home Savings Society, Boston Home and School Association, Employment Managers Association, Association for Labor Legislation.

After graduation I entered the employ of the American Car and Foundry Company, being two years at the works at Berwick, Pa., and six in their New York office. The last year I was connected with this concern my time was taken up almost entirely with export work, from which it was an easy transition into their foreign sales department (Dutilh-Smith, McMillan and Company). A year later I decided to enter business for myself. Member: Harvard Club of New York, Heights Casino of Brooklyn, Hamilton Club of Brooklyn.

continued my study there until February, 1906, when I returned to Northwestern University as a temporary instructor in economics. At the close of the year I was appointed instructor. During the summers of 1906 and 1908 I continued my study at the University of Wisconsin, where I took the degree of Doctor of Philosophy in June, 1909; then I was made an assistant professor of economics for a term of three years. In June, 1912, I became an associate professor of economics on indefinite appointment. From 1910 to the present time I have been acting head of the department of economics. Here endeth my biographical sketch from the time of leaving Harvard University in June, 1904, until the 14th of January, 1913. Books, articles or plays which I have written or translated: History of the Amalgamated Wood Workers' International Union of America, Wisconsin Studies; several pamphlets and articles. Years in College	<i>1899-1903.</i>
Degrees	<i>A.B., 1903 (1904); S.B., 1904.</i>
Married	<i>Evelyn Hetherington Hind, Brookline, Mass., Nov. 2, 1911.</i>

After receiving my S.B. in metallurgical engineering from Harvard in June, 1904, I became superintendent of the Maine Tourmaline Company of Auburn, Maine, where I remained until October, 1904. This was quarry work, and a large part of my time was spent in active association with a steam drill. The work stopping with the coming on of winter, I was glad to get a position with the Federal Lead Company of Flat River, Mo., as diamond drill inspector. There were five other Harvard men on this work, and no opportunities were neglected for a good time. Leaving Flat River in September, 1905, I went to Cripple Creek, Colo., and spent two months on underground work for practical experience. This was severe work, for while there were many college men getting the same experience, no favors were shown them over the common mine laborers. In December, 1905, I went to Matchuala, S. L. P., Mexico, as engineer for the Minas Dolores y Anexas, a property controlled by the Guggenheims. In March, 1906, I made a visit home and returned to Mexico in April where I was located at San Luis Potosi, S. L. P., until September, working mining properties under contract. At that time I made a prospecting trip into the states of Michoacán and Jalisco, located six mines known as the Santa Inez group, floated a company to work them, and until October, 1909, was occupied in working and developing these mines as well as doing odd engineering jobs in the western part of Mexico. In July, 1909, I had the typhoid fever. Convalescing slowly, I returned to Boston in October, and being advised not to return to Mexico for a year or two, I took a position with the engineering department of the Boston Transit Commission. The revolutions in Mexico have prevented my re-

CLASS OF 1903 — THIRD REPORT

turn there. In 1912, my health still being below par, I spent six months in Europe with my wife. Returning last November, I have again taken up my work with the Boston Transit Commission. Needless to say, this work seems very tame and dull compared with life in Mexico, but the event of November 2, 1911, in which I took one of the leading parts makes me more than contented here and even glad that I had the typhoid fever. I am about the same weight as when I left college, have no beard or moustache, and have only one hobby—the single tax. Business *Lawyer.*
Address *(home) Rye, N. Y.*
 (business) 27 William St., New York, N. Y.

I entered the Harvard Law School in September, 1903, and graduated in June, 1906. I served as secretary to Mr. Justice Holmes of the United States Supreme Court from October, 1906, until October, 1907, when I was appointed a deputy assistant district attorney of New York County under William Travers Jerome, which office I held until the end of his term, January 1, 1910. Upon the latter date I entered private practice, in which I am still engaged independently. From October, 1910, to date I have given part of my time to teaching law in the law school of New York University in New York City, and have taught the following subjects: criminal law, agency and quasi contracts. A large part of the year 1910-1911 I acted as special counsel to the attorney general of New York State, assisting in the grand jury investigation and trial of indictments for graft on the part of city officials in Queen's County. I have written a Case Book on Criminal Law (in preparation). Member: Harvard Club of New York.

Business	<i>Teacher.</i>
Address	<i>12 Trowbridge St., Cambridge, Mass.</i>

After spending the year 1903-1904 in the Harvard Graduate School, I taught for a year in Hobart College, Geneva, N. Y. Since then I have been in secondary school work, most of the time teaching Latin, Greek and German in the Cambridge Latin School. The year 1911-1912, however, I taught in the B. M. C. Durfee High School in Fall River, Mass. I have been near enough to Alma Mater to take an occasional course in the afternoon or in the Summer School, and to keep a watchful eye on the pitiful efforts of later classes to approach the standard set by 1903. O quae mutatio rerum! In the summer of 1908, and again in 1912, I spent the long vacation in travel and study in Europe. Member: Harvard Union; various professional organizations, such as Harvard Teachers Association, Classical Association of New England, National German-American Teachers Association, Modern Language Association of New England.

Address	<i>(home) 1518 Astor St., Chicago, Ill. (business) 105 South La Salle St., Chicago, Ill.</i>

In the fall of 1903 I entered the Department of Law of Northwestern University. I completed the course in June, 1906. Two circumstances—a timely epidemic, which put several of my classmates in bed at that critical period preceding examinations, and my thorough mastery, while at Cambridge, of the practice and theory of cramming—resulted in my graduation at the head of my class. After passing the bar examination of Illinois, I entered the law office of Holt, Wheeler and Sidley, in Chicago, where I remained until the following year. In the latter part of 1907 I took a position with Bentley and Burling, another law firm, remaining with them until the fall of 1908. In November of that year I was married, went to the Pacific coast on a wedding trip, and on

my return took a position in the legal department of Peabody, Houghteling and Company, a Chicago banking and bond house. After working up until I was in charge, in a supervisory way, of the legal work connected with the firm's bond underwritings, I had an opportunity of trying the commercial side of the business, and now hold the place of office manager. My vacations have been spent variously in the open air, on a cruise in Georgian Bay, a walking trip in France and Switzerland, canoe voyages in Canada and elsewhere, a pack trip in the Big Horn Mountains, and similar excursions, in all of which my wife now joins me. My small Boston terrier, Nibs, who was much more popular than I at Cambridge, thanks to a polished manner and an ardent disposition, is no longer with me. Circumstances led to a separation, and his later years have been shrouded in mystery. I have done various condensing and summarizing work as undergraduate editor of the Illinois Law Review. In order to begin the study of medicine a year sooner, I left Cambridge in the spring of 1902. The ensuing eleven years, which have been devoted to medical study, fall clearly in three groups: the first, of four years (1902-1906), were spent as a medical student at the College of Physicians and Surgeons in New York; the second group, of two years (1906-1908), as an interne at the Presbyterian Hospital of New York; and the last four (1908-1912), as a research worker in medical problems. The first year of this last set I spent in Germany, partly in the pathological laboratory at Frankfurt-on-the-Main, but chiefly in Professor Müller's splendid clinic in Munich. There I became interested in the circulation, and with Dr. G. C. Robinson published a long and exceedingly dull paper on the presphygenic period. The following year found me resident pathologist at the Pennsylvania Hospital in Philadelphia, which I left after thirteen months to become one of the assistant resident physicians in the new hospital of the Rockefeller Institute. I served there

two years, continuing the investigation of cardiac problems and also taking up the study of infantile paralysis and scarlet fever. In May, 1912, I resigned from the Rockefeller Hospital to go into the practice of medicine, and in July was given the appointment of assistant visiting physician to the Presbyterian Hospital. From time to time throughout the last four years I have published articles on medical subjects, alone or in collaboration with others. The Orthopedic Hospital of New York appointed me attending physician on December 1, 1912. I have written, alone or in collaboration, eleven articles on medical subjects. Soon after graduation I entered the employ of the General Electric Company at Schenectady, as a member of the testing department. After about a year and a half I was transferred to the engineering office and specialized in the protection of electrical apparatus against lightning. Early in 1911 I was transferred to the New York office of the General Electric Company as a salesman and as such travelled over New York State. While living in Schenectady I became a member of the National Guard, joining Troop B, cavalry, of Albany, and when I moved to New York I also transferred

from Troop B to Troop C, a troop of the same regiment but part of the First Squadron (Squadron A). I took part in the War of 1912 in Connecticut, acting as gunner on the machine gun crew, and not only killed many of the Reds, but was undoubtedly killed several times myself. In the spring of 1912 I left the General Electric Company and entered the employ of the Crocker-Wheeler Company as an engineer. Member: Harvard Club of New York, Squadron A Club.

On securing leave of absence from Harvard in 1902, I entered the College of Physicians and Surgeons (Columbia University), New York, where I spent the next four years. During the last year I was fortunate enough to pass in a competitive examination which secured me a two-year appointment in the Presbyterian Hospital, New York. During a six months' interval, before going on service in the hospital, and again for another six months after leaving the hospital, I studied pathology and physiological chemistry in Berlin and finished some research in the clinic of Fr. Kraus. In 1909 my year's service in the same hospital as assistant pathologist under Eugene L. Opie began. The next year I went to the Cornell University Medical College as instructor in applied pharmacology, a position which I still hold. For two years I spent most of my time in medical research, but had some private practice. In 1912 I was appointed medical director of the Russell Sage Institute of Pathology under Dr.

Graham Lusk. At the same time an appointment as adjunct assistant attending physician at Bellevue Hospital was given me. In order to have sufficient time for research, private practice was given up temporarily. The Russell Sage Institute of Pathology has just finished the construction of a respiration calorimeter of the Atwater-Rosa type in the wards of the Bellevue Hospital, so my next four or five years will probably be devoted to a study of metabolism in disease. Books, articles or plays which I have written or translated: Energy Requirement in Diabetes Mellitus (with B. S. Veeder), Absorption of Food in Typhoid Fever; edited Harvard University Songs. Member: Harvard Club of New York, Harvey Society, Society for Experimental Biology and Medicine, Alumni of Presbyterian Hospital, New York Academy of Medicine.

After leaving college in 1904 I spent one year at home on account of my father's poor health, and in December, 1905, went to work with the Westinghouse Electric and Manufacturing Company of Pittsburgh, Pa., remaining with this company for two years. In December, 1907, I took a position with the Canadian Westinghouse Company, Limited, and have been located at this company's Montreal office for the past five years. On November 15, 1912, my father's illness and death made it necessary for me to come home to Sutton, and I am at present temporarily located there.

The first half of 1908 I travelled in Europe, visiting Constantinople, points in Asia Minor, and going up the Nile as far as Cairo. Upon my return I went into business for myself, and at the present time am trying to work out a successful and, incidentally, a remunerative conclusion to a very interesting manufacturing proposition. I am afraid I am as much a crank as ever on the subject of shot-gun shooting, and incidentally have done a little big game shooting on the side since leaving college. I have been stung badly by the auto germ, but after ten

The day after Commencement in 1903 I returned to my home in New London, Conn. The next morning before eating breakfast I accepted a position as teacher in the Bulkeley School (Boys' High) in my home town. At that place and school I've been ever since. It has been good to be in New London on the several occasions when Harvard has beaten Yale on the Thames. In the third year after my return I undertook the duties of principal of the evening school. The task was not too arduous for me to continue working at it for six years. In 1911 I quit, glad of the freedom thus gained. Back in 1905 I essayed a summer course at Columbia. The bright spots in that enterprise were a trip to Ellis Island and a visit to Sleepy Hollow. One bright morning in the spring of 1908 Professor Charles H. Judd of Yale, state examiner of high schools, visited my classroom. By chance I had at hand my notebook containing a complete outline of the work I was teaching. Professor Judd liked my plan well enough to have it published in one of the pamphlets of the state board of education. Thankful was I that I had taken a few courses in education under Professor Hanus. In February, 1911, I had the thrilling experience of serving on a committee of one hundred citizens of New London, chosen to raise one hundred thousand dollars in ten days for a proposed Connecticut College for Women, the college to be located in New London. Our committee raised one hundred and thirty thousand dollars in the time set; Mr. M. F. Plant gave a million dollars to make

the project a reality. This spring ground will be broken for the first building. Several times during the past three or four years I have read papers before the English Round Table of the state teachers' association without any real calamity occurring. I am waiting patiently for Harvard to beat Yale on the Thames in June. Articles which I have written: Experience Day (Leaflet of New England Association of Teachers of English, April, 1912), An Experiment with Magazine Literature (The English Journal, May, 1912), Experience Day (The English Journal, October, 1912). Since I left Cambridge dazzled by R. Washburn Child's "patch upon the seat of learning," I could do nothing but teach, and ten years of teaching are simply told. Two years at the University of Maine, five at the High School as instructor in English and public speaking, and three years at the Cheshire School as instructor of French, complete the tale. And nine long summer vacations in camp or cottage could hardly appeal to the turbulent energy displayed in a 1903 class report. ("Fie on the vacations!" I hear Abercrombie sniff.) In order to complete my work for a civil engineering degree I remained at Harvard until June, 1904, when I went to Chicago to work with the Pennsylvania Company. After two months of railroad maintenance work I returned to New York to take up subway construction as an employee of the Rapid Transit Commission. Three years later, with the completion of the subway, I changed to board of water supply work, and for another three years I was located in Walden, N. Y., working on the one-hundred-mile Catskill aqueduct. As the aqueduct work was nearing completion, I moved again,—this time to Waycross, Ga., where, as chief engineer of a very small railroad, I made several hundred miles of surveys and estimates for extensions of line, none of which was ever built.

Eight months of this work and I returned to subway work in New York. The new Brooklyn subways were under construction and the Lexington Avenue work was about to begin. As constructing engineer for the Bradley Contracting Company, I was located first in Brooklyn on the Fourth Avenue subway and later on the Lexington Avenue subway in Manhattan. At present I have charge of the construction of that section of the Lexington Avenue subway between 53d Street and 67th Street. I am a manual training man,—was one before I entered college, and went at it again after leaving. I never intended to be a teacher, but I began, and like any other habit, bad or good, it has clung to me. I have tried on several occasions to swear off,—the first, when I left college with an architectural and building fever, of which I occasionally even now

have mild attacks. However, from the spring of 1901 to 1905 I taught steadily in Boston. Then came another attack,—first as an advertising manager, then as foreman of a factory, but back to teaching, my normal vocation, I went in January, 1906, introducing manual training into the public schools of Savannah, Ga. I was in the South for six years, returning to Boston in the fall of 1911 to take my place on the supervisory staff in the department of manual arts. I have charge of the elementary wood-working rooms in Boston. On several occasions I have taken part in Georgia state teachers' conventions. I have been secretary of the Savannah Teachers' Library Association, and chairman of the board of deacons of the Westminster Presbyterian Church. In Boston I have served one year as superintendent of the Harvard Church (Dorchester) Sunday School, and am at present secretary of the Boston Manual Training Club, of which I am a charter member, and which has grown from a membership of seven to two hundred. RECORDS OF THE CLASS

Among men from Harvard, Yale, Princeton and a score of other colleges, men from the eastern edge of Maine to the Golden Gate, men filled with the zeal of a common purpose, responsive for the first time to the thrill of acquiring mental power, who met for three keen, wit-clashing years in the debate of the classroom or the less formal, though often more heated discussion around the table at "Mem,"—three glorious years in the best law school in the world, Harvard,—I found my introduction and inspiration to my chosen profession. Those years would make the rest of life seem an anticlimax, except that afterwards you shoot real bullets instead of blank cartridges, but the game isn't at first so big. For example, as editors of the Harvard Law Review we tore to shreds the decisions of the United States Supreme Court with equanimity. The next year I learned to tremble before the Municipal Court of the City of Boston. In those ambitious days I begrudged idle moments, so filled the chinks in my Law School career by performing the duties of graduate manager of Harvard athletics. I managed the first Yale football game in the Stadium, and once bearded the great Walter Camp in his own private den—and am still alive. My summers were not idle either. In 1903 I travelled through the Canadian Rockies and up the south coast of Alaska. On my way home I explored the bottom of the Yellowstone Canyon and shot the Sault Ste. Marie Rapids in a canoe. In 1905 Bob Cross and I sweltered in Italy long enough to relish some scrambles among the snow fields of Zermatt and Chamounix, and I completed the summer among the chateaus of Touraine and in the Channel Islands. I started law practice in 1906 with the firm of Ropes, Gray and Gorham of Boston, where I still am, now as a partner. My practice has been enjoyable and sufficiently diverse to have given me good experience. It has consisted in large part of probate and corporate matters, especially in passing on the issue of the securities of public service companies. I have not indulged much in trial work, but have experienced a few times that intense excitement of a jury trial. I have not found time for many avocations, but have

followed politics with keen interest and some activity. I have gone far enough in it to say, with the small boy, that I will sell my chance of being President for ten cents. My most strenuous efforts were made in the successful fight for the adoption of Boston's new charter, in the drawing of which my father, as a member of the Finance Commission, had been largely instrumental. Last but not least of my pleasures has been the chronicling of the achievements of the glorious Class of 1903! After leaving college in June, 1903, I spent the summer very pleasantly with my parents in Akron, Ohio. In the fall of the same year I went to Spokane, Wash., to take my first school. This was a private school. I found the work there rather unpleasant, and at the end of that year I severed my connection with that school and came to California. I spent most of the summer of 1904 in San Bernardino. While at this place I secured the position of principal of the El Cajon Valley Union High School in San Diego County. I took charge of this school in September, and held that position for two years. This school is situated

in the country, and for this reason, as well as for the fact that I was principal, I had many new and enjoyable experiences during those two years. It was during my connection with the Union High School that I met my wife. In June, 1906, I resigned the principalship of this school to take a position as teacher of mathematics in the Monrovia High School. Very soon after my marriage I was offered a position on the faculty of the Los Angeles Polytechnic High School, which I accepted. I am still connected with this school. Since living in the city a fine boy has been given us. He appears to be promising material for a future son of Harvard. Member: Los Angeles City Club.

Business	<i>Stock broker.</i>
Died	<i>April 14, 1909.</i>

Alan Motley Fay, the son of Joseph Story Fay, Jr., and Rebecca Rodman Fay, was born in Boston, October 23, 1880. His early education was received first at the Fay School in Southboro and later at St. Mark's School, where he prepared for college. In the autumn of 1899 he entered Harvard College, graduating in 1903 with the degree of A.B. His first business experience was obtained with the Old Colony Trust Company of Boston, where he remained for two years, after which he entered the services of the brokerage firm of Tower and Underwood of Boston. In 1906 he purchased a seat on the Boston Stock Exchange, and formed a partnership with Rufus L. Sewall, under the firm name of Sewall and Fay, with offices in the Sears Building, Boston. Sewall and Fay carried on a banking business, and he remained with that firm until his death on April 14, 1909. He was also associated with the Electric Goods Manufacturing Company as secretary

and director, and was vice-president and treasurer of the Power Development Company, an engineering corporation. He was a member of the Somerset and Tennis and Racquet Clubs of Boston. One of his distinguishing characteristics was his broad and accurate knowledge of a wide variety of subjects, due to his investigating nature and extensive reading. This, combined with excellence as a conversationalist, made him a delightful companion. His gentle and sympathetic nature was felt by those in many walks of life, and his death caused great sorrow to all that knew him.

CLASS OF 1903 — THIRD REPORT

Having completed in three years the requirements for my degree, I was accorded a leave of absence during the college year 1902-1903, returning to Cambridge in June, 1903, to take my degree with my class. During the year's leave, and until June, 1907. I was English master at the Tome School for Boys, Port Deposit, Md. From September, 1907, to the present time, I have been English master at St. Mark's School, Southboro, Mass. During a summer in Europe in 1906 I became interested in our consular and diplomatic service, and for several summers have devoted my entire vacations to study and work in the American foreign service. The past five summers have been spent as follows: 1908, assistant in the American consulate general, Budapest, Hungary; 1909 and 1910, assistant in the American consulate general, Paris, France; 1911, secretary to the Honorable Charles Page Bryan, American minister, American legation, Brussels, Belgium; 1912, secretary to the Honorable Curtis Guild, American ambassador, American embassy, St. Petersburg, Russia. From June, 1913, to September, 1914, I shall be on sabbatical leave from St. Mark's School, passing the entire period in Europe.

The opportunity to teach economics at Harvard came to me, quite to my surprise, near the close of our senior year. That autumn found me a graduate student, installed as proctor in Apley Court, and section hand in Economics 1. The next year I was appointed Austin Teaching Fellow in Economics, and took up, in addition to my duties in Economics 1, the work of assisting Professor Carver in his course on social problems,—Economics 3. I sailed for Europe in August, 1905; studied during the winter semester at the University of Berlin, and rounded out nearly a year abroad by attending lectures in Paris and by reading in the British Museum library. From September, 1906, to June, 1908, I was instructor in economics at Harvard. In the summer of 1908 I accepted the offer of an instructorship at the University of Chicago, where I have since been teaching economics, specializing in statistics and the theory of population. I was made assistant professor of political economy in 1910, and am to advance this year (1913) to the rank of associate professor. Three years ago I revisited the British Museum and delved in manuscript records of a social reform propaganda of the early nineteenth century. I have written a little on the results of that study and on the related subject of eugenics, and have coöperated with my associates, Professor L. C. Marshall, 1901, and Professor C. W. Wright, 1901, in the preparation of two text-books embodying a method of teaching elementary economics which we have been working out together for the past five years. On the side, I am managing editor of the *Journal of Political Economy*; and

Francis Fisher, the son of George H. Fisher (Harvard, 1870) and Betsey Riddle, was born in Philadelphia, Pa., October 29, 1881. He was a delicate child and illnesses of various kinds interrupted his studies. but he finally became strong and healthy and skilful at cricket, shooting and riding. He had a turn for music and played a little on several instruments. He was prepared for college at St. Paul's School,

RECORDS OF THE CLASS

Concord, N. H., where he remained from 1895 to 1899, when he entered the freshman class at Harvard College. During the vacation at the end of his sophomore year, in 1901, he started on a cruise with his uncle in a small steam yacht, and while off the New Jersey coast on a foggy night the yacht was run down by a steamer of the Clyde Line. Fisher after gaining the deck of the steamer with all of the crew of the yacht, saw that his uncle was left behind alone. The captain of the steamer refused to allow them to lower a boat, so Fisher and some of the crew went down the steamer's side on ropes. Fisher failed to make the yacht's deck and while in the water was caught in the steamer's propeller and killed. This happened July 13, 1901. A college classmate writes of him: "Francis Fisher dead is an impossible thought. Never was any one more alive. Life bubbled up in him; it bubbled over too and happy are those who were near him to be refreshed by it. When, for instance, he captained that select organization, the Second Cricket Team, one saw sport for sport's sake. Professionalism was as far away as Chicago is from Philadelphia. He played for fun; and he had so much fun in him to put into the game that his team won. It was the same at the theatre or the opera. When he enjoyed it, he enjoyed it violently. He was not indifferent to anything or any one; only he usually kept his dislikes to himself, and let his likes explode in prodigal showers of golden enthusiasm. Such vitality, such unselfishness, such splendid intemperance, were certain to reach a great climax. In the summer after our sophomore year he lost his life, or rather he gave away his life with characteristic self-forgetfulness and generosity. While at sea on his uncle's yacht, it was run down at night by a steamer. In attempting to reach his uncle on the crippled yacht the steamer backed down on him and he was killed. Such life persists. We who knew and loved him still know and love him. And as Christians we believe and hope that we shall some day see him with our risen Saviour, in whom he trusted unto death. In his life he was our delight, in his death our inspiration."

In August, 1903, I entered the employ of Rogers, Brown and Company, pig-iron merchants, with which concern I am at present connected. With the exception of the winter of 1904, when I was in their New York office, I have been connected with their Boston office, at present being head salesman in the New England territory. In the summer of 1907 I travelled in Europe, part of the time being spent in visiting the blast furnaces of our English connections. Aside from regular trips through New England, I have travelled extensively through the East, South and Middle West, visiting various iron, coal and coke producing centres. In 1909 and 1910 I was a member of the Boston Society of Arts and Crafts, being one of the metal workers. Up to 1912 I was a member of the Harvard Club of Somerville. Member: Harvard Club of Boston, New England Foundrymen's Association.

My first job was an easy one and the next three were very short ones, as I spent my first year out of college in covering as much of the country as I could. In January, 1905, I settled down to hard work and started a three years' course as special apprentice in the Pennsylvania shops at Fort Wayne, Ind. When I was graduated from the shops as a full-fledged machinist, I was appointed motive power inspector, and travelled out of the office of the superintendent of motive power in that capacity for almost two years. They sent me to New Castle, Pa., in November, 1909, as assistant to the master mechanic at that place, and ten months later I was again moved to Pittsburgh as assistant engine-house foreman at the Allegheny shops. I held this job for almost a year and a half, and went through the Pennsylvania strike of 1911 in the thickest part of the trouble. Since April, 1912, I have been general foreman at Fort Wayne. I am still unmarried. Member: Harvard Club of Western Pennsylvania.

Since leaving college I have spent the usual four years at the Medical School, interrupted for one year by sickness. July, 1908, I went on surgical service at the Boston City Hospital as interne. Eighteen months later I went to the Children's Hospital for a six months' appointment as house surgeon. The resident surgeons at the East Boston Relief Station was then offered me, which position I held for almost a year. I left to travel in the interest of the Children's Hospital, as their resident surgeon-elect. From that time up to September, 1912, I have been travelling and working in the orthopedic clinics of Europe and America. I am now back at work as resident surgeon of the Children's Hospital, Boston. I have written a few small articles for medical journals of no great consequence. Member: Massachusetts Medical Society, Boylston Medical Society, Æsculapian Club.

After one year in the Graduate School and three years in the Law School, I went abroad in the autumn of 1907 and spent the winter in Rome, Italy, attending the lectures of the American School of Classical Studies, as an associate member. In March, 1908, I joined a group of four college men, including D. P. Lockwood, 1903, in a tour of Greece, returning to Naples in May to attend lectures at Pompeii given by the American School. The month of June was spent in Sicily with C. E. Whitmore, 1907, and Class Day was duly celebrated by us at Syracuse. From July to November I travelled through central and northern Italy, with a short walking trip in the Black Forest in Germany, and returned to Rome at Thanksgiving. At the time of the Messina earthquake I was in Rome, and joined the first relief expedition, organized by the American ambassador under the auspices of the Red Cross. On board the relief ship *Bayern*, which remained for ten days in the earthquake region, I was cashier in charge of the funds and superintended the forward hold of the vessel. It was my good fortune to execute many commissions on shore. The members of the expedition were awarded silver medals by the Italian government. Immediately after returning to Rome I went to Egypt for two months, where I joined another Harvard man in a caravan trip from Assuan into the Libyan desert to the oasis of Kur-

years later an M.D. After a breathing spell in Europe and at home, I again went into retreat as a member of the house staff of the New York Hospital, on one of the surgical services. After two years in this institution I married and went to Europe, where my wife and I travelled a good deal and where I studied pathology for about two years in Munich and two months in Berlin. Leaving Munich in July, 1912, I came with my wife and our "Müncherer Kind'l" to Boston, where I had obtained a position as assistant in the department of pathology of the Harvard Medical School. There I may now be found teaching second-year students, doing hack-work and research, and explaining the meaning of the term "pathologist." Books, articles or plays which I have written or translated: Ueber das Wachstum von Knochenmark in vitro (Ziegler's Beiträge, LIII, 1912), Ueber das Verhalten des Hübner Knochenmarks gegen Immunplasma (Centralblatt für Allgemeine Pathologie, XXIII, 1912), The Growth of Chicken Bone Marrow in Vitro (Journal Exper. RECORDS OF THE CLASS

Upon leaving Harvard in the summer of 1900 I was engaged in the poultry business in my home city, Williamsport, Pa., for one year. In the fall of 1901 I was employed by the Bowman, Forsman Lumber Company, of St. Albans, W. Va., where I remained two years, leaving there in the fall of 1903 to go to Eureka, Cal., where I was employed in the Hammond Lumber Company, in their mill, lumber yard and logging camps. Leaving there in the summer of 1903 on account of poor health, I returned to my home at Williamsport, Pa., intending to return to California in a few months, but I found, on account of illness in my family, it was best for me to remain, which I did until the spring of 1908. I then came west to Tacoma, spent one year up in Vancouver, British Columbia, and then took up my residence in Tacoma, Wash., where I have been engaged in the timber and logging business ever since, being half owner and secretary-treasurer of the Maple Valley Logging Company. In holding offices of honor or trust I can only mention those of treasurer of the Tacoma Lawn Tennis Club, vice-president of the University Club of Tacoma, and the above-mentioned position in the Maple Valley Logging Company. I have been a chemist in the laboratory of the Jones and Laughlin Steel Company, Pittsburgh, where I stayed one year (1902), then returned to Utica and entered the employ of David S. Foster, wholesale dealers in iron and steel, coal and heavy hardware. I was admitted to partnership in 1904, the

firm name being changed then to David S. Foster, Sons and Company. I have continued in this firm ever since, and at the present time have full executive charge of the business. I held the position of vestryman and treasurer of St. Luke's Episcopal Church, Utica, from 1903 to 1906. I have been a delegate to the Republican assembly and city conventions of Utica in the years 1905, 1906, 1907, and 1908, and secretary of the Republican city convention of 1907, also candidate for alderman on the Republican ticket in 1906. I have written: Noah's Log Book, being the Chronicles of Noah during the Days of the Flood; short stories for the Boston Sunday Post and Pittsburgh papers, also several articles for the Utica papers on civic government, and some humorous stories for Judge's Library. Member: Down Town Club of Utica, Republican League of Oneida County, Fort Schuyler Club of Utica, Sadaquada Golf Club of Utica, Republican Club of Utica.

Parents	<i>Hatherly, Emma (Bickford) Foster.</i>
School	<i>High School, Brookline, Mass.</i>
Years in College	<i>1899-1903.</i>
Degrees	<i>S.B., 1903.</i>
Married	<i>Ruth Crosby Thomas, Boston, Mass., Sept. 1, 1906.</i>
Children	<i>Summer Hatherly, Feb. 8, 1910.</i>
Business	<i>Merchant.</i>
Address	<i>(home) 56 Harvard Ave., Brookline, Mass. (business) 246 Summer St., Boston, Mass.</i>

The summer following graduation I spent travelling in Europe, and on my return to this country entered the retail clothing house of Macullar, Parker and Company of Boston, in which firm my father was a partner. After a few months I left temporarily to work in the various departments of a woollen mill at Hyde Park, Mass., with the idea of obtaining a knowledge of the manufacture of cloth. While at this mill I became interested in the wholesale wool business, and in the fall of 1904 obtained a position with Mr. F. N. Perkins, a Boston wool broker and commission merchant, with whom I

stayed until January 1, 1909. On this date I started the firm of J. W. Foster and Company, and am to-day carrying on the same line of business. I have continued my interest in sports, playing hockey winters with the Boston Hockey Club and Boston Athletic Association teams and golf in the summer time. Member: Harvard Club of Boston, Noanett Tennis Club of Jamaica Plain.

Business	<i>Consulting mining engineer.</i>
Address	<i>Tonopah, Nev.</i>

After receiving my degree of S.B. in mining and metallurgy in 1903, I spent a year in Cambridge as Austin Teaching Fellow in mining. The following fall saw me working on the timber gang in Cripple Creek, but I am glad to say that this phase of my career was short. The month of December, 1904, found me in the lead belt of Missouri and 1905 and 1906 in the iron country of Michigan. In November, 1906, I came to Tonopah, just in time to see the Goldfield boom at its maximum. From then until the present date I have made the Sagebrush State my home. The four years following the fall of 1906 I served the Tonopah Mining Company in several capacities,—geologist, engineer and assistant superintendent. In November, 1910, I left to become manager of the Hot Creek Development Company, operating at Rattlesnake, Nev., seventy-five miles from Tonopah, and incidentally seventy-five miles from the railroad. Last fall I returned to Tonopah to accept a position as examining engineer with a western company, and at the present time am pursuing that line of work.

"Oh you Four Winds that blow so strong
 And know that this is true,
 Stoop for a little and carry my song
 To all the men I knew."

I began the Hereafter on the engineer corps of the Pennsylvania Lines at Pittsburgh, spending a year and a half there. Then, harking to the "sound of the coast," I hit the trail for a smokeless sky and Seattle in 1905. For a year I knocked about the country acquiring local color, first accompanying a hard-luck railroad outfit to Nome, Alaska. The rolling stock was landed, the ties were washed overboard and the rails were kept aboard for ship's ballast. We, the party, were stranded. Working out on a windjammer, I received various experiences and the nautical degree of A.B. decorated with the nautical "summa cum" of "very good." I received also one month's pay of two bits, which is a quarter in Boston. Back to the tall timbers from Seattle, hibernating for the winter, logging. I received more varied experiences, really most interesting and enjoyable ones, but with the spring birds hit the pike for the open again. With a bad attack of spring fever, from the still unquenched wanderlust, I chewed meditative pencils for a while on an office stool overlooking Puget Sound's deep-sea shipping. But the Milwaukee's Pacific Extension needed me, so back to the mountains I went as resident engineer just to help them over the summit in the Cascades. Next I

made a breakaway from railroading to concrete construction with Gilbreth, the contractor, and remained with him in Seattle and in San Francisco just after the fire for one strenuous year. On my brother's death in 1907, I went home to Boston, continuing his boat-building business for a year and a half; then back again to concrete construction, first with Turner in New York and then in the Puget Sound country. The past year I have been in the Hinterland of British Columbia, about the "sunny Okanagan," putting in domestic and irrigation water systems. The future—*quien sabe!*

Some time in June, 1902, I left college, after two years' attendance. I was then entitled to my degree, having at the entrance examinations passed off a number of subjects for advanced standing. I preferred, however, to return the following year and graduate with my class,—The Glorious Class of 1903. My original intention upon leaving school was to go in for pedagogics, but it soon became apparent to me that this vocation would provide too meagre a livelihood. I therefore accepted the position of credit man with the wholesale dry goods house of N. Freedman and Company, Boston, which position I held from June, 1902, to March, 1905. The following June I married Kathryn Eyges of Boston, a distant cousin. Always a prolific reader of the "humanities," I acquired also, during my mercantile career, a fund of commercial legal knowledge, and soon drifted into the study of general law. In October, 1905, I enrolled at Boston University Law School as student in the two-year course for college graduates. The following June I passed the state bar examinations, and at once engaged in law practice. Since then and up to the present time, I have been associated with L. R. Eyges and R. S. Wyner as law partners, with offices in the Kimball Building, Boston. Member: Harvard Club of Boston.

March of 1903 saw me paddling my canoe vigorously through Sicily, Italy and Switzerland, all by myself. Then it was that our own Ned Fitz collared me and personally conducted me through Paris and London. Then, thinking that I had had enough, he saw me safely back to these parts. That was the beginning of things. Next I did wild-

horse stunts on Roy Pier's ranch in California, and then followed a four years' period in our little town of Boston, where I performed other stunts for myself, this time in the manufacturing of crackers. About then I began to learn things—I am still! The honors conferred upon me have been many, of course, though at this writing I don't seem to remember what they are.

The year following my graduation I spent in the Harvard Law School. No inducement could have held me to that line of work. Consequently the fall of 1904 found me messenger and then collection clerk for the Washington Trust Company of Boston. Here I remained until the institution was bought in 1906 by the Beacon Trust Company. At this time I was receiving teller. I remained with the Beacon Trust Company for about six months, and then, owing partly to ill health, I resigned. The balance of 1907 I spent in travel, chiefly in the southern and western part of the United States. Early in 1908 I was instrumental in the formation of a company known as the O Four Bar Ranch, incorporated under the laws of the state of Wyoming to conduct the business of farming and stock raising and located at Ranchester in the extreme northern part of that state. As treasurer of this company I lived at Rochester from February, 1908, until April, 1912. During this time I became interested in the schools of the district, was treasurer of School District No. 33, and gave considerable time to the planning and building

of one of the best lighted and ventilated cement schoolhouses in this section. In March, 1912, I sold my interest in the O Four Bar Ranch, and bought twenty-two hundred acres of land in Wyoming on the Little Big Horn River, where I am interested in the raising of high-grade Hereford cattle. I heard of an academy in Centre Strafford, N. H., which was in need of a "principle." I went there, and that the experiment was a success is evidenced by a letter from a classmate, a friend of whom is still teaching there. After some appreciative words, he adds, "But usually a fellow isn't an angel until he's gone." While visiting in Washington, D. C., I acquainted the school authorities with the fact that I was a Harvard A.M. Immediately, their school system being then in a poor condition, I was invited to spend my second

year at the Capitol City, and accepted a position to teach mathematics in the McKinley Manual Training School. In the midst of studying advanced mathematics from my brother's old text-books, looking forward to a perhaps prolonged stay in the field of science, I accepted an offer to teach my old friends, Latin and Greek, in a private school in Baltimore. Two years later I moved on to the Horace Mann High School of New York. The following summer, 1908, I spent in traveling about Europe, and on my return began service at the Public Latin School of Boston, where I proved to my friends that I could spend more than two years in one place. Instead of going to Europe again last summer, I was married. My success in the Latin School is small or great according to the interpretation one gives to this explanation, received recently, of a boy's absence: "My son is sick in bed under the doctor's care with acute information since last Tues. eve." Member: Fales Club of Waltham.

In the fall of 1904 I went to Brockton, Mass., where I was a substitute teacher of Latin until February, 1905. To secure a regular election as teacher, I needed experience elsewhere, so I taught Latin and German in the high school at Wakefield from February to June, 1905. During this summer I married, and made my home in Brockton, where I taught

history and English in the high school from September, 1905, to June, 1909. My first two children were born in this city. In the spring of 1909 I took the Boston teachers' examinations, and in September of the same year was elected an instructor in the Mechanic Arts High School, Boston. I was promoted to the rank of junior master in November, 1911. My teaching subject is English. From 1909 to 1911 I made my home in Somerville, Mass. During the summer of 1911 I built my present home in East Weymouth, where my third child was born. My principal interest outside of my home and school work has been music. From my sophomore year in college until 1910 I held several positions as organist and choir director in Weymouth, Brockton and Holbrook. I was a member of the Brockton Choral Society, and for two years of the Handel and Haydn Society of Boston. I have coached school or other glee clubs nearly every year; for the last five years I have had charge of the vocal music at the Phillips Exeter Academy.

After graduating I spent a year in Oklahoma in a coal mine, and then returned to Cambridge to learn to be a mining engineer. A few months in the Scientific School made it very clear to me that I was not going to be a John Hays Hammond, so after the boat race I embarked in the real estate business on Long Island, N. Y. I enjoyed considerable success at this until I took the bit in my teeth and started speculating in tracts of land for my own account. In 1907, in the panic, I lost a great deal more money than I had, and

the following day lost all my clothes and personal property in the Long Beach Hotel fire. I then went back to Oklahoma, and secured a theatre in Coalgate, Okla., on credit and three mortgages. This made money, and I got another one in Shawnee, Okla. That summer I bought a horse and took him out to Denver, where he won the Denver Derby. This looked better than theatres, so I sold my temples of Momus and Thesis and bought three more horses. I raced with varying success through Kentucky, Florida and Canada for three years, having at one time plenty of money and eight horses and winding up with one broken-down selling plater and no money at all. I returned to Boston in the winter of 1912 and sold investment securities with indifferent success until spring, when I became interested in a moving picture theatre in Keene, N. H. I moved to Keene, started an investment business and incorporated the United Amusement Company, which has three moving picture shows, all doing well. I am at present the vice-president of this company.

Tufts medical school in 1905 and graduated in 1909, being president of the senior class and chairman of the student government body. In January, 1910, I entered Worcester City Hospital as interne, remaining until the fall of 1911. I started practice in Haverhill, Mass., in the winter, but left in September, 1912, to take a position as teacher in Creighton University, where I am professor in materia medica at the medical school and professor of pharmacy at the pharmacy school. Member: American Pharmaceutical Association.

Business	<i>Landscape architect.</i>
Address	<i>(home) 15 Davis Ave., Brookline, Mass. (business) Care of Olmsted Brothers, 99 Warren St., Brookline, Mass.</i>

I was driven from Harvard in 1902 by a humiliating attack of the measles, but I went back later to graduate in 1904. Preferring to stay with my class of 1903, I have tried to keep up with their traditions. I have plodded along as an assistant unknown to the world in general, and have hardly been heard of outside a small business circle. I came near becoming famous this year when my son George the 3d won second prize at the Western National Stock Show in Denver as a ninety-seven per cent. pure, three-year-old baby. Still loyal to my old Kentucky home, I have reverted to Yankeeedom, and am content to live on in Brookline and to summer on the Cape, where my ancestors used to shoot the red men. From 1903 to 1905 I served as one of the student travelling secretaries of the International Committee of Young Men's Christian Associations. In connection with this work I visited most of the private preparatory schools, and many of the colleges and universities of eastern Canada and the states east of the Mississippi, studying to promote their moral and religious life along such lines of activity as are carried on at Harvard through Phillips Brooks House. In 1905 I entered Union Theological Seminary, an undenominational school of theology in New York City. During my first year there I continued to give part of my time to the work of the International Committee. In my second year I served as assistant minister at the Spring Street Presbyterian Church, an institutional church on the Lower West Side; and in my last year I was an assistant at the Madison Avenue Presbyterian Church. I graduated in 1908 with the degree of S.T.B., and was given the travelling fellowship of the Seminary for two years of further theological study abroad. The first of these two years, 1908-1909, I spent in Germany at the universities of Berlin and Marburg, bicycling through Italy between terms in the spring, and tramping in the Alps in summer. The second year I spent in Scotland and England, studying at Glasgow, Edinburgh and Oxford, and investigating social conditions and work as well. I was drafted as a speaker for the Liberal

party in the general election of 1910, and had some interesting experiences stumping in several Scotch constituencies. In the spring of that year I made a camping trip through Palestine that had several unexpected touches of real adventure. Returning to this country in 1910, I was called to the pastorate of the Hyde Park Baptist Church in Chicago, where I have been since December of that year. The close though unofficial relations of this church with the nearby University of Chicago make its problems and work in many ways unusual, and my own situation most pleasant. I am a member of the board of trustees of the Divinity School here. I edited *Men and Religion* (report volume on Work with Boys), and have written occasional articles in religious magazines. Member: Harvard Club of Chicago, University Club of Chicago, City Club of Chicago, Quadrangle Club.

I completed the requirements for the degree of Bachelor of Arts in February, 1903, and spent that spring and summer travelling in Europe. In the fall I entered the employ of the Hargadine-McKittrick Dry Goods Company, an old established wholesale house in St. Louis. I resigned in January, 1906, and again had several months in Europe. The next few years I passed as an officer in the wholesale firm of the Watson-Glasgow Hosiery Company, but this company sold out and retired from business in the spring of 1912. I then accepted my present position as secretary and treasurer of the St. Louis Tire and Rubber Company, which was formed for the purpose of manufacturing all classes of auto-

When I entered Harvard I had intended to go to the Law School. I therefore planned to complete the work for my A.B. degree in three years. During my junior year I changed my plans and secured a position with N. W. Harris and Company, New York (name since changed to Harris, Forbes and Company), bankers and dealers in investment bonds. I began work with them July 7, 1902, at the munificent salary of five dollars a week. In 1903 I was married to Florence Tower Cheney and lived in New York for a few months before I went to Connecticut to represent my employers in the sale of bonds. This period was for one year from March, 1904. In 1905 I was transferred to Buffalo, where my two older children were born and where I remained about two years. In January, 1907, I was given full charge of the sale of Harris, Forbes and Company's business in central New York. In September, 1907, I took up my residence in Clinton, N. Y., and lived there for four years, doing business in the cities of Utica, Water-

town, Oswego, Syracuse, Auburn, Ithaca, Elmira, Binghamton, Cortland, Norwich, Little Falls and immediate points. In October, 1911, I moved to Binghamton, N. Y., where I hope to be able to make a permanent home. All my time is absorbed by my family and business, and as I have had to be away from my home half the time, I have had no opportunity to take part in public affairs, which I regret. In January of this year I was granted an interest in the business of Harris, Forbes and Company, one of my cherished ambitions. Ten years have passed since graduation, a period long enough to show the drift of one's life. My plans, I find, are not quite as ambitious as when first attacking life's real problems. To make my family secure in case I die, to bring up my children to be good citizens, to send my boys to Harvard and have them do well there and have a fair start in life would please me most of all. To attend every reunion of 1903 and to see many members of our class do exceptionally well in life would help toward happiness. Member: Harvard Club of New York, also clubs in Watertown, Utica, Elmira and Binghamton.

JOHN HERBERT HENRY GLOVER

Born	<i>South Boston, Mass., April 7, 1876.</i>
Parents	<i>Frank Joseph, Delia (Hurley) Glover.</i>
School	<i>English High School, Boston, Mass.; State Normal School, Bridgewater, Mass.</i>
Years in College	<i>1901-1903.</i>
Degrees	<i>S.B., 1903.</i>
Married	<i>Mary Agnes Coughlin, South Boston, Mass., April 7, 1913.</i>
Business	<i>Statistician.</i>
Address	<i>(home) 80 Johnswood Road, Roslindale, Mass. (business) City Hall Annex, Boston, Mass.</i>

For several years after graduation I taught science and mathematics in two private academies in the Middle West. At the close of the school year I accepted a position as assistant superintendent of a syndicate of college stores, with headquarters in New Haven, Conn. I remained in this

position about three years, refused a reappointment, and took a financial interest in and became chemist and manager for the Carr Chemical Company of Boston. In September, 1908, I organized the American Broom Company of Boston, manufacturers of heavy duty brooms for street and factory purposes, and retained my interest in it until January, 1913, when I sold out, owing to pressure of other work. For nearly five years I have been in the employ of the city of Boston as statistician and editor, under a civil service appointment. During part of this time I have obtained leave of absence to accept an appointment as junior master in the Mechanic Arts High School of Boston, in the departments of history and mathematics. In addition to my day work, for three years I was an assistant in the Bigelow Evening School, South Boston, Mass. I have done considerable work along mechanical and electrical lines, have devised and put on the market an improved broom which is in large use on private yachts and steamers, and have invented and perfected an electric striking train for use with electrically operated clocks.

Born	<i>Boston, Mass., Sept. 24, 1877.</i>
Parents	<i>Frederic Charles, Lydia Emily (Armstrong) Gohring.</i>
School	<i>High School, Somerville, Mass.</i>
Years in College	<i>1899-1903.</i>
Degrees	<i>S.B., 1903.</i>
Married	<i>Nellore May Rowe, Bisbee, Ariz., March 8, 1908.</i>
Children	<i>Dorothy, Nov. 17, 1909; Katherine, July 22, 1911; John Frederic, Oct. 22, 1912.</i>
Business	<i>Mining.</i>
Address	<i>Warren, Ariz.</i>

My first foothold in the mining profession was secured through an acquaintance formed while fishing in Maine in the summer of 1903 after graduation from the Mining School. I went to western Arizona to what purported to be a mine, but, finding my patron to be better informed on fish than he was on mines, I left and went to Bisbee, Ariz., in February, 1904. I worked a few weeks in the mines there and was then taken into the newly formed geological department of the Calumet and Arizona Mining Company. In 1905 I became the head of this department, and for the next two years spent considerable time examining mining prospects all over Arizona and northern Mexico. During this period I learned that all mine owners are liars. I was appointed superintendent of mines in October, 1908, and still hold that position. I was married in 1908, my wife being from California. We have two girls and a boy, unmatchable for pulchritude and vigor.

RECORDS OF THE CLASS

The year 1903-1904 I spent in study in Paris and Berlin, and returned to Harvard for the year 1904-1905. From 1905 to 1907 I taught in Arizona. I went back to Paris in June, 1907, and remained there until February, 1908, studying in the University of Paris and the Ecole des Sciences Politiques. On my return to the United States I enrolled once more in the Harvard Graduate School. Since the fall of 1908 I have held the following positions: 1908-1909, instructor in history, University of Missouri; 1909, instructor in history and economics, Boston University; 1910, instructor in history, University of Chicago; 1910-1912, assistant professor of history, State College of Washington; 1912-1913, professor of history, State College of Washington. After leaving college in June, 1903, I travelled abroad for a short while. In the fall of 1903 I became employed by the Lesser Goldman Cotton Company of St. Louis. Being somewhat ambitious I decided that a little knowledge of law might help, therefore in December, 1903, I entered the law department of Washington University, where I remained until June, 1904. Then, deciding that the legal profession was somewhat too laborious, I again entered the employment of the Lesser Goldman Cotton Company, with whom I have been connected ever since, being elected secretary of the company in the fall of 1905, also vice-president of the Adler Goldman Commission Company. Ignoring alike the ripened judgment of graduates at home and the sober warnings of upper classmen at Cambridge, I finished my inconspicuous college career in three years. My stubbornness was the result of a then forgivable ambition to get through the Law School and to enter practice with as little delay as possible. Thus it was that I lost one of the greatest of all goods at Harvard, my senior year. Fired by the same noble aim, I entered my father's law office in Cincinnati, my native city, on the first Monday after my return from Class Day, 1905. I was then twenty-four. My father's firm had been in existence for more than that length of time, and, strange to narrate, had reached a position of distinction without my aid long before. I have had almost ten years in which to regret these two misapplications of youthful energy. My accomplishments since leaving college are not noteworthy. I have held no positions of trust, save as guardian of the estates of insane or deceased relatives of certain clients; I have filled no positions of honor, save again as director and officer of sundry country and social clubs and charitable organizations. In short, I have made no history and, therefore, have never broken into print. I say "never," because I make no account of society notes and of

RECORDS OF THE CLASS

my annual efforts (thoroughly successful, of late!) to live down an early reputation in our local golf world as a "mug hunter"; nor of provoking and tedious reports of my arrest and subsequent trial for the altogether unintentional violation of an altogether silly automobile ordinance. However, I would not have it believed by my more distinguished classmates that the habit for work acquired by us ten years ago has brought nothing of good in my case. I was recently admitted to membership in the firm of Harmon, Colston, Goldsmith and Hoadly; and inasmuch as one partner's father, George Hoadly (senior member of the firm of which the present is a lineal descendant), and Judson Harmon (now senior member) have both served as illustrious governors of an illustrious state, my refusal to enter politics actively may be regarded as little short of a public calamity. I say it may be so regarded; the fact that those of my classmates who know me well are convinced to the contrary has no place in this class report. Married	<i>M. Jeannette Pearson, Somerville, Mass., Sept. 1908.</i>
Died	<i>Woodrock, Wyo., Aug. 18, 1909.</i>

Arthur Francis Gooding, the son of Henry Alanson Gooding and Mary Isabel Wellington, was born May 19, 1882, in Somerville, Mass. He received his education in the public schools of Somerville, graduating from the Latin School in 1899 and then entering Harvard College with the Class of 1903. He took his A.B. degree with the class in June, 1903. Although his courses in college were widely diversified, he specialized principally in chemistry. After graduation he started with the Wellington-Wild Coal Company of Boston. Later he went to Spokane, Wash., where he stayed one year. For six months prior to his death he was with the Big Horn Lumber Company of Woodrock, Wyo., where he rapidly rose to a position at the head of the office and was highly esteemed

I left college at the midyear examinations in our freshman year. After an unsuccessful effort to enter the Lawrence Scientific School in the fall of 1900, I spent a few months as

RECORDS OF THE CLASS

a book canvasser at Cambridge. In the spring of 1901 I went to Alaska as a mining prospector, but found conditions bad, so returned to Seattle. I drifted back to Cambridge in 1902, hoping again to enter Harvard, but finally gave up the struggle, and in 1903 went a second time to Nome, Alaska. During a five weeks' stay I made several trips into the interior, but struck nothing, and returned to Cambridge for one more attempt to enter Harvard. Failing in this, in 1905 I found myself once more in Alaska, this time at Skagway in charge of forty head of steers bound for Fairbanks. On arrival there I found it impossible to get work in the placer mines, but did land a job as deckhand on a steamer for a short time. On a trip down the Yukon River we came on a stranded passenger steamer, and I put in a deal of hard cold work removing oil tanks from her hold to lighten her. Once at the river mouth we found it and the Behring Sea for some miles out frozen over with three or four inches of hard ice, which the steamboats dared not buck. Our boat was the most powerful of all. So the bow was sheathed in sheet iron and two-inch plank sawed into short lengths and nailed onto the hull to catch the brunt of the ice as we crushed through. We broke a lane through for twelve miles, the other four steamers following, and eventually arrived at Seattle. My next venture was in Arizona as a carman with the Copper Queen Mining Company at Bisbee, but after a few weeks I went to San Francisco, and on to Valdez, Alaska. Starting from there at the end of March, 1906, on the overland trail of four hundred miles to Fairbanks, I experienced tremendous hardships, but was fortunate in being able to save two men from freezing to death in a blizzard. I worked on several steamers, but could get no work in the mines. The report that good wages could be earned in San Francisco after the great fire tempted me back there, and I had steady, well-paid employment as a lather for ten months. After some unsuccessful prospecting in various parts of California, I returned once more to Boston in December, 1907. I earned a living at book canvassing, and in the fall of 1908 began a six months' course in chemistry at the Massachusetts

Institute of Technology, from which I profited much in learning, if not otherwise. Since then I have been roaming about as a prospector in various parts of the West, helping out my earnings by lathing, but hoping to strike some good mine. I think I have one now in Oregon, if I can raise the money to buy it. I have travelled in my life thus far one hundred and ninety-three thousand miles. In 1903, after graduating, I attended summer school at the Massachusetts Institute of Technology, and entered the junior class in sanitary engineering in the autumn. After one year of study, in the following June I took a position with the firm of Hering and Fuller, consulting sanitary engineers, of New York City, as inspector of sewer work at York, Pa. I returned to Technology in the fall, but was obliged to leave in February on account of typhoid fever, contracted during some special analytical work on the distribution of sewage in Boston Harbor. This attack laid me up until September, 1905, when I went to work again for Hering and Fuller as resident engineer on the construction of a dam and reservoir for the water supply of Columbia, Pa. In the spring of 1906 I took six weeks' leave of absence and returned to Technology to take the final examinations for the S.B. degree. My experience at Technology was most fortunate and pleasant. After the final examinations I went to work again for Hering and Fuller, this time on some land improvement and flood prevention work at York. In September, 1906, I was moved to the New York office, where I remained until March, 1909. During this time I worked on the designs of many interesting projects for cities in all parts of this country and had several interesting trips. In December,

RECORDS OF THE CLASS

1907, I was at Burlington, Vt., on the construction of a water filter for the city. In March, 1908, I went to Bellingham, Wash., on Puget Sound, on a project for an additional water supply for that city. In June, 1908, I went to England and Germany for two months with Mr. Hering to investigate sanitary works. During this time I had made a particular study of refuse disposal, and in March, 1909, I went to Milwaukee, Wis., to take charge of the construction of a refuse incinerator for the city, which is the largest plant of its kind in this country, having a daily capacity of three hundred tons. The construction work lasted until June, 1910, when the plant went into operation, and I became superintendent. I held this job until October, 1911, when I went to Caracas, Venezuela, to assist in the preparation of plans for the water supply and sewerage. The work was only preliminary but most interesting because it was the study of a location where there was no sanitation and where public health was at a very low ebb. We found that up to ten years of age one in every three of the population died. Finally in February, 1912, I became assistant engineer with the Sanitary District of Chicago. This has given me the long-wished-for opportunity to live at home, and I am enjoying it. I have found no city more interesting to live in than Chicago, and no two places more full of Harvard spirit than Chicago and Winnetka. Last fall (September, 1912) I was appointed chairman of the committee on refuse disposal of the sanitary engineers' section of the American Public Health Association. Books, articles or plays which I have written or translated: Special Devices for Charging High Temperature Refuse Incinerators, The Construction and Testing of the Milwaukee Refuse Incinerator, Investigations for Municipal Refuse Disposal, The Principles of Municipal Refuse Collection, A Standard Form for Statistics of Municipal Refuse, Refuse Materials. My time since graduation has been spent largely in teaching French, first at the Cheshire School, Cheshire, Conn., and later at the Hotchkiss School in Lakeville in the same state. I fancy my chief claim to distinction during these years was industry and recognized ability to get the "boys" to work. All this, you see, in the so-called "enemy's country," coupled with a very little language work in the Yale graduate school. During these years I came to know well, through the intimacy of boarding-school life, several graduates of other colleges, notably of Yale. New Haven was our stamping ground when off duty, and its fine old Graduates' Club, with President Eliot's portrait in its library, our special haunt. I consider that few can enjoy more than I our rivalry with Eli Yale, because I know so well both Johnny and Eli.

RECORDS OF THE CLASS

From Hotchkiss in 1909 I went to the University of Wisconsin to take a teaching fellowship in Romance languages and to study for a master's degree, which I took in 1910. If you don't believe that a New Englander can profit by an acquaintance with the West, take my word for it. It was in the West that I met and married my wife, who, after my travels, has made of me, in Mr. Dooley's phrase, "a converted cruiser, leading now a quiet, dainty and respectable life." Nothing like it! Since leaving Wisconsin I've been here at Butler College in Indianapolis, Ind., teaching French and Spanish as head of the department of Romance languages. "But 1903 is the best compagnee." I have written articles on language teaching for the State of Indiana Teachers Association. Member: Indiana Harvard Club, Modern Language Association of America.

Immediately after graduation I followed the fashion by having my appendix removed, and then went to work for the United Zinc and Chemical Company in Kansas City, Mo. During the seven years I was with this concern I served in about every capacity from office boy to sales manager. As a salesman of the product and as a buyer of ore I travelled extensively, so that I feel quite familiar with the Middle West, Southwest and Mexico. The company is a large producer of sulphuric acid, so that those of you who remember Chemistry 1 and Professor Jackson will realize that the sale of it brings the salesman into contact with very diversified lines of busi-

ness. For exercise during this time I took up enthusiastically the pursuit of the elusive aniseed fox, with golf as a side line. Fortunately Kansas City was well fixed with country clubs, and as they played a surprisingly important part in the social life, the problem of outdoor recreation was easily solved. I found the hot summers rather trying, however, and was glad to secure the position of treasurer for the Thames River Specialties Company, a cardboard mill, which was built in 1910, on the Thames, at the head of the boat race course above New London, Conn. I was there for about a year, and since then have been in Boston, developing some agencies for British products. Member: Country Club of Brookline, Harvard Club of New York.

Address	<i>(home) 76 Cottage St., New Bedford, Mass. (business) 100 North St., Pittsfield, Mass.</i>

In the summer of 1903 I entered the office of C. Howard Walker, architect, in Boston, as a draughtsman. The following fall I took a position with Cram, Goodhue and Ferguson, for the winter of 1903 and 1904. On account of ill health I abandoned work in the summer of 1904, but early that fall found employment in draughting to illustrate some archaeological work for Professor Pumpelly, of Dublin, N. H., and returned in a few weeks to work for Messrs. Cram, Goodhue and Ferguson. After a few months, ill health again necessitated my leaving Boston, and I travelled in the South, visiting parts of Florida and Georgia and finally New Orleans, where I took the steamer for New York. I returned to my old employers for a few weeks only, leaving

because of dull business conditions. My next place of employment was the office of Coolidge and Carlson, architects, in Boston. I remained with them only a short time, but acquired much useful architectural knowledge, particularly in regard to the practical side of residence construction. I next went to New York. In that city I entered the office of Hale and Rogers, architects, remaining with them through the winter of 1905 and 1906. In 1905, while working as a draughtsman, I became interested in developing a conception of mine of a drawing-board adapted to facilitate the work on drawings of large scale. This I got patented in 1906, and the experience increased my fondness for mechanical invention, and although pursuing architectural work and study for several years, I have gradually abandoned them. In 1907 I did some architectural work in my home town, New Bedford, Mass., and as a result went there to superintend the work. While in New York in 1908 I became interested in trying to perfect an invention of mine for a gas-lighting device, especially applicable to lamps for automobiles. Unable to choose between the profession of architecture and the occupation of inventing, I moved to Pittsfield, Mass., primarily for the better climate and more healthful surroundings that it offered. In Pittsfield I found temporary employment in the offices of Harding and Seaver, and of McLaughlin and Siebert, architects, but spent much time in the attempt to perfect my invention. Unable to carry on both lines of work successfully, and having interested some Pittsfield men in my work along mechanical lines, I have formed a company, the G. C. A. Manufacturing Company, a Massachusetts corporation formed for the purpose of manufacturing various patented articles. I am not now doing any architectural work, but am working along mechanical lines and manufacturing. At the date of this writing I hold the office of treasurer and manager of the company above named. Died	<i>Aug. 4, 1911.</i>

Browning Groce, son of Thomas Jared Groce and Clifford Loverin Groce, was born in Galveston, Texas, January 19, 1881. Among his ancestors were the distinguished southerners, John Marshall, Chief Justice of the United States Supreme Court, and George Walton of Georgia, a signer of the Declaration of Independence. His childhood and youth were passed in Galveston where he attended the public and high schools. He later entered St. Paul's School, Concord, N. H., where he prepared for Harvard College. He entered Harvard in 1899, with the Class of 1903, and graduated with the degree of A.B. in 1903. He then returned to his home in Galveston, and entered business in his father's banking house. In this work he forged forward, working beyond his strength frequently. At his death he was the active vice-president of the institution. He died bravely, as he lived, on August 4, 1911. With him his loved ones and Fair Harvard were his dearest possessions.

the employ of Jose, Parker and Company, bankers and brokers, 78 Devonshire Street, Boston. After an apprenticeship of a few months in the office, I began to sell securities in southeastern Massachusetts. After I had gained some experience in this field, I branched out into Rhode Island and Connecticut, still retaining my original territory. Later I also developed business in the lower half of western Massachusetts. In November, 1909, the partnership of Jose, Parker and Company was dissolved and the firm of C. D. Parker and Company was formed, in which I received soon afterwards a financial interest. In August, 1912, this partnership was incorporated, at which time I became a member of the same, secretary of the corporation and one of the directors. I am also a director of the Blackstone (Mass.) Electric Light Company, the Central Massachusetts Electric Company (Palmer, Mass.) and the Union Light and Power Company (Franklin, Mass.), as well as one of the trustees of the Central Massachusetts Power Company. I have practised law in Washington since I graduated from the Law School; and except for the all too infrequent glimpses that I catch of Page and McGrew as they fly through town to North Carolina, my life is a peaceful one. I am a Republican in politics, an Episcopalian in religion; my pet aversions are Arnold Bennett and the New York Evening Post; my favorite game is tennis, and I like riding and walking. I am a member of the bar of the Supreme Court of the United States and of those of the courts of the District of Columbia, of the state of Maine, of the United States Court of Claims, etc. I have not held public office. I am the treasurer of St. John's Orphanage. Member: Metropolitan Club of Washington, Chevy Chase Club of Washington, Harvard Club of New York, American Bar Association.

Parents	<i>Harold Farquhar, Valérie (Burckhardt) Hadden.</i>
School	<i>Groton School, Groton, Mass.</i>
Years in College	<i>1899-1902.</i>
Degrees	<i>A.B., 1903.</i>
Business	<i>Mercantile.</i>
Died	<i>New York, N. Y., June 6, 1908.</i>

William Aspinwall Hadden was born in New York City, September 28, 1881, the son of Harold Farquhar Hadden and Valérie Burckhardt. His education was received at a private school in New York during his early childhood, followed by two years at the Fay School, Southboro, Mass., from which he went to Groton School in 1893 for the full course of six years. While there he was prominent in the School Missionary Society. He was also interested in athletics, playing centre rush on the school football team and first base on the nine. He entered Harvard College with the Class of 1903 as a freshman, and completed his course in three years, taking his A.B. degree, however, with the class in 1903. During his college life he continued his philanthropic work by teaching algebra at the Prospect Union, and participated in athletics to a moderate extent. In his last year he specialized in economics and accounting. During the summer and fall of 1902 he obtained some knowledge of practical banking by taking various positions in the Chemical National Bank of New York. He then started work in his father's office, New York City, Hadden and Company, importers of raw silk and matting, and on January 1, 1905, he became a partner in the firm. Shortly after that he went to China and Japan to learn the silk and matting business. In 1907 Hadden and Company incorporated, and W. A. Hadden was elected president. During the same year he headed the preparation of a memorial to Congress to impose a uniform duty on matting, thus avoiding undervaluations. The next year he became a director of the Broadway Trust Company. He was a lance corporal in the Seventh Regiment of the New York National Guard, and

CLASS OF 1903 — THIRD REPORT

was also a trustee of the Pilgrims Club, a boys' club affiliated with the Church of the Incarnation. He was deeply interested and active in the propagation of the right principles in politics, and was a frequent correspondent of the New York Evening Post in regard to political questions. He died in New York City, June 6, 1908, of typhoid pneumonia. Hadden was a man of deepest religious convictions; he drew a rigid line between right and wrong, and he never suffered a compromise in his actions, whether business or social. His life, his work, his hopes should be an inspiration to all of us to make business methods and social intercourse more honorable.

After leaving college I entered my father's business, where I have been ever since, now being secretary of the firm of William Hahn and Company, Incorporated, shoe merchants. I also began studying law at Georgetown University, where law classes are conducted in the evening. I completed the course in 1903, being admitted to the bar the same year. However, I never intended to practise law and have never done so. There is nothing very exciting to narrate about my career since leaving college. Member: Harmony Lodge, No. 17, of Masons. In the fall of 1903 I entered the Harvard Law School. There I remained a regular student until admitted to the degree of LL.B. in 1906. During my second year in the Law School, in addition to my regular work, I took two courses in the college, to be counted towards an A.M. I had been credited with two courses towards an A.M. at the end of my senior year in college. I received the degree in 1905. In the summer of 1906 I took and passed the Massachusetts bar examination. In the fall of the same year I was admitted to the Massachusetts bar. On January 1, 1907, I opened an office for the practice of law in Room 522, Bay State Building, Lawrence, Mass., and have been located there ever since. My life as a lawyer has been uneventful. I have never entered active practice. During the year 1906-1907 I took a post-graduate course in bankruptcy at the Harvard Law School, and since then I have been studying special branches of the law, working mostly in real property. My social life has been as uneventful as my professional life. I have assisted in coaching the Lawrence High School track teams for the last few years, but have not done anything else worth mentioning. Member: Harvard Club of Lawrence, Lawrence Y. M. C. A.

After leaving college I entered the Harvard Law School and took the first-year work in 1903-1904. The following year I spent with the Roosevelt family in Washington, preparing Theodore, Junior, for Harvard College. Then I took my second year at the Law School and began my third year, which was interrupted by an operation for appendicitis in December. In 1907 I married, and my wife and I travelled for six months in the South and West. In the fall of 1908 I settled in Boston and entered the law office of Messrs. Brandeis, Dunbar and Nutter, where I spent one year. In the fall of 1909 I opened a private law office, and also became assistant solicitor in the legal department of the Boston and Maine Railroad, specializing in interstate commerce law. There I remained until the fall of 1911, when Raymond H. Oveson, of the class of 1905, and I formed a general law partnership at 15 State Street, Boston. In August, 1912, Alexander Kendall, of the class of 1904, became a member of the firm. A good deal of my time since settling in Boston has been spent in developing real estate in the West End, trying to change that neighborhood from stables to small houses. In December, 1908, I was elected to the board of aldermen of Boston; in the following year I was elected to the new city council for a three-year term. In 1911 I became interested in the Progressive movement within the Republican party, and took part in the Roosevelt-Taft preconvention campaign in the spring of 1912. Upon the formation of the Progressive party I was elected chairman of the state committee, and in January, 1913, was reëlected to that position. In August I was elected member of the Progressive National Committee from Massachusetts. Member: Union Boat Club of Boston, Boston City Club.

Fellow Classmates: 'Way back in 1903 I took a "Subway to Park" for the last time. I was confronted with the problem of how to get an education that would really count. I guess a good many of us had about that same idea in one way or another, and most of us agree that Johnny Harvard gave us a pretty good start. Should I take another car back to Harvard Square and learn some more? There were other towns to be thought of—South Boston or Chelsea, for instance. "You might learn a thing or two in one of these places," I thought to myself, "about civic government or something." Ah! but I wanted to be an artist. So I went to Paris. I got there just in time somehow to catch on, and I left just in time to practise what I learned in my own country. I work every day in my studio in Boston. If you care about it, come in and see what I am up to.

working in various departments, including the open hearth, steel foundry, puddle mill and metallographic laboratory, I was sent to the crucible steel department, of which I was made assistant superintendent in 1905. I resigned in June, 1906, and took a position with the Buffalo Crucible Castings Company, Buffalo, N. Y. Leaving there in October, 1906, I served the Taylor-Wharton Iron and Steel Company, High Bridge, N. J., as metallographist. After six years at that, during the last year in full charge of laboratories, and the technical side of the steel making, etc., with the title of metallurgist, I resigned January 1, 1913, retaining a position as consulting engineer for the Taylor-Wharton Company. At this writing I am starting as consulting engineer, with offices in New York City. I have been a member of the volunteer fire department in High Bridge for five years. I have held the exalted position of second assistant foreman, and helped fight a couple of lively fires. Believing that a man who has taken part in athletics in college should not give up active exercise, I have devoted what little time I have had for sports to tennis, baseball, swimming, skating and running skis. I ran a mile race two years ago, and was badly beaten; but I will guarantee to beat my old two-mile teammates of the class at that distance at any time. I have never completely recovered from the effects of a strain in the right knee, which I damaged in a race in the spring of 1904. Otherwise I am sound, wind and limb, unmarried but not down-hearted, and keep house with my mother, because she is the only member of the family left at home. My brothers and sisters are married, and my father died after I left college. Member: Harvard Club of New York, American Society for Testing Materials, American Institute of Mining Engineers.

After leaving college I travelled in Europe until September, 1904, and then took a year at Massachusetts Institute of Technology in the sciences necessary to forestry. In September, 1905, I entered the Biltmore Forestry School, but had to leave on account of sickness in November, and went to Egypt and southern France for six months. I was in business until fall, and then entered the Harvard Law School. After a year there I returned to Biltmore in November, 1907, and after eight months there, two months at the Squam Lake surveying camp and a year at the Harvard Forestry School, took my degree in forestry in June, 1909. I had passed the civil service examinations in forestry in April, 1909, and received an appointment as forest assistant on the Gunnison National Forest in central Colorado. I resigned this position in the fall of 1911, and returned to the Law School. In February, 1912, I set up a consulting foresters' office with Herbert J. Miles (Harvard, 1907), and we are still in that business. Member: Massachusetts Forestry Association, Odd Fellows, Brae Burn Club.

Immediately after graduation I adopted the profession of office boy, but was presently persuaded by my employers to become a clerk instead. The latter profession I soon discovered to be far more arduous, and not particularly remunerative; and after a year I went abroad to gain experience and acquire an educated taste in art, literature and liquor. Prior to my departure, I became affianced to the young lady whose name appears elsewhere in my sworn testimony, and in consequence was very glad to accept an offer from my present firm, to return to this country after an absence of about nine months. Since then I have been actively engaged in catering to the noses of my fellow-citizens, with such success that the use of handkerchiefs in the United States has substantially increased. Shortly after my return I married, and have been busy ever since in racing my salary against the cost of living. By consistently backing myself to lose, I have so far succeeded in avoiding an annual deficit! In some years I have even gotten far enough ahead to pay my subscription to the Bulletin. I regret that the onerous duties of married life, dog-breeding and selling handkerchiefs have left me little leisure to devote to my former classmates. I sometimes meet A. P. Thornton, alias Sunny Jim, Hustace Hubbard, the well-known lecturer on the New York, New Haven and Hartford Railroad's misdeeds, and other Gothamites, but of my classmates who reside in the wilderness outside New York I have seen but little. Richard Eddy Hammond was born October 21, 1882, at Missoula, Mont., the son of Andrew Benoni Hammond and Florence Abbott, his father being a lumber and railroad man. Hammond prepared for college at the Gunnery School, Washington, Conn., and entered the Lawrence Scientific School with the Class of 1903 in its freshman year, graduating with the degree of S.B. in 1903. He was well liked by his classmates, and though enjoying considerable social success he was always democratic and independent. His favorite sport was baseball, and in his junior year he played on the class baseball team. After leaving college he went

into the lumber business with the Hammond Lumber Company of San Francisco, where he worked hard and made rapid progress. Two years later, as a result of his too great enthusiasm in working, he experienced a general nervous breakdown, and was compelled to resign temporarily active business duties, and decided to go abroad, hoping that the sea trip and change would benefit him. On his arrival in London his condition became alarming, and physicians advised his going to Switzerland for absolute rest. It was the beginning of a long, hard fight in the effort to regain his strength and build up his lungs, which had become affected. Courageously he fought against big odds, and only his remarkable will power and wonderful constitution could have kept in check as long as he did the sickness that had taken such a hold. The last two years of his life were spent at Colorado Springs, where he had made his home. The immediate cause of his death was a severe attack of pneumonia. He died February 6, 1911, at Tucson, Ariz., where he had been removed a week before in the hope that the change would prove beneficial.

elevated railroad extension and the elevated railroad yard at Bronx Park. Later I made survey maps and studies for a tunnel under the Harlem River for the proposed Lexington Avenue subway. In 1906 I joined the engineering corps of the board of water supply of New York City, who were commissioned by the New York State legislature to make investigations for, design and construct a system of dams, reservoirs and aqueducts for an additional supply of water sufficient for the needs of the five boroughs of the city. In this connection I took part in the investigations, estimates and studies for the location and construction of sixty miles of the Catskill aqueduct, of which twenty miles were deep tunnels and forty miles surface conduit. Later I took charge of the actual construction of a section of three miles of the Catskill aqueduct, the cost of which was about a million dollars. At present I am engaged in completing this work. RECORDS OF THE CLASS

I entered the Harvard Medical School in the fall of 1903, and was graduated cum laude at the end of four years, devoting fifteen months of this time to hospital work, exclusive of that required in the school course. This occupied practically all of the time given for summer, Christmas and Easter recesses. The month after graduation I passed the Massachusetts State Board examinations in medicine, and the next day began service as surgical house officer at the Massachusetts General Hospital. During this service I was admitted a fellow of the Massachusetts Medical Society (August, 1908). I graduated from the Massachusetts General Hospital November 30, 1908, and one week later began service as house physician at the Boston Lying-in Hospital, graduating June 7, 1909. On the following day I began duty as accident ward surgeon at the Massachusetts General Hospital. During that summer I was appointed alumni assistant in surgery at the Harvard Medical School, and began duty as vaccinist to house patients at the Massachusetts General Hospital, in which capacity I served from June, 1909, to September, 1910. Immediately upon completion of service as accident surgeon (September 30, 1909) I began my duties as teacher in surgery. This position I held for two years, when I was appointed assistant surgeon to the Infants' Hospital. I have reviewed for the Boston Medical and Surgical Journal since June, 1909, and have recently accepted an offer to review for the Journal of Surgery, Gynecology and Obstetrics (Chicago), and have written articles on surgical subjects. In September, 1909, I began practice, and since September, 1910, have been located at 192 Marlboro Street, Boston. Member: Harvard Club of Boston, Massachusetts Medical Society, American Medical Association, Esculapian Club, Boylston Medical Society, Surgical Review Clubs.

Address	<i>(home) 705 West 179th St., New York, N. Y. (business) 22 West 1st St., Mount Vernon, N. Y.</i>

After leaving college in 1903 I came to New York City and engaged in the real estate business, securing employment by the Lawyers Title Insurance and Trust Company as solicitor for mortgages and title examination. In the fall of 1904 I engaged in the mortgage business, under the name of the Cortlandt Mortgage Company, which I incorporated in 1905. After the panic of 1907, owing to the stringency in the money market, I gave up the mortgage business and engaged in promotions with some success. In June, 1908, I was married to Clotilde Sansville who died in July, 1909, after giving birth to a boy, who is now living. After my wife's death I spent one year at Germantown, N. Y., returning to New York in September, 1910, where I engaged as a bond salesman, continuing the work until January, 1912, when I became associated with Stephen Holden, a college associate at Colgate, as manager of the commercial department of his law practice, a work in which I am now engaged. In July, 1911, I was married to Anna F. Hoyt and we are now living at 705 West 179th Street, New York City.

Address	<i>64 Sanford St., Bangor, Me.</i>

After graduation in 1903 I went to Denver, Col. As a member of the National Guard of the state of Colorado I was sent to Cripple Creek and other points where the state militia was stationed to prevent deeds of violence by the strikers. In this way I experienced a very interesting six weeks' camping trip in the Rocky Mountains. That winter I returned to Massachusetts and Maine. In the following spring I took a civil service examination, and was appointed to the railway mail service, with Boston as my headquarters. In 1906 I was married, and settled in Bangor, Maine. We expect our son to be a loyal Harvard man when the proper time arrives.

Business	<i>Broker.</i>
Address	<i>(home) Davenport Neck, New Rochelle, N. Y. (business) 38 Broad St., New York, N. Y.</i>

On leaving college I entered the Ripans Chemical Company in the fall of 1900, remaining there until April, 1902. I then conducted business for myself on the curb, until September, 1907, when I entered the New York Stock Exchange as a member of the firm of Atwood, Violet and Company. Owing to illness I was obliged to sell my membership in the Exchange in 1909 and retire from all active business for three years, a part of which time was spent in France, Switzerland and Italy. I resumed business in the early fall of 1912 as a broker, dealing in unlisted securities and stocks on the New York curb. In May, 1902, I became secretary of the Ripans Chemical Company, retaining this office till May, 1912. Member: Union Club of New York, Westchester Country Club.

RECORDS OF THE CLASS

Married	<i>Bertha Louise Hannah, Medford, Mass., May 26, 1906.</i>
Children	<i>Frederick H., Feb. 28, 1908 (died March 3, 1908); Alton H., Jr., Feb. 12, 1910; Persis, Dec. 4, 1911.</i>
Business	<i>Manufacturing.</i>
Address	<i>(home) 25 Hurlbut St., Cambridge, Mass. (business) 25-45 Richdale Ave., Cambridge, Mass.</i>

I left college in the spring of 1900, having spent a full year lacking one month without improving the opportunities that offered. From 1900 to about 1904 I was employed by my father and elder brother in the wholesale baking business and learned most of the essentials of practical bread manufacture. I started in 1904 to manufacture a prepared wall plaster, and with unlimited capital and experience might have succeeded. Lacking both, I closed up in 1906 and found a position as salesman with a wholesale butter and egg firm in Providence. I began in the shipping office and after several months took hold of the outside end of the business and began to sell goods. I met with success at the start, and found the work both congenial and interesting. I stayed with this firm until November, 1910, having gained a good thorough knowledge of salesmanship. In 1910 my father and elder brother both urged me to return to the baking business, as the rapid growth in volume demanded an increase of management. I started in 1910 as manager of sales and advertising, and a year later was taken into the firm of C. F. Hathaway and Sons.

I entered the Harvard Law School in 1903, and was graduated unostentatiously in 1906. having put in one summer vacation at Sorento, Maine, behind a hotel desk, and another, or most of it, cruising with classmate Hank Foster and three other willing seekers for health and work, in a twenty-eight foot sloop, from Beverly to Calais,—“East, no’the-east. where the tide’s like yeast; For Quoddy bound, yo ho!”—as our poet put it; up Fundy to St. John, and along the southern coast of Nova Scotia. We achieved the health, and had the work thrust upon us, spasmodically. Immediately upon sweating through Law School exams. I offered myself as a sacrifice upon the altar of the board of examiners for the Massachusetts bar, spent a fruitless month or so trying to jimmy my way into some of the leading and misleading law offices in Boston, and then went back home to the woods, to rest and speculate upon the advantages of the higher educa-

tion. In September, 1906, I grabbed a job in the Wilber Mercantile Agency in Boston, and was admitted to the bar. A year later I burned my bridges and got married. In the fall of 1909 I left the Wilber Agency, and went to work for the Library Bureau as credit and collection man in Boston; was transferred to their New York office in the same capacity in July, 1910; spent three months diligently canvassing the New York law offices and public service corporations for a position adapted to my qualifications and offering remuneration commensurate with my needs; and in February, 1911, came to Alliance to take charge of and increase the efficiency of the collection department of the McCaskey Register Company. As a reward for what degree of success I have reached in this endeavor, I stand a fair chance of spending a few more years of my life in this waterless, treeless, hill-less, soft-coal and natural-gas town. school training. After four years at Hale's School (Boston), he entered Harvard in the fall of 1900 with the class of 1904. He completed his academic course in three years, in June, 1903, receiving his A.B. degree cum laude, and in the fall entered the Harvard Medical School. He showed marked aptitude for this field of work, and throughout his course was among the foremost in his class. In December of his senior year at the Medical School (1906) his strength was not able to meet the demands which close application to his work made upon it, and in January he took to his bed with pulmonary tuberculosis. His fortitude and outward cheerfulness during his long illness will always be remembered by his classmates and friends. In the early summer he went with his mother and brother to a camp at Great Diamond Pond, N. H., and here he was drowned on November 30, 1907. Heath studied music under Miss Inez Day and Mr. Lang. He was organist at the Stoneham Methodist Church and also played at Wakefield. While at Cambridge he was interested in debating. He was a member of Theta Delta Chi Fraternity, Alpha Omega Alpha and Phi Rho Sigma (medical) fraternities, Boylston Medical Society and the Esculapian Club. Heath was modest, quiet and kind; honest, dignified and courageous; a man of high ideals, who lived up to his ideals; a delightful companion and a dear, true friend. His ability, sterling character and charming personality gave promise of a brilliant professional career. His untimely death deprives us of a very dear classmate and medicine of a noble son.

CLASS OF 1903 — THIRD REPORT

After leaving college I entered the College of Physicians and Surgeons, Columbia University, in August, 1903. Four hard years of boning in medical subjects followed, during which time the Christmas vacations were spent renewing friendships in and around Boston, and the summer vacations devoted to travel in Europe. After graduating I left for Europe, where I remained about three years, specializing in the diseases of children. Most of these years was spent at the University of Vienna, Vienna, Austria, and at the hospitals connected with that university. Then I returned home to Honolulu, a step long anticipated. I immediately entered a medical firm already established by three other Island boys, and have since continued the practice of medicine. Among other positions of lesser importance, I am a member of the board of medical examiners, member of the board of pharmacy, visiting physician to the Children's Hospital, one of the visiting physicians to the Queen's Hospital, examining physician for students of Oahu College, physician of the Mills School for Boys, physician of the Kawaihau Seminary, physician of the Kainlani Home, physician of the Castle Home for children, one of the physicians of the Kamehameha Schools, and physician of the Lunalilo Home for Aged Hawaiians. Address	<i>(home) 20 West First St., Belleville, Ill. (business) 623-634 Murphy Building, East St. Louis, Ill.</i>

RECORDS OF THE CLASS

After leaving college I entered the Law School at Harvard, where I remained until 1906. I had a severe case of typhoid in the fall, which laid me up until early in 1907. I passed the Illinois state bar examinations in February, 1907, and became the junior member of the firm of Ropueget and Heinfeldten on March 1, 1907. In June, 1908, I became a member of the firm of Kramer, Kramer and Campbell at East St. Louis. In that month also I was elected chairman of the board of education of the public schools of Belleville. In July, 1908, I was elected president of the board of directors of the Belleville public library, and have been re-elected to that office every year since. I served on the board of education until 1911. I was elected chairman of the Democratic county central committee of St. Clair County in 1910, and later in the same year chairman of the congressional committee of Illinois. I have been fairly active in Democratic political circles in this state. I am doing a great deal of trial work in the law, handling railroad cases in Illinois and Missouri. For two years I have been professor of pleading in the City College of Law, St. Louis, Mo. Mrs. Heinfeldten died suddenly shortly after the birth of our child. My son survived and is a fine strapping youngster. My home is with my mother and grandmother in Belleville, Ill. I am always glad to see Harvard men who come to St. Louis on business or pleasure bent, and I hope any who read this and do come to St. Louis will look me up. After one year in the Harvard Law School (1903-1904), I finished my law course with two years at Drake University in Des Moines. In June, 1906, I was admitted to the bar, and shortly thereafter my father and I opened offices under the firm name of Henry and Henry at Des Moines, where the senior member had practised since 1876. The grind of the office was relieved in June, 1908, by a trip to Boston at Commencement time. This has so far been my only opportunity to revisit Cambridge since leaving there in June, 1904. In 1911 my brother, P. M. Henry, Harvard, 1909, joined the firm. The family partnership has made my business associations most pleasant. In 1908 I married Miss Florence C. Megee of Philadelphia, a graduate of Wellesley College in the class of 1906. Member: Grant Club, Golf and Country Club, University Club of Des Moines, Law Club, Harvard Club of Iowa.

Edward Chester Hewitson

Born	<i>Malden, Mass., Jan. 8, 1881.</i>
Parents	<i>Edward, Rachel (Barham) Hewitson.</i>
School	<i>High School, Quincy, Mass.</i>
Years in College	<i>1899-1900.</i>
Died	<i>Wollaston Heights, Mass., Feb. 23, 1900.</i>

Edward Chester Hewitson, the second son of Edward and Rachel S. Hewitson, was born in Malden, Mass., January 8, 1881. He graduated from the Quincy, Mass., High School in 1896, and took a year's post-graduate work, entering Harvard in the fall of 1899. He had always enjoyed good health, and as the signs of appendicitis were not so readily diagnosed then as now, when the actual situation was realized the disease had developed too far to permit of an operation's being performed. He died at Wollaston Heights, February 23, 1900. Edward Hewitson was not connected with the college long enough to become widely known, but those who had the good fortune to make his acquaintance found him, as his school friends had done, a clear-minded, high-principled, sunshine-bringing spirit, whose sudden and unexpected death is one of the mysteries that must wait for its solution in the life to come.

this company I acted in the capacity of mechanical inspector and later became general inspector. In 1908 I went with the Pan-American Machine and Engineering Company as mechanical engineer, later being made general mechanical engineer and finally chief engineer. I was sent to the International Railroad Congress, Berne, Switzerland, as delegate on air brake and safety appliances in 1909. In 1911 I became junior partner in the L. J. Hibbard Company, manufacturers of railroad supplies and machinery, and am now general manager. I went from Harvard directly to the Tuskegee Institute in Alabama, where for three years I taught English and education. In 1907 I was called to the principalship of the Manassas Industrial School for Colored Youth, on the borders of the battleground of Bull Run, or Manassas. Here have I been ever since. My work is still of the pioneer sort. It has demanded all I have had of mental equipment or physical endurance. Nothing that Harvard had to give in breadth of view, widening of sympathies or distinctive special training has gone for naught in this neglected field of service. It seems trite, if not absurd, to argue in these days that every state in the Union should offer to its children, of whatever race or condition, adequate opportunity for sound instruction in the elements of knowledge and in the principles of good citizenship. Yet it is precisely this opportunity that the great masses of my people in the rural South still lack. So colossal is the task that it is both my inspiration and my despair. Surely no other cause is more vitally related to the progress of real democracy in our southland, nor is there any to which the life of a consecrated individual can be more effectively given. I go forward in this work with the confident expectation that my classmates many of them now rapidly advancing in wealth and influence, will devote somewhat of their leisure

in a serious investigation of the claims, merits, limitations and present urgent needs, of the American Negro. It will, I assure you, be a study full of enlightenment and profit. It is a great pleasure to be able to report that I can see all about me visible evidences of the worth of what we are attempting at Manassas. I might also add, perhaps, that, while daily stressing to adolescent, backward youth the need of the old elemental moral qualities, mental discipline, and heart-winning ability, I have not forgotten that there are still such things in this world as poetry and music and sunset skies. And if these were all less than they are, I should still have wider margins of compensation in a wonderful wife and three happy, healthy children. For four years I have been president of the Northern Virginia Teachers Association and of the Northern Virginia Agricultural, Educational and Industrial Alliance; and I have just been elected secretary and treasurer of the Association of Secondary and Industrial Schools, a recently formed organization embracing schools for our people all over the country. I have contributed occasional verse to the Christian Register, the Public, the Outlook and the Independent. Member: American Academy of Political and Social Science, National Geographic Society, National Association for the Advancement of Colored People.

I finished work in the college in 1902, but waited to take my degree with the rest of the class. I then spent two years in the Scientific School studying engineering, finally leaving Cambridge in 1904. After a short visit home I went to New York City, and have been there or thereabouts ever since practising my profession. My story is nothing more than a professional record. For the first two years I was in New York City working on the construction of the first subway and extensions to the Brooklyn Elevated lines. In the spring of 1906 I adopted the simple life and moved to High Falls, a little village of about four hundred inhabitants, about ninety miles from New York as the crow flies. I have been there for the last seven years engaged on the construction work of the Esopus division of the new Catskill aqueduct. For the last two years I have been division engineer. Having completed the four years' strain at Cambridge and in the month following Commencement having said the "How do you do" and receive the congratulations of those at home, having successfully managed the separate weddings of a sister and a brother, and then having seen a mother and father well started on their extended tour of Europe, a quiet month in the northern woods seemed ideal. There I could rest and fish and paddle and hunt and contemplate the great future. As I was born into a family of men of my profession, my natural leaning was toward a profession, but the years of preparation seemed years which would be valuable in securing a start and a hold in the world of business. So I quit the restful pine woods to go

back to Milwaukee and look for work. Three positions in as many days, I believe, office boy and store clerk and then the realization of the professional training and the advantages of being one's own clerk. So I entered the Chicago College of Dental Surgery in October, 1903, and with the aid of my work at Harvard and one summer course I was able to complete the three years' course in two years, receiving my degree in May, 1905. The next month the state board accepted my papers, and I then entered active practice in Milwaukee, associated with my father. Hardly active practice. I should say, but at least entitled to it. The first few months in a profession are usually not very active. After four years of work and much figuring, matrimony seemed possible, and on April 14, 1909, I married Enid Elizabeth Scott of Milwaukee and Atlanta, going on a fishing trip in the northern woods for our wedding trip. April 21, 1910, our first son, Harold E., Jr., was born, and our second boy, John Scott, was born October 22, 1911. Since entering the practice of dentistry I have been active in the state, county and local societies, lecturer in the Wisconsin College of Physicians and Surgeons and on the staff of the Milwaukee Children's Free Hospital. I have been engaged with others in an attempt to secure dental inspection of school children and in the establishment of a free clinic for the poor attending our public schools. My next desire now is to be back in old Cambridge and help celebrate our Decennial. I have written papers for the Dental Society meetings. Member: Milwaukee University Club, Harvard Club of Milwaukee, Wisconsin State Dental Society, Milwaukee County Dental Society, Milwaukee Odontological Society, Military Order of the Loyal Legion of the United States, Wisconsin Commandery.

RECORDS OF THE CLASS

Harry Holliday Horton was born July 11, 1878, at Sheffield, Pa., and died there March 8, 1912. He was a son of the late George Horton and his wife, Eunice L. Barnes. He was descended from Barnabas Horton, of Mowsley, Leicestershire, England, who settled at Southold, Long Island, in 1640. Among his ancestors on his mother's side were Deacon Benjamin Barnes of Branford, Conn., and John Alden and Captain Myles Standish of Plymouth, Mass. Mr. Horton prepared for college at the Heathcote School in Buffalo, N. Y., and entered Harvard in the Class of 1903. He never enjoyed robust health, and during his freshman year at Harvard was obliged to leave college on this account. Subsequently he became interested in art. He spent two winters studying at the Buffalo Art Students' League. From 1906 to 1908 he studied under Robert Henri at the New York School of Art. In 1909 he purchased the homestead and farm of his grandfather at Sheffield, and in the care and management of this farm he took the greatest interest. With his mother and brother, he donated to his native town a high school building in memory of his father. For a man of his limited physical strength he displayed an unusual amount of energy and interest in all movements and projects for the advancement of Sheffield and its people. Kind, thoughtful, sympathetic and helpful, it is possible that he at times overtaxed his strength to help advance some cause in which he was interested and in which his help was needed. His death was due to acute dilation of the heart following a week's illness from bronchitis.

My work since leaving Harvard has been in education. I have taught in several of the high schools and preparatory schools of New England. For two years I was an instructor in the Somerville Latin School, my old preparatory school for college. At present I am in the educational department of the Boston Young Men's Christian Association. Besides my day work I teach also, for about sixty nights a year, young men and boys who are employed during the day. This has proved very interesting and satisfactory work, for the students, as a rule, take a remarkable interest in their studies. They are anxious to become efficient, and we plan to help them accomplish their desires.

Harvard, fortunately for me, bid me au revoir merely, in June, 1900. After a year's experience of Yale and two years at Bowdoin, the latter situated near my parents' home at Brunswick, Maine, I came to rest once again in Cambridge, to study economics for two years. In the summer of 1905 I entered upon a year of publicity work in Boston, coming to New York in the fall of 1906. The editor of the Tribune took pity on me with commendable promptness, and apparently has remained compassionate during the intervening hard and crowded but wonderfully instructive years. He still employs me.

In September, 1903, I entered the cotton trade, in which I am still struggling. My first position was in the Memphis office of Messrs. W. A. Short and Company, a firm of cotton buyers whose main office was in Helena, Ark. The next fall, the Memphis office being closed, the firm retained my valuable services in their main office at Helena. This season proved quite a strenuous experience owing to the fact that the crop of 1904-1905 was the largest cotton crop produced to that date. Modesty prevents a statement of the number of hours per week that office force was supposed to labor. Besides, in these days of "social justice," one hesitates to start an inquiry into the fate of the average cotton clerk, as no fifty-four-hour-a-week law applies to this branch of the industry. In 1905 I became office manager for Hubbard Brothers and Company in New York, which position I held until September 1, 1911, when I became a junior partner in that firm. In December, 1908, I became a member of the New York Cotton Exchange and was elected a member of the board of mana-

gers of that institution in June, 1910, still holding that position. I am a trustee of the St. John's Riverside Hospital and also of the First Unitarian Church of Yonkers. I was married on March 27, 1912, at Las Cruces, New Mexico, in the teeth of a howling dust storm. Our eastern classmates will probably not appreciate the dry humor of this situation, but surely those who have personally experienced one of these delightful incidents of the Great American Desert will appreciate the fact that our marriage was unique as well as picturesque and romantic. Further "intimate and spontaneous" information will gladly be supplied to any members of 1903 who care to call at the New York Cotton Exchange, where I assure them they will receive at least one hearty welcome. For two years after leaving Cambridge I was connected with the office of E. L. Ransome, consulting concrete engineer, 11 Broadway, New York. In the spring of 1905 I went with R. A. Cummings, consulting engineer, and for nearly three years acted as field engineer in charge of concrete building construction. In 1908 I served the General Fireproofing Company in Youngstown, Ohio, as assistant to the chief engineer. After an experience of two years with them as sales engineer and designer I spent a year with the Nicola Building Company as chief engineer. In the fall of 1911 I organized the Hunting Davis Company, and have been with it as chief engineer ever since. During this time we have designed and built many large factories and warehouses in the Middle West. I have written a paper on Reinforced Concrete, which was read before the American Society of Mechanical Engineers. Member: American Society of Civil Engineers, Engineers Society of Western Pennsylvania, Harvard Club of Western Pennsylvania.

In the autumn of 1903 I went out to St. Paul to work in the accounting department of the Great Northern Railway Company. Some weeks after my arrival there I was surprised and delighted to see an old friend and classmate walk in and be assigned to a desk place near me. The joke of it was that we were still, though through with school and college days, known as "students," as we were engaged in taking a course of instruction, supposed to be open only to a select (?) few, to fit us in as short a time as possible for the position of division superintendent. Some months in the accounting department were followed by work in the stores department, where we got right down to overalls, and hustled supplies out on the line. This was followed by outdoor work on roadbed and track and work in a division office. A most delightful vaca-

tion from this work, interesting though it was, was afforded in January, February and March, 1905, when I was one of a party of Great Northern men to make the trip on the maiden voyage from Seattle of the steamship Minnesota, which is still the giantess of the Pacific. We went to Japan, China and the Philippines. At Manila we had the pleasure of meeting a number of Harvard men. I believe Bowditch was not then there. I made a report on trade conditions in the Orient for Mr. Louis Hill, then vice-president of the Great Northern. In January, 1907, family affairs called me back east, and since that time I have been with the head office of the United Fruit Company in Boston, devoting the greater part of my time to our insurance matters, which, as may be supposed, with our great fleets of ships, thousands of buildings and tens of thousands of employees, are not small. I am very happily married and find my chief delight in life in my home and two youngsters. The boy is very young yet, but the wise M.D. says he is already a candidate for some Harvard crew or team about the year 1934, as he has a chest and shoulders like a young Samson. Good luck to all the class is my wish, and may it always be true that "1903 is the best company that ever came over from old Germany!"

I came to Cleveland from the Law School because I had a job offered me in the office of Hoyt, Dustin and Kelley and because I thought this city would do as well as any other. It has. First I shovelled coal on a freight boat to

prepare myself as a practitioner in admiralty. Just when I had learned to shovel a man's share of coal I was called into the office to write briefs and run errands. When I had learned that, my good employers sent me to Columbus to become solicitor of the Hacking Valley Railroad, in charge of its general office. I returned in 1910 to Cleveland and started a law office with Robert J. Bulkeley, 1902, with whom I am still practising law; but my firm, like my family, has grown, and is now Bulkeley (1902), Hauxhurst (Princeton, 1902), Inglis (myself), and Saeger (1904). At Western Reserve University I teach "Private Corporations" in the law school, but I am not a professor, only a lecturer, which is less in dignity than an assistant professor or even an instructor. You can't be on a faculty and be less important than a lecturer. The ten years have been empty of adventure of a startling kind, but they have been without disaster, free from heresy, unclouded by politics, rich in domestic happiness and in the loyalty of friends, most of whom are in 1903. After graduating from Harvard I went to the natural gas region of western Pennsylvania and for six months worked in a carbon black factory. Then I got a teaching position in the Connecticut Agricultural College and finished the year there. I decided to become a teacher, so went back to Harvard for two years, then spent a year in Germany. I studied in Munich, Karlsruhe and Strasburg, and made a six weeks' trip to Italy. In the summer I saw the German-American sonder class yacht races at Kiel. Another year at Harvard and I took an S.M. in chemistry, and stepped into what looked like a very good job with the Porter Fibre Bottle Company. The company was a fake and I got out just in time. For a year I worked for the National Carbon Company in Cleveland. The dust caused me to have boils, so I had to quit. Then I taught in Purdue the winter of 1910-1911. The next year I was instructor in the University of North Dakota. The thermometer stayed below zero for thirty-five consecutive days and reached a minimum of forty-three degrees below. I have often seen the wind blow forty miles an hour (official) three different days in one week. After my marriage last summer we lived in Cambridge, and I did

Upon entering Harvard I established a record worthy of passing note in that my home was, as it is to-day, within a few short blocks of the Yale "Campus." So far as I can learn, no other resident of New Haven ever entered the undergraduate department at Cambridge, either before my time or since. Thus that record remains intact. But since graduation I have neither accomplished any feats nor attained any distinctions worthy of special comment. Upon leaving Cambridge I entered the employ of the Bethlehem Steel Company, with which I am still identified. During my first year with them I managed to leave in various corners of their Pennsylvania rolling mills a few pairs of greasy overalls and about forty pounds of sweat, in return for which I absorbed an approximate idea of what they manufactured and their methods of manufacturing it, together with a princely stipend of fifteen dollars for each week thus spent. After a year of this experience I had the good fortune to be taken into the main offices of the company, after which I was

RECORDS OF THE CLASS

transferred to New York, where I engaged myself in peddling the company's wares. A few months later changes came about which necessitated my departure for Chicago, where I was engaged in the same pursuits, except that there I was in charge. (I was "in charge" of one stenographer, who together with myself constituted the entire force of our young organization in that city at the time.) In approximately another year more changes brought me to Boston, where the company opened an office that has developed into a somewhat more sizable affair. I have been here this time nearly six years, and hope that it may be possible to stay many times six more, for from my experiences, which have been quite varied and equally interesting, and from my travels, which have been fairly extended during my time of employment, I have learned that, at least for me, all factors considered, Boston provides one of the pleasantest of communities in which to live. Early in October of 1903 I went to Buffalo, N. Y., in the employ of the R. Laidlaw Lumber Company, in the capacity of tally boy in its white pine yard and docks on the Ohio basin. My duties consisted in tallying lumber, shovelling snow, loading trucks, driving horses, and later on, when more conversant with sizes, lengths and thicknesses, in helping sort the stocks from the long piles on the docks into the various grades standard in the Buffalo and Tonawanda markets. One may realize that the knowledge required to do this is not small when informed that there are twenty grades in all, that there are no printed rules to go by and that a capacity to sort as much as fifty to sixty thousand feet in a ten-hour day is required of an inspector. I stayed until March, 1905, at this work before I felt sure that I knew the grades. At that time I had an opportunity, which I took, to go to the saw and planing mill operations of the Butters Lumber Company, at Boardman, N. C. The cut there is mainly North Carolina pine, cypress and gum, the grading of which was easy to learn after the ground work

RECORDS OF THE CLASS

I had had in Buffalo. July found me down pretty well in weight from hard work in the southern sun for eleven hours each day (six to six), and with a strong longing for food other than "hog and hominy." Accordingly I went back to Boston and Cohasset for the rest of the summer and early fall. December saw me again en route to the South, this time to Gulfport, Miss., where my present firm maintains a branch office for the handling of its export business in pitch pine. Work at that point was partly clerical, and the balance buying, shipping and loading and clearing vessels for the West Indies, Mexico, South America and African ports on the Gold Coast and Ivory Coast. In August, 1906, I returned again to Boston, and since then have been connected with the James and Abbot Company, wholesale lumber and timber dealers, in various capacities,—selling, buying, etc. Outside of business my chief interests have been in swimming and boat racing. I have held various offices in the Brookline Swimming Club and the Cohasset Yacht Club, being now secretary-treasurer of the latter. During my stay in Buffalo I met Miss Gertrude J. Dakin, to whom I was married on October 11, 1910. We have now a husky youngster of six months, who expects to enter Harvard with the class of 1933. Member: Brookline Swimming Club, Cohasset Yacht Club, Cohasset Men's Club, Boston Chamber of Commerce.

of Geneva, Switzerland, and Marburg, Germany, and entered the Harvard Medical School in the autumn of 1903. After a year there I gave up medicine to study painting, and entered, the following autumn, the school of the Museum of Fine Arts in Boston. Becoming curious, after a year and a half, to learn how much better the conditions for study abroad might be, I spent eighteen months in Paris, where I worked chiefly at Julian's Academy. Art is certainly more native to the Latin Quarter than it is to Boston Common, but at the same time I found the criticism of Messrs. Tarbell and Benson so much more helpful than any I encountered abroad that I returned to the Boston school for three more years. Since then I have worked by myself and have painted a few portraits. After my marriage I lived for six months in England. I have written a magazine article, Sport or Business (Harvard Graduates' Magazine, December, 1903). Member: Tavern Club, Union Boat Club.

I entered the Harvard Law School in the autumn of 1903, and left in 1905 to accept an appointment as secretary to the American ambassador in London which was offered me by Mr. Whitelaw Reid. I returned to New York in the fall of 1906 to begin the practice of law in the office of Winthrop and Stimson. I took my bar examinations in April, 1907, and was formally admitted to practice in May of that year. After about two years as managing clerk of the office of Winthrop and Stimson, in 1909 I was appointed a special assistant to the Attorney General of the United States in the prosecution of customs frauds in and about the port of New York. For about six months, with other junior counsel, I assisted Mr. Henry L. Stimson in the preparation and bringing to trial of a series of indictments for frauds committed on the government in the importation of sugar. In April, 1910, I formed a law partnership with William Wickham Hoffman (1902; LL.B., 1905) and Alexander Keogh (1903), one of the civil service commissioners of the city of New York, under the firm name of Hoffman, Keogh and Jay. Member: Harvard Club of New York, Knickerbocker Club, Racquet and Tennis Club of New York, Bar Association of the City of New York.

In the fall of 1903, through the good office of the Harvard Employment Bureau, I obtained an appointment as instructor in Latin and Greek at the Pennsylvania State Normal School, Edinboro, Pa. My experience there was very successful, and I was offered the position for another year at an increased salary, but having made up my mind to leave the teaching profession, I came to Buffalo looking for newspaper work. My reason for giving up teaching was because I could see no financial future in it, and my desire to take unto myself a wife precluded the idea which I had previously cherished of going on and studying for a Ph.D. Luckily for me, perhaps, I escaped becoming a cub reporter and accepted a position which was offered me by the Larkin Company, with which firm I have been ever since. My experience in business has been very satisfactory. My advice to college graduates planning to enter the big business world is to connect with some good reliable firm and then stick to

After 1903 I continued in Harvard as fellow in philosophy for two years, doing graduate work and taking my master's and doctor's degrees, acting as registrar in three summer schools in 1903, 1904 and 1905. I then taught psychology and was vice-president of the Pennsylvania State Normal School in the year 1905-1906, at East Stroudsburg. I was acting professor of philosophy at Dartmouth College in 1906-1907, and accepted a permanent appointment as assistant professor of education at the University of Michigan in 1907. I was promoted to junior professor in 1909 and to full professorship in 1910 in that university. I resigned in 1910 to accept the deanship of the School of Education and professorship of education at the University of Kansas. I am not yet sure that I shall not extend my geographical experiences. In addition to my administrative and instructional duties, I have attempted to contribute articles for the psychological and educational journals of the country. I have been appointed professor of education in Columbia University summer school, New York City, N. Y., for the summer of 1913. I have written for various psychological, philosophical, scientific and other

CLASS OF 1903 — THIRD REPORT

I went out to Arizona to work on the construction of an Atchison branch, laying steel south of Phoenix, and enjoyed the customary initiation for railroad construction engineers, with its combination of ragging, hard work and hard living. During the course of three or four years I had some exceedingly interesting experiences with graders, mules, scrapers, camps, mountains, rivers and deserts, several of which I had enthusiasm enough to describe on the printed page. With the same road I later went into the operating department, for a broader and more thoroughly fundamental railroad experience, confident that general managers were only made in the rank and file of railroaders, and that better service was rendered humanity through efficient trained managers of quasi-public corporations than through the other activities that offer a livelihood or a modest competence for concentrated, sustained and driving effort. I lived at lone desert stations; went to a little Arizona road as superintendent's chief clerk; later, assistant to the auditor; and still later took a job as train dispatcher, the most exacting and painstaking job on a railroad. Thus the young idea; in the hope and buoyance of youth I might still be expecting to become a railroad manager had not a man come along offering quiet luxury on a hacienda in Mexico, with health, wealth and power on the Rio Acaponeta, broad lands and cattle, leisure and contentment, the isolation but authority of a feudal baron. I fell for it; under Don Porfirio Diaz and his old generals' stable government, it was true. I stayed through the first revolution incredulous, and managed to hold the authority of law and government over the people; but after a number of personal encounters with leaders of revolutionary bands in the second uprising, and one or two rather exciting nights, a house riddled with bullets, and no assistance in sight, our consul communicated the warning of the American government to withdraw to a place of safety. Later a United States Army transport came down the west coast to rescue the refugees with which the ports were filled. Last summer I went to Panama, and travelled up the east coast of Central America this fall, and have returned to

Chicago with a deep-seated inclination for the steadier pursuits of a civilized life. Briefly, I was with the Santa Fé, Prescott and Phoenix Railway, headquarters at Prescott, Ariz., from 1903 to 1908; with the Arizona Southern Railway, headquarters at Silverbell, Ariz., in 1908 and 1909; and with the Cía. Agrícola de Quimichis, South America, Hacienda de Quimichis, Tepic, Mexico, from 1909 to 1912. In 1905, with Frederiek Webb, 1896, and A. C. McArthur, 1905, I was instrumental in organizing the Harvard Club of Arizona, acting as its secretary for three years, and seeing its membership increase from three to forty; it included among its members the chief justice of Arizona, and in a modest way offered medals at Arizona secondary institutions. I served once or twice as delegate to Republican territorial conventions. Books or articles which I have written at some time: Without Water; an Arizona Experience (Outlook), Gypsum for Fireproofing (Engineering Record). Member: Sons of the American Revolution, City Club of Chicago, Harvard Club of Chicago, Society of Harvard Engineers, National Geographic Society.

ser, Chicago, with whom he was associated until September 1, 1911. In October, 1906, he was admitted to the Illinois bar; in April, 1911, to the bar of the Supreme Court of the United States; and in October, 1911, to the bar of the District of Columbia. His experience in the practice of law in Chicago was accompanied by the teaching of occasional law courses in the John Marshall Law School. In September, 1911, he moved to Washington, D. C., and became assistant professor of law in the George Washington University, where his attention is devoted primarily to teaching law, and secondarily to writing on legal topics and acting as advisory counsel. Books, articles or plays which he has written or translated: A collection of Illinois cases on Suretyship, article on Contracts in Library of American Law and Practice.

HENRY NEELY JONES

Born	<i>Ashland, Me., Oct. 25, 1881.</i>
Parents	<i>Henry, Manetta Rowena (Fifield) Jones.</i>
School	<i>Coburn Classical Institute, Waterville, Me.</i>
Years in College	<i>1899-1900.</i>
Degrees	<i>A.B. (Colby, Me.), 1905.</i>
Married	<i>Cora Crommett, Waterville, Me., June 26, 1907.</i>
Children	<i>Henry Crommett, April 12, 1908.</i>
Business	<i>Bacteriologist.</i>
Address	<i>(home) 32 Linden St., Brookline, Mass. (business) Room 705, State House, Boston, Mass.</i>

Following my very brief but wholly enjoyable sojourn at Harvard as a special student, I entered the University of Maine with the class of 1904. The following year I did not return to college, but instead devoted myself to the selling of prints, percales, sheetings and similar staples of the dry-goods trade. After a year's experience in mercantile employment I reëntered college, this time at Colby, and was graduated with the class of 1905. Following graduation I enlisted as a teacher. My first school was the North Haven High School, at North Haven, Maine,—needless to say, a small affair with only thirty or forty students. The following year I served as teacher of sciences in Leavitt Institute

at Turner Centre, Maine, and the next year, 1907-1908, I was sub-master of the high school at Waterville, Maine. In the autumn of 1908 I attended classes and did special work in bacteriology and the medical sciences at the Medical School (Harvard), and later attempted research work on the "wilt disease" of gypsy-moth larvæ, under the direction of Professor Theobald Smith, for the state forester's office. In August, 1910, I was appointed bacteriologist to the State Board of Health to succeed Dr. E. L. Walker, who had accepted an appointment as protozoölogist to the Bureau of Science, Manila, P. I., and I have been retained in this position since that time. Address	<i>2509 Prince St., Berkeley, Cal.</i>

In the fall of 1903 I registered in the University for the master's degree in science. Just before the end of the school year the Agricultural College of Montana called me to the position of instructor in biology, which position I held three years, teaching classes in botany and zoölogy. In the fall of 1907 I resigned from the college to accept the principalship of the Teton County High School at Choteau, Mont.

CLASS OF 1903 — THIRD REPORT

During the two years spent in Choteau I served on the county board of educational examiners. After spending the summer of 1909 at the Agricultural College conducting entomological life-history studies, I moved to Berkeley, Cal., and took up work in plant pathology in the University of California, registering for the degree of M.S. In January, 1910, I secured the position which I now hold and left the University at once. During the past three years I have lived in Redding, Shasta County, California, where I have been engaged in examining the farms with reference to the pathological conditions of the various crops and reporting these conditions to the Mammoth Copper Mining Company. My studies have also included the native timber and all vegetation in the region. During the present semester I am registered in the University of California in order to conduct investigations along the line of factors which operate to reduce the yield of wheat in Shasta County for the company which employs me. This work, if satisfactorily completed, will entitle me to the degree for which I registered here in 1909. My graduation thesis, *A Revision of the Genus Fexmenia*, was published in the Proceedings of the American Academy of Science.

My life in this vale of tears began with a tragedy: I was born. My recovery from the effect of this blow has been very slow but also very sure. Another ten years in my profession and I shall be quite as dead as the dearest professor that ever got chalk on his clothes or powdered his white soul on a blackboard. But I was not always thus. In the fall of 1903 my innocence innocently let itself into a job of teaching English in Princeton University. Woodrow Wilson was the other neophyte, and our careers ran parallel; though space is often curved in Princeton, they never touched. By 1905 I had acquired such an *odium theologicum* (Princeton maintained early chapel and other items of the *summa salvationis*) that Harvard was safer for me, in spite of my baccalaureate, and thither I accordingly wended me, to sit at the feet of William James, and Santayana, and Royce, and Münsterberg. Ehew! Them was happy days. Philosophy went so excellent with political and social "reform" in Boston, and a wee bit teaching in Cambridge! And when elections and other ructions were over there were the paradisaical

RECORDS OF THE CLASS

joys of the Summer School. I assisted Royce there, and in the following winter, James, and held the Walker Fellowship and fought Martin Lomasney, and—and the authorities decided I was too active and advised the cycle in Europe instead of the regulation thirty days to the month in Cambridge, so I gathered wisdom from Schiller in England and Bergsen in France, among others, and came back to be scolded in Latin by Prexy Eliot, and to wear a Ph.D. like an aura the rest of my accursed days. The faculty issued me a license to lecture, and I rioted in words according to this license at Harvard, and for a term at Clark College, Worcester (1910), until this Middle Western centre of progress, democracy and efficiency drew me to gyrate in another sphere. And here I have been spinning these two years—my hair thinner at the temples day by day, my manner sedater and my soul chalkier—my spider's web of dialectic, to teach the young idea how to shoot off its mouth. I have written a little, I have held an office or two, ward committees and such, literary or philosophical societies and such. Most of my extra-menal activities have been confined to "social work" (I have voted for Debs twice, and will continue to, I suspect, unless the Socialist party gets another candidate) and to the Zionist movement to renationalize the Jews in Palestine. In that movement I have held and am holding divers offices. The greatest thing I can record is that William James chose me to edit and bring out his unfinished work, *Some Problems in Philosophy*. Books, articles or plays which I have written or translated: (plays) *God's Mercy* (a tragedy in one act), *Job* (a dramatic version of the Bible dialogue); (translation) *Criminal Psychology* (by Hans Pros); edited *Some Problems in Philosophy* (by William James); articles in *Journal of Philosophy*, *Mind*, *International Journal of Ethics*, *Philosophical Review*, *American Hebrew*, *Boston Transcript*, *Journal of Education*, *Maccabaran*, *American Journal of Psychology*, *The Nation*, *The Dial*, etc. Member: American Federation of Zionists, Ethical Society, American Philosophical Society, Western Philosophical Society, University Club of Madison, Socialist Club of Madison.

During my year at Graduate School I was engaged in teaching thirteen subjects in Ballou and Hobigand's School, Boston. I continued here until the summer of 1905. In 1906 a foreigner failed to agree with some of the boys in one of the Boston schools, and I was pressed into service at that institution. No harm came of this and as a result I was given a place in the English High School in Boston. Here I have held forth ever since. After knocking about the school I finally settled down to teach French. In 1910 I was assigned to the Continuation School of Boston, and tried to teach the store employees in four hours a week something about the goods they sell. 1911 has proved my best year. I married in June, sailed to Europe the next day, and had the time of my life. I was assistant to Professor Maurice Castelain at the University of Poitiers (Vienne), France. I partially succeeded in changing the ideas of the French nation about

The three years after graduation I spent in preparation for Holy Orders,—one year at the General Seminary in New York, the other two at the Episcopal School in Cambridge. In 1906 Bishop Lawrence ordained me to the diaconate, and a year later advanced me to the priesthood:—and I'm mighty glad of it! I served three years as curate in Grace Parish, New Bedford, and hope I did no great harm, and then two years in St. Stephen's, Boston, where I got so thin that I cast no shadow, but east many a shoe in the everlasting street walking of a city parish priest. In 1911 I became rector of St. George's, Bridgeport, Conn., where I am mightily enjoying a twelve-hour-day, seven-days-a-week work, and do not envy those of you who have made your fortunes and retired. In the summer of 1910 I took a vacation in England, France and Italy, and the next year went back to England to be married. The trip was very successful, and I have lived so happily ever after that I now cast quite a noticeable shadow. Every night I scan the hotel arrivals in the papers of this distant place, hoping to find the name of some stray 1903 man, with the intention of enticing him away from his hotel to the safety of my rectory. It would be an act of charity on the part of any of you finding himself in this place to telephone to me, and come and give me a whiff of 1903.

And there've been quite a lot of 19's more”; etc.

After leaving college I was employed for a few months as clerk in the office of Emmons Brothers and Company, manufacturers of hats, Boston, Mass. In December, 1903, I became a clerk in the office of Appleyard and Company, brokers, Philadelphia, Pa., where I remained until December, 1905. During the greater portion of 1906 I was ill and consequently unemployed. In October, 1906, I entered the employ of Ladenburg, Thalmann and Company, bankers, 25 Broad Street, New York, where I was assigned to the mining and railroad department. I filled successively the positions of clerk, bookkeeper, assistant auditor and auditor. In April, 1910, I was elected secretary and treasurer of the various companies comprising this department, which positions I am still holding. Member: Harvard Club of New York, Nip-nichsen Club of Spuyten Duyvil.

DANIEL WALDO KNOWLTON

Born	<i>West Upton, Mass., April 7, 1881.</i>
Parents	<i>Daniel Waldo, Mary Anna (Frost) Knowlton.</i>
School	<i>Pomfret School, Pomfret Centre, Conn.</i>
Years in College	<i>1899-1903.</i>
Degrees	<i>A.B., 1903.</i>
Unmarried	
Business	<i>Lawyer.</i>
Address	<i>(home) El Paso Club, Colorado Springs, Col.</i> <i>(business) Mining Exchange Building, Colorado Springs, Col.</i>

I finished the required work for the degree of A.B. at the midyear examinations in the spring of 1903, and spent the balance of the year travelling through the South and West, returning in June to graduate with the class. In the fall of 1903 I entered the Graduate School, taking a special course in metallurgy. In March, 1904, I left Cambridge to take a position with the United States Steel Company, at Duquesne, Pa. There I worked in the rolling mills for nine months, holding various positions, from common laborer at forty dollars per month to foreman of the stripping shop at eighty dollars per month. Following my employment at Duquesne I worked at Braddock, Pa., in the rail mills and in the United States Steel and Wire Mills, holding for several months the position of assistant heater of one of the blast furnaces. In the spring of 1905 I took a position in the American Car and Foundry Company shops at Berwick, Pa., working there until September, when I returned to Cambridge to enter the Law School. Following two years' work in the Law School I travelled one summer through Europe, England and Ireland, then went to New York City, where I entered the law office of James Russell Soley in the fall of 1907. I passed the New York state bar examinations, and worked in this office one year without salary, and about nine months at ten dollars a week. Following this I practised law independently for about six months, receiving one fee of twenty dollars only during that period. In February, 1910, I came to Colorado Springs, where

I am now located. I was influenced in taking this step by the fact that I was well acquainted with Mr. H. Alexander Smith, who was practising law in this city and appeared to be doing very well; through him I had become interested in a small way in an irrigation company and ranch located in the southern part of Colorado. For a year I worked as a clerk for Mr. Smith and was then taken into partnership. For a young firm we have done exceptionally well, I believe, paying expenses from the beginning. Our law work has been quite general, its most interesting features being in the fields of irrigation, mining and public utilities. Through William P. Bonbright and Company, of New York City, we became interested in the law of public utility commissions, and for the past year have made an exhaustive examination of the laws of the various states having such commissions. In addition to the work of our office we have kept ourselves closely in touch with the public works of this city and the state, partly with a view to resulting business, and partly because of the real live interest of such work in a pioneer community as this one still may be considered.

ROSCOE HOSMER KNOWLTON

Born	<i>West Acton, Mass., May 22, 1880.</i>
Parents	<i>Frank Roscoe, Emma Susan Knowlton.</i>
School	<i>High School, Concord, Mass.</i>
Years in College	<i>1899-1902.</i>
Degrees	<i>A.B., 1903; M.D., 1906.</i>
Married	<i>Katharine Helen Coggeshall, San Juan, Porto Rico, Feb. 1, 1912.</i>
Business	<i>Physician.</i>
Address	<i>(home) Juncos, Porto Rico. (permanent) West Acton, Mass.</i>

My senior year and the three following I spent in the Medical School, graduating in 1906. I was for a time interne at the Massachusetts General Hospital, but did not finish my term there. After this I took a rest and later hung out my shingle in Lowell, Mass. I stayed in this city for a little over a year, but things not being entirely to my liking,

RECORDS OF THE CLASS

I determined to change. It is said that Harvard medical men do not spread out much, so I determined to help change this and jumped to Porto Rico. I will say that, aside from being a long way off from family and friends I have never regretted the move. For two years I was employed as physician for a sugar company in Naguabo, and lived on the estate and also practised in the near-by town and surrounding country. During this time I took a good vacation in the States, and when I returned found that the new department of sanitation was organized and was engaged in the cleaning up of the island. I was appointed health officer for my town, which corresponds as nearly to a board of health of one as anything we have at home. The powers are considerably greater, for we have charge of everything even remotely connected with public health, including street cleaning, building inspection, the preparation and sale of food, etc. An important part of the work is the campaign against uncinariasis or hook-worm disease which has been going on for some years. I have charge of the local dispensary, which gives free treatment to all; but in spite of the large number of persons treated, the disease is extremely prevalent. The next most important disease is malaria, and I am also engaged in the work of mosquito extinction. In June, 1912, we were favored with a visit from the bubonic plague, which however did not reach alarming proportions, due to the energetic work in San Juan. More good than harm resulted, as we took advantage of the general alarm to give the island such a cleaning up as it never had before. The summer following my marriage we took a vacation in the States, returning in the fall to this town, to which I had been transferred during my absence. I am still "Oficial de Sanidad" besides practising my profession. Member: Massachusetts Medical Society.

I spent the summer after graduation in travelling abroad, and entered the office of Drexel and Company, bankers, Philadelphia, in October, 1903. In January, 1907, I took a position in the bond department of Drayton and Elkins, in which firm I was made a partner in January, 1909. In December, 1912, I resigned from the firm of Elkins, Krumhaar and Morris, the successors of Drayton and Elkins, to become a partner in the firm of W. H. Newbold's Son and Company. I was married in 1907, and have two daughters, as appears just above, and with the exception of a somewhat extended trip to the Pacific coast in 1908, I have nothing further to report. Business	<i>Orchardist.</i>
Address	<i>Shadeland Orchard, Central Point, Ore.</i>

Having finished the requisite amount of work in my junior year, I obtained a leave of absence from college for 1903, and spent that year in the West, working my way and investigating the country. I worked on a government survey in the Badlands of North Dakota and later in a lumber mill at Bellevue, Wash. In 1904 I returned to New England, and obtained a clerical position with Isaac Prouty and Company, boot and shoe manufacturers, at Speneer, Mass. In the spring of 1907, at which time I held the position of general purchasing agent with Isaac Prouty and Company,

RECORDS OF THE CLASS

I was stricken with a well-nigh fatal illness. This caused a complete reconstruction of plans, and I found myself compelled to seek an absolute outdoor occupation. After a long period of convalescence, in 1909 I came to the Rogue River valley in Oregon and bought a forty-acre apple orchard, which I still operate. While I can hardly be classed among the "idle rich," I am able to spend my winters in southern California. The life on my Oregon ranch, though having certain social disadvantages, is healthful, wholesome and satisfying.

Three years in Cambridge at the Law School and seven in practice with my father in New York City have filled up the decade for me. No doubt the details of my practice would form a "connected narrative," but I fear the tale would appeal to the editor and readers of the other eight hundred and fourteen copies of the report in about the same way as the sentence of the court appealed to my client in the first criminal case I tried. That case, however, had at least two redeeming features, for the defendant later became head cook at Sing Sing prison and upon his release paid me a friendly visit and received back his watch which meanwhile I had kept for him in my safe. I include the latter incident to show that I have had at least one office of trust. Suffice it to say as to practice that I have had enough to do to keep me busy and then some. I have had two vacations,—one much too short, in October, 1909, when I was married; and another, too long by far, in the summer and fall of 1911, when a case of typhoid fever came my way.

RECORDS OF THE CLASS

The birth of my son also made 1911 a gala year. In January, 1912, our offices at 120 Broadway, which my father had occupied for more than twenty-five years, were completely wiped out by the fire which destroyed the Equitable Building. We got the last of our safes out of the ruins about three months later, and have since been trying to catch up. We are now located at 60 Broadway, where I shall certainly be happy to greet any member of 1903. Member: University Club of Brooklyn, Harvard Club of Long Island, Harvard Law School Association, Adelphi Academy Alumni Association, of which I have been president since 1911; Squadron C, Second Cavalry, N. CLASS OF 1903 — THIRD REPORT

After leaving college in June, 1903, I returned to New Orleans and entered my father's law office for the purpose of studying law. After devoting two years to a combined study of the theoretical and practical sides of the profession, I entered the Tulane University law school, from which I was graduated with the degree of LL.B. in May, 1906. Immediately thereafter I was admitted to practice before the Supreme Court of Louisiana. In the competition to determine who should be the valedictorian of the law class, it was my good fortune to be selected for that honor. Immediately after my admission to the bar I entered upon the active practice of my profession, and shortly thereafter I was admitted into partnership with my father, under the firm name of Lazarus, Michel and Lazarus. In June, 1907, I entered into another partnership, but this one was for life,—with Miss Hilda Grabenheimer. My time has been constantly devoted to my family and my profession, with an occasional dabble in politics. I have, however, never been a candidate or a seeker after any office. I have taken an active interest in collegiate and philanthropic work, acting at times as the alumni coach for the Tulane University debating teams and serving in various capacities in different charitable institutions. Member: Elks, Knights of Pythias, Independent Order B'nai B'nith, Tulane Economic Society, Tulane Alumni Association, Harvard Club of Louisiana.

As soon as I finished college I went to New York City and took a special course of training at the home office of the Equitable Life Assurance Society. I then spent three years in Boston selling special gold bond contracts, winning several prizes in competition for amount of business secured. When the insurance scandals were aired in the newspapers, I left that work to engage in selling stocks and bonds of industrial companies in New England, and helped to promote some of them. On a visit to Youngstown in 1907, I found there such a live town that I engaged at once in the stock brokerage business, dealing chiefly in local industrial securities. In connection with this work I took up promotions, some of which succeeded, while others failed. One memorable failure involved a million dollar hotel and office building proposition backed by two very large construction companies in New York, which, with papers and options all signed and blue-prints out, were compelled to withdraw owing to the failure of the Knickerbocker Trust Company in New York. I then helped to organize a real estate company of four hundred thousand dollars capital, and we have eleven hundred acres at the edge of the town. We have built a suburban street railway through it, and with two hundred

I was married soon after leaving Harvard and went with my wife on an extended trip to Europe. When we returned at the end of nine months I opened a law office in Elgin, where I practised law for five years. I then went into partnership with Judge J. W. Ranstead, and have been with him ever since. The history of these years has been uneventful. One summer I took a short vacation in Europe and one winter made a hurried trip to Florida and Cuba. Several summer holidays have been passed in Spring Lake, Mich., but the rest of the time has been spent at my work here in Elgin. Member: Hamilton Club of Chicago.

The first three years after graduation I spent in the Harvard Law School. My life there, particularly my experiences and associations on the Law Review, is a very happy memory. Upon taking my law degree in June, 1906, I came at once to New Orleans, and after reading the Louisiana Code for some months I was admitted to the Louisiana bar in March, 1907. I have been engaged in the active practice of law ever since, and that has been my principal occupation and interest; but at the same time I have, since October, 1906, been devoting three to four hours a week to teaching in the law school of Tulane University. That school now maintains a full three years' course upon the case system of instruction, and while handicapped by lack of funds, is creditably preparing recruits for the bar and bench of the state. I was appointed a full professor of law in 1912, and have given the courses on torts and conflicts. Unfortunately the demands of active practice do not allow me to give all the attention to my teaching work which it should have. In my first year of practice I employed the leisure which I then had in writing articles on sequestration and lotteries for "Cyc" (Cyclopædia of Law and Procedure), a general law encyclopædia. Since January 1, 1910, I have been a member of the firm of Hall, Monroe and Lemann, attorneys-at-law. I have held no official positions, but have been more or less active in several organizations and societies in which I am interested. I am unmarried, with no prospects. Having had a fair measure of success in various businesses when working my way in college, I decided in the spring of 1904 to forsake the career of a scholar, which was then opened to me by the offer of another fellowship in another university. I determined to start in business by accepting a clerkship in the private bank of M. L. Stewart and Company, of Owosso, Mich., who in addition to my several other references had me examined by a noted phrenologist in New York City. Her recommendations counted for more than my sheepskin. I was substitute clerk during a summer and at last became secretary to the president. His intention was eventually to make me cashier, but his investments did not break right. By mutual agreement, in the face of the inevitable failure that came upon the bank within a few months, I left for Chicago. In those early years it was an uncertain and difficult struggle I passed through. Often I felt that in forsaking the scholar's life I had burned my bridges behind me. I had no definitely planned career to guide me when I was working on shipping floors and in cost departments. I was at Montgomery, Ward and Company's during the time of the great teamsters' strike. It was there that, in spite of receiving three promotions in a year and a half, I decided, since I now had considerable experience in railroading, banking and merchandizing, I ought to turn to manufacturing. In that direction I had always heard lay the greatest opportunities, and I am still content with that idea. Accordingly I resigned from Montgomery, Ward and Company. During my experience of about seven years with the Western Electric Company at Hawthorne, Ill., I aimed to become well acquainted with every phase of manufacturing. I was successively shipping clerk, cost clerk, secretary to the general manager of the power apparatus shop (then the only one at Hawthorne), secretary to the general superintendent of American plants, head of the accounting inspection department,

RECORDS OF THE CLASS

statistical bureau and inventory section, etc. In my last work with that company I was engaged in framing new routines and was a freelance on staff development work, excepting when I had to inventory those numerous millions that were being invested at Hawthorne.

Suddenly I knew that the position I had practically created for myself after a lengthy struggle had a greater market value for me outside than inside the firm. I realized that the services I was giving were those of a specialist and that I was ahead of the rest of their organization on the subjects of systems of control and efficiency. I had spent my vacations studying other factories comparatively. I became an efficiency engineer, and during the whirl of the last two years I have spread my services amongst factories in some thirty-odd industries, in fact have at times been at work for several entire industries. At the risk of appearing boastful but only to show the variety of work that such a position offers. I have personally been engaged in the following kinds of factories: furniture, table, match, bed, sash and door, chair, metal cabinet, school seat, metal working (miscellaneous), gas engine, vehicle, wheel, etc. Recently I have been appointed general manager of the newly organized firm of efficiency engineers, L. V. Estes, Incorporated, Chicago. There has been very little more in my life to date than the gradual development in me of some degree of executive ability and business insight. I have won neither fame nor money for myself yet; but, since I have been able to command for my company fees ranging from twenty-five to fifty dollars a day, and prove them good investments for clients, I feel that I am having success with the kind of work that I enjoy most. After leaving college in 1903, I worked for about a year in our mill at New Bedford, Mass. For two years after that I travelled west for our concern, the Holden, Leonard Company, with my headquarters in Boston. In the spring of 1906 I moved to New York and took charge of the selling end of the Oreko Woollen Mills at New Bedford, which position I have held since. Early in the year 1909 I made a trip around the world to bring home my brother Charlie, who had typhoid at Rangoon, Burma. As to offices, I would say that I am a director of the Holden, Leonard Company and a governor of the Westchester Country Club. I left Harvard at midyears, 1903, and entered the law office of Brooks and Hamilton, Springfield, where I studied law until September, 1904. From that date until the fall of 1905 I was in the employ of the National Bank of Commerce, Boston, Mass., attending the Boston Young Men's Christian Association evening law school. In September, 1905, I returned to Springfield, Mass., and entered the office of Ralph W. Ellis, 1879. I was admitted to the Hampden County Bar in 1908, and have practised law in the office of Ralph W. Ellis, specializing in probate and real estate law, ever since. During the years 1908 and 1909 I was a member of the Republican city committee. I was elected to the city council in December, 1909, and held this office until January 1, 1912, declining a further term. Member: Winthrop Club, Springfield Country Club.

In the fall of 1903 I entered the Massachusetts Institute of Technology, and at the end of the third year in that institution, when nobody was looking, stole a degree of S.B. in mechanical engineering. That summer (1906) I had the good fortune to be a member of a camping party which spent three weeks in the Yellowstone National Park, and, finishing with an extended trip to the Pacific coast through the Canadian Rockies, entered temporarily the engineering office of Greeley, Howard and Company, Chicago, surveyors. In January, 1907, I entered the employ of the Chicago and Alton Railway as a special apprentice in the repair shop at Bloomington, Ill. During my two and one-half years with that road I had many varied and instructive experiences, but those of most value were connected with the labor organization known as the International Association of Machinists. I was a member of this organization about two years, and, during my last six months in Bloomington was an officer of the local organization. In the fall of 1909 I entered the mechanical department of the Chicago and North Western Railroad. In this, my last railroad adventure, I had the good fortune to be sent to Toledo, Ohio, on the series of brake tests carried on by the New York

Central, the Pennsylvania, and the Westinghouse Air Brake Company. The purpose of these tests was to determine the breaking power necessary and advisable for the new heavy steel passenger cars. I ended my railroading career in the position of round-house foreman,—the one position in a railroad where, as a railroad president and Harvard man expressed it, “You get h— from everybody.” For the past two years I have been located in southwestern Colorado, and although I have various pursuits which take most of my time and energy, I have become particularly interested in scientific farming as applied to potato growing. This work is proving extremely interesting, and in all probability the near future will find me struggling with the manifold problems of intensive farming.

In September after graduation I started on a trip around the world with A. H. Schefer. In San Francisco, A. C. Champollion, 1902, joined us and remained with us until we reached India. It was not until two years later that I settled down to anything serious. Then I began a two years' course of study in the School of Mines at Columbia University, which work was brought to an untimely end in April, 1907, by a serious attack of rheumatism. This necessitated my going to some hot springs to be cured, and I chose Aix-les-Bains, where I spent the greater part of the summer. In the fall I went to Iowa to study certain family interests, and took up my residence in Des Moines. There I remained most of the time until the following June, when I returned to France to complete the cure started the summer previous. In August I was married in England, and a few months after returned to this country. I entered the office of the Brooklyn Improvement Company, where I have been ever since. In June, 1909, I attended our class Sexennial, having three years previously attended the Triennial. Later on in the summer I visited the Northwest and Alaska. Since then I have done nothing worth mentioning, having lived a conventional city life. This is broken each spring, however, by a vacational pilgrimage to one place or another, and this year I trust will include our Decennial. Edward Clarence Littig, son of John and Louise R. Littig, was born in Davenport, Iowa, September 6, 1878. He inherited a strong constitution, which, together with the fact that he spent his boyhood on the farm, made him prominent in athletics from the time he entered the Davenport High School, from which he graduated in 1897, until he left Harvard in 1903. He spent one year at Morgan Park (Illinois) Academy and one year at Iowa State University before entering Harvard. Football was his favorite sport, and, although on account of his deafness and his light weight he never made the 'varsity team, for three years he played faithfully and pluckily on the second eleven, doing his best to serve the college in that rather thankless position. In the middle of his sophomore year his deafness increased so that he was obliged to leave college and take special treatment. This resulted in sufficient improvement to enable him to complete his college course and take his degree with the class. Littig belonged to no social organizations and did not take a prominent part in college affairs, largely because his deafness kept him somewhat aloof. Everyone who knew him liked and respected him for his unassuming, straightforward life and the cheerfulness with which he bore his physical handicap. Few people knew that he had a considerable talent for acting and impersonation, because his modesty kept it hidden from all but his most intimate friends, and to these it was a constant delight. Though he

did not take high rank in studies, he had good understanding and judgment. After graduating from college Littig went into the retail florist business in the firm of Littig Brothers in Davenport. He kept up his interest in football, and it was while coach of the Davenport High School team in the autumn of 1906 that he met his death. While the team was returning on a car from a tie game with a neighboring team some opposing "fans" drove by in a buggy and lashed the windows of the car with a whip. Littig, in jumping out with some others to chastise them, caught his foot in the spokes of the buggy and was dragged and pounded for some distance before the excited horse could be stopped. He died the next day, November 4, 1906, as a result of his injuries.

I have found the road so far almost as hard as the hero of Bunyan's Pilgrim's Progress found his, but can honestly say that it has been far more interesting, and I am not sorry a bit that I have undertaken it rather than some other that my degree of A.B. might have entitled me to tread. position at Buffalo on my way home. In the fall I entered the shops of the J. G. Brill Company of Philadelphia as an apprentice. In November, 1902, I developed typhoid fever, and spent three months in a private hospital in New York, returning home in March, 1903. On April 1 I sailed with the family for Europe, and spent several months in the south of England; then went to southern France, Italy, Bavaria, Germany, Holland and Switzerland, travelling slowly and making a restful stay in various cities. I reached home in the fall and went back to the shops of the Brill Company. The following year I was sent out to St. Louis in charge of the company's exhibit at the Louisiana Purchase Exposition, and remained there until the close of the Fair. Upon my return I was taken into the sales department, and spent the next few years in this work. In the fall of 1908 I took the Strang gasoline-electric car, of which the Brill Company built the body and trucks, under its own power over the lines of the Lehigh Valley and Erie railroads to Chicago, and from there over the Chicago and Alton to Bloomington, where it was tested in local passenger work. In April, 1909, I resigned and spent the following year in placing our firm at Downingtown in the Chester Valley on a paying basis. A year later I started in the brokerage business with Mellor and Petry of Philadelphia. Last fall I was elected secretary of the Chester Valley Farms Coöperative Association. I am still in the brokerage business with the same firm, which on January 1, 1913, became Mellor, Petry and Canby. Of the ten years which have elapsed since the return to the Fatherland, the first seven (except 1908-1909) saw my name still in the Harvard Catalogue; the last three have been spent at Columbia. Until June, 1905, I stayed on at Cambridge taking graduate courses. Becoming interested

in Latin MS. No. 25 of the Harvard Library, I decided to search the libraries of Europe for more of the same sort. At four o'clock one June morning I left Harvard Square in my overalls and shipped as a cattleman on the *Devonian*, reaching Liverpool flea-bitten but otherwise intact. There I met Will Bedal, 1903, and together we spent two months tramping through parts of England, France and Switzerland. In December I began deciphering codices in Munich at the *Hofbibliothek* (and Bierstoff at the *Hofbräu*), and stayed through the Carnival and the Xmas Bierfest. The next four months I wandered from library to library in Italy, then back to Paris, London and Oxford, returning home in November. I received my doctorate in 1907, and got a job as assistant in the Summer School. In the fall I returned to Italy and spent two years in the American School at Rome, first as Harvard fellow, then as fellow of the Carnegie Institute. April, 1908, was memorable for a trip to Greece with Weston B. Flint, 1903. In September, 1909, I joined the throng of young instructors who hurry back and forth between Radcliffe and the Yard. In the summer of the same year I presided over the obsequies of Greek in the Harvard Summer School. (My class included a Chinaman.) Imagine how I felt the same summer receiving two salaries at once! I had been called to an assistant professorship in Columbia for 1910-1911, and my salary began three months before I went there. Columbia continued to treat me so well that in May, 1911, I could marry Ralph Abercrombie's sister, having ardently desired to do so since January, 1910. I am now a contented cave-dweller in a New York apartment, but to remind me of the good old days, I shall teach two Latin courses in the 1913 Summer School at Cambridge. Books, articles or plays which I have written or translated: *Widening Toward the Past* (*Classical Journal*, V, 8, June, 1910), *Aristophanes in the XVth Century* (*Proceedings American Philological Society*, Vol. 40 (1910), p. lvi), *The Sicilian Translators of the Twelfth Century* and the First Latin Version of Ptolemy's *Almagest* (in collaboration with Charles H. Haskins) (*Harvard Studies in Classical*

Address	<i>(home) 71 Moulton St., Charlestown, Mass.</i> <i>(business) 131 State St., Boston, Mass.</i> <i>(permanent) 11½ State St., Boston, Mass.</i>

Being in poor health when I left Harvard, I travelled for two or three years, returning to Boston in 1905. Then I engaged in the banking and security business, serving for a short time as treasurer of a trust company. During the ensuing years I have been treasurer of several industrial companies and acted as trustee for important interests. In the fall of 1911 I resigned my various positions to give my time and attention as assistant treasurer and secretary of the United Telephone Company. I am still with this company as assistant treasurer and secretary.

Dudley Lathrop Loomis

Born	<i>Tiffin, Ohio, March 15, 1880.</i>
Parents	<i>George Dudley, Liona (Sullivan) Loomis.</i>
School	<i>High School, Tiffin, Ohio.</i>
Years in College	<i>1899-1904.</i>
Married	<i>Katherine Howard Webster, Brookline, Mass., June 11, 1902.</i>
Died	<i>Southampton, England, June 5, 1909.</i>

Dudley Lathrop Loomis was born March 15, 1880, at Tiffin, Ohio, the son of George Dudley Loomis and of Liona Sullivan. His father was a banker and manufacturer. He attended the Tiffin High School, but for several years lived a rough outdoor life, covering on horseback practically all the wild regions of Mexico, Arizona and Colorado. His tastes took him away from civilization, and for the greater part of that time he was alone, sleeping outdoors wherever

nightfall found him and having many exciting experiences with wild beasts and with men. In June, 1898, while cruising off the coast of Labrador towards Greenland, he was caught in an ice pack and held in a dangerous position for over a week. The following year he attended Heidelberg University in Germany, where he wrote several articles on his travels. He entered Harvard College as a freshman with the Class of 1903. While there he satisfied his desire for strenuosity by playing baseball and by service in the First Corps of Cadets. On June 11, 1902, he married Katherine Howard Webster at Brookline, Mass., but they were subsequently divorced after Loomis had left college. The year after leaving college Loomis took a general science course in the Lawrence Scientific School. He then returned to his former home in Tiffin, Ohio, where he became manager of the Loomis Machine Company. He died at Southampton, England, June 5, 1909.

JAMES COUPER LORD

Born	<i>New York, N. Y., May 9, 1881.</i>
Parents	<i>James Brown, Mary Townsend (Nicoll) Lord.</i>
School	<i>Groton School. Groton. Mass.</i>
Years in College	<i>1899-1903.</i>

Business	<i>Mercantile.</i>
Address	<i>(home) 26 East 54th St., New York, N. Y.</i> <i>(business) 36½ Broadway, New York, N. Y.</i>

After leaving college in the fall I entered the United States Mortgage and Trust Company, where I stayed for two years. From there I went in the brokerage office of Dudley Brothers Company, remaining there until the spring of 1908; from there to the New York Dock Company, where in a few months I took charge of the coffee department,—the largest department in the concern. I remained there until I was offered the position of director and treasurer of the Royal Typewriter Company, which I accepted, and still hold.

GEORGE LYND LORILLARD

Born	<i>Newport, R. I., Aug. 17, 1881.</i>
Parents	<i>Louis L., Katherine (Beeckman) Lorillard.</i>
School	<i>St. Mark's School, Southboro. Mass.</i>
Years in College	<i>1899-1902.</i>
Degrees	<i>A.B., 1903.</i>
Unmarried	
Business	<i>Diplomat.</i>
Address	<i>(home) Catherine St., Newport, R. I.</i> <i>(business) Department of State, Washington, D. C.</i>

I passed the necessary number of courses for the degree of A.B. in three years, and spent the year from June, 1902, to June, 1903, in Europe perfecting myself in foreign languages, notably in Germany and France. On April 29, 1903, I was appointed second secretary of the United States legation at Habana, Cuba. I returned to Cambridge for Class Day, 1903, but was compelled to leave for Habana before Commencement, and my degree was sent to me there. I held the position of second secretary there for two years at probably the most important time of our relations with that island, just after the first intervention. I travelled frequently all over the island. In March, 1905, I was promoted to be first secretary of the United States legation at Copenhagen, Denmark. During my stay there occurred the separation of Sweden and Norway and the election of a Danish prince to the throne of the latter country. European diplomacy was very busy with this affair and it afforded me many interesting experiences. I was in charge of the legation for over a month. In April, 1906, I was promoted to be first secretary of the United States embassy at Rio de Janeiro, Brazil, where I remained two years, and was in charge of the embassy for three months. I witnessed the Third Pan-American Conference, the visit of Secretary of

RECORDS OF THE CLASS

State Root, and the stay of the combined naval forces of the United States. In June, 1908, I was transferred as first secretary of the United States legation at Lisbon, Portugal, where I stayed almost four years, during which time I was five times in charge of the legation for periods of from two weeks to six and nine months respectively, aggregating on the whole twenty-three months. I witnessed the revolution of October, 1910, and the earthquake of 1909. I was designated to recognize the republic of Portugal for the United States in June, 1911. I was transferred to be secretary of the legation at Buenos Aires on February 1, 1912, since when I have been in charge of the legation twice and am at present in charge. In point of seniority I am the fifth secretary in the United States diplomatic service. There are few, if any, Americans who have served ten years continuously in the diplomatic service and in five countries. I have served under ten ministers. The knowledge of Spanish first acquired by me at Harvard has been of infinite assistance to me, not only in a business way but in a social way as well. During the past ten years I have returned to the United States four times on leave of absence and each time visited Cambridge. Member: Knickerbocker Club of New York.

mitted to the Ecole des Beaux Arts in Paris that winter. I stayed in the Latin Quarter until December, 1908, and travelled from Norway to Sicily during my vacations. I entered Mr. Cass Gilbert's office in New York on my return and was there, more or less, for three years, being sent to Portland, Ore., for eight months, to superintend an office building; also to Texas for a month, to work on the general plan for the State University. I went across the line for a fortnight into Mexico and while there fifty thousand United States troops were mobilized. I saw a few insurrectos, but had no trouble. August 1, 1912, I opened an office in Boston, but still represent Mr. Gilbert on the new Beverly public library. I am also architect-in-chief for Doodle Page's and Pumpelly's plantations in North Carolina.

CHARLES BUTLER LOUGHEAD

Born	<i>Charlestown, Mass., May 15, 1881.</i>
Parents	<i>Robert, Mary Evelyn (Butler) Loughead.</i>
School	<i>Boston Latin School, Boston, Mass.</i>
Years in College	<i>1899-1903.</i>

Unmarried	
Business	<i>Teacher.</i>
Address	<i>130 Sycamore St., Winter Hill, Somerville, Mass.</i>

I studied in the Graduate School in 1903-1904 and received the degree of A.M. I was a teacher in the Waban School at Newton, Mass., in 1904-1905, and also in the Boston Young Men's Christian Association Evening Institute. In the years 1905 to 1908 I was studying in the Graduate School again, and received the degree of Ph.D. in classical philology in 1908. In 1908-1909 I was a teacher in Wesleyan Academy at Wilbraham, Mass. I fell seriously ill in June of that year and the convalescence has been extremely long drawn out. At present I am on a stern chase after my health, doing a little tutoring but not much of anything else. Member: Classical Association of New England, Harvard Teachers Association.

Business	<i>Lawyer.</i>
Address	<i>(home) 207 Dodge St., Beverly, Mass. (business) 85 Devonshire St., Boston, Mass.</i>

The school years 1903 to 1905 I spent in the Harvard Law School, graduating in June, 1905. I was admitted to the Massachusetts bar in August of that year. Practice was not immediately begun, and several of the months preceding August, 1906, were spent in the Southwest. In the early fall of 1906 I became associated with George W. Anderson, in the practice of law at 43 Tremont Street, Boston, later moving to 85 Devonshire Street, with the same associations. I have continued the general practice of law to this date at the same address, with some local practice at Beverly. In 1908 I was appointed by Chairman Hitchcock of the Republican National Convention to conduct the campaign in behalf of that party in the colleges, and as president of the National Republican College League was at Chicago headquarters August to December, inclusive. I was elected city solicitor of Beverly, Mass., in January, 1909, and continued in that office until January, 1913. In April, 1912, I was elected alternate delegate to the Re-

Address	<i>(home) 19 Summit Ave., Winthrop, Mass.</i> <i>(business) 120 Franklin St., Boston, Mass.</i>

Having completed my college work in June, 1902, I obtained leave of absence during my senior year. From September, 1902, until April, 1904, I was connected with the treasurer's department of the Worcester Consolidated Street Railway Company at Worcester, Mass. Since leaving the railway company I have been with the American Steel and Wire Company, a subsidiary of the United States Steel Corporation. My first five years with this company were in the sales department office at Worcester. I then travelled about New England for the American Steel and Wire Company, visiting steam and electric railroad companies; but after eight months of road work, I was given an opportunity to go into the sales department office at New York, and I accepted. There I remained about three years, and in November, 1912, was transferred to the Boston office, where I am at present located. Member: Harvard Club of Boston, New England Street Railway Club.

After graduating I went to work in the wholesale leather district in Boston with C. G. Flynn and Company. After "doing six months" with this concern, I went with McNeely and Company, large glazed kid manufacturers. I remained with them over eight years, most of the time acting as salesman. My work took me to the New England shoe manufacturers, especially those north of Boston. In July, 1912, I joined Horace D. McCarthy in the copartnership of Horace D. McCarthy and Company; six months later I bought him out, and am now operating a very small business for myself, under the name of William C. McDermott and Company. I deal mostly with shoe manufacturers and handle such leather as is used in the uppers or linings of shoes. In August, 1903, I succeeded my father (who had just died) as treasurer of the South Boston Building Company. I live in South Boston, a densely settled and rather poor district, and naturally have become interested in charity work. I am now president of a conference of the Society of Saint Vincent de Paul.

of New York, in December of the same year. Shortly after entering this business I became manufacturing man, and handled the making of all their publications for about a year and a half. In the fall of 1905 I returned to Boston to aid in the management of Macdonald and Sons, bookbinders and manufacturers, a business that had been in the family since 1860. In the fall of the same year I coached the Harvard freshman football team. In the spring of 1907 I organized and established a publishing house as a branch of Macdonald and Sons, called The Edinburgh Society, and up to the present date have handled the publications of The Edinburgh Society, together with the manufacturing of Macdonald and Sons. I have kept up my interest in Harvard athletics, and have given as much time as my business would allow. On account of my residence being in Cambridge, I have had the fortunate opportunity of being in closer touch with college life than a good many of my classmates who have drifted to fields afar. In the summer of 1910 I made a short business and pleasure trip abroad, visiting my younger brother at Oxford, where he was at that time a student. My summer residence is in Magnolia, and I have spent as much time as possible in summer on the water, being interested in yachting in Marblehead, Manchester and Gloucester. Member: Harvard Club of New York, Puritan Club of Boston, Corinthian Yacht Club of Marblehead, Manchester Yacht Club of Manchester, Gloucester Yacht Club of Gloucester.

CHARLES EDWARD McGLENSEY

Born	<i>Philadelphia, Pa., July 25, 1879.</i>
Parents	<i>Charles Warrington, Ellen Regina (Martin) McGlensey.</i>
School	<i>DeLancey School, Philadelphia, Pa.</i>
Years in College	<i>1899-1903.</i>
Degrees	<i>A.B., 1903.</i>
Unmarried	
Business	<i>Banker.</i>
Address	<i>The Real Estate Trust Company of Philadelphia, Philadelphia, Pa.</i>

After a year and a half of travel, chiefly in Europe and the American West, my first serious efforts after graduation were directed towards obtaining a commission in the Army, a profession I was ultimately obliged to abandon because of an internal injury. Returning to Philadelphia, however, I obtained a position with the Pennsylvania Warehousing and Safe Deposit Company. Shortly after the first six months I became superintendent of one of the company's depots. It was but a few months afterwards that I had the very good fortune of being moved to the Real Estate Trust Company of Philadelphia, then in process of reorganization. In the capacity of assistant treasurer my duties have involved great responsibilities, being identical in fact with those of the treasurer himself, a position I am occupying to-day.

in addition to which I was made general manager on the death of my father in 1911. In 1910 I sought office and was elected to the New Hampshire legislature, session of 1911. I was also a member of the Constitutional Convention in 1912. I have served the local Republican club in several capacities during the campaigns since I graduated, including the office of president. Masonry has interested me considerably, and I have passed through all the chairs in the two local bodies. During the Russian-Japanese peace conference in 1908 at Portsmouth I had an opportunity to come into rather close contact with the principals on both sides through my father, who was at that time governor of New Hampshire. Books, articles or plays which I have written or translated: I translated several pages for Professor de Sumichrast when a freshman at an eight o'clock class. After graduation I first worked as reporter on the Brooklyn Eagle, later on the Evening Telegram, New York, and the New York Herald. In 1905 I entered the Law School, where I stayed two years, at the end of which I was admitted to the bar of New York State. In the fall of 1907 I was appointed examiner in the United States Patent Office at Washington, where I worked two years. During this time I took a graduate course at George Washington University Law School, taking the degree of Master of Patent Law. I left Washington in 1909 to organize a patent bureau for the Adder Machine Company, a corporation of Pennsylvania, located in Wilkes-Barre, and also maintained law offices in Wilkes-Barre for two years. I opened my New York office at 220 Broadway, January 1, 1912, and a branch office in Washington six months later. I am doing a fine business, and I wish every one in 1903 as much good fortune as I have had in this respect. In April, 1912, I

married Miss Isabelle Scott, a graduate of Brown University and president of her class of 1907. I have had several communications from Roger Ernst these past few years and to my shame this is the first one I have answered. I entered the Harvard Medical School the fall of 1902 and graduated in 1906. I was secretary of the class of 1906 at the Medical School throughout its course. I had a two years' general appointment at the Worcester City Hospital, followed by the medical appointment at the Boston Children's Hospital. Then I went to Seattle, Wash., where I am now located, and have been for three and one-half years, and am limiting my practice to disease in children. I am a visiting physician to the Seattle City Hospital on the children's service, consultant to the Children's Orthopedic Hospital, a member of the board of directors of the Public School Athletic League (an organization which arranges athletic contests for the grade schools, provides competent officials, teaches the boys to play by rule and has an eye out for their conduct during the games), and was secretary last year of the County Medical Society. All the above institutions are in Seattle. I am a member of the Æsculapian Club of Boston. During the past winter I have been in Europe studying diseases of children. I have written numerous articles on diseases of infancy and childhood.

After getting my degree of A.B. in June, 1903, I spent two years in the Scientific School. The summer of that year was spent at Squam Lake taking the surveying courses, and the next summer in Cambridge working at shop work and blacksmithing. During these two years I took all the courses I could in electrical, civil, and mechanical engineering, without specializing in any single branch. My first job was with F. B. Gilbraith in New York City as a draughtsman, with a salary of six dollars per week the first month and eight dollars a week the second month. After about eight weeks I was offered the position of assistant to Professor W. F. M. Goss, then of Purdue University, Lafayette, Ind., who had charge of research work on locomotives. For a year I worked there, with a salary of one thousand dollars. It was very interesting and I gained much good experience. The first of September, 1906, the B. and R. Rubber Company started to install machinery and foundations at North Brookfield, Mass., and I went there to take charge of this work. In the following February the plant began to manufacture, and I stayed to learn the rubber business. After a year I was

I left college at the end of my junior year, having done enough work for my degree. I returned in June and graduated with the class. After the summer vacation I went to work in my father's business, starting at the bottom and working my way up through the factory, salesrooms and executive offices, and was taken into the firm in 1906. The business was then incorporated, and I became secretary and treasurer. My father was a sick man, and I had to take charge of many of his affairs when he died in 1908. I then became president and treasurer of the corporation of M. Martin and Company. I became one of the directors of the Empire City Safe Deposit and Trust Company, served on the executive committee of the Merchants Association of New York, and became interested in some department stores and silk factories. I was also a director of the Montefiore Home, one of the largest charitable organizations in New York. All of these offices I still hold. During the recent strike in the white goods industry I was elected on the board of directors and executive committee of the Cotton Garments Association of New York, and served on the arbitration com-

Almost immediately after graduation I entered the employ of S. D. Warren and Company, paper manufacturers, and started in work at their mills in Westbrook, Maine, working as an apprentice through the various departments for about a year. In September, 1904, I came to the main office in Boston as clerk and salesman. In April, 1905, I was married in Portland, Maine, and on February 18, 1910, I was admitted to partnership in the firm of S. D. Warren and Company. Since leaving college I have travelled very little,

I have been more or less interested in church work and am a member of the vestry or committee of St. Stephen's Church in Boston, and a vestryman of the Ascension Memorial Church of Ipswich, Mass. I am a member and on the executive committee of the Episcopal City Mission; member and of the executive committee of the Boston Paper Trade Association, and president of the Beater Club. In 1911 I moved to Ipswich, Mass., and became a legal resident there, taking an active interest in farming and raising live stock. During the year 1912 I took up politics, and was president of the Republican Clubs of Essex County, member of the Republican town committee of Ipswich, Mass., and have run for the office of selectman of Ipswich, Mass. I am now in the process of preparing myself for the great celebration next June. I left college on the breakdown of my father, and for a few months worked as a bookkeeper for a large furniture company in Worcester. A little later my father's old business was incorporated and reorganized, and I entered it in the capacity of manager and treasurer. This business was called the Mason Brush Works and was principally given over to making textile and paper mill machine brushes. In the fall of 1909 I was married to Elsa Whitin, and took up my residence in Whitinsville, though still keeping my business interests in Worcester. In April, 1910, I entered the Whitin Machine Works of Whitinsville, builders of cotton mill machinery, and took that up as my principal and active business occupation, although still remaining treasurer of the Brush Works but giving up the active management. During my active business work in Worcester I travelled about the New England states, and some of the central states, besides the provinces. On being married my wife and I had an interesting trip through the Middle West out to Colorado. The following year we went through the southern

My first work after leaving college was for the King-Richardson Company of Springfield, Mass. Having earned my own way through college by selling books, I undertook to hire agents for the same firm and to inspire them with the proper fanatical fervor necessary for success in such work. This lasted until 1905, when I left the United States and accepted a position in Mexico City with the American Book Company. For the next three years (1905-1908) I had charge of the publishing end of that firm, translated several of the Mexican mining, land, and tariff laws, wrote and published Hoeck's Guide to Mexico, married the girl I left behind me, increased the family to three, and finally sailed for New York, a sadder and a wiser man. My third job was with Pearson's Magazine, where I was duly installed in charge of the publicity department. During this period (1908-1911) I was exceedingly busy—trying to make both ends meet. As I look over my small circle of friends and acquaintances in New York, it seems to me that they are all busier in that direction than in any other. But that's another story. From Pearson's I went with Harper and Brothers, and have since been in charge of the publicity department of that concern. For the first time in ten years I find myself in a position that is congenial and one which, at the same time, promises a satisfactory future. Books and articles which I have either written or translated: Translated from Spanish to English, *The Mexican Mining, Land, and Tariff Laws*; written

Immediately after graduation I took up water supply engineering in the employ of the Massachusetts state board of health, where I remained about two years. I next entered the employ of the city of Springfield, Mass., as engineer on the construction of the water filtration plant. In the latter part of 1905 I went to Wilmington, Del., as manager of the experimental station of the DuPont Powder Company. In the year 1907 I began at the bottom again, as I felt strongly that I was better suited to manufacturing than to technical work. I began with Gunn, Richards and Company of New York, production engineers and public accountants, and during the next three years I received a broad business training. I am now with the Arlington Company of New York, manufacturers of Pyralin. Member: Harvard Club of New York, Harvard Engineering Society of New York.

I left college to continue work that I took up, as I supposed, for the summer only, and am still doing that work. Our company, the Tabulating Machine Company, has developed the application of punched paper, and mechanisms controlled by punched paper, to the field of figure handling, i.e. accounting and statistical work. This idea, brought into being as an answer to the problem of quickly and accurately compiling the immense volume of data obtained by the census enumeration, has been found to be of great value. Dr.

Hollerith, the inventor, was shown honor in various ways, for his important contribution to political science and economics in thus providing methods of making hitherto impossible compilations and comparisons. New opportunities for usefulness are constantly appearing, and of course the mechanisms involved have been constantly improved and elaborated. Thus our work is a part of the large movement to obtain intelligent scientific management. The development of the Hollerith methods and their application has taken up most of my time since leaving Harvard. I have visited most of the large cities, staying from a day to two years in a place. The present indications are that I shall remain in Cleveland indefinitely. The real pioneering stage now having been passed, conditions are becoming more settled. Incidentally we are now in a position to give more attention to the application of our methods. We believe our work will be of important value to society, and therefore the future is full of interest and ambition. Member: Harvard Club of Cleveland.

After leaving the Scientific School in 1905, firm in the belief that my degree in architecture qualified me to take immediately a front seat in the assembly of great architects, I accepted a position as a poor draughtsman with the Associated Architects in Boston to show them how things should be done. They had but one job, the Boston Normal and Latin School group in the Fenway, and about January, 1906, they had finished all the work I was busy on, which, by the way, was such entertaining material as schoolroom furniture and the like. I then went to the office of Kendall, Taylor and Stevens in Boston, where I wrought myself into a fine enthusiasm over such interesting details as hospital cabinets and linen closets until April, 1906. The fire in San Francisco resulted in the publication in the newspapers of Boston, among other cities, of the crying need of architects in San Francisco. After due deliberation of at least six out of ten hours granted to applicants, I became one of a party of twenty argonauts who left Boston for the West, with the stirring words of our mayor ringing in our ears.

When we arrived in San Francisco, however, five days or so after our departure from Boston, we found no brass band awaiting us nor any one delegated to look after us. After discovering that no one had sent for us, we scattered and in various spheres aided in the work of rebuilding the city. My first work, however, was on the Sonoma County Courthouse in Santa Rosa, a city north of San Francisco. It was a competitive job, and after the drawings were in the hands of the judges, my employer, J. W. Dolliver, farmed me out to a former partner of his while awaiting the decision on the competition. Before the award, which, I am glad to say was favorable, was made, I had changed to the office of William D. Shea, where I was employed from September, 1906, until January, 1911. It was an eventful period and the work was always interesting. The life of the city at this time particularly was such as to stimulate the imagination, but, as I was a negligible part of that, its description does not belong here. In January, 1911, I left the office of W. D. Shea to work for the city of San Francisco as an architect in charge of the various buildings connected with the auxiliary water-supply system, the garbage disposal system, the municipal railways and the tunnels. In this connection I am employed at present, under the supervision of the city engineer. We have built two pumping stations, one garbage incinerator, one car house and a small pump house, and are about to begin the construction of a second incinerator, a water tank of considerable size, a valve house and several tunnels. The work has been intensely interesting, and although at first it was hard to convince engineers of the value of architecture, now they yield the point without argument. I have found time to do but little work for myself,—two or three residences and a couple of miles of docks along the water front complete the list. All my work, however, has taught me the truth of the teaching of my former professor, that although much happiness accompanies the practice of architecture, great riches are by no means a consequence. I do own up to the enjoyment of happiness. Member: Harvard Club of San Francisco.

During the first summer after I left college I spent a large part of my time in making studies of the methods of handling coal at the principal seaports of New England. I undertook this work with the intention of perfecting myself in the physical management of the coal business. In order to gain a greater knowledge of this work I embarked on a sailing schooner from Portland, Maine, bound, light, for Newport News, Va., and then went to Thurmond, W. Va., where in a nearby mining camp I spent eight or nine months. I entered the employ of the New River Consolidated Coal Company as draughtsman and surveyor. Most of my work was underground, where I gained a knowledge of bituminous coal mining. Among many exciting adventures I barely escaped disaster in a mine explosion which wrecked the mine and cost many lives. After my return to the East I went into the employ of the Eastern Coal Company of Providence, R. I., where I was engaged as engineer in charge of the alteration and construction of coal-handling machinery and equipment. After two or three years I completed this work and attempted the sale of coal for a short time, but not finding this a particularly congenial pursuit, I resigned my position and engaged in the designing of coal-handling plants for numerous companies in New England. I then accepted a position in an engineer's office in Boston and had in charge the supervision of the construction of a large plant in Hart-

I spent one year on a biographical encyclopædia; nearly a year with a publicity bureau; a very short time as a reporter on the Boston Journal; and nearly two years in the retail grain business. In 1905 I entered the employ of the Regal Shoe Company, and have been with them ever since, being connected all the time with the wholesale end of the business. Throughout it all I have found life very good; I have made friends, earned a living, established a family, kept out of law-suits and enjoyed myself. Member: John Cutler Lodge, A. F. and A. M.

After completing my college course in three years, I entered the Harvard Law School, but did not take by bachelor's degree until 1903. At Law School I was a member of the Westengard Law Club. Shortly after receiving my LL.B. I located in New York City, and entered the law office of James, Schell and Elkus. My work with that firm tended too much towards specialization, and after a year I

became connected with Wollman and Wollman, with whom I remained until I started practice for myself in September, 1907. A year later I felt fairly well established and married the girl who had been waiting. After three years of living in New York we satisfied our desire for the country by moving to Garden City, a nearby suburb. Here many of my summer hours are spent in weeding the garden, and in winter I am occasionally requisitioned to "crank up" the furnace. Since the arrival of our youngster last June, I haven't seemed to take my customary interest in the many sports which are so popular in this vicinity. I have attended pretty strictly to business, but have done some legal advising at the Educational Alliance of this city and quite a bit of political work, principally from the tail end of a cart. During the recent presidential election I was much occupied, being one of the organizers of the Progressive party at Garden City. My law work has been of a general character, mercantile matters somewhat predominating, and I have been appointed referee by the Supreme Court in numerous matters. While I do not review the last ten years with entire satisfaction, I feel that I have builded satisfactorily for the future.

has revolutionized residence property here; it has created new ideals of beauty and new standards for landscape treatment and laying off residence property, and has attracted the attention of landscape architects all over the country. I delivered an address on Efficient Methods of Platting Residence Property before the National Convention of Real Estate Exchanges in Louisville, last June, and in November, before the American Civic Association in Baltimore, on Creating Residence Neighborhoods by Planning. At this convention I was elected a member of the board of directors of the association. I am a director of the Commerce Trust Company, being probably the youngest bank director in Kansas City. I am also a director of the University Club, Business Men's Accident Association, Civil Service Association, Kansas City Real Estate Board, Kansas University Alumni Association, and other such associations. I am also president of a number of commercial companies controlling several million dollars' worth of property in Kansas City. I am vice-president of the Kansas City Provident Association, and am actively connected with several other philanthropic institutions here. In the fall of 1901 I left for a year's trip around the world. I spent the greater portion of this trip, namely three months, in Japan, where I did extensive travelling through the interior, where few foreigners have been. From Japan I went to India and then on to the Malay peninsula. After leaving this place I spent about a month and a half in Java. On the way to Java I may mention that the boat I was on was shipwrecked by running on to a coral reef in the middle of the Java Sea. We were rescued a few days later after quite a disagreeable experience. From Java I went to India, where I travelled a great deal, seeing thoroughly a large portion of this country. Among the interesting experiences I had in this country was my stop at Benares. I was there during the terrible cholera epidemic. It was calculated by the authorities that the natives were dying at the rate of a thousand a day, the English government having great difficulty to prevent the natives from throwing their dead into the Ganges. After leaving India I went to Africa, Greece, Italy, France and England. After arriving home I worked at the Old Colony Trust Company for three years, and then went into the real estate business (which I did not fancy) for a year. During the Russian-Japanese war I spent two months in Russia, being at Warsaw during the beginning of the riots. After visiting Moscow and other cities, I travelled for the greater portion of a month in Sweden and Finland, and on my way home spent a few weeks in Ireland. Upon my return the greater part of the following year was taken up by business in connection with my father's estate. Then I left for a short trip to Cuba and Jamaica, and through the

South. In July, 1906, the firm of Hamlin, Nickerson and Company, of which I was the junior partner, was formed. After the panic of 1907 I left for a two months' vacation, going to California, fishing, and also visiting some mines in Guanajuato, Mexico, in which I was interested. After travelling through Mexico and leaving Vera Cruz, I paid a second visit to Cuba. My next trip was in 1910, when I took a fishing trip to California. In March, 1911, I left for a trip abroad, via the southern passage, stopping at the Azores, Gibraltar, Algiers and Naples, spending some time in the southern part of Italy and seeing most interesting excavations at Pompeii. After leaving Italy I went to Corfu, then to Greece. From Greece I went to Constantinople, spending quite a long time in this city, leaving by train and travelling through a most interesting country to Budapest. From Budapest I went to Vienna, from Vienna to Paris, and then home. Since my return home the firm has changed to W. G. Nickerson and Company, I being the senior partner.

On leaving college in the spring of 1903, I came west to the mining camp of Morenci, Ariz., where I entered the employ of the Detroit Copper Mining Company as a day laborer. During the following year I moved around from one job to another, gaining as much experience as possible in the mine, the concentrator, smelter and mine office. Having decided that my inclinations and tastes lay in the direction of engineering and particularly mining engineering, I returned to the East and entered the Columbia school of mines. I attended courses during the years 1905, 1906 and 1907; but becoming dissatisfied with things, I transferred in the fall of 1907 to the Mining School at Cambridge, and received the degree of Mining Engineer in June, 1908. The following fall I returned to the Detroit Copper Mining Company at Morenci, Ariz., as an assistant in the engineering office. In June, 1909, I left Morenci, and joined the geological staff of J. M. Boutwell, 1897, who was making a survey of the property of the Copper Queen Consolidated Mining Company, one of the subsidiaries of Phelps, Dodge and Company, at Bisbee, Ariz. Associated with me in this work was E. M. Sawyer, 1904, who took his mining degree at Cambridge in June, 1907. On the completion of Mr. Boutwell's work in the fall of 1909, Sawyer organized a geological department for the company, with me as assistant. The following July Sawyer was called away to take charge of an outside property, which the company was developing under option, and I became chief geologist. Since that time the department has grown quite extensively, there being six men directly connected with it, and as many more indirectly. I have written *The Geology of the Bisbee Ore Deposits* (Bulletin 100 of the Institute of Mining and Metallurgy). Mem-

Arthur Wallace Noyes, the son of Edward P. and Elizabeth C. Noyes, was born at Gardner, Mass., January 26, 1882. He attended the public schools, and graduated from the Gardner High School in 1898, remaining an additional year for graduate work. In 1899 he entered Harvard College with the Class of 1903. Owing to somewhat limited means he lived quietly and took small part in college activities. He specialized to some extent in chemistry and in Romance languages. He was a member of the Boylston Chemical Club and of the Spanish Club. He graduated with the S.B. degree in 1903. After graduation he decided upon a business career, and came to Boston for a course in a business school and an advanced course in French and Spanish at the Berlitz School. He later went to New York, and at the time of his death, March 2, 1906, held a position in the office of the president of the Pacific Express Company.

I had completed the seventeen courses necessary for my A.B. degree in June, 1902, but owing to an unpleasant complication by which, as a result of the examinations, I was not given credit for Chemistry 2, the office record showed that I had completed at that time only sixteen and one-half courses. I accordingly remained in the Summer School in 1902 to take a course in mathematics, which would give me this half

course. I left Cambridge about the middle of August, 1902, and my degree came forward the following June. During the years 1902 and 1903 I taught science and mathematics in the high school at Lebanon, Ind. From August, 1903, to August, 1904, I was finding out how little I knew about business in the office of a large buggy manufacturing plant in Indianapolis. I left this job to go to the western part of North Carolina as the local representative of a company operating mica and kaolin mines. I lived in this locality, for the most part at Rutherfordton, N. C., until December 1, 1906. During the last year of my residence there I managed and edited the local weekly newspaper, which was "the largest and most influential in the eight counties of the congressional district." Since the early part of 1907 I have been living in Indianapolis, having been connected until January 1, 1913, with the Indianapolis Water Company. During 1910, 1911 and 1912 I was auditor of this company, leaving to go into business as a public accountant and auditor. In 1908 I was elected secretary of the Indiana Harvard Club, and have been unable to push the job off on some one else until early in the present year. Address	<i>Woodbury, Conn.</i>

I withdrew from Harvard in April, 1901, on account of ill health. In the following September I went to the University of Pennsylvania, where I took a special course in English, spending one year there. In January, 1903, I entered the employ of P. Garvin, Incorporated, Hartford, Conn., as a travelling salesman, and continued this employment for one year. At the end of that time I entered the real estate business in Waterbury, my home town, and devoted my energies to the construction of tenement property, in which I am still interested to some extent. In 1905 I purchased a large farm in Woodbury, Conn., and the following year, having in the meantime married, we came to Woodbury to spend the pleasant months of the year. After two years spent in Woodbury we became so attached to the old town and its people that we relinquished our home in Waterbury, and spend all of our time in Woodbury: on the farm most of the time and at a local hotel during January, February and March. In October, 1910, I was elected a justice of the peace for Litchfield County, and having qualified, since then I have tried all of the local cases, civil and criminal. The gross disproportion in the remuneration of the judge and the attorneys practising before him caused me to study law then and thereafter. I registered as a law student in my father's law office, and since I have delved into the intricacies of a use upon a use as well as the soy bean as a forage crop. If I am successful in being admitted to practise law in Connecticut, I shall practise in Woodbury. Member: Sons of the American Revolution, Country

I followed the procession from the Law School down Broadway, up Wall Street, down Nassau, up Pine, to 24 South William Street, New York. I polished the handles so carefully that I almost became Mr. Herbert Noble's managing clerk. For purely mercenary reasons I went from there to a desk in Lindsay Russell's office, where he took good care of me and let me watch the last struggles of Otto Heinze's copper frenzy. This was all very well, but meantime I lived up town with Roy Pier and Bob Kernan and Gardner Perry and a bunch of Parkers. Following the law all day and them all night became a tax on the system. Jimmie Byrne had meantime reduced Uncle George Franklin to a frazzle. So together we just dropped the game and made for the stones of Venice on H. M. S. Majestic. If you are worn out, I advise you to do the same. I refer to my biographical notes on Franklin for the account of this trip. We had some very exciting adventures coming home, and then went into partnership at 2 Rector Street. The only really important and pleasant thing I did during this period was to go each summer into the Adirondacks, near the headwaters of the Hudson, with a charming remnant of the old Puritans. Here was song and laughter and mystery and romance, and miles and miles of wooded hills. Jim Field, there, as elsewhere, held down the bass by the camp fire. These excursions in contentment led to frequent engagements in Boston, which resulted finally in a beautiful wedding in Brookline on the second day of October, 1911. Uncle George sought the higher and faster fields of the law, and went into partnership

with Senator Spooner. I dreamed of green pastures and still waters, the harvest field and a song by the fire, so Raphael Pumpelly and I took another chance and bought a plantation in Carolina. There you have it all. The movement in this story is done. If you like to follow a covey into a brake or weigh the cotton in the field, to talk over old times or plan the national campaign, and it may be meet a class-mate or two in my chimney corner, you had better come to Samarcand. My only position of honor is postmaster at Samarcand. My trusts, if they be trusts, are acting as treasurer for an orchard company and a farming plant or two. Books and articles which I have written: From a Law Office to the Cotton Field (*World's Work*, November, 1911), *Memoirs of George S. Franklin*. After graduation I entered the work of student secretaryship of the Young Men's Christian Association at the University of Michigan, remaining at Ann Arbor two years. The glimpse of fresh Middle Western University life was invaluable. I began to sense the largeness of American life. Its social and spiritual problems interested me, and as increasing numbers of students seemed to be adopting the other professions I wanted to try to voice the Ideal, and even at the risk of always wearing a Reverend as a handle, attempt the delicate task of expressing the picture of things as they should be, believing that there is a general drift toward a better state of things. This I recognize as the Divine Purpose. For two years I studied at the Union Theological Seminary, then assuming the pastorate of the Free Congregational Church in Providence, R. I., where I have remained for a little over five years. I have tried to relate myself to whatever seems necessary to be adjusted in the sorry scheme of things that your lawyers and doctors and teachers and engineers and gentlemen of leisure are constantly mussing up. Now just as I am writing this the conviction has blossomed that I need the larger esprit and drive and continuity and uplift and camaraderie of the Episcopal Church, and have resigned to begin as an assistant at the Cathedral Church of St. Paul in Boston under Dean Edmund S. Rousmaniere. Come in, you distorters of life, and get the real hunch.

In the autumn of 1910 I went to Italy, spending the larger part of my time in Rome and Florence, returning by way of Paris, where I spent a few days. School	<i>Tutor.</i>
Years in College	<i>1899-1900.</i>
Died	<i>San Juan, Porto Rico, Sept. 13, 1909.</i>

Horace Partridge was born at Cambridge, Mass., February 19, 1880. He was the son of Frank P. Partridge and Lettie M. Oldham. He attended Harvard University as a special student during the years 1899-1903. He then entered the business which his grandfather of the same name had founded and which his father had carried on under the name of Horace Partridge and Company in Boston, dealers in athletic goods. In 1908, finding prospects not especially bright in Boston, Partridge went to San Juan, Porto Rico, and took a position in the interior department of the government. He performed his duties so ably and conscientiously that he was appointed secretary of the franchise committee of the executive council of the island. The day after receiving this appointment, September 11, 1909, he was drowned while out sailing. Governor Post of Porto Rico wrote of him as follows: "In the short time that he was here he not only gained the love of every American who knew him, but also the absolute confidence of every person in the insular government. The conscientious way in which he performed his duties in the interior department had attracted the attention of all of us, and the franchise committee of the executive council unanimously selected him to take the position of secretary to that committee, one of the most responsible positions in the government. His death is not only a loss to all of us personally, but a positive loss to the government which he was serving."

After graduation I entered the engineering department of the New York Telephone Company. After a student's or apprentice course, about two years were spent on engineering studies of telephone development and districting of New York City, the object being to determine the best arrangement of plant to meet the remarkable expansion of the business. While in New York I was enrolled in the Brooklyn Polytechnic Institute, taking evening courses in electrical engineering. In 1905 I came to Boston, joining the engineering department of the New England Telephone and Telegraph Company. The work here covered the electrical features of long-distance telephony. In 1907-1908 I was a member of a joint committee with the American Telephone and Telegraph Company on toll development plans. In 1908-1909 I was registered in the Harvard Graduate School of Applied Science, specializing in wire and wireless telephony and telegraphy. In 1912-1913 I was instructor in Franklin Union, Boston. Since 1910 I have been in charge of fundamental engineering plans of long-distance lines for the New England Telephone and Telegraph Company. Article which I have written: Boston Telephone Rates (Harvard Engineering Journal, November, 1910). Member: Association of Harvard Engineers, Telephone and Telegraph Society of New England.

After graduation and achieving the honor of the Harvard A.B., I spent one year in the Harvard Law School and one year in the Harvard Graduate School before settling down to the business of life. In July, 1905, I came to New York, and after looking over the field decided to cast my lot with a real estate company or broker. It was not a good cast, for the moneyed man of the firm went broke two months afterwards. Shortly after this I entered the employ of the New York Telephone Company in a clerical capacity, and remained with them until March, 1907, at which time I availed myself of an offer to learn the foreign exchange business from the viewpoint of the broker. (N. B.—I have since discovered that the longer one stays in this department of finance the more there is to learn about it.) I worked for a Wall Street firm of foreign exchange brokers until about two years ago, and then decided to go in for myself in conjunction with one other partner. I am still at it. Member: Harvard Club of New York.

Having decided to devote my working hours to architecture, my first four years after graduation were spent principally in preparation for that profession. One year was spent at Columbia University, New York, and the three following in Paris, France, at the Ecole des Beaux Arts. I found study and life in a foreign country to be a most interesting and enjoyable experience, as well as being the best training that I could give myself for my profession. As I now look back upon it I think it was also a most valuable experience. At the end of three years, however, I was glad to return to my native land and home. Since my return in 1907 I have been associated with various firms of architects in New York, until in January, 1911, I formed my own firm or partnership, under the name of Peabody, Wilson and Brown, with offices at 389 Fifth Avenue, New York. In July, 1903, I entered the employ of the National Bank of Commerce of Boston, and remained until September, 1906. (I had previously been employed there from July, 1901, to September, 1902, but left to return to college and take my degree with my class.) During this period I studied law at the evening law school of the Boston Young Men's Christian Association, and becoming interested in this subject as a profession resigned my position in the bank and entered the Harvard Law School in the fall of 1906, graduating in 1909. During the period of my attendance at the Harvard Law School I held the position of assistant clerk of the municipal court of Brookline. In July, 1909, I entered the employ of the Boston law firm of Choate, Hall and Stewart, remaining until May, 1910, when I became associated in the practice of law with my father, Charles F. Perkins of Boston, since which time I have made no business changes. Member: Harvard Club of Boston, Harvard Club of New York, Corinthian Yacht Club.

Business	<i>Professor of physics.</i>
Address	<i>(home) 1359 Fairmont St., N. W., Washington, D. C.</i> <i>(business) Howard University, Washington, D. C.</i>

In September, 1903, I became a graduate student in physics at Yale, receiving a regular scholarship. In June I was granted an A.M. degree, and became principal of the Leland and Gray Seminary at Townshend, Vt., resigning in June, 1905, to accept the chair in physics at Western Maryland College, Westminster, Md. In September, 1906, I returned to Yale University as a Loomis fellow, receiving the Ph.D. degree June, 1908. During the college year 1908-1909 I acted as supply professor of physics at Trinity College, Hartford, Conn., in the absence of the regular professor. In September, 1909, I became professor of physics and director of applied sciences at Howard University, Washington, D. C. The summer semester of 1912 was spent in graduate work in physics and mathematics at Göttingen. Member: The Physical Society.

CLASS OF 1903 — THIRD REPORT

Upon leaving Cambridge in June, 1903, I secured a job with the Chicago, Burlington and Quincy Railroad in the engineering department, holding the same until August, 1904. I was occupied on location work in northwestern Illinois, and for six months was in charge of the construction of a reinforced concrete arch bridge at Plano, Ill. From August, 1904, until July, 1905, I was assistant engineer for the Long Island Railroad Company, Jamaica, L. I., on maintenance of way work. Between July 1, 1905, and May, 1906, I was connected with the following organizations: engineering department, Pennsylvania Tunnel and Terminal Railroad, Long Island City; engineering department, Rapid Transit Commission, New York City (construction of New York subways); board of water supply of the City of New York (new Catskill aqueduct). From May, 1906, to date I have been connected with the Turner Construction Company, New York City, engaged in the construction of reinforced concrete industrial buildings, in the following capacities: assistant estimator, assistant superintendent, superintendent, steel sales agent, manager of contract department. While the above work has kept me pretty busy, I have been able to get away once in a while on vacations, which have included the following trips: winter of 1907, Cuba; winter of 1908, Italy, France and England; winter of 1909, Cuba and Mexico; fall of 1911, four-hundred-mile canoe trip in northern Quebec, as far as the Hudson Bay Height of Land; fall of 1912, caribou shooting in Newfoundland, and after moose in New Brunswick.

I got mixed up in politics a little bit in connection with a hard fight in New York City against an attempt on the part of Tammany Hall to enact a building code which would put the company with which I am connected out of business. In connection with this fight, I had the fun of running a mass meeting and of speaking before the board of aldermen and the mayor. I have not yet been able to negotiate the most important of all contracts (the one for life), and am beginning to doubt my capacity for such a deal. As a compensation, however, I have a farm in New Jersey which gives

me a week-end playground. I have written some eighty or more technical articles on the subject of reinforced concrete, appearing largely in the technical press; also a book, *Factories and Warehouses of Concrete*. Member: Harvard Club, City Club, First New York Cavalry (Squadron A), all of New York City; American Society of Civil Engineers, Harvard Engineering Society of New York, Society of Colonial Wars, Society of Mayflower Descendants, Society of the Cincinnati.

Doth my Decennial approach, or am I in English A, doing the autobiographical stunt? It matters not which. My life must be writ large. After Commencement the boat races, and after the races the Northfield Students Conference, where with a classmate I had met only once in college I formed one of my two intimate college friendships. My career serious began July 5, 1903, when I entered the employ of the Washington National Bank in my home town, Westerly, R. I. My family in direct line had served as cashiers of the bank, beginning with my great-grandfather in 1806. My work was particularly interesting the first year, owing to the fact that the Washington National Bank combined with the Westerly Savings Bank to form the Washington Trust Company. The academic year 1904-1905 I spent in the Harvard Law School, with the intention of learning something about commercial law and of taking the full course if the law should appeal to me as a profession. It didn't. I re-

turned to the Washington Trust Company, and have been its assistant treasurer since 1906. In February of that year I sailed on a three months' Mediterranean cruise with Arthur Perry, Jr., and O. N. Shepard, both 1906 men. Our only bit of original research was on the head of the Sphinx, which my adventurous cousin climbed (by way of the ear), with the help only of his bare hands and a pair of rubber-soled shoes. I have recently been appointed to fill a vacancy on the Westerly school committee, and have been elected a member of the state executive committee of the Massachusetts and Rhode Island Christian Associations. Member: Harvard Club of Rhode Island, Colonial Club of Westerly, Ninigret Tennis Club.

After being turned out of Cambridge with a recommendation written in some foreign tongue in which two of my names were insulted as to spelling. I spent a few weeks at a promising young institution called Columbia. Nothing noteworthy happened. The arrival of a college graduate did not cause even a ripple of excitement in New York. For the next three years I persisted in my attempt to uplift the city by teaching some of the gilded youth the rudiments of a few fundamental facts concerning the alphabet and the Arabic system of enumeration. Suddenly without any violent protest I was elected to matrimony and the superintendency of a school at Warren, R. I. I tackled these new jobs in the above order during June, 1906. Between the two I have been steadily occupied ever since. But two items of interest have

occurred since. The business of the firm had prospered sufficiently, so in September, 1909, we took in a junior partner, who has since attained the ruling interest in the concern. In 1910 she persuaded us to remove to Pittsfield, Mass., and gave father the same job in that place. Up to date we have dodged any notice of eviction. Member: Berkshire Harvard Club, Park Club.

My honorable Secretary and my noble Classmates: I can bring you little but excuses for not bringing more. When I left your midst for my home in Davenport, Iowa, by the broad Mississippi, it was—for some must work—to become a mighty business man. This emerald route began as director in the Union Savings Bank,—a very young and inexperienced director. But my youth was forgiven, and my reward for helping others in founding a commercial club was to become also one of its directors. So I might have continued until to-day, had the doctor not said to some of my family that it were better they travel and think of their failing health a bit. So we travelled, and up to a year ago my home has been my trunk. A year in Arizona taught me what heat is and why Orientals sing the praises of a fountain of running water. Then for some five years I abandoned my country for Davos, Switzerland, the greenest of lands in summer, but where in winter we skated and bobbed, and I—I proudly relate it—won a few bob prizes. So there I was with Jove-like headquarters in lofty Davos, but like Jove I often descended by-paths that led to Wiesbaden, to Baden-

Baden, the garden, lovely Tyrole, to Paris, and on and on,—to see the mortals. In visiting the Latin Quarter in Paris I discovered a second little Harvard assembling loyally in the vinous precincts of the Deux Magots. London offered the delights of English clothes, shirts and hats, which I am sure I wore with distinction. During these years I studied mankind and the French language, learning also something about good wine, good cigars and good music, and I was always faithful to the sweet delights of conversation. Now for a year I have been back in America, living for the time among the modest-tongued, self-deprecating Californians. Thus, my friends, without a wife, alas! have I passed my time, often forgetful of the past, too heedless of the treacherous future, thinking mostly of the present. And so accept my greetings, which I send together with my sincerest wishes for your abundant happiness. Member: Davos Skating Club, Davos Bob Club, Altadena Country Club.

In September after graduation, I started in at six dollars per week with the law department of Little, Brown and Company in Boston, of which Philip Lamson Brown, 1899, was then head. I did everything except sweep out, and by February was advanced as high as eight dollars, I think. However, I was soon really into things and took up the "legal education" department. This took me to law schools all over the country,—most interesting and broadening work. By 1909 I was head of the department, with full charge of publishing details, selling, office management, etc. In Au-

gust, 1910, I resigned to assume the management of the Philadelphia office of the Cromarty Law Book Company. We handle here only foreign, principally English, legal works. My new business takes me to England frequently, and I expect soon to go round the world, taking in all the English colonies and dependencies. The business here was practically only begun when I took hold, and it has kept me close to the grindstone building it up and fashioning its policies. Thank Heaven, it is growing splendidly and is a success beyond my hopes. While I see a good many Harvard men in my business life, I hardly ever run into any of the 1903 vintage. I presume they are all bankers—alas! For recreation I have a horse that is a corker, and once in a while I ride to hounds, not often in deference to business, as I seem to be slow at healing. I write (or try to) plays for the “movies”—it’s good fun, especially when they are accepted (which is seldom). I’m not married, but I have lost my hair! What is the connection, if any? And if not, why not? Member: City Club of Boston, City Club of New York, University Club of Philadelphia.

A few days before Commencement, through the efforts of the Appointment Office, I obtained a position as instructor of mathematics and science in the Allegany County Academy, Cumberland, Md. After receiving my diploma from University Hall, I started for Maine to take a good rest before beginning my life work. Early in September I arrived in Cumberland, Md., where I spent two very pleasant years, teaching all grades from the fourth up through the high school besides coaching the football, baseball and basketball teams. During the summer of 1905 I attended the Harvard Summer School, taking a course in physical education, preparatory to taking up gymnasium work and athletic instruction at the Allen School for Boys at West Newton, Mass. I also had charge of the science department. After my marriage in June, 1907, we spent the summer at Deer Isle, Maine. Going back to the Allen School in the fall, I was made house master of the Junior House, and was placed in charge

of the department of mathematics. In September, 1908, I entered public school work for the first time, taking a position in the science department of the Malden, Mass., High School. After spending three years there, during the last two of which I was class master of the freshman class, having charge of the discipline of its three hundred or more members, I felt prepared to take a principalship. In September, 1912, I became principal of the Oliver Ames High School at North Easton, Mass., where I am still located. I assisted in compiling the College Entrance Examination Papers in Plane Geometry, published by Charles E. Merrill Company. Member: Paul Dean Lodge, F. and A. After graduation I went to Imperial Valley in the Colorado Desert, California, and started developing an irrigation ranch. I grew alfalfa and raised live stock for three years and a half. The first year was hell, the second year bare existence, but the last year and a half was real life. However, in the winter of 1907 Doodle Page wrote that he had languishing for me in the South a cotton mill presidency. So, as the ranch was well developed and as I wanted more of the society of my eastern friends than the West had given, I rented my alfalfa fields and packed east, candidate for a cotton mill. The cotton mill presidency started in in February, 1907, with me all thumbs and in blue jeans at the hopper of a cotton-picker machine. I followed cotton from the bale all the way to yarn and cloth, until our mill shut down in December after the panic of 1907. A little cruise to Boston with side trips to some New England cotton mill towns showed me that the big cotton manufacturers were in the North. Chud Loring's brother-in-law, William Whitman, Jr., very kindly offered me a position in the firm of

RECORDS OF THE CLASS

Harding, Whitman and Company, who were selling agents for one of the big New Bedford mills. Later, when the firm of William Whitman and Company was formed and the Nashawena Mill of New Bedford was built, I became the agent for that mill; and that is my business in New York at present. Life in New York since 1908 has been as pleasant to look back on, in part at least, as days in Cambridge, largely because, I suppose, one is surrounded by classmates and Harvard men of one's time if not one's class. Certainly, if I found California deserts somewhat sterile in companionship, I found New York luxuriant in that respect. I was taken into the quarters of Gardner Perry, Ralph Page and others of the same sportive and genial nature. With Doodle for philosopher and the ubiquitous gallant Perry for guide, with plenty of good fellows from many classes and many colleges, with business progressing and romance alive to me, New York has appeared, as "the Colonel" would say, "with the lights all lit along the shore." In the summer of 1910 I married Miss Anne Terry Gardiner. As we live in the country on Long Island, I commute. Bigsy Riggs is the only other 1903 man I see on the train, but there are a number of Harvard men in my community. Life still preserves a pleasant aspect. Address *Care of Forest Service, East Tawas, Mich.*

In the autumn of 1903 I entered the Yale forest school, and graduated from there in June, 1905, with the degree of Master of Forestry. In July, 1905, I entered the national forest service as a forest assistant, and was assigned to a working plan party in southeast Wyoming. I worked with this crew until fall, when I was assigned to work in California. My work here took me from San Francisco to McCloud, Cal. About the middle of December I went south and joined a timber estimating crew in the mountains east of Bakersfield, Cal. From here I was sent on a reconnaissance trip to the San Bernardino Mountains, going to San Bernardino and Fredalba. I then returned to Bakersfield and early in April, 1906, came east. From August, 1906, until February, 1907, I was inspecting timber cuttings on the lands of the Delaware and Hudson Railroad Company in northern New York, in the vicinity of Lyon Mountain. In the spring of 1907 I did some private forestry work in West Virginia, and in June returned to the government service. During

RECORDS OF THE CLASS

the summer and fall I was with an estimating crew in the Swan-Clearwater valley of Montana, and in the early winter was on a government timber sale in the Clearwater valley of Montana. I was assigned in the winter of 1908 to the Gallatin National Forest, with headquarters at Bozeman, Mont. In the spring of 1908 I had charge of a field party in the Custer National Forest, about ninety miles south of Miles City, Mont. That summer I had charge of a similar crew in the West Gallatin valley in the Gallatin National Forest.

During the early winter of 1908 to 1909 I was in Washington, D. C., writing reports on the preceding spring and summer's work. From late February, 1909, to April, 1909, I had charge of a working plan crew on the lands of the Tennessee Coal and Iron Company, near Birmingham, Ala. About this time my title was changed from forest assistant to forest examiner in the forest service. In May, 1909, I was again assigned to the West, and during the summer of 1909 had a crew estimating timber and mapping lands in the mountains in the vicinity of Boulder, Helena, Townsend and Bozeman, Mont. The early part of the winter 1909 to 1910 I was in Missoula, Mont., writing reports on the previous summer's work. In February, 1910, I was assigned to the regular force of the Gallatin Forest, with headquarters at Bozeman, Mont., and was there until after the big fires that occurred in Montana in the summer of 1910. Early in September, 1910, I went as deputy forest supervisor to the Madison National Forest, with headquarters at Sheridan, Mont. Much of February, 1911, I spent in field work in the Madison basin, near the Yellowstone National Park. In March, 1911, I was sent to Au Sable, Mich., as acting forest supervisor of the Michigan and Marquette National Forests. The fire which swept through and burned out the two towns of Au Sable and Oscoda, Mich., in July, 1911, destroyed the forest service office and nearly all my things there. In November, 1911, the office of the two forests in Michigan was transferred to East Tawas, where I am at present. In the summer of 1912 I was made forest supervisor of the two national forests in Michigan. I have written an article on Forest Planting in

I went to work for the United States Steel Company at Lorain, Ohio, on construction work June 15, 1903. Going from there to New York City in 1905, I was employed by different firms on both city and out of town jobs. For a while I lived in Buffalo, being married there on July 30, 1910, to Marie Vandewater, also from Buffalo. We moved to Pittsburgh in 1911, where I have worked since on several reinforced concrete structures. We have a family of four,—my wife and myself, a baby girl seven weeks old, and a man, class of 1933. I am now employed by the Nicola Building Company of Pittsburgh on a pumping station and filtration plant for the city of Portsmouth, Ohio.

RECORDS OF THE CLASS

After graduating from Harvard in 1903, I studied architecture in the office of Peabody and Stearns in Boston, and took a special course at the Massachusetts Institute of Technology. In 1905, owing to eye trouble caused by the strain of draughting, I was forced to give up the study of architecture. I then secured a position with the Boston Insurance Company as assistant to the vice-president, which I held until June, 1906, when I came to New Haven to take up the real estate work in which I am still engaged. Member: Harvard Club of Connecticut, Graduates Club, New Haven Country Club, New Haven Yacht Club.

I'm most too busy a man to take time to write this theme, and besides Barrett can no longer count off for the vice of procrastination. Howsoever, here goes! I had always planned to study medicine and had shaped my life accordingly. My gravest doubts came just before the final plunge in September, 1902, when the stretch appeared long and the outcome dubious. However, plunge it was, and I spent four fascinating years as a medical student in the Washington University medical department, St. Louis. It was a most excellent, practical school. I graduated in second place and won out in the competitive City Hospital examination. Two dandy years followed, full of practical application of my text-book knowledge within the more or less cloistered walls of our large City Hospital. As no well-equipped physician can afford to do without the advertisement that goes with a

trip abroad, I spent my next year on the Continent in the pursuit of medicine and at times, I confess, of life. Those were the most care-free days of my life! It's a real part of a liberal education. For the past four years I have been associated as first assistant with one of our prominent surgeons. I have a valued position as teaching assistant in the anatomical department of Washington University. I have time and inclination for research work and am making good with my effort on antiseptics. For the past two years I have followed special cancer research and am actively interested in the public health and legislation problems of our profession. I find this old world less inflammable than a schoolboy doctor thinks, and yet the rewards do come. I am living the life of single cussedness, but still hope to catch her off her guard some day. What with learning the steps of new dances every month, of keeping up with the medical game, and trying to keep the fellows from winning your hard-earned lucre at bridge or golf, not to mention stag dinners, this bachelor life is no sinecure. My next real event, I trust, will be the Decennial! Mary Evelyn Thomas. His father died about two years after Poland's birth, and he was therefore brought up at the home of his grandparents. He was a precocious and decidedly impressionable child, and during his early years he showed a keen interest in artistic and intellectual pursuits. Before he was ten years old he had tried painting and writing, and in natural science had, in a very elementary way, studied geology, zoölogy and archæology. He owed much to the influence of his grandfather, an unusually refined and scholarly man, well informed in everything, a wide reader and an independent thinker. At the age of thirteen, Poland entered the Roxbury Latin School and made a brilliant record in scholarship there. At the same time he kept up his interest in drawing, painting and music and wrote frequently for the school paper, of which he was editor-in-chief in his graduating year. He entered Harvard College in 1900 and took the four years' course in three years, graduating in 1903. While in college he specialized in English and made a brilliant record, being elected to the Phi Beta Kappa Society, receiving various prizes and honors, and graduating with the degree of A.B. *summa cum laude*. His summer vacations were passed chiefly among the White Mountains, and the beauty and solemnity of his surroundings had a strong influence upon his life. From 1903 until 1905 he was a resident graduate student in English and Celtic at Harvard. In the summer of 1905 he attended the School of Irish Learning at Dublin, Ireland, and during the following winter continued his Celtic studies at the University of Rennes in France. While there he was stricken with an attack of typhoid fever, which his strength, overtaxed by prolonged mental application, was unable to resist. He died at Rennes on March 2, 1906. A former teacher of his in the Roxbury Latin School writes of him as follows: "He was indeed a scholar of the highest distinction. He loved learning and pursued it with a single-hearted purpose worthy of all praise in this land of the almighty dollar. A charming trait of Poland's character—one not always found united with so much of moral earnestness as he possessed—

was his keen sense of humor, which enabled him to enter so fully into the amusing side of literature and life. Had he lived to continue his English and Celtic studies, it seems well-nigh certain that he would have become an authority on these subjects and taken a very high rank in the honorable list of American scholars'' The dean of the faculty of the University of Rennes also paid Poland a very high tribute.

After leaving college I spent six weeks in the employ of the New York Edison Company as a cable tester. This work was more than anything else a method of keeping busy and in training for a position in the testing department of the General Electric Company at Schenectady, N. Y., which I entered October 3, 1904. Two years of efforts in overalls and a good dose of work on all kinds of electrical machinery proved sufficient to land me in the engineering office of the lighting department in September, 1906. The trials of residence in Schenectady were somewhat mitigated by a very pleasant association with a half dozen other college men in bachelors' quarters. but the inducements of working in New York and living at home were sufficient to cause me to leave Schenectady in the fall of 1908, when I entered the New York office of the General Electric Company as salesman. In December, 1909, I was introduced to two gentlemen who had come to New York for the purpose of introducing in the United States a

After completing my college course at the midyear's, senior year, I entered the employ of Valentine and Company, varnish and color manufacturers, as an assistant in their chemical laboratories at their Brooklyn, N. Y., plant. I returned to Cambridge in June, and graduated cum laude with the class. My work has been partly that of a research chemist and partly the superintendence of manufacturing operations, both in the Brooklyn and Chicago factories of the company. In 1909 I was elected a director of Valentine and Company, and shortly after became chief chemist, which

Business	<i>Professor of English.</i>

In all, my residence in Cambridge covered three school years. In 1902-1903 I was a senior, taking my bachelor's degree with the Class of 1903. In 1903-1904 I did regular classroom work for the master's degree, which I took in June, 1904. In 1904-1905 I continued doing class and library work without recording credits for the same. I utilized my time, as I thought best, in preparing for the teaching of collegiate English. Since leaving Cambridge in August, 1905, I have served one year as instructor in rhetoric and public speaking at Beloit College, Beloit, Wis., and seven years as professor of English literature in Pennsyl-

vania College for Women, Pittsburgh, Pa., where I am at present located. While at Beloit College I faced the problem of a much needed reorganization and separation of the two fields of rhetoric and public speaking. The division of the department was accepted and I was proffered my choice of the two departments. Shortly after electing the department of rhetoric I resigned, to accept the head of the department of English in Pennsylvania College for Women. During my seven years here (1906-1913) I have seen the college grow and the English department enlarge. However, the burden of classroom work has prevented any private research work. Thus I have been forced to forego plans for work toward a doctorate. I have, however, spent two very interesting summers in touring Europe on foot,—1907 alone in tramping through England and Scotland, and 1908 with a friend in tramping in the Rhine valley, the Black Forest and Switzerland. From February to September, 1909, I was in Germany, during the larger portion of the time at Kolberg on the Baltic Sea as exchange teacher in English at the Gymnasium. While there I responded to the request of a colleague to write for a forthcoming text-book by him an article on the American School System and its Ideals. In addition to this last-named article, I have had occasion to produce a number of miscellaneous articles, none of which have, I believe, found publication in any accessible form. Through three winters I gave of my time extensively in lecturing. I gave three series of lectures before the Women's Club of Sewickley Valley and in addition a number of isolated lectures elsewhere. Recently (February 22 and March 8) a group of English teachers in the secondary schools and colleges of this vicinity have organized an English Masters Lunch Club, for social and professional profit. I have been honored with the first presidency of the same. The remaining incident of importance demanding record here is strictly non-professional. In 1908 I first met Miss Clarke of Longwood, Brookline, Mass. After my return from Germany in the next year our engagement was announced, and we were quietly married in 1909. Our life

In the autumn of 1903 I went to England and matriculated at Balliol College, Oxford, where I spent the next two years doing research work for the degree of B.Litt. In September, 1908, I returned to Harvard and began work for my Ph.D. in history. At the same time I served as assistant in one or two history courses. I held a John Harvard Fellowship in 1903-1904 and 1905-1906, and an Austin Teaching Fellowship in 1906-1908. In 1905-1906 I was proctor in Little's Block, in 1906-1908 in Westmorly Court. I took my degree Ph.D. in 1908 and went abroad for another year (1908-1909) to carry further some research work in the British archives. Upon my return I accepted a position as instructor at Princeton. The same year (1910) I announced my engagement and in June was married. My honeymoon occupied most of the rest of that year and was spent, for the most part, in a private hospital in London, wrestling with typhoid. Meantime I had accepted a call as instructor in history at the University of Chicago, where I arrived in January, 1911. In April, 1912, I was appointed assistant professor at the same institution, and still occupy that position. After a year in the Graduate School at Harvard I received my A.M. degree (1904), with "honors in English" (I must mention trivial details or have nothing at all to say). In July, 1904, I was appointed instructor in English at Williams College. The summer of 1905 I spent in England and Scotland. In 1907 I was made assistant professor at Williams. The college year of 1910-1911 was my sabbatical, and gave me a year at Oxford. I teach literature in courses of various sizes and shapes, ranging from an unwieldy sophomore course, which someone called "From Caedmon to Kipling: a Gallop through English Literature," to a tiny senior course in Anglo-Saxon and Chaucer. I am always about to write a book or do something really worth while, but thus far my plans have been (perhaps providentially) frustrated. I like teaching, and shall probably, unless forced by the high cost of living into something more lucrative, continue to "call the roll" at stated times and places for the rest of an uneventful life. *Voila tout!* I edited Thoreau's *Walden* (Macmillan Company). I completed sufficient courses for a degree in the spring of 1902, and then spent a year's leave of absence, granted by Harvard College, in the Harvard Law School. In the fall of 1903 I was appointed assistant clerk to the committee on naval affairs of the House of Representatives. I resigned after about a year's service and returned from Washington to Chicago. I completed my legal studies at Northwestern University, and was admitted to the bar in the fall of 1905. Since then I have been engaged in the practice of my profession. Member: City Club of Chicago, Harvard Club of Chicago, Illinois Bar Association.

Shortly after leaving college I was employed by the International Trust Company, Boston, for about six months, then left to go with Brown, Durrell and Company, where I remained for about two years and a half. Since August, 1906, I have been treasurer of E. F. Drew and Company, Incorporated, of Boston, and I am also a director of the American Postal Machines Company of the same city. During this time I have acted as executor of an estate. Member: Harvard Club of Boston, Massachusetts Charitable Fire Society, Loyal Legion of the United States.

Harold Allan Rich

Born	<i>Hyde Park, Mass., Nov. 21, 1880.</i>
Parents	<i>Adoniram Judson, Harriet Louisa (Allan) Rich.</i>
School	<i>Phillips Exeter Academy.</i>
Years in College	<i>1899-1901.</i>
Died	<i>Cambridge, Mass., May 21, 1901.</i>

About six o'clock on May 20, in his sophomore year, Harold Allan Rich, while sitting in the window of his room, 54 Weld Hall, in some unaccountable way (for neither his roommate nor any of his friends were with him at the time) fell from the fifth story, and died early the following morning, May 21, 1901, as the result of injuries received. The impression left upon one meeting him is well expressed by the following extract from a eulogy delivered by Professor LeBaron R. Briggs, Dean of Harvard College at that time, at the funeral services held in Appleton Chapel: "A stranger, meeting the student and friend whom we have lost, would have noted a face refined and interesting, a manner quiet yet with plenty of strength in reserve; and the stranger might well have said to himself, 'Here is the true Harvard student,—sensitive, intelligent, trustworthy.' Those

who knew him best unite in calling him one of the very finest fellows they had ever seen,—of clean speech and clean heart, of exacting New England conscience, devoted to his mother, in earnestness of purpose a man, yet with enough of the boy to keep him sweet and young and open-minded; a man, who stood for what we like to think characteristic of Harvard College,—for intellectual vigor, for gentle manners, for resolute courage, for upright life.”

He was born in Hyde Park, Mass., November 21, 1880, the youngest son of Rev. Adoniram Judson and Harriet (Allan) Rich. He attended the high school at Milford, N. H., and was graduated from the Phillips Exeter Academy in the class of 1899, where he was an honor man for his three terms there. He entered Harvard College in the fall of 1899 with the Class of 1903, of which he was an enthusiastic member. In his classes he always stood well and worked earnestly, being more than a mere scholar. His chief interest in college activities was in debating, in which he obtained his grounding as a member of the Golden Branch, an old debating organization of Phillips Exeter Academy. He was a member of the Freshman Debating Club and the Sophomore Debating Club and was also on his class debating team in his sophomore year. In this line of activity he took a keen interest and showed marked ability. He possessed an indescribable charm of personality in his sunny disposition, kindly thoughtfulness and courteous manner. He was admired for his honesty of purpose, his faithfulness to a duty, his earnestness and sincerity, and he was essentially a man of high ideals.

pared for college at the Brooklyn Polytechnic Institute, and entered Harvard College with the Class of 1903 in the autumn of 1899. He left at the end of his junior year, and did not take any degree. He specialized in geology, which was his favorite subject. After leaving college he became interested in various business enterprises and served as director of several companies. His special interest was in the Butler Ward Company, bookbinders, a corporation which he practically owned and to which he devoted most of his time. In April, 1906, he married Eleanor Holland, of Williamsport, Pa., and they had two children, Enos and Virginia. He died March 20, 1911. Perhaps no better description of his character can be given than in the following words taken from a resolution of the board of directors of the Nicholas Power Company, of which he was a member: "It was always a great pleasure for his associates to listen to his advice and heed his counsel in all matters. He had an exceptionally broad mind, was liberal in his views and generous to a fault. He was a kind, loving and sympathetic friend. We realize our great loss, and desire to express to his family our appreciation of his sterling qualities. He has left a place in our hearts that can never be filled."

City. Ever since I have been engaged in this wise, with enough good fortune to keep the wolf from the door. I have been connected with no sensational cases the recital of which might prove a source of edification to the interested reader of this narrative, although my professional work has now and then brought me personal sensations of many kinds. Although I have been a loyal worker in my local Republican organization, I have held no office of honor or trust, so far as I am aware. Still, I have continued faithful to the last, and even the recent upheaval finds me still a Republican of occasional independent tendencies. As a director of the Young Men's Hebrew Association and to Emanu-El Brotherhood, I find sufficient opportunity for the performance of my social duties. I have lived in New York City uninterruptedly, and except for my membership in the firm of Cohen, Creevey and Richter, have formed no alliances. The fall following graduation I spent in the Middle West and in Colorado, returning to Boston late in December to take a position with a dry goods jobbing house. In the summer of 1904 I left the jobbing business and entered the pulp mill of the Great Northern Paper Company, at Millinocket, Me., as a laborer. I worked in various capacities in both the pulp and paper mill of this concern until the early summer of 1905, when I entered the employ of a paper jobbing house in Boston. In 1906 I left the paper jobbing business for a position with a book manufacturer and publisher in Boston. I remained in the book business until June, 1911, leaving to organize a plant for the manufacture of special grades of paper. This plant was located in the spring of 1912 at Peoria, Ill., and is now under construction. The concern is known as the Illinois Paper Company and my official capacity is manager. The fact that I did not graduate with the Class of 1903, nor from Harvard at all, has always left the feeling in my system that some day I would go back and get that degree yet. For three years after leaving college I worked in wool-rooms in mills in the city of Lawrence. Then I decided to see the country and sheep raising in different parts of the world. For two years I had a taste of ranch life in the Northwest and in the Southwest, in the cold regions and in the warm regions. But I have now actually settled down to hard work in the Boston wool trade. I have done more or accomplished more in athletics since leaving college than I ever did while there. In canoeing I have won events in

regattas all around New England, but the one event which qualified me for entrance into the real American tribe of Indians was one called the Hurry Scurry, running, swimming and paddling, winning from Canadians at their own sport. I received my training among Crows, Blackfeet and Boston tribes of Indians. Last year I served on Colonel Sweetser's provisional regiment staff, which was in charge of troops in the city of Lawrence. My service lasted for ten weeks and one day, and I didn't belong to the regulars. The first year after graduation I attended the Harvard Law School. The next year I returned to the Graduate School and took courses in railroad administration, statistics and accounting. At the same time I took the stenographic

course at the Burdett Business College in Boston. In October, 1905, I went to Washington, and at the opening of Congress in December became secretary to Senator Newlands of Nevada. I was borne on the Senate rolls as "laborer" at nine hundred dollars a year. In June, 1906, a vacancy occurred in Senator Lodge's office in the position of messenger of the committee on the Philippines. While my official title was that of "messenger," my duties were in fact those of assistant clerk of the committee. I served in this capacity until March, 1909. My work kept me in Washington during the sessions of Congress and in Boston and Nahant during the recesses, with a month to six weeks' leave of absence each summer. In March, 1909, when Senator Root of New York entered the Senate, I was appointed clerk of his committee, that on expenditures in the Department of State. At this time I transferred my legal residence from Massachusetts to New York City. The summer of 1909 was devoted to the extra session on the tariff, and I saw a great deal of the preparation and enactment of the Payne-Aldrich Tariff. I have remained with Senator Root from that time to the present writing. In the summer of 1910 I went to The Hague as Senator Root's personal secretary and an attaché of the American Agency during the arbitration of the North Atlantic Fisheries case with Great Britain, before The Hague Tribunal. This was a most interesting but extremely tedious experience. I was kept closely confined to The Hague for three months, from June 1 to September 1. In April, 1911, when the Sixty-Second Congress met in extra session to consider Canadian reciprocity, Senator Root was transferred to the chairmanship of the committee on industrial expositions, and I was appointed clerk of that committee. I expect to leave the government service when the Democratic administration comes in, on March 4, 1913, and enter private life, but am not able at present writing to say just what or where my work will be. Member: Metropolitan Club of Washington, Harvard Club of Washington, Chevy Chase Club (Chevy Chase, Md.), Harvard Club of New York, Tennis and Racquet Club of Boston.

I graduated from Harvard in June, 1903, taking an A.B. degree. In October of that year I went with the Graton and Knight Manufacturing Company, of Worcester, Mass. I was with them a year and a half in the Worcester and New York offices, part of the time being on the road as a salesman. At Commencement, 1904, I returned to Cambridge to take my A.M. degree, the work for which I had covered in my senior year. In March, 1906, I took a position with Charles Scribner's Sons, publishers, New York City. I am now office manager of the educational department, which deals in text-books for schools and colleges. I am now living in Upper Montclair, N. J. I was one of the organizers and am now secretary of the Montclair Coöperative Society, which started in May, 1912, a grocery and provision store conducted on the coöperative basis. In the autumn of 1904 I entered Colorado College at Colorado Springs, and remained there until June, 1905. I then determined to take up mining, and went to Utah, where I worked at Bingham Canyon as a laborer in the Boston Consolidated Mine. Subsequently I was sent to Australia to assist in the examination of certain mining properties. I returned to this country about New Year's,

While trying to get a degree at Harvard most of my time was spent on the farm. The degree, therefore, came two years late, namely in 1905. However, in the meantime I learned to wear cowhide boots gracefully, and taking the first train for the backwoods after Class Day, I put them on, and have not been out since. Up to the present, I have devoted all my time to the raising of crops, and various animals to feed on these crops. During the warm weather I work in the fields. In cold weather I work in the woods, and then come home to study and figure on the crops for the coming season; or how to grow on one acre what the other fellow grows on two and at the same cost. This is my history to date. It will be the same ten years hence, and

After graduating I took a position as reporter on the New York Globe (then the Commercial Advertiser), which I held until March, 1905. when I travelled for three or four months in Europe. Upon my return I went into the knitting business in Rockford, Ill., with my father, and covered the territory from Denver to the Pacific coast. The call of Europe for another two months was followed by the call of the copy boys and the smell of ink. I purchased an interest in the Rockford Daily Republic, and was managing editor for exactly twelve months when I was "called" once more, and took the position of an editorial writer on the Spokesman Review of Spokane, Wash. After working there nearly two years I purchased a controlling interest in the Daily Medford Sun, was married, and have since made my home in the Rogue River valley. Aside from being the only one of two Bull Moose dailies in the state during the past year. I can think of no particular distinction achieved. We have a University Club, a Harvard Club of fourteen members, and celebrate the football games and crew races with great solemnity every season. Member: Rogue River University Club.

Since leaving college my occupations have been various and sundry. I have farmed at Waltham, Mass.; worked for a year for Jim Dole (1899) on his Hawaiian pineapple plantation; I have prospected for land in Northern British Columbia; I have dabbled in real estate in Vancouver, this rapidly growing seaport of Western Canada; and finally settled down here as British Columbia manager for a manufacturing concern, the Paterson Manufacturing Company, Limited, of Montreal. But I am off again this summer on a three months' leave of absence to explore and stake land in the Comox-Atlin district, six hundred miles to the north. It may interest you to know that in spite of the fact that this is situated in the same latitude as Labrador it has a comparatively mild climate owing to the warm influence of the Japan Current, and there are thousands upon thousands

I made my exit from Harvard in March, 1902, with a case of walking typhoid contracted from drinking too much of the Charles River after trying to row a maverick shell with one Phil Atwater. It took a year in the balmy Sierra Madre to right my frail craft, when I returned to Springfield and became thoroughly conversant with the banking business in six months, with the City National Bank. Manufacturing was my next victim, and the Chapman Valve Manufacturing

Company made it easy for me for two years. During that time I arose early, and easily from the foundry to chief bookkeeper. I was then made a director. Sixty dollars a month, however, was nothing to owning a plantation and cotton-blanket mill in the South, with my friend Doodle to attend to the promoting and music. That was the quickest promotion I ever got. The climate was good and the niggers (as far as I know) and the songs, but my rosy investment was no good in no time. So I "bid old hell a last farewell" and beat my way over the Mason and Dixon line, never to return. Somebody told, so it was not long before I was marked by a Wall Street broker, and entered the branch office in Springfield. While the money lasted I paid myself a handsome salary from assistant to manager. Trust busting and Wickershaming got in their little work right here, and business rested. I was on the point of going out and optimistically "greeting the unseen with a cheer," when who should blow in but Ernest George. It took him a month to take Springfield's measure and my good-will (which was not all water). He left me high and dry, and I am now hiding behind a shingle—

Before going to Harvard I attended schools in Paris and Dresden. Three months were spent at Browne and Nichols School in Cambridge. On leaving college I worked as reporter on the New York Evening Sun for about a year. From there I went to the Critic Magazine, where I was assistant editor for about a year. Leaving the Critic, I went to the Metropolitan Magazine, where I was editor until in 1906, on account of my father's illness, I returned to my home in Cornish, N. H. (P. O. Windsor, Vt.). While on the magazines I had been writing numerous special and art articles and short stories. So from the time of my return until the fall of 1911 I continued with this work. In 1911 I went on the road as advance agent for Maude Adams, and this season I am stage managing with her company. I have written art articles, special articles and short stories for the Century, Critic, Metropolitan, Hampton's, Harper's, half a dozen plays not good enough to produce, and a long biography of Augustus Saint-Gaudens, now on the press, to be published by the Century Company. Member: Century Club, Players Club, Harvard Club, Fencers Club, Biscayne Bay Yacht Club, all of New York; Harvard Clubs of Keene, N. H., and Vermont.

and practice of law. My practice has been of a general character and about evenly divided between office work and trial work before courts, state commissions and military tribunals. I have had some experience in about every branch of legal work excepting admiralty. During 1907 and 1908 I was a member of the political party known as the Independence League, and was twice a candidate of that party for the state senate. In the summer of 1908 I was appointed to take charge of the probation system of the municipal court of the West Roxbury district during the temporary absence of the regular officer. I ought not to be a member of 1903. 1904 was more my size, therefore I disappeared from the rolls in February, 1900, for good and sufficient reasons. The following two years I attended a small agricultural school in Westchester County, N. Y., that was supposed to have an especially practical programme. This school expired after giving birth to a few graduates, of which I was one. More practice in the bucolic art still seemed desirable, and for a couple of years I worked for my board and keep and a few dollars on a number of farms in New England and York State. I then drifted back to Boston, and after wasting some time looking about, became a banker by engaging to fill ink-wells and run errands for the Boston Safe Deposit and Trust Company. I am still with them and doing better now.

Shortly after Commencement, 1903, I started with Bayard Litchfield on a trip around the world via San Francisco. We left in September, 1903, and I returned about a year later, having left Litchfield in Vienna, where he joined his family, who had been in Russia. When starting we had only vague ideas of what we wanted to do on our trip, and changed our general plans considerably. We stopped a few days at the Grand Canyon and in 'Frisco, then sailed for Yokohama via Honolulu, where the steamer stopped for a day. In Japan we were joined by A. C. Champollion, 1902, and went over the usual tourist route. While there we met Joe Grew, 1902, who joined us on several trips. Our stay there lasted about six weeks; then we went on to Shanghai and Hong Kong: in Shanghai we met Ernest Metcalf, 1902, in business there. From Hong Kong we went to Manila (Litchfield left me here to rejoin me in Java later), and I joined forces with three Elis, all 1903,—Douglas Dodge, Brock Smith and Frank Alsop. We spent a fortnight in the neighborhood of Manila around Christmas, 1903, and New Year's, 1904, taking a very interesting but rather rough little trip to the Taal volcano. From the Philippines we sailed for Singapore (with a stop at Labuan to take on coal), then over to Java for a fortnight, returning to Singapore. Then on to Ceylon, India and Burma, where in Rangoon we met W. M. Chadbourne, 1900. In India it was very hot, and I contracted some sort of malarial fever, from which I did not fully recover for several years. We left Bombay at the end of May, and

RECORDS OF THE CLASS

were unwise enough to spend two weeks in Egypt in June; then via Athens, Constantinople and Vienna to Paris and London. This trip, I think, did more to develop me than my college course, but probably college, aside from being pleasant, was necessary to prepare me for the advantages of the trip. In September, 1904, I entered the employ of my father's firm, Schefer, Schramm and Vogel, dry goods commission merchants, and am still with this firm, having become a partner in January, 1911. The business is rather confining and the hours long. However, I have had a pleasant time on the whole, partly due to the fact that I have spent a good deal of my leisure time at the Harvard Club of New York, in the affairs of which I have been allowed to take a part for some time past. For almost six years I was a member of Squadron A, and withdrew three years ago because of an injury to my right knee, which necessitated a painful operation and tedious recovery; fortunately I escaped the stiff leg with which I was threatened. I have had no serious illnesses since starting in business, and don't feel or look much older than when I graduated. My vacations were rather short for the first few years, but in 1910 I spent about a month in Colorado with Dan Knowlton at Colorado Springs and Bill Clark in Telluride. In 1911 and again in 1912 I spent a couple of weeks in the Canadian woods with L. C. Ledyard, Jr., 1900, in September. I have been a director of the Union Exchange National Bank since January, 1912, a manager of the Harvard Club since May, 1911, and have just become a trustee of the German Hospital. I am just starting (March, 1913) on a business trip to Europe, and expect to be away for several months. Member: Harvard Club of New York, Racquet and Tennis Club, Riding Club, Merchants Club, Rumson Country Club.

For about four years before I went to Harvard I had had a position with my brother-in-law's firm, and it was in order to become more useful to him that I went to college. It was quite a matter of course, therefore, that I should go back to my old job after leaving Harvard in 1902, and as I have fared well there I have stuck to it ever since. The firm was incorporated a couple of years ago, and I was made one of the directors and secretary and treasurer. My vacations I have spent travelling, visiting Germany and Italy, making a trip around the world, and recently I passed a month in Egypt. I have translated Chemical Reagents: Their Purity and Tests, by E. Merck (D. Van Nostrand Company). Member: New York Peace Society, Harvard Club of New York.

In 1903 I took charge of a small high school in Sheffield, Mass. Two teachers had charge of the work, and I had much leisure to enjoy the beauty of the Berkshire scenery. The next fall, 1904, found me assistant principal of the Central Grammar School of New Britain, Conn., where I had the opportunity to study a fine school, organized on departmental lines. After a year's experience there I was called to Holliston, Mass., where I had charge of the high school for three years. In the fall of that year I married and began house-

keeping. Wishing to move to a larger school, I was glad to accept the principalship of the high school at Scituate, Mass., where we had four teachers and the work was a little better divided. The salary, however, did not promise very rapid advancement, so it seemed best to accept the charge of the physics department at the English High School, Somerville, Mass., in 1909. The work and the associations in this school were most delightful and the satisfaction of teaching most keenly enjoyed, but an offer of a large increase in salary again attracted me, and I moved to Belmont, Mass., to take charge of the high school. The past two years have been spent here, and I trust that our town may grow as rapidly as in the last few years and that the work here may grow in size and usefulness. the ensuing college year. On November 1, 1903, however, I entered the employ of the Great Northern Railroad in St. Paul. The department in which I worked handled the entire range of railroad operating accounts, and in connection with this work I spent some time in the railroad shops and at various division headquarters. In the summer of 1905 I returned east and accepted a position as cashier and soon after as office manager of the electrolytic copper refining plant at Chrome, N. J. This plant is one of the subsidiaries of the United States Smelting, Refining, and Mining Company, and in August, 1906, I was transferred to Boston as auditor of the controlling company, which owns several mines and smelters in Utah, Nevada and California. I left the company in April, 1907, and joined the staff of Gunn, Richards and Company, production engineers and public accountants, in New York City. My work since has been exclusively in the field of public accounting and industrial engineering. While with the New York firm my assignments included extensive investigations of the Pension Bureau, the Bureau of Indian Affairs, and other subdivisions of the Department of the Interior. For two years following December 1, 1910, I was a partner in the firm of Harvey S. Chase and Company, public accountants, of Boston. During this time I qualified as a certified public accountant under the laws of New York and Massachusetts. On December 1, 1912, I established the business of Clinton H. Scovell and Company, certified public accountants and industrial engineers, which has been continued to the present time.

The writing that I have done has been entirely on professional subjects. In the spring of 1911 I made a series of reports on the business methods of certain offices and departments of the commonwealth of Massachusetts. My assignment included the commissions engaged in the supervision of public service business conducted within the commonwealth. Of these reports two were published, one A Report on the Board of Railway Commissioners and the Board of Gas and Electric Light Commissioners with Respect to the Approval of Capital Stock and Bond Issues; and the other,

During the summer of 1906 I was abroad, observing the landscape work of England, France, Germany, Holland, Switzerland and northern Italy. In the fall of 1906 I entered the office of Olmsted Brothers, landscape architects, Brookline, Mass., where I served in the capacity of draughtsman and general assistant. I stayed there until the spring of 1908, when I again went abroad, this time studying chiefly in England and France. Upon my return from this trip in the fall of 1908 I opened my present office in Providence, R. I., for the general practice of landscape architecture, sharing office expenses with Sibley C. In January, 1906, I accepted an appointment to serve for a term of three years as first reader of First Church of Christ, Scientist, in Cambridge. This appointment necessitating the abandonment of a previous arrangement for the practice of law in the West, I decided to take up the practice

of law in Boston. From August 13, 1906, until about August 13, 1907, I worked for the firm of Warner, Warner and Stackpole, where I had a happy and valuable experience. In 1907, because I wished to be free to give more time to my work as reader, I decided to give up law, at least temporarily, and to devote all my energies to work in the Christian Science movement. In October of that year I began work as a practitioner of Christian Science, and I have continued in that ministry, with increasing activity and interest. During 1909 I was chairman of the board of directors of the Cambridge church, and during 1910 I was president of the organization. Doubtless none of us who graduated from the Law School in 1906 will soon forget the grand address which Dean Ames gave at our class dinner when he said, "If a man is not happy, his ideals must be wrong." I am finding a large measure of happiness in my work, for the reason, I am convinced, that no higher ideal can be found than that presented by Christian Science, and because in no field of endeavor can a man find larger opportunities for real service to mankind. On leaving college in June, 1902, I started in as a cub reporter on the Boston Post. I have been with the Post ever since. At present I happen to be the federal court reporter. Perhaps it might be of interest to state that ten years ago there was one Harvard and one Yale man on the Post. To-day there are at least half a dozen Harvard men and two Yale men, with a couple each from Dartmouth and Cornell. Included among the Harvard men is the publisher's son, Mr. Richard Grozier.

With regret I said good-bye to "Hell Bend," as the middle entry of Thayer was called, and good-bye to the good old days I had spent there. I had a contract with a Mr. Harry F. Knight, of St. Louis, to act as captain on his twenty-one foot knockabout; so along about a week after Commencement I was anchored in Light House Cove, just inside Eastern Point, Gloucester. Being a natural sailor the work was play,

and although I slept in the stable quarters and ate with the rest of the servants, I soon became used to such life, and the summer passed quickly enough. Mr. Knight, on leaving, gave me voluntarily the finest recommendation a man could ask. I did not deserve it, I was sure. I came to New York in September, 1903, to look for a job. I had studied to teach and had refused an offer from Greenfield, Mass. I got in touch with Mr. H. A. Pratt, to whom I am related, and went to work as an oil treater's helper for the Standard Oil Company on October 6, 1903. Then the fun started, and work piled up fast and the hours were not short. You all know, without doubt, how it feels to turn to at 4.30 A.M., in the winter time; in summer time it is easy. However, I stuck to it, and in June, 1904, I had the treater's job. My next move came in April, 1905, when I was put in charge of the candle department at Pratt Works, Long Island City. Late in 1907 I was sent back to the Pratt Works, Brooklyn, as foreman in charge of the refinery; that is, in charge of the manufacture of all the petroleum products handled at this plant. About a year and a half ago I was appointed assistant superintendent, and here I am now. It has been fight, fight, fight, every minute, but I am still game.

Departing from college with my degree, determination to make good and the satisfaction of never having done much in athletics at Cambridge—thanks to the magnanimity of an athletic committee which dropped me on suspicion of professionalism—I soon found myself with other college men in professional football in Pittsburgh. After that, fortune steered me in 1904 to teaching and coaching in the Boys' Latin School of Baltimore. During my three years there I also managed and played upon the football team of the Maryland Athletic Club and succeeded, according to experts, in getting together the greatest collection of stars ever seen on a single team. In 1907 I moved on to Mercersburg Academy, whose reputation needs no comment, and took up the duties of a faculty member and coach of football and baseball. Finally, in 1910, wishing to devote my time to the academic side of school work, I became a member of the teaching staff of the High School of Commerce of Boston. Looking back over ten years, I take pride, not so

On July 3, 1903, I went to work for the Buffalo Dry Dock Company at Buffalo, N. Y., as a driller in their No. 1 Dry Dock. I was there two years, being promoted to the position of dock foreman; but being discouraged by constant strikes, I went to Lorain, Ohio, where I entered the local plant of the American Ship Building Company as loftsmen, to learn the technical rudiments of the new arch and side tank construction of the first six-hundred-foot vessels then being built on the Great Lakes. After spending a year in this position I was given charge of a new boat at the yard, and finally of all repair work on the river and on the docks. Working hard and being rather successful in getting results in the handling of labor, I was sent on September 13, 1906, to take charge of the local plant of the American Ship Building Company, where I have been stationed since as general superintendent. In 1910 I was elected vice-commodore, and in the following year commodore of the Buffalo Yacht Club. Member: University Club of Buffalo, Buffalo Yacht Club, Buffalo

Since graduation I have been engaged exclusively and continuously in teaching secondary school work. For some years circumstances wafted me about amongst private (or privateering) schools for the most part unknown to fame and not high in the scale of honor. In these I accumulated much unprofitable experience. Since 1909 I have been located, as at present, on the faculty of the boys' high school of the Atlanta public school system. I began my connection with the boys' high school of Atlanta as associate teacher of languages; was made head of the department of English in 1911; and in 1912, at the request of the principal and the superintendent of schools, consented to shift to the headship of the department of languages, which had become vacant, in order to provide a suitable place for a man of known ability, who could take the English work but not the languages. Two graduates of the boys' high school have entered Harvard in the past three years,—one in 1910, the other in 1912. Another, an Atlanta boy, whom I prepared privately, five years ago, graduated in 1911. We have still another in our present graduating class whose eyes are turned towards Harvard.

CLASS OF 1903 — THIRD REPORT

After graduation I spent two years in the department of landscape architecture at Cambridge and two years in the offices of Edward Burnett and Rollin Saltus in New York. While in New York I roomed with Arthur Rotch and Page Ely. Gardner Perry and his gang spent a few hours four or five nights a week on the floor below. During the summer of 1905, just before going to New York, I became interested in a tract of woodland in Rhode Island, about five miles northwest of Point Judith. It was of glacial origin and riddled with ponds and lakes. There was also a superb view looking down over the tops of the trees to Point Judith breakwater and the ocean, and it contained what is probably the finest natural growth of rhododendron and mountain laurel in New England. I was keen to get some practical experience in landscape forestry, and as I couldn't imagine a place better adapted or pleasanter to work in, I bought forty acres. The work proved even more fascinating than I had anticipated, and there were very few Saturdays that I did not catch the one o'clock to Wakefield. I built a small shooting box on the hill, which Rotch and Ely promptly christened "Skibo Castle," so elaborate and engrossing were the plans I made for it. The following summer found me giving week-end parties. One of the guests, Miss Ethel Homans, gradually succumbed to the charm of the place. At any rate we were married in October, 1907. I resigned my job with Mr. Saltus, and on New Year's day we sailed for Europe, returning the following spring, just in time for the Sexennial. Shortly after that young Sibley was born, and I set to work to enlarge the shooting box, built half a mile of road and a small garage. Having reluctantly concluded that it was no place to spend the winter, we finally decided on Providence as the most convenient city for winter abode. My first work in independent practice was started in the spring of 1908. Shortly afterward Tom Sears also came to Providence, and we took offices together. During the last four years my time has been about equally divided between "Skibo" and the office. We have enlarged the original house, built a new one for the children (there are-

two now), bought forty acres more land, leased a farm, and I am now building a cottage to rent to summer people. Business has also expanded somewhat, and last summer we moved into larger offices directly opposite the railway station, where we should be pleased to welcome any of our classmates. I should also be delighted to reveal the beauties of "Skibo" to any Harvard 1903 who may have a taste for horticulture, landscape or any of the allied arts. My life since I left Harvard in 1903 is best told by filled-out cards. It has been the average predictable life of the usual citizen. I have taught school since graduation: seven years in Greenfield, Mass., three years in the Boston English High. I have written no books nor any articles. I have read ten million "themes" written by the inchoate minds of high school youths. I have worn out ten gross of blue pencils, and I am now on the last pencil of the eleventh gross. I have annexed no new degrees. I am now a member of the Marblehead school committee, which is my only "office of honor or trust."

When I graduated from Harvard in 1903 I was appointed assistant instructor in French and Italian and the following year instructor in Romance languages. I pursued also graduate studies from 1903 to 1905. In the latter year I left for what was planned to be an extensive year abroad. I stayed in Europe for about a year, visiting France, Belgium and Germany in turn. During this period I was foreign correspondent for the Boston Transcript and other papers. Illness interrupted this trip, which was to have extended to other foreign countries subsequently visited. After my return to America I spent about a year in Boston. In 1907 I went to New York, and entered Columbia University as a graduate student in Romance languages (philosophy). Here I spent several years in research work under Professors Todd, Cohn, Fletcher and Speranza. (The death of Professor Speranza, which occurred after I left Columbia, was to me a great shock and a profound sorrow, for he had won from me both affection and respect.) In 1908 I passed the oral requirement for the degree of Doctor of Philosophy, after presentation of a thesis, shortly to be published in an amplified and extended form. (See below.) From 1908 on, I was engaged in preparing an extended treatment of the subject of my dissertation. This investigation, now completed, will be

published, probably by the Columbia University Press, in the course of the next academic year. The title is as follows: *Alba, Aube and Tagelied in the Light of the History of Culture*. This work is a study of the immediate origins of certain mediæval lyric forms from the standpoint indicated in the title. Its method, and to the extent communicated, its results, have been approved by M. Joseph Bédier of the Collège de France. In 1910, while still engaged in this research work, I was offered, and accepted, the position of lecturer in the French language and literature in the University of Toronto (Victoria). In 1911-1912 I was made associate professor, Old Provençal literature and philology, as a University graduate option, being added to the number of my teaching subjects. I have had, furthermore, during the last year, a class of twelve students in the Russian language, my first knowledge of which was gained at Harvard under Professor Leo Wiener, and have done some teaching of the Dano-Norwegian language and literature, which I first studied with Professor Schofield of Harvard, in connection with graduate work for the degree of A.M. I hold at present the office of honorary president of the Modern Language Association of Victoria. Books and articles which I have written: *A story of mediæval lyric origins* (for title and information see above); *The Symbolism of Petrarch's Canzone to the Virgin: a comparative study*; *The Romanic Review* (Columbia University, Vol. II, No. 1, January-March, 1911; reprint, (bound) Columbia University Library, March, 1911); several short stories. Worthy of mention here, perhaps, would be *Three on the Steppe* (Harper's Monthly, October, 1908) and *The Hermit of Malea* (Smart Set, November, 1910). Others under various pseudonyms. Member: Harvard Club of Toronto, Canada.

Three days after Commencement I left for St. George, Utah, a little Mormon town in the southwest corner of the state. Fifteen miles from there, on the Piute Indian Reservation, was located the smelter of the mining company with which I had secured a position. After doing the assaying there for four months I was transferred twelve miles into the mountains to the mine, where I did assaying, surveying and mapping, bookkeeping, and a multitude of other things, including shift-boss duty at times. A little over a year at this, with hard physical work, poor food and water, and underground air, brought on pleurisy and tuberculosis, and in December, 1904, I went home to Brookline, Mass., and spent over a year in getting well. In June, 1906, I went into the engineering department of Stone and Webster, Boston, as secretary of the department. Later I went to Texas (Dallas) on construction work, and assistant to the southwestern manager of the engineering corporation, when that office was opened. While in Texas my interest in religious and philanthropic work became so strong that I returned to Cambridge and went through the Divinity School, graduating in 1911. I was married in June, and in August I began work with the Barrington (R. I.) Congregational Church, where I now am.

After graduating in 1903 I studied mining and mechanical engineering at Massachusetts Institute of Technology for three years, not getting a degree as I wanted the knowledge. In the summer of 1906 I went to California and started at the bottom to learn first the gold dredging business. I worked in the "bull gang" of a construction crew, in the middle of summer,—temperature from 100° to 150° in the shade every day. I spent two years in Orville, Cal., working at all sorts of work around the gold dredges, from laborer to draughtsman. In the spring of 1907 I went to work for the Guggenheim Exploration Company, and lived three months in Vancouver, British Columbia, looking after a piece of work for them. In June I went to Dawson, and had a very interesting time with their Yukon Gold Company, as this was an immense undertaking, being established in the wilderness, two thousand miles from all supplies. I was assistant to the superintendent in the dredging department, and intended to return the next year, but the panic curtailed their operations that year, and I had a chance to go into a new and promising field in Colombia, South America, so took it. I spent a

CLASS OF 1903 — THIRD REPORT

year in the employ of an American company which was doomed to failure, so turned in my resignation, and if my successor had been sent promptly would have quit that country for good; but as luck would have it, I heard of some good chances to try something on my own hook, and being so fixed that I could attempt them, came back. This was in 1909. I have had a hard experience here, but have acquired a unique knowledge of the possibilities of what is going to be a very important mining region, and have a great opportunity here to make a success. I have a mine nearly ready to pay dividends, and a chance to acquire and develop some very large and valuable properties, but am in the mining business and not the stock selling game, so that the bank account will come a little later. South America offers tremendous opportunities, but to take advantage of them needs patience and perseverance, and not every one is suited to the life and hardships.

Upon graduating I repaired to my home town of Penn Yan, N. Y., to make the most of the last vacation I was sure of. A month later I reported to the division engineer of the

RECORDS OF THE CLASS

Baltimore and Ohio at Chicago. After a year and a half, having failed to make any dint in the railroad organization, and having acquired nothing but experience and bad health, I renounced railroading and went home. This was in February, 1905. By September I was ready to try the railroad business again, so I set out for New York. The New York Central people were at that time absorbing men in droves, so they took me. For several months they did not know what to do with me, and I was loaned hither and yon. Finally I landed in the grade crossing department, and after three years or more of that work, I felt that I could eliminate grade crossings blindfolded. Then I drifted into other departments, but the chief engineer never asked me to take his place, and so two years ago, after five or six years with the New York Central, I discharged them. Several painful months followed while I was convincing myself at some financial cost that I was not a business man, and then once more I found a railroad opening, this time with the Jersey Central. I stayed there a year, and then recently gave up active railroad work to write about it for the Engineering Record. Having failed to do anything wonderful myself, I feel eminently qualified to tell others how. Several years after graduation I discovered a young lady in Cambridge that I had somehow overlooked while in college. After a protracted struggle, I won the prize three years ago. For the rest, my life has been uneventful. I have never stopped any runaways, saved anybody from drowning, nor been in jail or Congress. Member: Harvard Engineering Society of New York, Association of Harvard Engineers, American Society of Civil Engineers.

I came to New York in February, 1901, and secured employment in the American Can Company. At the end of six months I was made assistant Atlantic District purchasing agent, in which position I remained until December, 1902, when I received an appointment as cashier of the Windsor Trust Company of New York. After three years I went with Strong, Sturgis and Company, members of the New York Stock Exchange, to learn the brokerage business. In January, 1906, I purchased a seat on the New York Stock Exchange, and was made a member of the firm of Ullman Brothers, bankers and brokers. A year later I retired from that firm and became a member of the firm of Cutting and Company, in the same business. In November, 1907, I retired from the firm of Cutting and Company, sold my seat on the New York Stock Exchange, and sailed for South America, to become associated with some railroad concessions in Columbia. On account of ill health I returned in March, 1908, and in September took a position with Hayden, Stone and Company, bankers and brokers. In January, 1910, I purchased a seat on the New York Stock Exchange, and organized the firm of Raymond, Starr and Company, bankers and brokers, with offices in New York City. Member: Aero Club of America.

Business	<i>Lawyer.</i>
Address	<i>(home) 861 Prospect Ave., Winnetka, Ill.</i> <i>(business) 125 West Monroe St., Chicago, Ill.</i>

For the first five years after emerging from the Law School, I endeavored with more or less success to apply to the law as she is practised the principles as they had been taught. In 1906 I was admitted to the law firm of Steere, Williams and Steere, of the Rookery Building. Becoming particularly interested in probate law, I entered the Western Trust and Savings Bank trust department, where, in 1910, I was appointed assistant secretary. In December, 1911, that bank was absorbed by the Central Trust Company of Illinois. I was transferred with other assets and liabilities, but as a result I have decided to remain in the probate and individual trust work of the Trust Company. I am very pleased to add that I have recently been appointed probate officer of the Central Trust Company of Illinois. Member: Harvard Club of Chicago, University Club of Chicago, Union League Club of Chicago, Chicago Yacht Club.

Years in College	<i>1899-1902.</i>
Degrees	<i>A.B., 1903; LL.B., 1905.</i>
Died	<i>Milwaukee, Wis., March 30, 1907.</i>

Henry William Becker Stern was born in Minneapolis, Minn., October 28, 1881, the son of Frank J. Stern and Adolphine Virginia Becker. He received his earliest education in Chicago, and later in Milwaukee graduated from the high school there. He entered Harvard College with the Class of 1903 in 1899, and completed sufficient courses to entitle him to his degree in three years. He thereupon entered the Harvard Law School, taking his A.B. degree, however, with the class in 1903. In 1905 he graduated from the Law School and immediately took a trip to Europe, traveling during the summer in England and on the Continent and spending the winter at Munich, where he took a course of lectures on philosophy and art at the University of Munich. He completed his education at the Sorbonne, Paris, where he attended a course of lectures on international

law during the remainder of the year, and received his degree from that university. The incipieney and the swift development of the disease which eventually led to his death were probably due to an almost passionate desire for mountain climbing, developed during a sojourn in Switzerland while he was staying in Europe. In the early spring of 1906, while taking a trip in the Bavarian mountains, his party was overtaken by a heavy snowstorm, which impeded their progress and made the ascent a dangerous and most strenuous undertaking, and the unusual strain caused a heart lesion, which ultimately brought about his death. On his return to America in 1906 he entered the employ of a prominent Milwaukee law firm, where he enjoyed the confidence of his employers and was very successful. His career was of short duration, as his heart trouble assumed serious proportions, and he was obliged, in the autumn of 1906, to take to his bed, to which he was confined except for short intervals until his death on March 30, 1907. During his lingering illness he preserved with wonderful courage the humor and the sunny disposition which were the keynote of his character. During his illness he did a considerable amount of serious reading, and until the end retained a live interest in his friends, his Alma Mater, and all matters of general educational interest and progress.

In the fall of 1903 I was offered a position as a result of examination for the Philippine civil service. This I accepted, arriving in the islands in January, 1904, in company with William E. Thompson, Harvard, 1903. I was appointed examiner in the Philippine Civil Service Board (name later changed to the Bureau of Civil Service), to which Homer Carleton, also of 1903, was later appointed. I was promoted to acting chief examiner and then to chief examiner. As such I had immediate supervision of preparing, giving and rating examinations of about six thousand Americans and Filipinos annually for government positions of all grades, from messenger to teacher and physician. Examinations were given in Manila, and about fifty other cities of the islands, and were offered in both the English and the Spanish languages. I enjoyed life in the Philippines, and was glad to have a part in Governor Forbes' great work there. On my return to the United States in 1912 on leave of absence, I accepted a position with Ginn and Company, educational publishers, with which house I am at present connected, having charge of the high school and college field

The fall following graduation found me studying medicine at the College of Physicians and Surgeons, Columbia University, New York. Continuous effort for four years minus good lengthy vacations was rewarded by the conference upon me of a degree and a position on the Roosevelt Hospital interne staff. Here I served for two busy and happy years. Then, 1909, I hung up my shingle, also I became an instructor at the College of Physicians and Surgeons with the title of associate in anatomy. This position I held for three years, when I had to give it up to become second assistant attending surgeon to Roosevelt Hospital and chief of its surgical clinic. Such so far is my professional career. The crevices in this have been filled with the usual athletic activities of a healthy man. I have been to both previous class reunions, have not missed seeing a Harvard-Yale football game, have seen all but one of the victorious races at New London, and have been

On leaving college I was doubtful as to what business to enter, but finally decided to go into railroad work. I went to Baltimore and worked in the Baltimore and Ohio Railroad shops, but did not like it, and after staying five weeks I left and came back to Philadelphia. Then I secured a job in a trust company; they were not very generous at first—they paid me fifteen dollars a month. I used to help the tellers, and sometimes when the paying teller was away I took his place at the window; ever since I have laid claim to being the lowest paid teller in existence. When I had been in the trust company a year I began studying law. I worked under a very able law tutor who had a class of six or eight men and lectured to us at night; I studied after four o'clock, when the trust company closed, at night and Sundays. Two years later, in 1905, I was admitted to the bar and began practising. One of the leading law offices of the city gave me a berth, and I have been associated with them ever since. I am still single, which I suppose is a mistake; but I generally have plenty to do and always have had a good home to go back to at night, so I don't worry.

Pennsylvania, Philadelphia, Pa.*

Though I took the degree of A.M. at Harvard in 1903, I lived the entire year as an undergraduate, having entered as a senior from Haverford. In the spring, by special permission, I was allowed to try for my A.M., my case being the only one of the kind on record, as I was told. In the autumn of 1903 I entered the University of Pennsylvania as an assistant in English, and after two years took my Ph.D. in English and Greek, my thesis being on the plays of William Rowley. In the following summer I went abroad as a research fellow and worked at the libraries in Oxford, Cambridge and London, seeing a good deal of life incidentally. I wished to supplement my general knowledge of literature by an acquaintance with the other arts, especially the sculpture and architecture of Greece, the painting of the Italian Renaissance, and modern German music. I therefore paid long visits to Munich, Bayreuth, Florence, Rome, Egypt and Athens. I had previously published a small book of verse privately with a friend and had sold a poem or two to magazines. As a result of three months' wanderings in Greece I published a volume of Greek myths, filling in the background from observation of the actual country. This was favorably noticed by the London Times and Chronicle, the Boston Transcript and the New York Nation. Returning to Philadelphia, I took up the full work of an instructor, and even at one time took part of Professor Gummere's work at Haverford during his illness. Finding the strain pretty severe, I did nothing outside but society, where I managed to have a good time without becoming engaged. Feeling the need of a more thorough training in linguistics, I returned to Europe the following year, spending the summer in Italy and the rest of the time in Munich. Toward the end of this time I became engaged to Fraulein von Pausinger, daughter of the famous Austrian painter, Franz von Pausinger. In August, 1908, we were married at Salzburg, and in the fall settled at my grandfather's old house near Philadelphia.

RECORDS OF THE CLASS

Since then I have lived along steadily, teaching at Pennsylvania and writing verse, stories, etc. My second volume of verse, *The Queen of Orplede*, won over the London Academy and divers American critics. Since then I have sold more verse, notably two sonnets to the *Century*. In scholarship my interest, after the publication of my thesis, went over to the humanistic side, as my article on Heine and Tennyson in the *Festschrift* in honor of Dr. Gummere will attest. It seems more important to me to introduce literature to the mass of the American people than to edit authors of secondary rank. In my literary club, the Franklin Inn, I had two small plays performed, besides writing the music for others. I have a fair collection of good pictures and, as Mrs. Stork both sings and paints pictures, we have an all-around artistic life. Lately I have been working very hard at verse and have read poems on various public occasions. I see too little of Harvard, but feel that the year I spent there was critical in bringing out whatever possibilities I had. Two children have been born to me, and I feel that life has in general treated me better than I deserve. My desire now is to write for a wide audience without lowering my standard of truth to feeling. Books, articles or plays which I have written or translated: *Arcades Ambo* (verse), with R. M. Gummere (privately printed), *Day Dreams of Greece* (verse) (Elkin Mathews and J. B. Lippincott), *The Queen of Orplede* (verse) (Elkin Mathews and J. B. Lippincott), *Heine and Tennyson* (essay) (in *Haverford Studies*), *William Rowley* (two plays, edited, with introduction) (University of Pennsylvania Publications). CLASS OF 1903 — THIRD REPORT

Charles Louis Story was born April 7, 1878, at Dixon, California. His father, Alfred Riley Story, was a school teacher. His mother was Mary Matilda Behrens. Charles graduated in 1893 from the Dixon High School with the valedictorian's class essay and went then to the Pacific Methodist College at Santa Rosa, where in 1897 he graduated and delivered the class oration on Privileges. After this he entered the senior class at Stanford University, winning the love and esteem of every one, from the president (whom he accompanied on a trip through Mexico) and his professors to his classmates. A frequent contributor of excellent prose and verse to the *Sequoia*, he stood highest in every class, and was a member of the Phi Beta Kappa Society. Yet he was not a mere "dig," but a boy ready and able to enjoy life in the California woods and on its sunny plains as only a boy of twenty can. He received his degree of A.B. in English in 1898, his A.M. with a dissertation On the Language of the Harleian MS. of Chaucer's *Canterbury Tales* in 1900, and was offered at once the professorship of English and history at the Pacific Methodist College at Santa Rosa. He filled the position admirably for one year, at the end of which the presidency of this institution was urged upon him. He refused this offer and started immediately on a long trip to Europe with his mother, his constant companion. During 1901 and 1902 he travelled through Great Britain and most of the countries of the Continent, and finished some faithful work on the Chaucer MSS. of the British Museum. Returning in 1902, he entered Harvard for a continuation of his post-graduate work, and received his A.M. degree there in 1903. He was appointed professor of English at the State Normal School, Warrensburg, Mo., and in 1904 accepted an instructorship at Stanford University. But in June of this same year his health suddenly broke down, and the fatal illness to which he succumbed after a brave and heroic struggle of almost three years settled upon him. A frequent contributor of verse and prose (essays, descriptions, criticisms, accounts of travel, sermons) to various journals and papers, he gathered a few months before his death what he

thought best of his poetical work, under the title *Moods and Memories* (Stanford University Press, 1906), a volume, which has preserved to his friends the picture of his noble soul, of his true poet's conception of the world, his earnestness, his hopefulness, and which occasionally shows genuine inspiration. Among the best poems which he ever wrote are a handful of magnificent strains of serenest hope and joy in the face of death, written on what he knew was his death-bed. A second edition of his *Moods* which is preparing will contain this wonderful last harvest of a most promising young poet's heart, of a truly rare man whom his *Almae Matres*, Stanford and Harvard, have every reason to be proud of, and will never forget. He died at Palo Alto, Cal., March 24, 1907.

After leaving college and having decided to teach, I found that I must have experience before I could hope for a good position; therefore I taught in two evening schools for pay and a day school for love and experience, and did a fair amount of private tutoring during the year 1903-1904. For four summers I have had a summer camp for boys in Jaffrey, N. H., which has been most successful and very interesting work. At the present time I have a club of about thirty boys who meet once a week for sloyd. In 1904 I got a position in Cambridge in the Rindge Manual Training School, and as that school changes teachers very often, I found myself in five years the third oldest teacher in the school in point of service, and the head of the mathematics and science department. In 1909 I had an offer to go to the Mechanic Arts High School in Boston, where I am at present teaching science. I spent the summer of 1910 in Europe. Ordinarily I summer in Gloucester. Member: Harvard Club of Boston, Eastern Association of Physics, New England Chemistry Teachers Association, Association of Mathematical Teachers in New England.

RECORDS OF THE CLASS

Shortly following my graduation I took a shooting trip. I travelled by tramp steamer through the Great Lakes, stopping at the larger cities en route. In October, 1903, I started in to learn the workings of a department store, and like my brothers who had graduated from Harvard in 1893 and 1897, respectively, went through the mill and served my apprenticeship in the various departments of R. H. Macy and Company. After experiencing the thrills and adventures of a clerk, floorwalker and department manager for four years, in order to get a more comprehensive idea of the workings of a department store, I am now finally located in the private office as a member of the firm. My life up to the time I married was uneventful. I have always had a particular fondness for music, and have managed to keep it up by means of weekly meetings of the string quartette in which I play the 'cello. I was married July 15, 1907, on one of the warmest days ever recorded by the weather bureau of New York, and spent my wedding trip touring by motor through England, Scotland and Wales. My young son, Edward Kuhn Straus, put in his appearance on the 12th of November, 1909, and now at the age of three, inspired by a Harvard flag which hangs at the foot of his crib, and judging from the strength of his lungs which he exercises at regular intervals, he is fitting himself to join the cheering section when he goes to Harvard. I have a farm at Red Bank, N. J., where I spend eight or nine months of the year, and I am gradually realizing that so-called gentleman farming is not a profitable venture. I am frequently brought face to face with the fact that on poor land one must put more fertilizer than can ever be profitably taken from it in the form of crops. The past year a great shadow has been cast upon my family by the tragic death of my parents, who perished in the sinking of the Titanic. My only activity in public work has been in connection with the Young Men's Hebrew Association, of which I am a director. I frequently meet my college classmates and Harvard contemporaries at the Harvard Club of New York, and by this means keep ever before me a memory of the good old days spent between September, 1899, and June, 1903. Alfred Swenson was born October 5, 1881, at Wellesley, Mass. His parents were Peter and Pernela Lundgren Swenson. His education was obtained at the public schools of Wellesley and at Norwich University, Northfield, Vt., which he entered in the fall of 1898, after completing three years at the Wellesley High School. He left Norwich University in the spring of 1900, and that autumn entered Harvard, becoming a member of the Class of 1903. He remained in Harvard less than five months. He was then employed by Blodgett, Ordway and Webber, dealers in wholesale dry goods in Boston. In February, 1903, he was forced to give up this position on account of his poor health, and on November 16, 1904, after a long illness, he died.

RECORDS OF THE CLASS

In 1904, after graduating from college, I accepted a position in the steel plant of the International Harvester Company, near South Chicago. I remained at South Chicago for three years, working in the following departments: The laboratory, the blooming mill and the Bessemer department. I left and went to the National Malleable Castings Company, remaining only a short time. I then went with the Zenzen Converter Company, as manager, finally resigning toward the end of 1908. On January 27, 1909, I married Miss Antoinette Ceballos Hewitt and went abroad for a six months' honeymoon trip to Spain, Italy, Egypt, Palestine, Greece and Turkey. Upon my return to Chicago in July, 1909, I connected myself with the international banking house of Goldman, Sachs and Company, where I have been ever since.

Following graduation I served as a reporter on the Boston Journal for a few months, and then at Albany on the staff of the Associated Press during the 1904 session of the New York legislature. I then devoted myself to The Commons, a monthly periodical concerned with municipal affairs, industrial problems and social settlement activities. This was published at Chicago Commons, a social settlement in which I have for years resided and which I consider my permanent home. The Commons was consolidated with Charities, of New York, and other journals in the field of social betterment, and the outgrowth is The Survey, a weekly magazine which seeks to get at and interpret the facts of living and working conditions in America and to promote efforts for civic, social and industrial progress. I serve as a member of the editorial staff of The Survey, my time being spent partly in Chicago, partly in New York and partly in travel and investigation in the country at large. My residence being mainly in Chicago, I have sought to identify myself with various social and civic activities in that city, and I have engaged actively in the politics of my ward. I have been greatly interested in the movement to provide public recreation facilities, and have served as secretary of the Playground Association of Chicago and as a director of the Playground and Recreation Association of America, the local arrangements for the first convention of this organization having been in my charge. My interest in this field has taken me to a number of cities, where I have been asked to help in campaigns for public bond issues to provide recreation facilities. In 1910, on leave of absence from my magazine work, I served as a special agent of the United States Census Bureau, being chief inspector of field work in the enumeration of population in the city of Chicago. I have taken an active interest in the work of the City Club of Chicago. Mainly as part of my magazine

work, I have devoted much time to the observation of civic and industrial conditions in this country and abroad. Recently I have given some study to the growth of industrial towns and districts on the edge of large centres of population. Articles which I have written: A series on Satellite Cities, dealing with industrial suburbs of large cities; City Neighbors at Play, a study of the Chicago recreation centres; Creating the Newest Steel City—Gary; The Socialists in Milwaukee; The New Chicago; A Man-Made Flood, a study of the social responsibilities—of the state, the town, the company and the engineering profession—involved in the Austin Dam disaster. Since graduation from Harvard I have lived in Laporte, Ind., being associated with my father in the manufacture of metal and wood wheels for agricultural implements. I was married in 1906, and am the proud father of two little girls. I am a member of the Presbyterian Church, and have been president of the board of trustees the past year. I have taken a great deal of interest in the game of golf, and at one time thought I had a chance to be a champion player, but the fates ruled otherwise, as I am now the possessor of a stiff left arm. At the midyears in 1903 I left college, having completed the requirements necessary for my degree, and immediately went to Lawrence, where I prepared to learn the wool business, at the wool-scouring plant of Mr. E. Frank Lewis. I arose at five o'clock every morning and worked from half past six in the morning until six at night, except Saturdays, when we quit at noon. This was before the passage of the fifty-four-hour law for working men. I take great credit upon myself for my industry, as getting up at that hour was quite a change from having to attend an eleven o'clock lecture. I worked here a year and a half, and through my association with the poor working men I developed that broad understanding of humanity. At the end of three months I became a full-fledged wool sorter, with a remuneration of \$13.50 per week. As the other men before becoming wool sorters with wool sorter's pay had to serve an apprenticeship of three years, one can readily see, by my astounding rise, what a college education did for me. I should also add that I carefully followed all the customs and habits of the wool sorters, and never got ahead of them on piece work, but followed along and made each job last as long as possible. For this I became very popular, and if I had stayed would probably have been mayor of Lawrence. After leaving the mill I became a wool broker, and as such served with distinction for several years until, the publishing firm of Small, Maynard and Company requiring my services, I gave them, and for the

RECORDS OF THE CLASS

After leaving college my first notable achievement was my marriage, as noted on the preceding page. My first occupation as a responsible member of society was as a stock clerk in a large wholesale hardware business in San Francisco. I was to "learn the business," which process appeared to consist of raking bolts out of a bin and throwing them into another. In six months I knew all about this business and quit. I then went to a small town in the southern part of California, as assistant to the manager of the gas and electric company at San Luis Obispo. Here I stayed over four years as manager, director and treasurer of the gas company and holding a small interest in the business. The great earthquake and San Francisco fire of 1906 occurred while I was still in San Luis Obispo, and though no local damage was done, five anxious days were spent before I could locate the members of my father's family, who had left San Francisco as the fire swept through it. All were well and unhurt. In 1907 the gas business was sold and I moved to San Francisco. In July, 1907, I began with a few friends the manufacture of gas engines and automobiles at San José, Cal. This business was never properly financed, however, and we were forced to close out in a few months before getting our product on the market. I had lost the small amount of money I had made in the gas business, so was fortunate in getting a job with the Home Telephone Company of Los Angeles. After normal conditions were restored in San Francisco I returned and effected a connection in September, 1908, with the firm I am now with. Epitomized, my history resembles that of a rolling stone, and like the rolling stone I have gathered no moss. Otherwise, I should be present at the Decennial of our class. No signal honors have fallen to me, other than that of being for three years past the secretary of the Harvard Club of San Francisco, which numbers among its members a few good men and true of the vintage of 1903. A Pacific section of the Associated Harvard Clubs is now in process of formation, and is expecting to charter a steamer to bring the Associated Harvard Clubs through the Canal and up

“The entire period elapsed since leaving Harvard” has, in my case, been practically all devoted to working. Of course, there have been some vacations, but the main thing has been “establishing a career,” which I started to do, shortly after graduating, by getting a job as clerk in the comptroller’s office of the Brooklyn Rapid Transit Company, in Brooklyn, N. Y., having ambitions to become a railroad magnate, or as near that as possible. I was satisfied with this clerical job for almost one year—until I realized that the production side of the cost sheet was more vital than

RECORDS OF THE CLASS

the overhead side—and then got me a different job, this time in the operating department and with the Long Island Railroad, in the train service. This was practical railroading, and I worked in the train, engine and roadway departments on the various roads running out of Greater New York and vicinity, principally the New York, New Haven and Hartford and the Long Island, getting real experience for around three years, up to February, 1907. Then I forsook the strenuousness of railroading with the grade of assistant roadmaster in the maintenance of way department—the closest I have ever been to being the railroad magnate—to be one of the stenographer-secretaries of the executive officer of the General Education Board (the John D. Rockefeller Foundation), and to avail myself of what seemed to be a shorter and surer route to fame and fortune. But office work proved far too tame, so I hunted something more exciting, and finally located in April, 1909, in Utah, in the mining and smelting industry with the United States Smelting Company, at Midvale, Utah, twelve miles south of Salt Lake City. Here I have been ever since, and at present handle the bag house or fume filtering plant for this company and operate their arsenic plant besides. I am rated as one of the general foremen. This brings my career down to date. Member: Midvale (Utah) Commercial Club.

see the Yale game, and ended by staying there three years more; the first year as a graduate student, the second as Austin Teaching Fellow and assistant to Professor Moore in Fine Arts 4, and the third as assistant in Fine Arts 3 and 4. I came abroad in 1906, and have lived in France ever since, except for three visits home. I lived in southern Brittany most of the time at first, but lately have been settled in Paris. In 1906 Paris seemed to be populated very largely by 19's men; I think I am the last one left, but plenty of 19's more keep turning up. I have written a book, *French Portrait Engraving* (published in London in 1910), and am at work on several others. One of these, on Franklin in France, I hope to finish soon, though it is true that I have been hoping so for a good while. I have been back to Cambridge twice, and could report that although I lived far away, it was in a country where l'université Harvard is the only recognized American college; the word Yale is supposed to refer only to burglar-proof devices, and is pronounced Yol.—*A bas Yol!* Books and articles which I have written or translated: (book) *French Portrait Engraving*; article on Sebastien Bourdon (*Gazette des Beaux Arts*, January, 1912), and various others. Years in College	<i>1899-1902.</i>

Died	<i>Saranac, N. Y., Sept. 21, 1905.</i>

Francis Banks Thompson was born at Troy, N. Y., on the thirteenth day of February, 1881, the son of Robert Hallam Thompson and Harriet Augusta Banks. His early education was acquired under the direction of private tutors, and at a private school in Vevey, Switzerland. He passed his entrance examinations for Harvard College in 1898, and after spending a year abroad matriculated with the class of 1903. Mr. Thompson completed his course for the degree of Bachelor of Arts in three years, and during his senior year attended the Harvard Law School, receiving his degree with the class of 1903. During the winter of 1903 he continued the study of law at the law school of Columbia University in the city of New York. Because of failing health his legal studies were interrupted, and after spending the spring of 1905 at Asheville, N. C., he went to the Adirondack Mountains in the hope of regaining his health. The summer of 1905 was spent at Saranac Lake, and on September 21 of that year he died of tuberculosis. Possessed of an unusually cheery disposition and endowed with a great fund of humor, his capacity for the genial friendships of college life was complete. Members of the class will best remember him as an active participant in the French plays given by the Cercle Français. Mr. Thompson was admirably equipped for the practice of his chosen profession, and his brilliant intellect and power of analysis could not have failed to achieve success for him had he been spared to pursue his ambitions. His happy, guileless character and his scintillant wit remained with him to the last, and his life closed as a chapter, all too short, of kindness and good will. During his last illness he was cheered and comforted by the correspondence of his

Through the Appointment Office at Harvard, on graduation, I secured a position as yard clerk on the Pittsburgh division of the Baltimore and Ohio Railroad. The work was very interesting but very hard, as the hours were from six A.M. to six P.M., combined with the fact that I had to work Sundays and holidays. A pleasant little change came now and then, when I was placed on the night shift, starting at six P.M. and quitting at six A.M. A summer of this proved sufficient to cure me of railroading, and about October 1, 1903, my uncle took me in as office-boy in his cotton goods business in New York. I received there a thorough training in the methods of running a cotton goods converting business. I might say, however, I did not master quite all that was going on in the business, as my particular boss was later sent to prison for embezzling one hundred and fifty thousand dollars of the firm's money. For some reason, while I was there, this gentleman did not explain to me the details of that part of the business. I learned all about them, however, from the newspapers, seven years later. After two years of inside work with my uncle, I went with L. Hess and Company, importers of linens. After a couple of years I took a position of salesman with the Robinson, Hughes Company, a Louisville dry goods commission house, as one of their New York men. About a year later, when the manager of the New York office

Thorvaldur Thorvaldson was born December 4, 1878, in Iceland. He was the son of Thorvaldur Thorvaldson, a farmer, and Thuridur Thorbergson. In 1887 he moved from Iceland with his parents to Canada and lived in Manitoba for some years, where he studied at the University and received the degree of A.B. in 1902. Previous to that time he had lived in North Dakota for nearly two years engaged in work and study. In the fall of 1902 he went to Cambridge, and entered the senior class of the Lawrence Scientific School, where he specialized in physics and mathematics. His record at the University of Manitoba was excellent, as he twice won scholarships and at graduation received a silver medal. He received the degree of S.B. from Harvard in 1903, and spent the following year studying in the Harvard Graduate School in the department of physics. He died February 9, 1904.

A man's autobiography should not be published until after his death. I should be loath to write mine for publication even then. However, since only a certain period is asked for under this head, and since that leads back to one of the happiest facts of my life, my graduation from Harvard, I am glad to jot down an account of it, for my own reading and for those of my classmates who have time to kill. I entered the Harvard Law School in the fall of 1903, and between the burden of my debts and that of earning a livelihood, I managed to plod through the study of law and, incidentally, through the first year at the Law School. Not a very brilliant year, but a profitable one! For, though I came back the second year, I had already learned that I was not destined for the legal profession. Towards the end of December of my second year, broken in health and more broken in spirit, I was obliged to give up. My debts were still heavy, and the task of teaching in one of the evening schools of Boston five evenings every week from 7.30 to 9.30 was not conducive to love of study. I drifted along from January until June, 1905, teaching evening school and spending the daytime in long walks and odd jobs. June found me pretty well restored to health, but with nothing definite in view for a livelihood, not to mention career. Just at this time a little Scotchman, running a lyceum bureau, got hold of me, and induced me to go on the lecture platform, as the famous poet-philosopher, etc. Of course recommendations from Professors Royce, Palmer, Wright and others were utilized, and I was foisted upon Chautauquas, church societies, Browning clubs and other naïve and unsuspecting audiences. From a financial standpoint, my platform experiences were quite successful, and my manager, the canny Scotsman, was even more so, as I found out later. But this could not keep up long. The

summer was drawing to a close, and I was looking around for something more definite. A friend had learned of a vacancy in the department of oratory and elocution at the Hebrew Union College at Cincinnati. Having had a little training in that line, and backed by the prestige of a first Boylston prize, I made application for the position, accompanying my application with letters of recommendation from Professor Winter and Dean Briggs. Of course the authorities at the Hebrew Union College could not resist all this, and I was invited to accept the chair in pulpit oratory at the munificent sum of nine hundred dollars per annum. I came to Cincinnati, I saw the institution and the students, but I did not conquer. I did not have the courage to teach the student body that greeted me at the college. The authorities must have observed my plight, for they did not insist upon my living up to the contract. Instead they offered me a substantial scholarship, if I desired to change my status from that of instructor to that of student. I accepted the scholarship, and as a result I am now in the ministry. My first charge was in Lexington, Ky., where I stayed a little over a year,—but long enough to find, woo and wed the sweetest girl in the blue-grass country, and that is a standard unsurpassed anywhere in the world. Just before marrying I received and accepted a call from a larger congregation at Kalamazoo, Mich. There I, or I should say we, tasted of real life, with its many responsibilities, its bitter and sweet. Four and a half years held us in the Michigan city—and many other things beside. The members of my congregation were of an exceptionally high type of church people, and the community at large in Kalamazoo is composed of a fine and progressive citizenship. I was especially favored at the hands of the people of the city. I was a member of a committee of fifty appointed by the mayor to consider the needs of the city and prepare a social survey; one of ten delegates at large to constitute the executive committee of the Civic League; held the office of president of the Art Association of Kalamazoo; a director of the Charity Organization Society; and en-

CLASS OF 1903 — THIRD REPORT

joyed honorary membership in the Academy of Medicine of the city. Our two children were born to us in Kalamazoo, and we were very happy there. Indeed, it was with great reluctance that I accepted a call to my present charge some four months ago. The field here is much larger, the congregation being nearly four times as large as that of Kalamazoo, and, since a minister must go where he is most needed and where his services are as far reaching as possible, I felt in duty bound to give up the comparatively easy life in Michigan for the rush and hustle, the strain and stress of the life that we live,—whether we admit it or not—here in the East. Of course, there are considerations which the East offers which mean much to me. I like to tackle the problems that beset the minister here on all sides. I like the crowds. Above all, I like the feeling that I am nearer old Boston, Harvard Bridge, Cambridge and FAIR HARVARD. Articles or plays which I have written or translated: (articles) Aspects of Jewish Education, Spirit of Thanksgiving; (play) A Maiden's Loyalty to her People. Upon leaving the Harvard Law School in June, 1905, I entered the law office of J. E. Bastress, at Mount Carmel, Pa., to continue the study of law. On being admitted to the Pennsylvania bar in March, 1906, I formed a law partnership, under the firm name of Bastress and Tier, at Mount Carmel, Pa., and have there continued therein thence hitherto. My professional activities have all been confined to Mount Carmel, Pa. I am general counsel for the following Mount Carmel institutions: Guarantee Trust and Safe Deposit Company of Mount Carmel, Pa., the Anthracite Brewing Company, the Central Pennsylvania National Building and Loan Association, Mount Carmel Iron Works, and Mount Carmel Gas Light Company. I am secretary and director of the Peoples' Building and Loan Association of Mount Carmel, Pa.; secretary and treasurer and director of the Union Water Company of New Berlin, Pa.; trust officer of the Guarantee Trust and Safe Deposit Company of Mount Carmel, Pa. By virtue of a decree of the United States Dis-

After Commencement, the year 1903 held three things for me: a summer course in geology in the Colorado mountains; a return to Harvard to do some graduate work in geology and to act as assistant in the familiar courses A and B; attendance at a wedding, where I discovered a good comrad, whom I later beguiled into forming a partnership with me. The events of this time later proved fatal. Escape from the attraction of "earth sciences" was as impossible as unsought. Teaching also appealed to me, for neither lawyers nor ministers and book agents have such a monopoly on chances to hear their own inspiring discourse. Vengeance for the years of listening to others is here! In 1904 I entered the camp of the enemy, as a fellow, in "Pennsy." It was my first intimate contact with college ways not familiar, and with an

existence where "Harvard" was not a magic word. The effect was doubtless good, though deflating and painful. Thus began two years of hard grind, which culminated in 1906 in three things: the trade-mark of Ph.D.; the elevation (?) to an instructorship in geography; and the formation of aforesaid partnership with another member of the '1903, best company," of Wellesley. Subsequently, as a place merely to live, Philadelphia appeared to have few equals. Some of its golf courses are fine. For 1907 two momentous events must be recorded: the appearance of my first book, such a modest little thing that kind friends wondered how I dared let it venture out alone; and the addition of our third partner.—junior only in name and age, and not known ever to have been silent. The next year moved on with little worthy of notice, except that I then was dubbed assistant professor,—really a painless experience as there were so many other pleasant things to remove its sting. Not having enough chance to talk during the regular college year, I accepted an invitation in 1909 to give lectures during the summer quarter at the University of Chicago. In 1903 I despised Chicago; in 1909 I became a golf fiend in Chicago,—the germs are in the air here; in 1910 I was back again to give more summer quarter courses and get more germs; in 1911 our firm abandoned Philadelphia and set up in Chicago. It is truly some change! The last entry in my epitome is to record the journey through Chile, Argentina, Uruguay and Brazil, in 1912, to study the geography of those countries. Of course the other two partners went along, wherever possible. Thus at the end of the third triennial interval a third line of action was started. Teaching a little, writing a little, travelling a little, especially in South America, living much with these two good comrades, looks like a very safe forecast of what is ahead. Books which I have written: *A History of the American Whale Fishery*, *The Story of Oil*, (co-author) *Elements of Geography*, (co-author) *Modern Geography*; and various articles, mainly for scientific magazines. Member: City Club of Chicago, Geographic Society of Chicago, American Seismological Society.

Address	<i>(home) Edgewood (Bethesda P. O.), Md. (business) 1219 Connecticut Ave., Washington, D. C. (permanent) Metropolitan Club, Washington, D. C.</i>

After graduation I lived in Washington, D. C., with my aunt and uncle, Mr. and Mrs. James Lowndes. In the summer of 1903 I played in the national golf championship at Nassau, and reached the fifth round. I was invited to play on the All-America golf team against Oxford and Cambridge. In September, 1903, I went to work in the Union Trust Company, Washington, D. C., as a clerk. In September, 1904, I entered the law school of George Washington University, retaining at the same time the position with the Trust Company until 1906, when I resigned

from the bank and continued the law. In 1906 I commenced to deal in real estate. I spent four months of the summer of 1906 travelling in Europe with Philip H. Sheridan, visiting England, France, Italy, Germany, Switzerland, Holland and Belgium. I left Monte Carlo one hundred and fifty francs ahead of the game. In 1906 and 1907 I studied law, taking the third and fourth years simultaneously, but was refused the master's degree. In 1907 I won the Middle Atlantic golf championship. After graduating as LL.B. and being admitted by examination to the bar of the District of Columbia, I went to Nevada as counsel for the Bernice Mining Company, having headquarters at Winnemucca. For the next two years I was variously engaged in practising law, mining, cattle ranching and sheep herding, living for the most part out of doors and in remote places. I was in Goldfield, Nev., in 1907 when the United States troops arrived to protect the mines from violence by strikers. In 1908-1909 I was manager of the Morgan-Hill cattle ranches, Elko County, Nevada. From April 1 to October 1, 1909, I was a member of the field force of thirty-five men of the United States Alaskan boundary survey, under Thomas Riggs, Jr., engaged in the survey, location and demarcation of the one hundred and forty-first meridian in Alaska. Being employed to hunt game for provision, I killed moose, caribou, white sheep, etc., and travelled about two thousand miles on foot, mostly near the headwater of the White River. In the autumn of 1909 I returned to the practice of law in Washington. In 1910-1911 I organized the National City Real Estate Corporation, and as vice-president and manager of this company have since been developing the Edgewood property near Washington, D. C. In 1910 I played in the national golf championship at Brookline, and reached the semi-final round. I also played on the winning Massachusetts golf team in the Lesley cup competition and on the Chevy Chase team which won the Middle Atlantic championship. In 1912-1913 I was master of fox hounds, Riding and Hunt Club of Washington, and vice-president of the club; in

After graduation I took a short vacation at my home in Exeter, N. H. In the middle of July I went to New York to accept a position with Hornblower and Weeks, bankers and brokers. I started at the bottom of the ladder on a very small salary. My work at first consisted of running on the street, looking after the mail, cleaning ink-wells, and performing other equally important duties. I remember making a hit with my chief by taking off my coat and sweeping out the vault! After a time I was put to work on the books, and in the fall of 1904 was appointed cashier. My salary still continued very small as my only increase had been a very slight one. At Christmas, however, my salary was doubled and increased pretty steadily thereafter. On February 23, 1907, I married Anna Parker Lea. We began keeping house in Jersey City Heights, but the following October moved to Rutherford, N. J., a delightful home town, where we bought a house in 1909. My wife and I have joined the Unitarian Church in Rutherford, and I have served on the finance committee two years. I am secretary and treasurer of the New York Association of the Alumni of the Phillips Exeter Academy. In the fall of 1910 Hornblower and Weeks put me in charge of their unlisted securities department in New York, which position I am now holding.

Business	<i>Lawyer.</i>
Address	<i>(home) 19 Ruthven St., Roxbury, Mass. (business) 54 Equitable Building, 67 Milk St., Boston, Mass.</i>

At the end of my freshman year I left college, went to Camden, N. J., in the fall of 1900, and entered the employ of the R. H. Comey Company, of which my uncle, Robert H. Comey, was the president. This firm dyed straw and chip goods for hats. In June, 1902, I returned to Boston to live, and joined my father, William B. van Amringe, in the Van Amringe Granite Company, then at 3 Bromfield Street, Boston, and later at 172 Tremont Street. On April 20, 1903, I joined the Sons of the American Revolution. On October 13, 1904, I received the degree of Master Mason in Washington Lodge, A. F. and A. M., of Roxbury, Mass., and on January 19, 1905, I joined Mount Vernon Chapter of Royal Arch Masons, also of Roxbury. Leaving the Van Amringe Granite Company on June 4, 1906, I became a member of the reportorial staff of the Boston Evening Transcript, and for six years, almost to a day, enjoyed the varied experiences of a reporter on a metropolitan daily newspaper. During my last year and a half with the Transcript I "covered" the Suffolk County court house for that paper. I also "covered"

for the Boston Journal, a morning paper, at various times during this year and a half. While with the Transcript I began the study of law, entering the evening law school of the Boston Young Men's Christian Association on September 10, 1906. I was graduated from this school with the degree of LL.B., on June 15, 1910; took the Massachusetts bar examination on July 1, 1910, and was admitted to practice at the bar the following August. In July, 1912, I left the Transcript and entered upon the practice of law at Room 54, Equitable Building, 67 Milk Street, Boston, Mass., in the offices of the Honorable William A. Morse. I have written these special articles for the Boston Transcript: The Charles River Dam, Nova Scotia's State Technical Schools. Member: Washington Lodge, A. F. and A. In 1904 I acted as engineer for the Thames Paper Company of New London, Conn. The next year I was construction engineer for the O. W. Norcross Company of Boston. In 1906 I was put in charge of construction for United States engineers on fortification work. During the years 1907 to 1912 I was president of the Hanscom Construction Company, contractors for reinforced concrete, railroad work, rock and earth excavation; contractors and engineers for water works (domestic supply and fire protection).

Business	<i>Lawyer.</i>
Address	<i>(home) 47 Wendell St., Cambridge, Mass. (business) 110 State St., Boston, Mass.</i>

I spent the three years following graduation from college at the Harvard Law School, from which I received the degree of LL.B. in 1906. During my senior year I was an editor of the Harvard Law Review. In the fall of 1906 I entered the law office of Powers and Hall in Boston, Mass., and remained with that firm until the summer of 1907. While there my work was largely the preparation of briefs for appellate courts and opinions for clients upon points of corporation and constitutional law. In 1907 I became associated with the law firm of Carver and Wardner, at 28 State Street, Boston, which firm later became Carver, Wardner and Goodwin. Here I engaged in a very general practice, including admiralty cases, a branch in which the firm was prominent. In 1908 I was delegated to assist in the defence of Charles W. Morse, the New York banker, indicted for violations of the national banking law, and spent over a year in New York City preparing the facts and law for his trial,

and assisting in the various proceedings taken to secure a review and his release. Later I was admitted to membership in the firm of Carver, Wardner and Goodwin, and in July, 1912, the name of that firm was changed to Carver, Wardner, Cavanagh and Walker. Outside of interesting myself in local politics as a member of the Cambridge non-partisan city committee, I have not given much attention to anything not within the lines of the practice of law. Member: Boston Art Club, Boston City Club, Harvard Club of New York, Harvard Law School Association.

Gilbert Raymond Wallace was born May 17, 1881, at Syracuse, N. Y. He was the son of Samuel Rutherford Wallace, a minister, who was a graduate of Muskingum College, Ohio, and of Margaret Josephine Williamson. Wallace spent his youth in Brooklyn, and prepared for college at the Brooklyn Boys' High School. Before entering college he was engaged to some extent in newspaper work. He entered Har-

vard College with the Class of 1903 in its freshman year, and after spending one year there took two years at the University of Chicago, taking a degree of Associate of Arts there in 1901. He then returned to Harvard and took his senior year with the Class of 1903, taking his degree of A.B. with the class. For two years after he left Cambridge he taught school, first at Summit, N. J., and next at Pinehurst, N. C. He then entered business life in New York City, taking a position with the firm of Clifford and Lawton in the advertising business. Failing health compelled a year's residence in the Southwest. Apparently restored to health, in the year 1908 he entered the house of Marshall Field and Company of Chicago, where he remained until he was compelled again to go to Arizona for his health. It was of no avail, however. In March of 1909 he returned to his family in Syracuse to spend his few remaining days at home, and on June 1 he died. A classmate writes of him: "He was one of my roommates during my senior year, a sunny, cheerful companion, a true friend, whose loss weighs heavy on me. His circle of friends was not large, but his friendship was strong and constant."

After leaving Harvard I went to Princeton, getting an A.B. I found it a delightful place and very different from Harvard. Harvard is a wonderful and thoroughly equipped university with city surroundings; Princeton is an ideal college with country surroundings. I later studied law at the University of Colorado. This school is at the base of the Rockies, amid most attractive scenery, and an ideal place for study. After getting a law degree and negotiating the very stiff bar examination of Colorado, I entered the employ of Potter and Banks, corporation attorneys, Denver. Later I embarked in business on my own account, and in December, 1910, I became a member of the legal department of the local Bell Telephone Company, covering seven western states and one third of the United States. I am unmarried and enjoy life to the utmost (here I knock on wood). I find I am tremendously interested in my work and believe that success will come to any fellow who likes his work, has good habits and takes care of his health. I can see too where a fellow happily married, with income sufficient to be independent of the needs of the flesh, has it on us bachelors. For three years succeeding 1903 I attended the Harvard Law School, and in 1906 received the degree of LL.B. Immediately after graduation from the Law School, I went to work as law clerk for Mr. Daniel Harmon, of Charlottesville, Va. While so employed I received no salary. In January, 1907, I was admitted to the bar of Virginia, and at the same time my employer associated me with him in a partnership under the firm name of Harmon and Walsh. This association continued until Mr. Harmon's death in April, 1912. During my association with Mr. Harmon my practice extended to the Court of Appeals of Virginia, and in two cases to the Supreme Court of the United States. In July, 1912, I formed a partnership with Mr. Milton C. Elliott, lately of Norfolk, Va. This partnership was dissolved by mutual consent on January 1, 1913. Since then I have been practising alone, retaining the firm name of Harmon and Walsh. Member: Red Land Club of Charlottesville, Va., Colonnade Club of the University of Virginia.

I left college in June, 1902. In October of that year I began the study of law in the offices of Willard, Warren and Kropp in Scranton, Pa. As at college so while studying law I was compelled to support myself. During all of this period I did some selling of real estate, made collections turned over to me by the law firm in whose offices I studied, served writs, and picked up a five dollar fee occasionally for appearing in magistrates' courts. In March, 1903, I was appointed secretary of the borough council of Olyphant and manager of the municipal electric light plant, retaining this position for three years. In June, 1905, I passed the examination held by the state board of law examiners for admission to the supreme court of Pennsylvania. I was admitted to the bar of Lackawanna County, Pa., on September 11, 1905, and on the following day I married Miss Catharine Kelly, of Olyphant, Pa. We took a western trip of six thousand miles across the continent, returning in October. I began the practice of law the latter part of that month. My practice has been varied. I have appeared in nearly every kind of criminal case, many equity and common-pleas cases. I have practised in all the state courts, county, superior and supreme. I made my first arguments in the supreme court sitting in Philadelphia in February, 1909. I have also practised in the United States district and circuit courts. In 1907 I appeared before President Roosevelt and Postmaster General Hitchcock in behalf of a Mrs. Evans who had been removed from the postmistresship of Jessup, Pa. I have been solicitor to the borough of Olyphant, to the borough of Throop, to the Winton borough school district, and to the Throop borough school district. In addition to the practice of law I have

After graduating from the Law School, I practised law in Newark, N. J., until October, 1908. Then I accepted an appointment as assistant United States attorney for the southern district of New York, holding that office until October 15, 1912. During the summer and fall of 1910 I spent about three months in Europe on official business, travelling from London to Naples, but spent most of the time in Rome. The summer of 1912 I took a three weeks' walking tour in Switzerland. I resigned my position as assistant United States attorney to become assistant attorney general of Porto Rico, where from a room in the Pink Palace in San Juan I am helping to look after the legal affairs of this part of "our insular possessions." I am living on the edge of the island, with the Atlantic Ocean rolling into my front yard, and a grove of banana trees growing in the back yard. I began carrying my dinner in a bucket for two years in Grass Valley, Cal., and finally graduated from the "bucket brigade" into a real mining engineer in Arizona. Just to show that a Harvard mining engineer could do anything, I ran a railroad for two years (the railroad was very crooked and narrow gauge and short, but it was run remarkably straight). Next a year in commercial business, a successful and growing business, but apparently based on making many people invest in many things that they really did not need. Since marrying, over seven years ago, I have moved into nineteen different houses, and have ten times moved from town to town; this ought to be a class record. At various times and for various corporations and companies I have acted as engineer, president, purchasing agent, secretary, general manager, treasurer, general passenger agent, salesman, accountant, "kingpin" and "goat!" RECORDS OF THE CLASS

I went to New York in the autumn of 1903, and was a reporter on the New York Evening Sun in 1903-1904. Moving to Chicago late in 1904, I was engaged there in publicity work and journalism for several years. I took an active part in the movement for the conservation of natural resources of the country, and also took part in the agitation for postal savings banks. In the autumn of 1909 I moved to Boston. I went to India in January, 1910, as special correspondent of the Boston Transcript and New York Post, remaining in that country six months, studying conditions and writing. Returning to America late in 1910, by way of China and Japan, I engaged in free lance magazine and newspaper work in Boston, and have continued in the same, with some interruptions, up to the present time. I am a particularly enthusiastic member of the Progressive party. I joined the Roosevelt campaign in March, 1912, and was at Chicago headquarters, in charge of publicity for the Middle West, until the Republican convention in June. I accompanied Colonel Roosevelt on several of his trips through the West, the South and Massachusetts. I was active in the organization work of the new party in the West during the summer, and was temporary treasurer at Chicago and a member of the executive committee which organized the Progressive National Convention in August. I entered the campaign in Massachusetts in September, and organized Progressive clubs in most of the colleges in the state. I managed the campaign of the party in Ward 10, Boston, where I live. At present I am chairman of the Ward 10 Progressive committee and a member of the executive committee of the Progressive city committee of Boston. I have been assistant in history at Harvard during the past year in two courses,—History 18 (the Far East in the Nineteenth Century) and History 30 (the expansion of Europe in the Nineteenth Century). I have lectured on Indian art at the Boston Museum of Fine Arts. I have written articles, short stories, etc., for Harper's Monthly, the Forum and other magazines, and have contributed many articles on affairs in the Far East to American newspapers, especially the Boston

Degrees	<i>A.B., 1903.</i>
Business	<i>Dramatist.</i>
Died	<i>Cambridge, Mass., Dec. 28, 1912.</i>

Thornton Marshall Ware died on December 28, 1912, of heart disease, at Cambridge, after a few days' illness. He was born April 27, 1866, at Fitchburg, Mass., the son of Thornton K. Ware, 1842, and Lucy A. A. Marshall. He was deformed physically from birth, and during youth was confined to the house by hip disease and spinal trouble. He was never strong enough to attend school, but studied with private tutors in Fitchburg and later in Cambridge. In 1895 he entered Harvard College as a special student, and with an interruption of one year was a special student in the college until the fall of 1902, when he was admitted in regular standing to the senior class (1903). He took his A.B. degree in 1903, and received honorable mention in English and economics. He won a "Harvard College" scholarship in 1902-1903, and in 1903 was elected a member of the Phi Beta Kappa Society. Aside from his college work Ware's chief interest was in play-writing. He studied under Professor G. P. Baker of Harvard, and during his college course wrote four plays, which were performed by amateur companies in Fitchburg and Cambridge. One of these, "The Revolving Wedge," was published by W. W. Baker and Company, of Boston, in their series of plays, and was performed by numerous companies. After graduation Ware continued his dramatic studies with Professor Baker and became actively interested both as actor and manager in the Cambridge Dramatic Club, of which he was secretary at the time

of his death. He tried active business with his nephew, G. L. Ware (1907), a Boston broker, during 1908-1909, but his health was not strong enough to allow him to continue. He was much interested in philanthropic work, especially in connection with the Unitarian Church and Associated Charities in Cambridge, and was a visitor for the Home Savings Society. He was a loyal and quietly enthusiastic attendant at all class reunions, and his familiar form, as he pluckily "kept up with the procession," will be greatly missed.

A friend of many years writes of him as follows: "Infrequently do we find men, restrained by such great physical handicaps as those of this courageous and fine spirited man, who ask so little consideration on that account. Thirty years of great invalidism would have been for most men sufficient excuse to lead a quiet life, if the opportunity offered. But Mr. Ware, with a passion to know books as well as life, with a passion to live as other men lived, and with a creditable pride that he should not be the first of his line not to receive a degree from Harvard, let no discouragement deter him in his purpose. Although much older in years than most of his classmates, he was living his own repressed youth with them, and the difference in ages was no barrier to fullest comradeship with many of them. His membership in the Phi Beta Kappa was testimony to the excellence of his scholarship achieved under great difficulties, among the chief of which was the necessity of being five hours on his back during each morning or afternoon. He will be chiefly remembered for his loyal devotion to and affection for his friends. With an unusually large number he maintained constant and intimate fellowship. Up to his full capacity he fulfilled the best traditions of his kind."

In the fall of 1903 I entered the dry goods business in Boston with the firm of Brown, Durrell and Company. About January, 1904, I was transferred to their New York office, where I remained until January, 1905, when I resigned and spent nearly a year in travelling through the South and West, partly for pleasure and partly with the hope of entering some business in a new and growing country. I returned to Boston, however, and accepted a position with Mr. E. M. Taylor, of Pasadena, Cal., as private secretary and travelling companion. I went with him through the South and West again, remaining in Pasadena six months. In July, 1906, I returned once more to Boston and entered the engineering department of the American Telephone and Telegraph Company, where I remained five years in connection with their fundamental plan and development work. In October, 1912, I entered the firm of Ayres, Bridges and Company, wool importers, to assist in the management of their foreign office at Tientsin, China.

In January, 1904, I left the Harvard School of Landscape Architecture to go with the Pumpelly-Carnegie expedition to Central Asia. The next year I spent in the Peabody Museum at Cambridge studying archæology. From there I went to New York and worked until the spring of 1906 in the publishing house of Doubleday, Page and Company on the *World's Work* and the *Garden Magazine*. From there I went to Japan to study for the Museum of Fine Arts. Since then I have been on the staff of that museum and visited and lived in Japan five times, once as a Harvard Sheldon fellow, and once at the invitation of the Japanese government to translate the Japanese Temples and their Treasures. During that time I visited the Philippine Islands, China, Korea, and the Luchu group,—making collections in the last two places. In August, 1912, I resigned from the Museum of Fine Arts, my resignation taking effect in November. In January, 1913, I was appointed director of the American School in Pekin, and am to start in June to spend a year and a half in reporting on the monuments and private collections of China with reference to the future work of the school. Until then I shall give Fine Arts 7a in Cambridge. After leaving college I entered the employ of the publishers of a dictionary, and there I have stayed, placidly and unsuccessfully trying to reconcile my tastes with my income. I fancy that want of business success is almost as much of a commonplace among college men as is domestic felicity, so that after all I have no legitimate ground for complaint. Plans for the future? None. But I should like to pass my declining years in a hammock under a palm tree with complete editions of W. J. Locke and Richard Washburn Child within easy reach.

In October, 1903, I accepted an appointment in the Philippine civil service, and arrived in Manila the first day of December. Being assigned to the construction department of the bureau of engineering, the next five and one-half years I spent in the construction of highways in northern Luzon and in the island of Cebu. During this time I passed one very pleasant year (1907) as superintendent of the Berguet road, which leads to the summer capital at Baguio. The next year and a half among the Cebuanos was not so pleasant, but was made all the more pleasant by the leave of absence I began in July of 1909. After two months in China and Manchuria I went over the Transsiberian route to Russia and Germany, returning to the United States in October, 1909. The winter of 1909 brought the "call of the East," and I returned to Manila a second time, arriving in February, 1910. From April, 1910, to July, 1911, I was in Iloilo as engineer on highways and bridges. In July, 1911, I renewed acquaintance with China and Japan, was married in Yokohama to a sweetheart of my college days. In August, 1911, I returned to Manila. In December, 1911, I sailed from

School *High School, Lawrence, Mass.*
Years in College *1899-1900.*
Died *Lawrence, Mass., March 23, 1905.*

John Patrick Whalen was born in Lawrence, Mass., November 11, 1878, and died at the Lawrence General Hospital March 23, 1905, of typhoid fever complicated with acute pneumonic phthisis, after an illness of two months. Whalen was the son of Patrick K. Whalen, a merchant, and Mary (Gillrain) Whalen. Both parents were born in Ireland. Whalen was educated in the Lawrence public schools. He graduated from the Lawrence High School in 1899, and in his senior year won the Valpey prize, a gold medal awarded to the member of the senior class delivering the best original declamation. In the fall of 1899 he entered Harvard College, where he remained one college year. In 1900 he entered and in 1903 graduated from Boston University Law School.

CLASS OF 1903 — THIRD REPORT

After admission to the Massachusetts bar in September, 1903, he opened an office in Lawrence for the practice of law. In the fall of 1904 he was one of the three Democrats elected to represent the seventh Essex district in the Massachusetts House of Representatives. He was assigned to the committees on probate and chancery by Speaker Frothingham. Before he completed his term of service he died. Whalen leaned to the social rather than the scholarly side of life. He was easy of approach, an interesting and ready talker, and was thoroughly at home in any kind of social gathering. He was very frank and outspoken in expressing his opinions. In brief, he would impress one as being an easy-going, good-natured sort of fellow, who still had serious aims in life.

I attended the Harvard Law School during the year 1903-1904. I visited Florida, and cruised down east coast inland waters between St. Augustine and Key West at various times in the winters of 1905, 1906, 1907, 1908 and 1909. In the meantime I bought several run-down farms and woodlots in Groton, and began planting white pine in a small way, and finally set a small apple orchard. I have been interested from graduation in wild life protection, and have been able occasionally to help the cause in a small way. After completing the course in the Law School in June, 1905, I spent about six weeks visiting the principal cities of the Southeast, in search of a promising place to locate. Birmingham, Ala., impressed me most favorably, and therefore in September I packed my trunk, moved here, took the bar examination, procured a license, and rented an office. During the first six months I did manage to earn office rent for one month. At the end of that time I secured work on a salary basis with one of the large law firms, and remained with them about three years. In 1910 one Valentine J. Nesbit, a South Carolinian by birth, graduate of Sewanee and Princeton, and I formed a partnership, under the name of Whitaker and Nesbit, under which we are still practising with steadily increasing success. For the past year, in addition to our general practice, I have done the legal work of the land department of the Tennessee Coal, Iron and Railroad Company, both in and out of court. In 1906 my mother and father moved here to live with me; and then in 1908, as noted on another page, I was fortunate enough to marry the present, and I trust the only, Mrs. Spier Whitaker. Aside

from the birth of a son and a daughter, the death of my father, and a broken leg in 1909, which disabled me for about eight months, nothing unusual has happened. I have had no political yearnings, nor held any "offices of honor or trust," nor written any books or plays. I have so far nothing to boast of except my wife and children nor anything to be ashamed of. Member: Country Club of Birmingham.

Leaving college after midyear, 1903, I spent four months abroad, returning for Commencement. After a summer at home I began work as a clerk in the auditing department of the Chicago, Burlington and Quincy Railway Company at Chicago; after which I became bill clerk, assistant cashier (Burlington, Iowa), assistant travelling auditor (ranging Illinois, Iowa, Missouri and Wisconsin) and clerk in the superintendent's office (Galesburg, Ill.). In February, 1906, I left the Chicago, Burlington and Quincy Railway to become chief clerk of the assistant to the president of the Wabash Railroad Company at Chicago, and in February, 1908, was sent to Pittsburgh and later to Cleveland as chief clerk in the purchasing department of the Wheeling and Lake Erie Railroad Company. In December, 1908, I resigned, and after two months at home in New York came to Kingsville, Texas, as purchasing and supply agent for the St. Louis, Brownsville, and Mexico Railway Company. I was married there in September, 1910, and on May 1, 1911, after the sale of the St. Louis, Brownsville and Mexico Railway, to the 'Frisco System, was made local purchasing agent and stationer of its South Texas and Louisiana lines, with headquarters at Houston, which position I now hold. To sum up, I have lived and worked "all over the map," and while I have the greatest affection for New England am glad that I went out into the West, especially the Southwest. I have found good fortune there and hope that having followed Horace Greeley's advice I may grow big like the country. Member: Houston Club.

After receiving my degree of A.B. in June, 1903, I decided to continue for a year or two the agency at Cambridge for the Waltham Laundry Company, which had earned the greater part of my funds during my four years' course in college. I opened an office on Boylston Street, Cambridge, in June, 1903, and took in an older brother as partner. This partnership continued for two years, and in August, 1905, I tried a new line of business. Our laundry agency business I turned over to my brother, and I opened an office in Boston in the Old South Building, soliciting "naphtha cleansing work" for this newly opened department of the Waltham Laundry Company. I was able to do this work but a few months, for the laundry business established several years before at Cambridge demanded my attention. I opened a new office in Harvard Square, and remained there a year and a half, when I changed my work again and moved my headquarters to the laundry plant in Waltham. This took place in July, 1907. This date was the beginning of my actual experience in the laundry business at the plant. A wider field of activity, new and more complex duties and a large number of people to deal with made my new field very interesting. My principal work for the next two and a half years was the establishment and management of routes for the Waltham Laundry Company in all suburbs of Greater Boston. In November, 1909, the sudden death of the proprietor raised me to manager, which position I have held for three years. One year after the end of my college course I really began to live. No man really does live until he marries the one girl who can make life worth living. We were married in July, 1904, and started house-

keeping in Cambridge in a small flat. In fact so small was the flat that a healthy nine-pound boy, who came to board with us in September, 1905, forced us to take larger quarters without delay. Seven years have gone by, and gone happily, too. Often I meet some of the "boys," whose prospects and circumstances had seemed to me much brighter than my own, but many of them have met great sorrows and have suffered losses hard to bear, while I have thus far been spared. We have lived for the past three years in our own home in Waverley, Mass., enjoying it to the utmost, and although visited from time to time by chicken-pox, whooping-cough, measles, etc., which our seven-year-old hunts up among his schoolmates, we have really no cause to complain. I forgot to mention our garden, for, after all, I'm quite a farmer. For three years we have had a garden to be proud of. I started it, but after my wife discovered that I had set out three rows of onions with the onions bottom side up, she took charge of the garden. With her lusty young son and his grandmother as helpers, our garden has been a great success, in spite of its founder. Member: Massachusetts State Laundrymen's Association.

Immediately after taking my last exam. at college I became secretary and manager of the Ford Auger Bit Company at Holyoke, Mass. Five years later I changed and became treasurer of the C. Elmer Pope Paper Company. In 1910, attracted by water power, the business was moved to Erving,

Mass., and the name of the company changed to Erving Mills. Erving, which was not on the map previously, is now known as the home of a thriving company manufacturing crepe paper, paper napkins, towels and tablecloths. All my friends in the glorious old class of 1903 will be cordially welcomed to this town by Mrs. Whiting and her husband. Although our wedding took place on April second, which is very near to the first, some of my friends assure me that married life will be no joke. It has started off very pleasantly, however, and my wife has always been a Harvard girl, as her brother, David Howie, graduated in 1907. Member: Greenfield Club.

Leaving college shortly after midyear's in my senior year, I spent a month or two at home on the farm in Lanesboro, Mass. Beginning in May, I worked for over two long months for a plumbing and heating concern in Boston. About the middle of July, however, I gave it up and spent the rest of the summer studying architecture and arboriculture at the Harvard Summer School and the Arnold Arboretum. In September I began work for Olmsted Brothers, landscape architects, as a draughtsman and assistant engineer. The following fall (1904) I returned to Harvard and gave a full year (including the summer of 1905) to studying landscape architecture in all, or many, of its

branches. In August, 1905, I began work again for Olmsted Brothers, and have been with them ever since. My work has necessitated considerable travelling, chiefly about New England, New York and Pennsylvania; but aside from this my excursions have been few. Among these few, however, was a four months' trip to Europe in 1911. Member: Harvard Engineering Society, American Society of Landscape Architects, Boston Society of Landscape Architects.

I left Harvard during the latter part of April, 1902, going direct to California, and started in to learn the business of orange growing, on the Spring Valley ranch of the Whitney Estate Company in northern California. I spent the fall of 1902 at Del Monte, Monterey County, Cal., and I left

for southern California about January 1, 1903, to join a surveying party of the Edison Electric Company of Los Angeles. I worked as chainman, rodman and levelman for one year exactly, or until January 1, 1904, on construction of the Lytle Creek power plant of the above company. I then joined the central office, at Los Angeles, of the Edison Electric Company, and remained in their employ for about two years, or until December 1, 1905, when I left for San Francisco. During the two years above mentioned I held the positions of time clerk, collector, solicitor and right of way agent. In the latter position I bought for the company the greater part of its power transmission line from near Bakersfield to Los Angeles, about one hundred and seventeen miles. On April 18, 1906, the day of the great earthquake and fire of San Francisco, I was in Portersville, Tulare County, Cal., looking into the business of orange culture. Hearing news of the disaster, I left for San Francisco by automobile, arriving there three days later, and found the greater portion of the city smouldering ruins. My most vivid impression of San Francisco, immediately after the fire, was the uncanny quiet, only made more impressive by the reëchoing tread of searchers among the ruins. Real estate boomed in the outlying sections of the city, and made this business profitable. I tried my hand at it, with slight success. About January 1, 1907, the Whitney Estate Company started to rebuild, and I took active part in this work, and later, owing to the retirement of my father from business, I became the active manager. I was one of the founders and first directors of the Downtown Improvement Association of San Francisco, also the promoter and secretary of the Geary Street Improvement Association, which installed a new system of lighting in the business district of that city. I am a member of the Portola Festival Committee, which held on October 19 to 22, 1909, inclusive, the most successful festival ever held here. I was chairman of the naval committee, and was instrumental in obtaining battleships of foreign powers as a feature of the Portola Festival. I am a member of the ways and means

Parents	<i>William Scollay, Blanche (Bonesteel) Whitwell.</i>
Years in College	<i>1899-1901, 1902-1903.</i>
Died	<i>Decreed dead by Court, Feb. 26, 1903.</i>

William Scollay Whitwell was born in San Francisco, Cal., November 24, 1881, the oldest son of William Scollay Whitwell, M.D., of Boston, and Blanche Bonesteel Whitwell, of San Francisco. He passed the earlier years of his life at San Mateo, Cal., where his education was looked after by a private tutor. At the age of fourteen he entered St. Mark's School, Southboro, Mass., winning the golden medal on his graduation for distinguished scholarship. He was a prominent oarsman at St. Mark's, and was interested in general athletics. In 1899 Whitwell entered the freshman class of Harvard. In his freshman year his principal interest outside of his work was rowing. He was on the Freshman crew. He also became a member of the Institute of 1770 and the Delta Phi Club, and later of the D.K.E. and the Deutscher Verein.

CLASS OF 1903 — THIRD REPORT

His summer vacation he spent working in a mine out west. In his sophomore year he was substitute on the 'Varsity football eleven. His junior year he spent abroad, studying at Munich. In his senior year he was again a substitute on the 'Varsity football eleven, and won his "H" in the Yale game. He also took up debating actively, and was a member of the Senior Wranglers. Whitwell was actively interested in the Prospect Union, and spent much of his time teaching and assisting the laboring men there. In February, 1903, he disappeared and has never been heard from. One of Whitwell's most marked characteristics all through college was his strong love of humanity, and his very lofty ideals of conduct. His ambition was to lead a life of service for his fellow-men, and he would undoubtedly have carried his ideals into practice if he had lived.

After graduating in June, 1903, I travelled through England, France, Belgium, Switzerland and Germany, a trip of great interest to me as it was my first journey to foreign countries. I returned in September to a position in a banking and brokerage house which had been offered me before I left college. After five months I found that I was not adapted to the business. Early in 1904 I entered the National Shawmut Bank of Boston, where I worked hard as a clerk for over two years. My ambition was aroused by this experience, and after a trip through the West I returned to Boston the first of 1907 to become assistant to

the treasurer and secretary of the R. S. Brine Transportation Company, passing without harm through the big Boston strike of 1907 and the panic of that same year. In the fall of 1910 I went to the Harvard Graduate School of Business Administration, taking courses in transportation, a splendid training, more practical and delightful than my college days, for I appreciated Harvard more. From May until October, 1911, I was again abroad, and travelled extensively through Europe, this time including Austria and Italy, going even to the top of old Mount Vesuvius. Upon returning to the United States I entered the service of the Pennsylvania Company in New York, but as Boston still had its attractions for me I went into the general auditing department of the Boston and Maine Railroad. After completing courses in the George Putnam Grammar and the Roxbury High Schools, I spent a year in Bryant and Stratton's Commercial College. I then entered the employ of the Freeman Wight Company, in the raw fur trade. A gradual awakening to the fact that there remained worlds of knowledge yet unconquered induced me after three or four years of business life to enter Harvard for one year,—all the time I felt I could spare. Returning to the fur trade again, I acted as assistant manager in the business. After my father's death in 1909 I continued in the fur trade until 1912. Since that time I have interested myself in real estate and

mortgages. Having a strong Teutonic instinct, I built nine years ago a bungalow in Millis, in the woods on the banks of the Charles, where I have opportunity to gratify my love of outdoor life and study. My wife and I have also spent much time in Europe and elsewhere, as we are both fond of travel. I look back to my year in Harvard with the most pleasant of memories.

The summer after graduation I dusted off to Germany to master the language. Not meeting with much success, I took up the study of law in the fall, and was lost within the ancient portals and archives for the next three years. After Law School I spent one year with Mr. H. Eugene Bolles, who taught me many things I thought I knew before. The next year, however, I let my ambitions, not then subdued, lead me to start practising for myself in the Tremont Building with four other promising young lawyers like myself, and I am still holding down the place, not having been served with a writ of ejection. But I have had other things to interest me beside law. I had a nomadic disposition and consequently transferred my belongings from apartment to house and house to apartment with unfailing regularity, until I conceived a cure for this mania and builded me a house. I am not convinced, however, that

RECORDS OF THE CLASS

the cure is not worse than the evil; for now I can't move if I want to. Incidentally this last move gave me a greater opportunity for law practice as luck would have it, and lately I have been tormenting the judges of our probate courts with massive problems arising out of inconsiderate estates. I might further say that I have recently drawn up my last will and testament for the sixth time. Member: University Club, Boston City Club, Harvard Club of Boston, Massachusetts Republican Club.

At the end of my junior year in college (1902) I had completed the regular course for my A.B. degree, and so entered the Harvard Law School at the beginning of my senior year, which enabled me to finish there in the spring of 1905. In the fall of that year I went home to Cincinnati and into the law office of Kittridge and Wilby, my uncle's firm, where I prepared for the Ohio state bar examinations and learned the fundamental rules and details of Ohio practice. Most of the work of that law office consisted in defending the damage suits brought against several of the public service corporations, and particularly the street-car cases, because Kittridge and Wilby is one of the firms retained by the Cincinnati Traction Company. That was excellent training for me in the practical side of court work, and it gave me an experience in the preparation and trial of jury cases that does not generally come to the young

lawyer. In December, 1905, I was admitted to practice in the state courts of Ohio, and shortly thereafter, about February, 1906, I was admitted to practice in the federal courts in our United States Circuit Court of Appeals. I went east to attend the Triennial reunion of our class in Cambridge in June, 1906, and in September, my year's training in my uncle's office having been completed, I left Kittridge and Wilby and took up practice with my father, Charles B. Wilby, in the firm that had formerly been Wilby and Wald. Mr. Wald had died while I was in Cambridge, and consequently my father had that place waiting for me. From that time, September 1, 1906, I continued in a general practice of the law with my father until January 1, 1912, when I was appointed one of the assistants in the office of City Solicitor Alfred Bettman. I still occupy the position of assistant solicitor of Cincinnati, and am engaged most of the time in looking after the city's legal work and in trying city cases. My own office is still where it was before, in the Blymyer Building, and I give all the attention I can to my private practice, which seems to be growing as rapidly as can be expected. I attended our sixth reunion in 1909, and hope to be on hand for our Decennial next June.

CLASS OF 1903 — THIRD REPORT

During the winter of 1903-1904 I did not engage in business. In the spring of 1904 I decided to prepare myself to practise patent law. I found that a good way to do this was to obtain an appointment as assistant examiner in the United States Patent Office and study law at the same time. Accordingly I took the civil service examination for this position, and received an appointment in the fall of 1904. The business day in the Patent Office is from 9 A. M. to 4.30 P. M. This gave me an opportunity to attend the evening courses at the George Washington University Law School. There I completed the three years' course and received the degree of LL.B. in the summer of 1907. Immediately thereafter I took the examinations for admission to the District of Columbia bar, and was admitted in June, 1907. The next year I continued as assistant examiner in the Patent Office, and took a graduate course in patent law at the George Washington University, receiving the degree of M.P.L. (Master of Patent Law) in the summer of 1908. In June of this summer I left Washington and became associated with Messrs. Emery, Booth, Janney and Varney, having offices at 50 Congress Street, Boston, Mass., in the practice of patent law. I am still associated with them.

I have entered this business and mean to make it my career, because I think the American theatre and the American drama are both very much in need of fresh ideas and the better ideas that are or ought to be brought to bear upon them by university men. I keep in close touch with the University, particularly with Professor George P. Baker. This coming spring I am to bring Miss Maude Adams to Harvard for two performances, under the auspices of the English Department. The play will be "As You Like It.")

To fully appreciate my career to date, one must be reminded of my academic preparations. A dropped freshman at the end of a year of hard and tedious study, I directed my energies to a choice of courses for revenue only; and, thanks to the elective system under which 1903 flourished, by senior midyear's I was a Bachelor of Arts. Choosing the life-work for which my studies had so preëminently fitted me, I took the first job that offered, which happened to be in a malleable iron foundry, just reorganized with flowery prospects. At about the midyear's of the second year, holding a very important position in the malleable iron industry (about which I understood less than nothing), I experienced my sec-

and dropping sensation when the bottom dropped out of the reorganized company. However, during this year and a half my courses had been anything but elective; at least, I had begun to specialize in one subject, and accordingly obtained a position with another malleable iron foundry. With this organization I have been identified ever since, working into the sales department after about seven years of shop experience in various capacities. In omitting to state any facts relative to offices of honor or trust, let me say that nothing has been omitted from any feeling of modesty. I am sure I have stated everything that can possibly be of interest to the class. Member: Harvard Club of New York City, Harvard Club of Buffalo, Saturn Club of Buffalo.

Upon leaving the university, I entered the "test course" at the General Electric Company's Schenectady works for the purpose of obtaining practical experience to supplement my technical education, and was shortly made sub-foreman, then assistant foreman in the testing department; then later I became commercial engineer with the General Electric Company at Schenectady, and in 1911 was made chief clerk of the General Electric Company of Texas at Dallas. When the business of this company was taken over by the Hobson Electric Company (now the Southwest General Electric Company) I was made assistant sales manager with the jurisdiction the title implies as to sales of General Electric

Degrees	<i>A.B., 1903.</i>
Died	<i>Willows, Cal., Aug. 4, 1903.</i>

Howard Barrett Wilson was born March 4, 1881, at Middletown, Conn. He was the son of Edwin Horace Wilson (Yale, 1865) and of Jane Amelia Bidwell. His father, who was a teacher, moved his school in 1890 from Middletown to Norwalk, Conn., and in 1895 the family moved to Cambridge, Mass. Up to that time Wilson had received instruction in his father's school; but, on moving to Cambridge, he entered the Cambridge Latin School. After remaining there for two years, he left school and tutored with his father for his Harvard examinations. In the fall of 1898 he was admitted to and entered the freshman class at Harvard with the class of 1902. After completing his sophomore year, he accepted an offer to go to Houghton, Mich., as a private tutor, an experience which he enjoyed for the novelty of the country in which he was. Returning to college in the fall of 1901, he joined the Class of 1903, and graduated with it. In the last two years he began to specialize in anthro-

Employed by Harvard University on the Stadium from July 1 to about the middle of November, 1903, as an inspector, I was held responsible for the casting of all seats and the placing of them on the completed structure. From March 7, 1904, to May 1, 1910, I served the Interborough Rapid Transit Company (sub-company Rapid Transit Subway Construction Company), New York City, as an assistant engineer. The work under construction was the subway loop in Battery Park and the East River tunnels of the New York subway. I made inspections of the subway and tunnel work, house inspections both before, during and after the tunnel was constructed, and had charge of the Brooklyn office, where records and other data were kept. During the last two years I have made studies of the tunnel line and grade by which to decide where reconstruction is necessary. Since May 1, 1910, I have been with the J. Edward Ogden Company, 147 Cedar Street, New York City. I do both civil and mechanical engineering. The engineering department of the J. Edward Ogden Company manufactures and erects ferry bridge machinery, transfer tables for street railway

Address	<i>(home) 525 Jefferson Ave., Detroit, Mich. (business) Meldrum and Champlain Sts., Detroit, Mich.; Walkerville, Ontario, Canada.</i>

During 1903-1904 I was in charge of the engineer laboratory of the National Cash Register Company, Dayton, Ohio, with the duty of introducing improved processes and machinery. In 1905 I was made production engineer of the Burroughs Adding Machine Company, Detroit, Mich. I occupied a similar position in 1906-1907 with the Standard Screw Company, Hartford, Conn., Worcester, Mass., Detroit, Mich., Chicago, Ill., and Elyria, Ohio. In 1907 I was made vice-president and general manager of the Schweppe and Wilt Manufacturing Company of Detroit, which position I still hold. Last year I was made consulting production engineer of the Seager Engine Works at Lansing, Mich., and president of the Wilt Twist Drill Company of Canada, Limited, of Walkerville, Ontario. The latter company operates under a Canadian license for manufacturing twist drills on the Wilt drill machine, which produces automatically, from the bar, complete twist drills ready for hardening and straightening. This operation formerly required six different machines and two operations. I have written articles for the Engineering Magazine, New York City. Following my graduation from Harvard College I attended for the next three years the Harvard Law School, and in graduating from that school I entered the law firm of Gaston, Snow and Saltonstall in Boston, where I remained for two years. At the end of that period, although I was not in harmony with the law and wished to abandon it, I decided to give it a further test of three years, and if I liked it no better at the end of that time to enter brokerage. I set up for myself and practised for these three years, but found that I spent more and more time in brokers' offices, so when my lease expired I gave up all further idea of making the law my life work, bought a seat in the Boston Stock Exchange, and have now been a full-fledged broker for over a year, and hope to be for the rest of my days. Died	<i>Worcester, Mass., March 4, 1909.</i>

Charles Clinton Woodside was born February 29, 1876, at Leeds, Megantic County, Province of Quebec. He was the son of Samuel Alexander Woodside, a builder, and of Ellen Wilson. He began his education in Littleton, N. H., where he attended school for a short time only. His family then moved to Worcester, Mass., and he continued his studies at the Worcester Classical High School, being obliged to leave before graduation, however, on account of illness. He graduated from Bishop's College, Lennoxville, Quebec, with the degree of A.B. in 1898. He then attended Becker's Business College for some time, and afterward became book-keeper and accountant for Whittals' Mills. He then went to Harvard College and took the four years' course in three years, graduating in 1903 with the degree of A.B. The following autumn he went as an instructor to the Washington and Jefferson University in Pennsylvania. After one year there, he accepted a position in Smith Academy, St. Louis, Mo., where he remained until his health failed and he was obliged to give up teaching. He then accepted a position with the Skinner Organ Company of Boston, and stayed with them until December, 1908, when he left to attend a course of lectures at Harvard. He passed an examination for a government position at Washington, D. C., a position which he was never able to accept. He died March 4, 1909.

To the Class of 1903:

Dear Fellows:—After leaving Harvard I had some work to perform, but did not let it interfere entirely with pleasure. Immediately after I left college I went to work in Wright and Ditson's factory, of which firm my father is president. I remained in the factory working in the various branches for a year and a half, after which I travelled for the firm, my territory covering the entire United States. Naturally I had a good opportunity to see our country and come in contact with all sorts of people. I was pleasantly surprised quite frequently by coming in contact with many Harvard men, and of course when meeting a 1903 man, no matter in what part of the country, the conversation would begin, "Whom do you think I bumped into last week?" or, "What do you think Bill is doing now?" or, "Remember when we beat Yale, 54 to 0, at football our freshman year, and had the big time at the Columbia Theatre?" At any rate, Victor Mather, Duke Riker and I did. Boston had more police, I think, in those days. After travelling two years I was made vice-president of the concern and given a desk with an attractive stenographer, so that I was at least able to dictate to one person. Being in such a position I found time for lawn tennis (the sport I liked best), and after some strenuous work I was fortunate enough to win the championship of the United States in 1905 in singles, and, in 1904, 1905 and 1906, in doubles with Holeombe Ward, a Harvard man, thus giving us the famous gold bowls. In 1906 I was elected captain of the international team, but

owing to blood poisoning (which cost me a finger) I was unable to compete. In 1908 I was again elected captain of the team, which went to Australia and played at Melbourne. I played my best tennis and won all my matches, but unfortunately we lost. The heat was intense, being over 110° during the matches. We were wonderfully treated, and I must say the people from the "down under" country are great hosts and sportsmen. Although only two of us composed the team, three others went, and with the combination you can imagine the "knocking," especially as we were just receiving in January the football accounts, with Harvard 4, Yale 0. The party consisted of an ex-Yale catcher, an ex-Cornell crew man, a Princeton man, an all-around Harvard man, one who played soccer, cricket, tennis, the piano and got into trouble at the various ports, and myself. We met the American fleet at Colombo, Ceylon, on their way around the world, and as we knew a number of the officers and were going the same way, we stuck together until we reached Monte Carlo, when our return trip tickets were of great assistance. In 1911 I took another trip through the "bush" of New Zealand, and when returning spent some time at Honolulu, where I was given a great time at the attractive University Club. At present I am very well and happy, but still a bachelor so I can have a big time at the Decennial and return without having to pass in a report or itemized account or have the little ones pass remarks. I have written magazine articles on International Lawn Tennis and book on Hints to Beginners (on lawn tennis). Address	<i>(home) 57½ Summit Ave., St. Paul, Minn.</i> <i>(business) Wright, Barrett and Stilwell Co., St. Paul, Minn.</i>

In business I have been connected with the Wright, Barrett and Stilwell Company ever since leaving college. I have held down various jobs, starting in the basement, but at the present time I am credit man and secretary. Outside of business I have been more interested in the Minnesota Boat Club than any other one thing, and have rowed a good many races with the Minnesota crews at the different regattas. I have been away from home very little, having been east only three or four times since leaving college. I was at the first class reunion and also at the meeting of the associated clubs in New York last summer. Member: University Club of St. Paul, Minnesota Boat Club, St. Paul Town and Country Club.

Business	<i>Physician.</i>
Address	<i>130 Centre St., Newton, Mass.</i>

The last year of my college course was spent in the Harvard Medical School, from which I graduated in June, 1906. The following year I was house physician at the House of the Good Samaritan, during part of which time I did some work in the Graduate School of Medicine. In July, 1907, I commenced a sixteen months' service as medical house officer at the Massachusetts General Hospital. The first six months of 1909 were spent as medical house officer in the Children's Hospital, Boston, and the summer months in a similar position on the Boston Floating Hospital. Having been convinced by friends that two could live as cheaply as one, the aforesaid friends, however, offering no figures, I married in the fall of 1909 and began the practice of medicine in Newton, Mass. Newton being well supplied with physicians, but few people noticed there was a new doctor in town, so during the next year I was able to devote much of my time to work with Dr. Richard C. Cabot in collecting material for medical papers and a new book on Differential Diagnosis. In the summer of 1910 I was appointed assistant visiting physician to the Boston Floating Hospital, and the next year a visiting physician, a position I still hold. During the school year of 1910-1911 I was an alumni assistant in clinical medicine, and since then have been a fellow in the pediatric department of the Harvard Medical School. In 1911 I was appointed assistant physician to the children's medical outpatient department of the Massachusetts General Hospital, and in 1912 assistant physician to the Infants Hospital, Boston. August, 1911, was marked by the advent of a son in the family, who, with luck, I figure should make 1932. This about brings things up to date. I am still practising medicine in Newton,—when I am not doing teaching or hospital work in Boston,—and although I am prepared to treat any one who is sick, my efforts are devoted more especially to the diseases of infants and children. Business	<i>Commission merchant.</i>
Address	<i>(home) 383 Independencia Ave., Cárdenas, Cuba. (business) 48 Independencia Ave., Cárdenas, Cuba. (permanent) P. O. Box 165, Cárdenas, Cuba.</i>

I spent the summer following graduation travelling in the United States and in Canada, and in the fall I went to New York, working there for a year in commission-merchant houses. Then I returned to Cuba, and after spending the winter months travelling through the island, I started to work in Havana with the agents of the French line of steamers until 1908. This year I spent mostly in travelling, and in February, 1909, I moved to Cárdenas, where I established myself in the commission-merchant line, and where I am at present residing. Member: Harvard Club of New York City, Club de Cárdenas, Casino Español, Club Náutico Varadero.
